CALIFORNIA FARMER AND JOURNAL OF USEFUL SCIENCES.

VOLUME XXIII. SAN FRANCISCO, CALIFORNIA: FRIDAY MORNING, JANUARY 20, 1865. NUMBER 1.

The California Farmer.

AND JOURNAL OF USEFUL SCIENCES.

PUBLISHED EVERY FRIDAY MORNING.
BY WARREN & CO.

Office—*No.* 320 *Clay street (up stairs), below Battery.*
SAN FRANCISCO.

TERMS OF SUBSCRIPTION.

By mail, for one year, $5; for six months, $3. For a club of five new subscribers, a sixth copy will be sent gratis. When payments are delayed six months $1 additional per year will be charged.

To City subscribers, delivered by carrier, 12½ cents a number or $5 a year in advance.

☞ Advertisements and Subscriptions must be paid for in advance. Payments in Gold or Silver.

JOB-WORK—Of every description, done with promptness, at fair rates orders will be faithfully attended to.

☞ All letters on business connected with the office should be addressed to PUBLISHER CALIFORNIA FARMER,
SAN FRANCISCO, Cal.

Our Plaza.

Orrilla alludes to the "Plaza" and the proposed improvement of it, and makes most excellent suggestions, and it is to be regretted that the Plaza of the metropolis of the most important State in our Union could not be a true representaitve of the natural beautics of that State in its embellishment; but where the work is made a matter of "speculation" and of "dollars and cents," and those who control, design, and plant it, have no more knowledge of *Trees*, Plants and Shrubs, or of Landscape Gardening than a Hottentot of Greek, can we expect to see Art or Design *perfected* in such a work. The whole thing must prove an *abortion*, and, when said to be finished, Nature would shriek with hysterical laugh, and we should not wonder if, in just resentment, she would give us an *earthquake* and uproot the whole abomination.

We should have a "Botanic Garden;" we should have monthly exhibitions. We hope our cultivated women will move in the matter; they sway the world. We have long urged this thing. But the first and most important preliminary will be to *unite the Gardeners and Florists*. They are now so much bound up in self that they will not co-operate; they must first do away with all feeling but generous rivalry and honorable competition. Then we can have Horticultural shows.

We will guarantee that when they shall be ready to act *manfully*, to offer them a *public* Hall, free of expense for such exhibitions, and to secure to them a liberal public patronage—this will be—let Orilla keep his pen in use and speak again.]

New Commercial College.—We are very happy in announcing the opening of a New College, in our city, where the young men of our State can be properly prepared for their appropriate spheres of action in life. One of the greatest calamities that can befall a State is to have the youth and young men wandering about with no purpose of life in view at all, like Micawber, waiting for "something to turn up." The object of this College is, if we understand it, to take young men, sound them, as it were if with an electric rod, sort them out and each where they belong and then train them to their appropriate places.

This Commercial College will open to our young men a place where the Principal will be happy by personal consultation and *individual* instruction to prepare each and all for a life of usefulness.

A Commercial Education does not in this case arbitrarily mean to educate a young man for the Mercantile Business only, it means to fit and prepare him for our *intercourse with the world*, whatever his own particular business may be, and to do that business right. This is a College our State needs above all others, and we hope it will be liberally sustained. We most heartily commend it.

LONDON vs. SAN FRANCISCO.—London, England, has always borne off the palm as the greatest city of the world. Mighty, wealthy, *foggy* London, San Francisco is rapidly striding on for the prize; we can already *beat London* with our *fogs* (did we not this week?) and in thirty years we will excel her in every way.

OUR COLLEGES AND SCHOOLS.—California may well boast that the cause of Education is in the hearts of the People. No State in our Union contributes more, according to its population, than does California. Of this we intend to give positive evidence in our report on this all-important subject.

Let our authorities look to it and [illegible] now in progress shall not result more than the first effort. We feel assured that it will prove so. See "Orrilla's" letter.

DEATH OF MRS. FARNHAM.—The death of this celebrated woman is announced in the New York Post. We shall speak of the influence, character and demise of Mrs. Farnham, in our next.

LEFT OUT.—We have been obliged to leave out several advertisements and much matter intended for this number, in order to publish on Statistical Tables.

Business of California and the Pacific Coast.

We here present to our readers a very important Review of the business of California and the Pacific Coast; we are indebted to the Mercantile Gazette of our city the for statistics which we have taken from that valuable journal. We here note many remarkable facts of a highly interesting nature, showing that the past year (although an unfavorable one on account of the drought), will compare favorably with previous years, in producing all that goes to make up the real wealth of a prosperous and enterprising people.

Financial and Commercial.—The tunnage arrivals from various quarters, during the past three years, have been as follows:

	1862.		1863.		1864.	
From	Ves.	Tuns.	Ves.	Tuns.	Ves.	Tuns.
Atlantic Ports	110	119,926	102	114,953	116	120,064
For. supply Ports	212	100,209	216	96,948	198	103,387
	322	220,135	318	211,901	314	223,451

The following figures exhibit in gross the quarters whence the above arrivals occurred, with the exception of whalers:

From	1861.	1862.	1863.	1864.
Dom. Atlantic Ports	121,342	119,926	114,953	120,064
Dom. Pacific Ports	267,608	261,703	253,017	283,389
Foreign Ports	295,672	250,211	269,909	325,057

The receipts of Merchandise via the Isthmus of Panama, and not included in the foregoing tables of tunnage of supply ports, are as follows for the past five years:

	1860	1861.	1862.	1863.	1864.
Tuns	8,455	11,300	18,101	28,151	31,348

Export Trade—This department of trade during the past year has greatly exceeded expectations. Early in the season the most gloomy forebodings were indulged in consequence of the severe drought. The deficient product of Breadstuffs soon elevated prices beyond the range of export limits, and the withdrawal of this leading item, it was believed would render necessary a large increase of treasure shipments to supply the necessary remittances of our trade. While, however, it is true that more than the usual amount of treasure has been exported, it is also true that the clearances of merchandise and other products of this coast, have been considerably in excess of 1863. The falling off in export of Grain and Flour has been $410,000, while the aggregate increase upon all has been $394,363. This fact furnishes the gratifying evidence that the resources of this coast have now become so varied, and in process of growth and development, so rapid, that serious disaster occurring to so prominent an interest even as agriculture, although it may check, cannot stop the visible progress and expansion of our commerce.

The great deficiency in Breadstuffs has been made up by the increased clearances chiefly of Copper and Silver Ores, Quicksilver, Wool, etc.

An important item in our export trade has been the increased shipments by the P. M. S. S. company's steamers via Panama. The following table shows how this method of transportation has grown in favor in the last two years:

	1864.	1863.	1862	1861.
Value of Exports	$2,139,434	$1,430,036	$571,070	$329,149

The following table shows the value and destination of Treasure shipments from this Port during the past eleven years—1854 to 1864, inclusive:

Years.	Eastern Ports.	England.	Other Ports
1854	$46,533,166	$3,781,080	$1,731,387
1855	38,730,564	5,182,156	1,249,011
1856	39,895,294	8,666,289	2,135,852
1857	35,531,778	9,347,743	4,097,171
1858	35,891,236	9,265,739	2,391,051
1859	40,146,437	3,910,930	3,583,095
1860	35,719,296	2,672,936	3,933,684
1861	32,628,011	4,061,779	3,986,968
1862	26,194,035	12,950,140	3,417,586
1863	10,389,330	28,467,256	7,215,333
1864	12,316,122	34,436,423	8,954,656
Total	$353,975,269	$122,742,471	$42,695,794

Grand total, $519,413,534.

The aggregate value of Exports of all descriptions from the port of San Francisco for the past three years was as follows:

	1862	1863.	1864.
Treasure	$42,561,761	$46,071,920	$55,707,201
Merchandise.	10,565,294	12,877,390	13,271,752
Total	$53,127,065	$58,949,319	$68,978,953

It will be seen by the foregoing figures that our combined exports of treasure and merchandise in 1864 exceeded those of 1863 by more than $10,000,000. From this excess, however, is to be deducted $5,000,000, sent away by the Sub-Treasurer in this city for Government purposes, the same being a portion of the amount realized by the collector of this port from the duties on imports.

Tunnage.—The arrival of tunnage from all quarters, during the past 4 years, has been as follows:

Years.	Vessels.	Tons.	Years.	Vessels.	Tons.
1861	1960	599,233	1863	1893	631,769
1862	1869	634,709	1864	2096	739,190

Coin absorbed in the Interior.—With regard to the amount of Gold Coin in circulation on this coast, it is difficult to ascertain, with any degree of certainty. The following figures may serve to show in some degree the currency movement of the past three years, and perhaps give some idea of the amount of coin in circulation in the hands of the people:

	1862	1863	1864
Coin remitted to Interior,	$12,498,548	$12,916,781	$10,800,920
Coin received from Interior,	5,593,421	6,338,974	5,743,393
Balance added to interior circulation	$6,905,127	$6,532,807	$5,057,527
Total for three years,			$18,495,461

RECAPITULATION.

Yield of Mines.—Receipts of Treasure from the Interior, coined and uncoined, for three years, in the aggregate:

	1862	1863	1864
Interior,	$47,471,378	$50,297,349	$53,513,383
Foreign,	1,904,084	2,156,612	1,715,024
Total,	$49,375,462	$52,453,961	$55,228,407
Exports,	42,561,761	46,071,892	55,707,201
Increase	$ 6,813,701	$ 6,382,041	$* 479,794

*NOTE.—It will be seen in 1864 there was a decrease—more exported than received.

Shipment of Precious and other Ores to New York and Boston, during the year 1864:

Copper, sks	107,017	Ores—	
" bbls	1,043	TO ENGLAND.	
" bxs	54	Silver, sks	6,026

Rosin, cs, (and foreign)	5,767	Wine, pkgs,	16,638

Product of the Precious Metals.—From California and more especially the southern mines, notwithstanding the dryness of the season, the yield shows no abatement. This has been mainly owing to the increased productiveness of the mills, and indicate the growing importance of the quartz interests in this State.

By our usual comparative statement of treasure receipts from all sources during the past three years, it will be seen that the product in gold and silver in 1864 was, in round numbers, nearly $48,000,000, and some $4,000,000 greater than in 1863. If we add 25 per cent. to this for an allowance for arrivals of treasure in private hand, we have $60,000,000 as the possible product of the precious metals on the Pacific coast in 1864. By those who are well informed on this subject, however, this allowance is believed to be much too large, and we doubt if the entire yield has exceeded $55,000,000.

There was coined at the San Francisco Mint during the year 1864, in Gold and Silver, $16,320,186 37.

Quicksilver.—The yield of the New Almaden mine during the year 1864, was 42,820 flasks. We also give the exports, for the past six years, as follows: Total number flasks—

'59	'60	'61	'62	'63	'64
3,399	9,448	35,995	33,747	26,014	36,918

And our exports previously have been—

In 1858, flasks,	24,142	In 1855, flasks,	27,165
In 1857, flasks,	27,262	In 1854, flasks,	20,963
In 1856, flasks,	23,740	In 1853, flasks,	18,800

It will be seen that the exports this year exceed those of any of the previous years noted; with an increase of 10,904 flasks over that of 1863. We quote the price at 55@60c for export, and 65c for local use.

Copper and Coal.—The amount of coal brought to this city from mines on this coast was as follows: From the Nanaomi mines, Vancouver Island, 12,745 tuns; Goose Bay, 300 tuns; Bellingham Bay, 11,485 tuns, and from the mines of Monte Diablo, 13,710 tuns, which have been sold at prices ranging from $7 to $12 per tun, being a reduction of from $3 to $5 on the current prices the preceding year. This coal is of the bituminous variety, and is found to answer all the purposes of a fuel both for domestic uses and the generation of steam. It is consumed largely in and about the city, and is used in all our industrial establishments where steam is employed, as well as upon all steamers navigating coastwise or upon our inland waters. The above mines are well opened, the coal easily accessible, and enough to supply the consumption of the entire coast or any demand likely ever to be made upon them. The condition of the Diablo mines are such now as to be able to produce 170 tuns per day, did the demand require it. The quality continues to improve as the mining operations progress. The results of the last year's mining are perfectly satisfactory to the company. The cargo price of the last year $9 opening, down to $8, which is now the current rate of the day.

With the opening of the year there was a good deal of excitement on the subject of copper and copper mines, a condition that soon subsided however, and there is now not much doing in this line of a fanciful or speculative character. The mines at Copperopolis and several other points in the State are being developed with prudence and a good degree of energy. The amount received at San Francisco during 1864 was 14,300 tuns, valued at $1,094,660, against 5,900 tuns in 1863, valued at $512,000. The amount raised the coming year, it is believed, will be much larger than last. All the ore containing 10 per cent. or more of metal delivered in San Francisco, sells readily for cash.

DOMESTIC PRODUCE.

The year 1864 has been somewhat remarkable in its character. The universal drought prevailing for nearly eighteen months' continuance, having transformed California from the position of a large wheat-growing and grain-exporting State to that of a mere producer for home wants. We have also imported to some extent from Oregon as well as Chile.

During the year past our Grain market has had a steady upward tendency. In the month of February, 1864, owing to the continuance of dry weather, together with the fear that no more rain would fall, Wheat and Barley, as well as Oats, advanced steadily in price. Wheat, even before the early March rains, advanced as high as 3¾c; Barley to 3½c, and Oats to 3½c per lb.

The average prices of Wheat during 1864 were as follows: January, $1 41; February, $1 50; March, $1 92; April, $2 30; May, $2 69; June, $2 68; July, $3 12½; August, $3 45; September, $3 52; October, $3 65; November, $4 10; December, $3 53.

Wines.—California and Native wines have formed an interesting feature of our trade during the past two years, which is constantly augmenting in volume. The shipments to foreign countries, as well as to New York and Boston, have been free, including our Port, Hock and Sherry Wines, and orders in hand are fully equal to the supply ready for export. As to the product of 1864, we remark that the quantity of Grapes produced all through California last year, fell short of expectation, on account of excessive dryness. The quality of Wine produced is, on the average, better than of many previous years. The following are the Imports and Exports for the past two years:

Imports.	1863.	1864.	Exports	1863.	1864.
Hhds	20	572	Pipes & cks.	8 6	4,295
Pipes	21	31	Half casks	92	96
Casks, 60 gal.	5,444	7,191	Qr casks	71	42
Half casks	830	1,737	Barrels	151	147
Qr casks	1,600	2,534	Octaves	128	40
Barrels	72	595	Kegs	60	53
Octaves	432	1,818	Cases	8,994	9,481
Baskets	31,257	46,474	Baskets	2,235	2,114

In 1856 there was planted in this State, 1,540,134 vines; in 1858, 4,054,548 vines. The standing committee of the Legislature of 1862 reports the probable amount of 200,000 vines added since then, admitting that but little had been planted since '58. The wine produced in 1864 throughout the State will not fall far short of 4,000,000 gallons, and Brandy about 200,000 gallons.

California possesses no less than 20,000,000 acres of the very best kind of land for vineyards, the occupation of which for vine-growing and raisin-making will, in course of time, give independence and happiness to many industrious families.

Agricultural Implements.—Imports during the year past were liberal, but, owing to the drought, sales of the fall were greatly restricted, compelling importing dealers to carry over very heavy stocks of Plows and Harvesting Implements. The prospective trade is now promising. During the present winter about 2,000 Plows have already been disposed of, and the indications are flattering that a large business will be done all through the year.

Small Crops.—During the year past our crops of Fruit and Berries suffered like every thing else from the excessive drought. The quantity of all kinds was lessened and the quality alike inferior. Yet the scarcity was the occasion of proportionably higher prices being realized, and this fact of enhanced prices enabled producers to make money out of what seemed to be the reverse. We believe it is an admitted fact that many of our Fruit Growers, Vegetable Producers, if not our Farmers, taken as a body, have really made more money out of short crops and high prices than they would or could have done had crops been large and prices proportionably low as in years preceding. The occasion of this being a much lesser outlay for harvest gathering laborers, coupled with other greatly diminished expenditures. Not forgetting the economy which a fear of scarcity rendered imperative.

Brooms and Broom Corn.—Owing to the scarcity of rain during the previous winter, much less than the usual number of acres were planted to Broom Corn last season, and in many parts of the State the crop proved an entire failure. About 200 acres of land, lying in the bed of the slough at the base of the Marysville Buttes, which was flooded by the early rains of last winter, were planted to Broom Corn, and produced a crop which, for abundant yield and fairness of quality, has never been excelled in the State. The entire crop of 1864 is estimated at 140 tuns, which found a ready market at prices ranging from $120 to $200 ₮ tun. This amount will doubtless supply the demand. The unusually quick sales and high prices of the past two years, and the abundant rains of the present winter, will doubtless insure the raising of a heavy crop next season, and from the best information obtained, it is thought the supply will be greatly in excess of the demand. Common brands of Brooms are jobbing at $6, $5 and $4 ₮ dozen for Nos. 1, 2 and 3, respectively. The "Star Extra" brand are quotable at $7 50, $6 50 and $5 50 ₮ dozen for Nos. 1, 2 and 3.

Dairy Business.—As regards our Dairy product for 1864, it is the opinion of many parties, well versed in the business, that the yield of Butter and Cheese last year was equal to that of the year preceding, notwithstanding the drought, for the reason that those localities most affected thereby were not Dairy producing counties, and those that were, parties in interest lost no time in driving off their best American stock to more favored localities and to good pasturage. So that where a few Butter and Cheese counties suffered, the great bulk of California Dairymen were in good pasturage and have gathered a rich harvest in obtaining high prices for their products all the season and thus have greatly enriched themselves.

OUR BUSINESS DIRECTORY.—We shall always endeavor to have this Directory so well filled with the advertisements of the *Best Houses only*, that all purchasers who visit San Francisco have only to note down in their memorandum book these places, and go directly and buy there, for they may rest assured these are the most preferable houses to trade with.

We ask you as a special favor that you will please say *where* you found their business advertised, and this shall prove to you that they are the *best places*.

SAN FRANCISCO HOTELS.—No city in the world can boast more stately, better conducted, or more luxurious hotels than those of our city. Where can a city show finer hotels than the Lick House, Occidental, Russ, Cosmopolitan, Oriental, International, Brooklyn, Tremont, New England, each and all for the different claims of boarders and travelers to this great emporium. We intend a description of each, and their capacity, in our coming numbers.

MOORE'S SEED STORE HAS NOT REMOVED.—Purchasers of Seed must remember in sending their orders for S. W. Moore's seed, not to mistake and send wrong directions. S. W. Moore, *has not removed to Washington street*. S. W. Moore is at the old stand, California street, and has the largest and best stock on this coast.

CORRECT THE ERROR.—In the second line of the beautiful Song, in the Home Department, "Bless me Father, and let me go," the first word "Lowly" should read *Loudly*. "*Loudly swells the Bugle's note.*"

Letters from an Old Californian at the East

NEW YORK, Dec. 14, 1864.

NUMBER THIRTY-SIX.

Testimonial to Commodore Farragut.

EDITOR CALIFORNIA FARMER:

Republican Rome rewarded her victorious heroes with the most splendid triumphal processions. The great republic of the New World honors her brave sons with swords of useless value and spurs of needless magnificence, but public opinion is at last awakened to the ridiculous nature of such gifts, and public gratitude promises to manifest itself hereafter in a common sense way. New York city, through her representative men, received the Sea King, Farragut, on his return to the great Commercial Metropolis with an enthusiasm which must have been very pleasant to the Naval Hero of this War, and the subscription of a homestead, to be presented to him as a token of the appreciation of his services already amounts to a very handsome sum.

Sherman's Raid.

The greatest excitement has been felt with regard to Sherman's great "raid," and has afforded the bulls and bears of Wall street a chance to make a handsome sum by operating on the alternate hopes and fears of both loyal and disloyal men. It is a great misfortune that men with a capital of, often, only a few *hundred* dollars, can speculate in *hundreds of thousands* of dollars. Loyal men believe that a law could be framed to reach such gambling. Congress, however, no sooner discusses such legislation than the whole tribe of speculators unite in defeating any action by agreeing to buy and sell gold for a ridiculous advance. When Congress drops the matter, *down* goes the premium to a point where the gamblers can speculate. Of course no law can be made that will make gold and paper equal; but it does not seem reasonable that Congress cannot put some check on gambling. The opponents to *all* gold bills reason that gambling does not and cannot injure the finances of the country, that on the contrary its effect is good rather than bad. It is to be hoped that Congress will raise more money by taxes. We all agree that if we can nearly pay our expenses, as we go along, gold will necessarily fall. The people are beginning to see this for themselves and not strangely, when the circumstances are considered, ask to be taxed.

The Weather.

Our cold weather, so long delayed, has commenced, at last, in earnest. What can be more beautiful than a snow storm! It is the most attractive feature that a child sees in nature! We all can recollect with what ecstacy we used to watch the delicate flakes, and the cloud of disappointment when the crystals turned into rain. It is a softened pleasure that we feel now, but it would be a keener one if we could know that the poor would not suffer. I fear in the enjoyment anyway we are too forgetful of the miserable creatures, who with bare feet are living pictures of want. I remark, however, with pleasure, that there are fewer of these pitiable creatures to be seen now than at the same time last winter. Perhaps it is because I am becoming accustomed to the sad sight. If poverty is decreasing crime, is increasing. San Francisco, in its dark days, was not as ruffian-cursed as New York is to-day! San Francisco and New York indeed have changed places. The new Citizens' Association is rapidly becoming a power, and it is to be hoped that they will accomplish their object—by reform. They are threatened with the same obstacles which, so far, have failed of destroying your People's party, and it is to be regretted that here those who are interested in this disorderly state of society are fearfully powerful.

Concerts.

I attended the opening of the new Concert-room "away up town," corner of Broadway and Thirty-Fourth streets, called the Everett rooms. The entertainment was given by Mr. Isaac Solomon, one of the partners of the New York and San Francisco firm of B. L. Solomon & Sons. The exhibition of splendid dresses and costly furs was alone worth seeing. The music was by the Seventh Regiment band. Those who have not been in New York for years, will get a new idea of the size of the metropolis by thinking of the locality.

M. A. S.

OUR ILLUSTRATIONS.—It is our intention to give, in the coming year, some of the finest *Illustrations of California Scenery*, of Inventions, of Works of Art, and all the various Fruits, Flowers, Annuals, etc., that can be procured, and to make this journal one that shall be more and more prized as the Herald of Progress of the Pacific Coast, and we trust that we shall have the voluntary aid of the noble, wise and good, everywhere. This number, by reason of the Table of Products, is without an illustration. We had no space for it.

THE ladies of Paris, not content with dyeing their hair red, now dye their lapdogs to match the color of their dresses. Green dogs, yellow dogs and sky-blue pugs are all the rage. Wealthy parties have sets of lapdogs of all colors. A purple lapdog would be an addition to a fine landscape! What will not fashion do?

DOMESTIC RECIPES.

Apple Bread.—A very light, pleasant bread is made in France of a mixture of apples with flour; in the proportion of one of the former to two of the latter. The usual quantity of yeast is to be employed, and being beat up with the flour with the warm pulp of the apples, after they have been boiled, the sponge may be considred set; place it in a vessel, and let it rise to its utmost for eight or twelve hours, then bake well, in long, low loaves; little or no water is necessary.

Grease Spots.—One ounce of pulverized borax, put into one quart of boiling water, and bottled for use, will be found invaluable for removing grease spots from woolen goods.

To Save the Ladies from Burning Up.—By adding to the starch used in preparing their dresses a table-spoonful of common alum in a powdered state; the alum makes the dress far stiffer, and prevents it bursting into flame when placed in contact with any burning substance.

An Easy Method of Exterminating Rats and Mice.—Mix powdered nux vomica with oatmeal, and lay it in their haunts, observing proper precaution to prevent accidents. Another method is, to mix some oatmeal with a little powdered phosphorous.

To Raise the Nap on Cloth.—When woolens are worn threadbare, as is often the case in the elbows, cuffs, sleeves, etc., of men's coats, the coats must be soaked in cold water for half an hour, then taken out of the water and put on a board, and the threadbare parts of the cloth rubbed with a half-worn hatter's "card," filled with flocks, or with a prickly thistle, until a sufficient nap is raised. When this is done, hang the coat up to dry, and with a hard brush lay the nap the right way. This is the method which is pursued by the dealers in old clothes.

To Clean Articles of Embroidery.—Gold and silver fancy work of this description may be easiest cleaned with a little spirit of wine, either alone or diluted with an equal weight of water. The common practice of using alkaline or acidulous liquors is very injurious, and frequently destroys the beauty of the articles instead of cleaning them.

Toothache.—Use flower of sulphur as a tooth-powder. Rub the teeth and gums with a rather hard tooth-brush, using the sulphur every night; if done after dinner, too, all the better. It preserves the teeth, and does not communicate any smell whatever to the mouth.

Tooth Powder.—Powdered orris-root, half an ounce; powdered charcoal, two ounces; powdered Peruvian bark, one ounce; prepared chalk, half an ounce; oil of bergamot or lavender, twenty drops. These ingredients must be well worked up in a mortar, until thoroughly incorporated. This celebrated tooth-powder possesses three essential virtues, giving an odorous breath, cleansing and purifying the gums, and preserving the enamel, the last rarely found in popular tooth-powders.

To Cure an Offensive Breath.—Cleanse the mouth and teeth freely with powdered charcoal, and particularly after every meal, when unusually offensive. If the teeth be furred, have them immediately scaled, decayed ones stopped or removed, and useless stumps extracted. Take at bed-time, occasionally, a mild dose of jalap and rhubarb, and the following morning a dose of Epsom salts.

Nails Growing into the Flesh.—Cut a notch in the middle of the nail every time the nail is pared. The disposition to close the notch draws the nail up from the sides,

A Professor amongst the Farmers.

At the dinner of the Trent plowing match (says the Mark Lane, England, Express), Prof. Buckman said he recollected once, when he went into Wales to attend a scientific meeting, he heard a man in the streets of Swansea ask an acquaintance, "What are all these professors?" "Well, indeed," replied his friend, "I don't know; but I think they are men who preach and profess a great deal more than they do." It seemed to him very likely that the name of Professor had somewhat turned their heads, for they had made a tremendous noise about it. Now, he had not come there to teach them anything: he did not profess to do so, for he had himself a great deal to learn. As regarded farming, everyone knew that there was always something fresh to learn—some fresh plants, some fresh method of feeding, some new varieties of vegetables and animals—which often put one to great inconvenience for want of knowledge of them. For instance, there was a grub come amongst them, which was almost eating them out of their farms, which they knew nothing about; they did not know what sort of a creature it was, or what were its parents; they were only aware it was some kind of moth, which they could not tell how to get rid of. It might be a grub, which they would hear of some day, and which the rooks, which they did not generally consider did them any good, would prey upon. As far as he was concerned he was as perfectly in the dark as any one: everyone had been complaining about them, and he took the other day from three rows of turnips eight hundred and twenty-four (surprise). He was quite sure, unless they did look into matters, they would not know how to cope with them; and that would remind him to impress upon them that the more they knew about the habits and nature of plants or animals, the more capable they would be of doing that which is right and proper connected with them. There are men whom they called gentlemen-farmers; he would have no such distinction; he wanted all farmers to be gentlemen. If a man went hunting three or four times a week, and did not take care of his farm, he could not expect it to take care of him. Knowledge was not mischievous. It could not be so if properly applied and directed; but men could not afford to live independent before they had gained their independence; he must keep his accounts regular, accounting for every penny, if he wishes to be a successful farmer, which he never would be unless he could show that his books balanced at the end of the year. He thought he himself would have been able to have made out a tolerable balance-sheet this year if barley had been 40s. instead of 30s. a quarter, or if wheat had been somewhere about 8s. per bushel; but they were unable now to get as much for their corn as they used to; and he thought it would, one of these days, become an important problem with farmers how they were to get on. For his part he could not see how they were to get on, with the increasing rate of labor and decreasing prices of corn. There was a time when a farmer sent his son to a day-school, and if he learnt the three R's he was supposed to have had a good education; but that would not do now-a-days, and farmers wanted more money, and they would be bound to have it. Something must give way. He did not think it would be the farmers who would go back. He hoped they never would, and he hoped to see the time when the increasing intelligence of the farmers would become more and more respected.

A lady, who could not conceal even from herself the plainness of her face, boasted that her back was perfect. "That is the reason, I suppose, that your friends are always glad to see it," said one of her listeners.

Poultry Keeping.

This is the season of the year to start a poultry establishment, for it is easy to buy in a breeding stock at a reasonable rate, whereas by waiting till Spring, or any other intermediate time, prime and good bred birds, the same as common ones of every variety, become gradually and proportionably dearer, and have been picked over so that only inferior fowls remain. Besides by organizing now and perfecting every arrangement for the ensuing year, the whole of the different breeds settle down, and feeling at home will commence to lay early, and the young broods can be produced so soon after the new year begins, that if intended for sale as food, they will command the highest price as the first spring chickens, and turkeys, geese and ducks will all fetch much more money by being brought into condition for market before the common farming community have theirs half ready. If ornamental and rare sorts are bought to be kept for the sake of raising to sell at high prices to improve other people's poultry, or of being exhibited for premiums, and being sold to the gentry as fancy fowls, then it is best to lay in a stock now, to make sure of purchasing the very finest specimens bred by the most noted exhibitors, and other owners of really valuable poultry. Early maturity in any kind of live stock is a very essential desideratum, especially when meat-producing quality is the main object in view, for quick returns tell more in agricultural pursuits than in commercial speculations, inasmuch as animals often eat more than, their worth, through lying so long on hand, which is an additional loss to that sustained by the interest of money on the dead stock in merchandise.

Turkeys should not roost with the other fowls, nor should geese lie in the same place as ducks, and in each apartment there ought to be some nice private nests attached in such a way as to make it certain they will not be approached by the females for any purpose but to lay, so that they may be always sweet and clean, and for any poultry raiser to be thoroughly successful, he must give his young every chance to flourish unmolested by the bulk of old ones, which can be done by having plenty of range, a separate place for them to roost in, and their food given them away from the resort of the old ones. Don't expect to excel in the poultry line, or even get a return for food consumed, unless there is fresh air, room in proportion to the number kept, and attention paid to matters mentioned. Of all places particularly favorable for poultry, nothing equals a very large farm, or other homestead, where great numbers of horses and other animals are kept; there they will flourish with less food and attention than elsewhere, excepting that there is a little more trouble in hunting after the eggs, for often hens will there choose to make their own nests.—[J. B., in the Country Gentleman.

Chinese Dwarf Trees.

We have all known from childhood how the Chinese cramp their women's feet, and so manage to make them "keepers at home," but how they contrive to grow miniature pines and oaks in flower-pots for half a century, has always been much of a secret. They aim first and last at the seat of vigorous growth, endeavoring to weaken it as far as may consist with the preservation of life. They begin at the beginning. Taking a young plant (say a seedling or cutting of a cedar), when only two or three inches high, they cut off its tap-root as soon as it has other rootlets enough to live upon, and replant it in a shallow earthern pot or pan, so as to cramp the growth. The end of the tap-root is generally made to rest on the bottom of the pan, or on a flat stone within it. Alluvial clay is then put into the pot, much of it in bits the size of beans, and just enough in kind and quantity to furnish a scanty nourishment to the plant. Water enough is given to keep it in growth, but not enough to excite a vigorous habit. So, likewise, in the application of light and heat. As the Chinese pride themselves on the shape of their miniature trees, they use strings, wires and pegs, and various other mechanical contrivances to promote the symmetry of habit, or to fashion their pets into odd fancy figures. Thus by the use of very shallow pots the growth of the tap-root is out of the question; by the use of poor soil and little of it, and little water, any strong growth is prevented. Then, too, the top and side roots being within easy reach of the gardener, are shortened by his pruning-knife or seared with his hot iron. So the little tree, finding itself headed on every side, gives up the idea of strong growth, asking only for life, and just growth enough to live and look well. Accordingly, each new set of leaves becomes more stunted, the buds and rootlets are diminished in proportion, and at length a balance is established between every part of the tree, making it a dwarf in all respects. In some kinds of trees this end is reached in three or four years; in others ten or fifteen years are necessary. Such is fancy horticulture among the Celestials.—[The Technologist.

To Bring a Person Down Upon a Feather.—This a practical pun; You desire any one to stand on a chair or table, and you will tell him that, notwithstanding his weight, you will bring him down upon a feather. You then leave the room, and procuring a feather from a feather-bed, you give it to him, and tell him that you have performed your promise—that you engaged to bring him *down* upon a feather, and, if he looks, he'll find *down* upon it.

An exchange says that if every man's breast could be looked into, there would you find the image of some woman. If you look into the bosoms of the ladies you find a daguerreotype of Charley, a portmonnie, a paper of needles, and two or three billet-doux.

A politician was boasting, in a public speech, that he could bring an argument to a p'int as quick as any other man. "You can bring a quart to a pint a good deal quicker," replied an acquaintance.

An old woman, who lived in Lierikee, Poland, in a state of great poverty, was found to have left about 2,000,000 guilders in buried gold, silver and paper money.

It is stated that a lady has discovered a remedy for stuttering. It is simply the act of reading in a whisper, and gradually augmenting the whisper to a louder tone.

For the new Treasury building in Washington, last week a piece of granite, weighing 29 tuns, was drawn up Pennsylvania avenue, intended for a single column. It took 14 oxen to pull the load.

Oakland Seminary for Young Ladies.

Mr. G. M. Blake.....Principal.
Mrs. I. G. Huggins.....Associate Principal.

THE SEVENTH YEAR OF THIS INSTITUTION WILL commence on

MONDAY, JANUARY 9th, 1865.

For Catalogues and other particulars apply to the Principal, corner of Eleventh and Washington streets, Oakland. Catalogues can also be obtained at the Book Stores on Montgomery street, San Francisco. 23tf

California Grass Seeds.

EVERY VARIETY OF NATIVE GRASSES, the seed of which can be saved, will find a ready purchaser for the seed, on application a the Farmer Office.

EDUCATIONAL.

Santa Clara College.

THE FOURTEENTH ANNUAL SESSION OF THIS INstitution will commence on MONDAY, August 29th. The plan of instruction embraces two regular courses—the Classical and the Commercial, besides a preparatory Department

TERMS:

Entrance, or Matriculation Fee, $15, payable only once.	
Board and Lodging, including Fuel and Light, the use of the Swimming Pond and Gymnasium per week	$4 75
Tuition in all Branches—Modern Languages excepted—per week	1 75
Washing and mending of articles washed, per week	1 00
Stationery: Paper, Ink, and Pens, per week	25
Medical attendance and Medicines (unless Parents wish to incur the risk of paying the full bill) per week	25
Total per week	$8 00
Total per session of forty-four weeks	$350
For the use of Instruments in Natural Philosophy, and of Chemicals, per month	$2 00
Modern Languages, viz: Spanish, French, German, Italian, per month, each	5 00
Piano, with the use of Instrument, per month	8 00
Flute, Clarionet, or Brass Instruments, each per month	5 00
Violin	8 00
Vocal Music, per month	2 00
Drawing of any kind, per month	6 00
Vacations, if spent in the College	35 00

School Books are furnished at Store Prices.

GRADUATION FEES.

For each Academical Degree	$10 00
Commercial Diploma	5 00

N. B.—In cases where there are more than two brothers each additional one pays only $200 per session.

For further information apply to the President of Santa Clara College, Santa Clara, Cal., or to Rev. A. Maraschi, S. J., St. Ignatius Church, Market street, between Fourth and Fifth, San Francisco. 3

Miss Lammond,

LATE PRINCIPAL OF

BENICIA SEMINARY,

HAS THE PLEASURE TO ANNOUNCE THAT she has purchased the Seminary for Young Ladies known as the

CALIFORNIA COLLEGIATE INSTITUTE,

formerly under the control of Mrs. M. B. SWEDENSTIERNA, and has removed there with her entire corps of

Superior Teachers and Professors.

The New Term Commences

January 4th, 1865.

The location of this Institution (on the suburbs o the city) commands at once for its boarding pupils, the retirement of a country life, with the advantages of the finest professional talent from the city.

As Miss Lammond desires to make this a permanent Institution, no efforts will be spared to make it worthy of the patronage which has been so liberally extended to her during the past four years.

For further particulars, Catalogues may be obtained by addressing Miss Lammond, Principal of Benicia Seminary, until October 14th, after which communications must be sent to the Collegiate Institute, Corner Silver and Third streets, San Francisco.

M. LAMMOND,
10 Principal.

Academy of Notre Dame,

SAN JOSE, CAL.

THE FOURTEENTH ANNUAL SESSION of this Institution will commence on TUESDAY, AUGUST 23d. The course of instruction embraces all the branches of a polite and useful education. Its aim is to form young ladies to virtue, accustom them to early habits of order and economy, and to cultivate in them those qualities which render virtue both amiable and attractive.

TERMS:

Entrance, to be paid but once,	$15
Board and Tuition, per session,	$250
Washing, per session,	$50
Physician's Fees (unless it be preferred to pay the bill in case of sickness) per session,	$10

Piano, Vocal Music, Drawing, and Painting,

Form extra Charges, but there is no extra charge for the

French, Spanish, or German Languages; nor for Plain Sewing and Fancy Needle-Work.

PAYMENTS are required to be made half a Session in advance Pupils will find it much to their advantage to be present at the opening of the Session. 2

Saint Catherine's Academy,

BENICIA, CALIFORNIA.

THE SCHOLASTIC YEAR OF THE SAINT CATHERINE'S ACADEMY, Benicia, commences the

Last Monday in August.

Terms, per annum, $250—payable, semi-annually in advance.

Music, Painting, and Drawing form Extra Charges; also, Books, Stationery, and Physician's Fees.

No deduction will be made to any pupil leaving the Academy before the expiration of the term—cases of sickness excepted.

Foreign Languages, Plain and Fancy Needle-work, form no Extra Charge.

For further particulars, eler to the Superioress of the Academy. 4

Sacramento Seminary,

Boarding School for Young Ladies.

Tenth street, between F and G, SACRAMENTO.

The next Session will commence

January 2d, 1865.

For Circulars containing particulars, address
23 MR. or MRS. HARMON PERRY.

Benicia Law School.

THE FOURTH SESSION OF THE BENICIA LAW SCHOOL will commence on the

FIFTH DAY OF JANUARY, 1865.

And continue twenty-one weeks. A New Class will be formed at the commencement of the Term.

It is the design of the School, by a systematic and thorough course of instruction, to afford advantages for the Study of the Law which cannot be obtained by the usual method of reading in an office.

For Circular containing full information address
J. E. ABBOTT, Benicia,
22 C. J. FLATT, for the Trustees.

EDUCATIONAL.

NAPA

COLLEGIATE INSTITUTE.

For Young Ladies and Gentlemen.

NAPA CITY, CALIFORNIA.

NAPA CITY, IN POINT OF LOCATION AND Climate, is unsurpassed in the State. It is about four hours' ride by steamboat from San Francisco, and three by stage from Benica. There will soon be a daily boat from the former place, and there are now two daily stages from the latter. There are extensive accommodations for Boarders in the College Building, with large and well-ventilated sleeping apartments. Teachers reside in the Building, and will have a constant oversight of the Students who are Boarders.

GOVERNMENT.

Young Ladies will receive no calls from any except Parents and Guardians. Ladies and Misses will not leave the College grounds, except in company with their Instructors. Young Men and Lads are not allowed to lounge about the Stores, Hotels, and Saloons of the village. All pupils are required to attend Church on the Sabbath. Parents will choose the place of worship for their children.

MILITARY DEPARTMENT.

This Department has been opened with a view to the permanent establishment of a Milittry Academy on this Coast. From three to four years will be requisite to complete the course in this Department. The State has furnished us the necessary equipments for such a school. The Drills will be attended to daily.

TUITION.

Spelling and Reading, per month	$2 50
Common English, with the above, per month	4 00
Higher English, with the above, per month	6 00
Latin and Greek, with the above, per month	8 00
Janitor's Fees, per month	25

EXTRAS.

Modern Languages, each, per month	$2 00
Music, with Piano, per month	8 00
Embroidery, per month	3 00
Painting in Oil and Water Colors, per month	4 00
Board with Furnished Rooms, per week	5 00
Board with Furnished Rooms, Light, Fuel, and Washing, per week	6 50
Military Branches, per month	3 00
Sword Exercises, twelve lessons	8 00

CALENDER.

The Collegiate year is divided into two Sessions of 21 weeks each. The first Session will begin July 25 and end December 16. The second Session will begin January 2 and end May 23. The Winter vacation will be two, and the Summer vacation eight weeks long.

☞All articles of clothing should be plainly marked. Pupils will furnish their own Sheets, Pillow-cases, Towels, Napkins, and Lamps.

☞Payments, half-yearly in advance. Pupils can enter at any time, and be charged from the time of entering. No deduction will be made for absence, except in cases of protracted illness. The month consist of four weeks each.

For further particulars address

W. S. Turner, A. M.,
21-11 Principal.

St. Ignatius College.

(INCORPORATED APRIL 30th, 1859.)

The Fifth Annual Session of this Institution will Commence on August 22d.

THE DESIGN of the Institution is to give a thorough English, Classical, Mathematical, and Philosophical Education.

The Course of Studies Embraces

THE GREEK, LATIN, AND ENGLISH LANGUAGES,

POETRY, RHETORIC,
ELOCUTION, HISTORY,
GEOGRAPHY, ARITHMETIC,
BOOK-KEEPING, MATHEMATICS.

Mental, Moral, and Natural Philosophy.

The study of MODERN LANGUAGES is optional. Besides the Classical there is a preparatory Department for the Younger Students.

TERMS PER MONTH.

Tuition in the Grammar Dep't.	$5 00
" " Higher Dep't.	8 00
" Preparatory Dept't.	3 00

No1.

COLLEGIATE INSTITUTE,

Benicia.

FOR MALES ONLY.

THE NEXT SESSION OF THE INSTITUTE

WILL OPEN ON THE

Fifth of January, 1865.

THIS INSTITUTION HAS BEEN IN SUCCESSful operation ten years. Its facilities for Instruction and for the comfort of pupils are ample and good. The Instruction is divided into three parts—the Elementary Course, the Preparatory Collegiate Course, and the English or Scientific Course. Especial attention is invited to the latter Course, as being peculiarly suited to those who wish to obtain a liberal education, fitting them for almost any business in life, and yet want either time or inclination to pursue the dead languages. Persons wishing full particulars will receive a circular by applying to the Principal. Reference is made to our patrons, in every portion of the State.

Terms, Payable Three Months in Advance.

Pupils under Fourteen, Board and Tuition a month	$30 00
Pupils over Fourteen, Board and Tuition, per month	32 50
Washing, per month	2 50

No extra charge is made for Bookkeeping, nor for the Modern or Ancient Languages. No charge is made for Bedding, Rooms, or Lights. No entrance Fee is charged.
22 C. J. FLATT, Principal.

California Collegiate Institute

For Young Ladies,

No. 64 Silver Street,

SAN FRANCISCO.

THE NEXT TERM OF THIS INSTITUTE WILL COMmence on WEDNESDAY, January 4th.

As the class of Boarding pupils is nearly filled, those desiring admission will find it necessary to apply early.

For further particulars, Catalogues may be obtained by calling upon or addressing
23tf MISS M. LAMMOND, Principal.

SEEDS,

NO. 414 CALIFORNIA STREET,

Old Number 110,

Between Sansome and Montgomery streets,

SAN FRANCISCO, CAL.

THE UNDERSIGNED HAS ESTABLISHED SUCH a correspondence and business in Europe as to enable him to secure from the very best source—the most skilful growers—their choicest seeds grown, of which he will always be in receipt, and in endless variety, imported directly from France and England, from well known and responsible houses; some of the most prominent are named in our catalogues.

It has been the experience of our best gardeners and growers, and all others who plant seed, that seeds raised in California are not fully reliable and cannot be for a series of year, until more capital, experience and scientific knowledge shall be given to the business.

HAS FOR SALE

Alfalfa or Chile Clover; Hungarian Grass;
Kentucky Blue-grass; Orchard Grass;
Red-top Grass; Sainfoin Grass;
English Rye-grass, Timothy Grass;
Red Clover; White Dutch Clover;
Crimson Clover, Lucerne, &c. &c. &c.

With many entire new varieties of Grass Seeds and prepared Lawn Grasses never before offered.

EVERY VARIETY OF

BEET, CABBAGE, CARROT, RADISH, TURNIP, CUCUMBER, MELONS, LETTUCE, ONIONS, TOMATO, EARLY AND LATE PEAS, BEANS, &c., &c., &c!

Tobacco Seed.

HAVANA, VIRGINIA, CONNECTICUT SEED LEAF, AND MARYLAND TOBACCO SEED.

COTTON SEED.

Guano from Johnston's Island.

FLOWER SEEDS (300 Varieties

BULBS:

LILIES,	TULIPS,	HYACINTHS,
Amaryllis,	Anemones,	Ranunculus,
Narcissus,	Tuberoses,	Peony-roots.
	Gladiolus,	Iris,

and in endless variety, imported direct from France and Germany.

From his long experience in the Seed Business (over thirteen years), and his very extensive stock of goods appertaining to an establishment of this kind, he is confident of his ability to satisfy his patrons.

Native California Evergreen

TREE AND SHRUB SEEDS

For Exportation.

THE UNDERSIGNED, FROM HIS EXTENSIVE facilities and

Large Stock of Every Variety of Seeds

Can offer unusual inducements to

MERCHANTS IN THE TRADE, FARMERS AND LARGE RANCH OWNERS,

Who wish to be supplied in his line.

And would recommend that Orders for Seed be sent DIRECT to the undersigned, through the Express, by Mail, otherwise parties run GREAT RISK of being imposed upon, in case their Orders should be filled by some Irresponsible Establishment.

☞ The Agents of Wells, Fargo & Co.'s Express are hereby authorized to act as Agents for the undersigned in taking Orders for Seeds and receipting for the same.

The undersigned is also permitted to refer to C. Warren, editor of California Farmer, who has had long experience of twenty years in the Seed and Nursery business, and is conversant with the high value of imported seeds, and their superiority to all other seeds.

☞ Send for a Catalogue.

A Glorious Record.

During the last two years—a period of war—during which our enemies here and in Europe confidently predicted our national ruin, a most wonderful liberality has been developed toward our institutions of learning. The following are some of the marvelous figures:

Bowdoin College, Maine, has received $72,000, of which $50,000 were in one donation.

Dartmouth College, N. H., has received $47,000.

Middlebury College, Vt., has received $10,000 from a legacy.

Williams College has received $25,000 in one donation.

Amherst College has received more than $100,000 in sums of $60,000, $30,000 and $20,000 each.

Harvard has received a bequest of $44,000.

Andover Theological Seminary has received $50,000, of which $30,000 were from one firm.

Trinity College, Hartford, Ct., has received nearly $100,000.

Yale College has received (including $135,000 from the U. S. Government for its Agricultural school) the magnificent sum of $450,000! to which perhaps $100,000 will probably soon be added. The report states that of the portion already paid, the following sums have been given by individuals in single donations, viz: $85,000, $50,000, $30,000, $27,000, $25,000, $20,000, $12,000.

New York University has received $60,000.

Hamilton College over $100,000.

Rutgers College, N. J., has received $100,000.

Princeton College, N. J., $130,000, of which $30,000 is in a single donation.

Washington University, St. Louis, $50,000 in two donations of $25,000 each—one from New York, the other from Boston.

Chicago Theological Seminary has received $80,000.

Protestant College, in Syria, $103,000 from American Christians.

Take notice, Englishmen! who have been predicting that, without your gracious aid, our war with slavery would bring upon us desolation, poverty, famine and rags; take notice, gentlemen of the "chivalry!" who declare that the Yankee loves nothing but his dollar, and is incapable of the generosity of men who steal their living from "niggers;" take notice, all faint-hearted, faithless people, who have been sighing and groaning through all these years of this glorious war for right and freedom; take notice that, in the third year of this "exhausting" war, no less than one million and six hundred thousand dollars (and the real truth would put it nearer *two millions*) have been cheerfully and almost spontaneously given, not to Sanitary and Christian Commissions, or to any object which might seem immediately pressing, but to *colleges*—to *learning*—to the laying of foundations for future generations. Where will such a fact find its parallel in history?—[New York Independent.

Financial.

The Controller on the National Banks.—Controller McCulloch reports the organization of 182 new banks, and the conversion of 168 State banks, since his last report. There are now in existence 584 in all, having an aggregate paid-in capital of $108,964,547; a circulation of $65,864,650; and an aggregate of bonds deposited, $81,961,450.

Most of the Controller's Report is devoted to not very pointed discussions of the principle and effect of the new system. He regrets the organization of so many new banks in States where there are already an abundance of banking capital, but charges this upon the slowness of some Legislatures to authorize the conversion of State banks; declares it the intention of the new system rather to check than swell the volume of paper currency; felicitates himself upon the recent authorization given by the Pennsylvania Legislature to conversion in that State; and considers "that a national bank-note currency will be one of the compensations for the heavy debt which has been incurred." He is gratified that the change is effected with so little disturbance, and, in answering his own question why government should not drive out all bank-notes, only states what everybody knows, that "governments should not be bankers." He argues, however, that to fix the maximum of bank circulation, and secure the solvency of notes by putting its own seal upon them and guaranteeing their redemption, is one of the proper offices of government. The justice of this view is unquestionable; and, indeed, in doing this government but does upon a larger scale what has long been done by New York in reference to the issues of banks within the State.—[Economist.

Internal Revenue.—The Commissioner of Internal Revenue reports that in May, 1863, the receipts of internal revenue were $4,903,695. They have grown every month since; in December, 1863, $9,034,366 were received; in March, 1864, $10,955,111; in June, $14,094,366; in September, 1864, $15,819,770. The three per cent. income tax has produced over $23,500,000; the five per cent. special income tax will produce not less than $35,000,000.

The Commissioner asserts that the aggregate internal revenue for the year ending June 30, 1865, will amount to $265,000,0000. The product for the present year falling $35,000,000 short of the $300,000,000 demanded by the Secretary's arrangement, the Commissioner recommends a tax on sales, not as a permanent arrangement, but as a temporary expedient. Figures from various authorities are supported by an extended argument, the conclusion of which is that the amount of sales and merchandise and products in a year will be about eleven thousand millions—$11,000,000,000—on which a tax of one-half of one per cent. will produce $55,000,000.—[Economist.

Gold in Richmond is at a premium of 4,000 per cent., or $40 in Confederate paper for $1 in gold. It has gone up 1,600 per cent. since Lincoln's re-election.—[Hartford Christian Secretary.

What Charley Did.

Turning into a certain street I saw a company of boys playing very earnestly, and evidently enjoying themselves finely. One I noticed in particular, who seemed to be the leader of their sports, and just as I came up he was proposing a new game, and giving instructions in regard to it. His whole heart seemed to be in the thing.

At this moment a window was thrown open in the house I was passing, and a sweet, gentle voice called:

"Charley, your father wants you."

The window was at once closed, and that mother, as we took her to be, immediately withdrew, without even stopping to see if Charley heard.

The boy was so busy that I doubted if that quiet voice would reach his ear. But it seemed that she knew better than I. The words hardly escaped her lips, when everything was dropped, the boys left at play, and Charley within doors, where, of course, I could not follow him.

"A fine fellow, that," thought I; "he will make his mark in the world; I should not wonder if he was President some day. If a man would govern others he must learn to obey, and surely Charley has learned to obey."

Yes, boys, that is the way. Prompt, cheerful obedience is what you are to render to parents and teachers. Do not wait to be spoken to the second time, but drop all and run at the first call.

We Never Drink.—A correspondent of the Bangor Whig narrates the following incident, which recently came under his observation:

On the stage were seven or eight soldiers from the Eighth Maine Regiment—civil, well-behaved, intelligent men, as was apparent from their conversation. While at the stage house in Lincoln, there came into the office a poor old blind man—stone blind—slowly feeling his way with his cane. He approached the soldiers, and said in gentle tones, "Boys, I hear you belong to the Eighth Regiment; I have a son in that regiment." "What is his name?" "John ——." "Oh, yes, we know him well. He was a sergeant in our company; we always liked him. He is now a lieutenant in a colored regiment, and a prisoner at Charleston."

For a moment the old man ventured not a reply; but at last slowly and sadly he said: "I feared as much. I have not heard from him for a very long time."

Without waiting for another word these soldiers took from their wallets a sum of money, amounting to twenty dollars, and offered it to the old man, saying at the same time: "If our company was here we would give a hundred dollars."

The old man replied: "Boys, you must put it in my wallet for me, for I am blind."

But mark what followed. Another individual in the room who had looked on this scene as I had, with feelings of pride in our citizen soldiers, advanced and said: "Boys, this is a handsome thing, and I want you to drink with me. I stand treat for the company." I waited with interest for the reply. It came—"No, sir, we thank you kindly. We appreciate your offer, but we never drink!" The scene was perfect—the first act was noble and generous; the last was grand.

Dancing Bread.—To make a loaf dance while it is baking in the oven, put in the dough a nutshell filled with live sulphur, saltpeter, and quicksilver, and stopped close; as soon as the heat comes to it, the bread will dance in the oven, which is occasioned by the nature of the quicksilver, for it can bear no heat without being in a continual motion. Thus, by the means of quicksilver put into a pot where peas are to be boiled, all the peas will leap out of the pot as soon as the water begins to heat. In like manner, quicksilver put into bread will make it dance up and down the table.

Pack your cares in as small a space as you can, so that you can carry them yourself and not let them annoy others.

HOTELS.

REVERE HOUSE.

Second Street, Opposite the Court House,
Napa City,
GOODRICH & DEMMITT, Proprietors.

The Undersigned, having taken the above named well-known Hotel, and fitted the same up in superior style, would respectfully announce to the public that they are prepared to furnish excellent accommodations to permanent and transient guests.

The house is built in modern style, and the rooms are large, airy and pleasant. Families can be accommodated with elegant suits of rooms at reasonable rates.

The Table and Bar will be provided with all the substantials and luxuries to be procured in this market.

The location of the house is central and convenient. A fine Livery Stable adjoins the premises, and the Telegraph Office is next door. The offices of all the stages running out of town are in this Hotel.

☞ No effort will be spared to make the Revere House one of the best Hotels in the State. Public patronage solicited. GOODRICH & DEMMITT.

Legal Notice.

In the District Court of the Twelfth Judicial District of the State of California, in and for the City and County of San Francisco.

LAURA A. MOWRY, Plaintiff, vs. SYLVESTER MOWRY, Defendant.

Action brought in the District Court of the Twelfth Judicial District of the State of California, in and for the City and County of San Francisco, and the complaint filed in said City and County of San Francisco, in the office of the Clerk of said District Court.

The People of the State of California send greeting to Sylvester Mowry, Defendant.

You are hereby required to appear in an action brought against you by the above named plaintiff in the District Court of the Twelfth Judicial District of the State of California, in and for the City and County of San Francisco, and to answer the complaint filed therein, within ten days (exclusive of the day of service), after the service on you of this summons,—if served within this County; or, if served out of this County, but in this District, within twenty days; otherwise, within forty days—or judgment by default will be taken against you, according to the prayer of said complaint.

The said action is brought to obtain a decree dissolving the bonds of Matrimony existing between the Plaintiff and Defendant and awarding to said Plaintiff the care and custody of Ellen Melissa and George Barton, the children of said parties, and for general relief and costs.

And you are hereby notified that if you fail to appear and answer the said complaint as above required, the said plaintiff will apply to the Court for the relief therein demanded.

Given under my hand, and the seal of the District Court of the Twelfth Judicial District of the State of California, in and for the City and County of San Francisco, this twenty-sixth day of October, in the year of our Lord one thousand, eight hundred and sixty-four.

HORACE WATERS, Ag't,
No. 481 Broadway, N. Y

THE DAY SCHOOL BELL.

40,000 copies issued. A new Singing Book for Schools and Seminaries, called the Day-School Bell, is now ready. It contains about 200 choice songs, rounds, duets, trios, quartetts, and choruses, many of them written expressly for this work, besides 32 pages of the Elements of Music, which are easy and progressive.

Among the large number of beautiful pieces may be found, "Uncle Sam's School," "Don't you hear the children coming," "Always look on the sunny side," "The little lass," and "Little Lad," "Oh, if I were a little bird," "Bird of beauty," "Pretty pair tree," "Anvil Chorus," "Meet me by the running brook," etc. It is compiled by Horace Waters, author of "Sabbath School Bell," Nos. 1 and 2, which have had the enormous sales of 825,000 copies. Prices—paper covers, 25 cents, $20 per 100; bound 30 cents, $25 per 100; cloth bound, embossed gilt, 40 cents, $35 per 100. 25 copies furnished at the 100 price. Mailed at the retail price.

SABBATH SCHOOL BELL, NO. 1,

contains 144 pages, and nearly 200 tunes and hymns, and is the most popular S. S. Book ever issued. Among the most popular pieces are "Kind Words," "Eden Above," "Christian Hero," "Beautiful Zion," "I ought to love my Mother," "The Angels told me so," "In the Light," "Rest for the Weary," etc. Prices—paper covers, 20 cents each, $15 per 100; bound 25 cents, $20 per 100; clothbound, embossed gilt, 30 cents, $25 per 100.

SABBATH SCHOOL BELL, NO. 2,

is an entire new work of 192 pages, and nearly two hundred and twenty-five tunes and hymns. One million of these Bells have been issued and are now ringing through this and other countries. Among the many choice pieces may be found, "Shall we meet beyond the River?" "There is a Beautiful World," "Sorrow shall come again no more," "Don't you hear the Angels coming?" "Thou, God, seest me," "Sabbath Bells chime on," etc. Prices of Bell No. 2. are same as Bell No. 1. Both numbers can be obtained in one volume, price, bound copy, 40 cents, $35 per 100; cloth bound, embossed gilt, 50 cents, $45 per 100. 25 copies furnished at the 100 prices. Mailed at the retail price.

WATER'S CHORAL HARP.

A new Sunday School Book of 160 pages of beautiful hymns and tunes. It contains many gems, such as "Shall we know each other there?" "Suffer little children to come unto me," "The Beautiful Shore," "Oh, 'tis glorious," "Leave me with my mother," "He leadeth me beside still waters," etc. Price, papers covers, 20 cents; $15 per 100. Bound, 25 cents, $20 per 100. Cloth bound, embossed gilt 35 cents, $30 per 100. Mailed at the retail price. It is edited by HORACE WATERS, author of "Sunday School Bells," Nos 1 and 2, which have had the enormous sale of over 800,000 copies.

Just published by HORACE WATERS,
No. 481 Broadway, New York.

THE NEW PATRIOTIC SONG BOOK

contains 96 pages of songs, duets, and choruses, both sacred and secular, including 14 pages of prayers for sick and dying soldiers, and soldiers' Scripture Manual. It is well suited for social singing, as well as Sabbath worship. Among the many beautiful pieces may be found, "Where liberty dwells is my country," "The Christian Hero," "Three cheers for our Banner," "Come sing to me of Heaven," Columbia, the Gem of the Ocean," "Freeman's Gathering," "Columbia's King forever," "Marching Along," etc Prices—paper covers, cents, $10 per 100. Mailed at retail prices.

THE HARP OF FREEDOM

contains 32 pages of songs, duets, and choruses for Freedom. Among the choice pieces we would name, "Fair Freedom's morn," "O let my people go," "Over the mountain," "They worked me all the day," etc. Price 5 cents single, 50 cents per dozen, $3 per 100; postage 1 cent each

RUTH: A SACRED CANTATA

contains 126 pages. Words by Rev. Sidney Dyer, music by Prof. Cull. This is an excellent book for concerts for the young. Prices—paper covers, 20 cents, $15 per 100; bound 25 cents, $20 per 100.

THE REVIVAL MUSIC BOOK

contains 73 pages of tunes and hymns, designed for revival prayer, and conference meetings. Price in paper covers single copies 10 cents, $8 per 100. Mailed at the retail price

THE ATHENÆUM COLLECTION

contains 512 pages of tunes and hymns, new and old of the choicest kinds, for church, Sunday school, revival, missionary, temperance, prayer, and conference, and all kinds of sacred and social meetings. The music in this book has life and animation in it, like "Shining Shore," "Rest for the Weary," "Shall we know each other there?" "Shall we meet beyond the River?" "There is a Beautiful World," "Kind Words," "Sweet Hour of Prayer," "There is a Land of Love," "Suffer little children to come unto me," "God save the Nation," etc. Prices—single copies, bound, 65 cents, $55 per 100; cloth bound, embossed gilt, 75 cents, $65 per 100 Mailed at the retail price.

HORACE WATERS, Ag't
481 Broadway, New York,

S. D. & H. W. SMITH'S

American Organs.

SIBERIA OTT, Wholesale Agent,

748 Broadway, New York City.

THE

MOST PERFECT AND BEAUTIFUL

Musical Instrument

IN THE WORLD

FOR THE

American Home Circle.

WITH THE MOST PERFECT CONFIDENCE, we call the attention of the public to the AMERICAN ORGAN, as an instrument long desired in the Family Circle, and with our patent improvements is adapted to all kinds of Music, more especially to Sacred Music, with its sustained tones and harmonies, so much desired and sought for in American homes.

The AMERICAN ORGANS are superior to all other instruments of the kind, in many important particulars.

They are superior in their greater fullness and completeness of tone, volume and power. They are superior in expression, quickness of action, and elasticity of touch, rendering them perfect in rapid movements.

They are superior in quality and beauty of tone, and when controlled by the DOUBLE BELLOWS and BLOW PEDALS, Knee Swell, etc, the most charming effects can be produced, from the softest whisper of the Æolian harp to the full volume and power of the church Organ, thus enabling the performer to give expressions not to be found in any other instruments.

The TRENOLO stop has a pleasing and beautiful variety, sympathetic in quality, appealing to the tender emotions of the soul, producing effects the most charming and soothing, it is universally admired and appreciated. The KNEE SWELL gives the performer full control of the tone, enabling him to graduate from the *Pianissimo* to the *Fortissimo* at pleasure, and combines the effect of the Expression Stop of the French Organ in the AMERICAN ORGAN, more perfectly and easily managed.

With all these combinations and improvements of Double Bellows, Pedals and Swell, the AMERICAN ORGAN excels in Expression, Variety, and Power, and has all the quality and capacity of a full Orchestra, and in the hands of a master is capable of the most complete orchestral effects.

The AMERICAN ORGANS are superior in Mechanical finish of the action and interior portions of the Musical parts. The valves are of material expressly prepared to avoid all sticking, cracking, or decomposition, are thus durable and will be always in order.

The Keys, Reeds, etc, are perfect in their finish, and this gives the quickness and sprightliness of tone, brilliancy, etc, equal in every respect to the "percussion stop" of the French Organs, but not like them in danger of getting out of order.

The AMERICAN ORGANS are by far the most beautiful in exterior finish, forming a handsome piece of furniture for the Parlor, Boudoir, or Sitting Room, occupying but little space, and perfect and complete in every particular.

THE

AMERICAN ORGAN

Makes Home Attractive; and Refines and Elevates the Minds of All.

Beautiful in its Appearance and Effects.

The AMERICAN ORGANS are finished in Rich Rosewood Cases, varnished and polished, forming an elegant piece of Furniture. Also, in Black Walnut Cases, and in Oak, finished in oil, and especially adapted for Churches, Lecture and Lodge Rooms.

They take but little room, are only 35 inches high, and from 34 to 47 inches wide. *They cost but a trifle more than Melodeons*, and yet possess many times their advantages in musical capabilities.

The California Farmer.

SAN FRANCISCO:

FRIDAY.....JANUARY 20, 1865.

☞ Those who receive a number of the Farmer with this paragraph marked, may understand that it is sent to them for their examination, hoping it will meet their approval and induce them to subscribe, and ask their neighbors to do so.

Postmasters and others, who may receive the paper, will oblige us by soliciting subscriptions, or putting it in the hands of those that will. Subscriptions may commence at any time.

Send for Sample Papers and get up a club. Address

Publisher California Farmer, San Francisco.

TERMS OF ADVERTISING.

The charge for Advertising in the CALIFORNIA FARMER (payable in advance), is **One Dollar** for five lines, or less of space, in nonpareil type, for one insertion, and ten cents a line for any larger space. Each subsequent insertion half these rates. This it is believed affords the cheapest and best medium of reaching the Agricultural community on this coast. As heretofore, the right is reserved to reject any advertisements deemed objectionable.

THE CALIFORNIA FARMER READING-ROOM AND MUSEUM OF NATURAL HISTORY.

20 Clay street—Marble Building—Up Stairs.

The Farmer's Headquarters.

The Editorial Rooms and Museum of the Farmer Office are always open, and an attendant ready to make a visit instructive to those who take an interest in the productions of our State. Samples of all productions: grains, grasses, fruits, models, inventions, minerals, and specimens in Natural History innumerable, are constantly being added.

Farmer's Reading-room.

Farmers and Mechanics, from the country, who visit San Francisco, should visit the Free Reading-room and Museum, at the Farmer Office. Members of the Press, and Strangers, are particularly invited to avail themselves of these rooms. Newspapers from every State to which we have access by mails, as well as Foreign Newspapers, Periodicals, and Magazines, are upon file and on the tables for use; a Good Library of hundreds of volumes, with works illustrative of Agriculture, Horticulture, and Floriculture, works for reference upon all Sciences, with a Cabinet of Minerals, Coins, and Curiosities of interest to the Naturalist, to which we invite all.

Immigration Office.

ew comers to California can always obtain all needed information about Lands, Farms, etc, at the Farmer's Reading room, 320 Clay street. Most cheerfully we bid all welcome to our Sanctum.

Patent Rights.

It has been, and will be, one of our specialties to aid all who desire to secure PATENT RIGHTS, and to give them information and assistance in preparing their papers. We can facilitate them greatly in this matter as we have all the Laws and Rules of Action touching these things. Many models can be seen at our Office and Reading-rooms, where all are invited freely.

TO READERS AND CORRESPONDENTS.

Most welcome to us at all times are the Letters and Communications from our friends and patrons, whether they come full of glowing and descriptive thoughts upon any or all the great and growing interests of our world-influencing State, or whether they come teeming with inquiries relative to its further development, whether they come telling us of the bright opening prospects of the coming year to the sturdy tillers of the soil, and all the varied interests of the agricultural yeomanry of our State, or whether they come freighted with the story of opening riches in mineral resources, or the new development of our manufacturing interests, from whatever source they come they will always be welcome. The prosperity of such interests, with the establishment of "Homes," Colleges, Schools, Churches, and all these elements of human happiness are subjects for our journal, and will always be welcome. Therefore, we say let the pens of all our friends and patrons speak freely to us; their missives will always be welcome.

Our New York correspondent sends us a brief letter, but always welcome.

We have letters from the mountains on various subjects, which we shall soon give.

Our correspondent, "M. J. U.," has sent us several communications, which will appear in due time.

A valuable Letter, from the Seat of War, from our excellent friend, Rev. J. Butts, will appear next week. Also a letter from a Farmer in Colusa county.

From "Orrilla" we have a valuable Letter, on Native Plants, Trees, etc., to which we call special attention.

"M. B. C." sends us a beautiful picture, "The Home of Taste," and we trust this sketch of what should be, and that of "Orrilla," of what must be, will command the attention of those to whom they are addressed. Both subjects are well and finely presented, and we hope to hear from both these correspondents often.

We have a mass of MSS. copy which has accumulated at this season of the year. We shall soon present the thoughts and wishes of each; they have our kind compliments, we desire they will speak often and speak freely.

A Great Man Gone Home.

Yes, gone home! Edward Everett dwells no more on Earth; his work is done, it has been well done, and he has gone Home—to his Upper, Kindred Home—where the Spirits of just men made perfect, dwell.

When such men leave us—for they do not die, Good men never die. When such men leave us, we feel that something good, bright and beautiful has passed from our hearing and our vision; the music of their voice is hushed, the bright and beautiful imagery which their great eloquence pictured before us has gone, but we have their memories to cheer us. We know they were good, and this memory comes to us like the fragrance of flowers that have been crushed. We *live* in that fragrance for it is all we have left of the flowers that have gone. So it is with the memories of the passed-away; we knew him well, and as we looked upon a letter with his signature, of past years, just now, the memory of his great soul-strung eloquence came to us and we could almost hear his voice again, as he stood in old Faneuil Hall, Boston, where his words have so often thrilled the hearts of his hearers.

Edward Everett is no more of Earth, but his Name and Fame will live forever as one of the most eloquent men of the age, and one of the Purest and Best men whose lives adorn the pages of American History. He lived to the ripe age of 70 years.

OUR XXIIId VOLUME.

THE TWELFTH YEAR OF THE FARMER.

With this issue of our Journal we greet our readers with Number 1 of our *Twenty-Third* VOLUME, the Twelfth Year of the Farmer, and our labor in the cause of Agriculture and its kindred Sciences. Eleven Years of earnest labor we have given to this work. *Eleven Years* we have devoted all the best energies of body and mind and all the resources resulting from these to the cause we have espoused. From the first moment that we entered upon this work we resolved to Do or Die. We knew! for we *sat down and counted the cost before we began the structure*, that nothing but an eye single to this work could make it a success, and we *Resolved*, and have kept the resolution that we would *Labor* and *Toil* for the "Cause of Agriculture" and its "Kindred Sciences,"

With all the strongest purposes of a determined soul,
That we would battle on and win the hoped for goal;
We counted well the cost, in means, of strength, of life,
We knew full well such labor was *unusual* strife,
But this we knew, the time would surely come,
When they who "till the soil" would Love a "Home."
'Tis "Happy Homes" that make a prosperous State
From these come minds from which we can create
Our men and women strong in mind and health,
These are the pillars of our Commonwealth.
With Happy, Prosperous Homes spread far wide,
Our State triumphant—this our greatest Pride,
Our years of toil and labor briefly told,
To us such Triumph—better far than Gold.

Yes, Eleven years we have labored, as the volumes of this journal will tell. How well, how earnestly, how devotedly, by its pages, the doctrines and sentiments and its teachings will better illustrate, than any boast of our pen, now.

Eleven Years is a long while, in a State like California, for any one man to steadily adhere to one purpose, one position, one single cause. Nothing, we can boldly say, could have sustained us and all the losses and trials, perplexities and disappointments that it has been our lot to pass through, save that undying "Love of Nature," that great, deep, rich reward that comes to the heart and mind of him who is seeking the highest good, find that—

"Spontaneous joys when Nature has its play,
The Soul adopts, and owns their first-born sway."

For our love of Nature and fondness of the Beautiful we owe to the early lessons of a fond and loving mother, whose early teachings in the garden of bright flowers, which were her own care, we drank in, by inspiration, our earliest impressions. *That mother's* teachings and encouraging words in our boyish labor with her, among the flowers, made us a *Florist*.

But our purpose is not an Essay upon Horticulture, but simply an Introductory, as is usual on such an occasion.

We are indeed most happy to greet our patrons and friends, on this occasion. Eleven years we have annually greeted some we honor. We have many whom we have addressed at the opening of every Volume. Heaven grant we may enjoy their company many, many years longer, with God's rich Blessing of Health and strength, such as he has vouchsafed to us in our past labors, *we intend to labor Fifty Years more in the cause we love.* We greet all who have joined us in our several years of later labor—we say to each and all—come walk with us in our enterprise, confer with us every week, give us your thoughts and tell us of your plans and the result of your labors. To each reader we say this, for what employment or labor more ennobling than that to which the God of Nature first ordained for man.

The cause of Agriculture is coeval with our Earth. In the Garden of Eden the first Flowers bloomed and the trees yielded their first Fruits. Let us each and all labor until the whole Earth shall be one Garden like Eden, and until man shall labor and toil in a *perfected* Garden, where no rank weeds shall impede his work or destroy his harvest.

To our friends, patrons and readers all, we reiterate the original promise made in the opening number of the California Farmer in its Number I, Volume 1.

We need only repeat this and say we shall again renew our pledge, bend all our energies to make this journal all that it should be, the "Herald of the Agricultural Interest" of the Golden shores of the Pacific coast.

"That which contributes most directly to the substantial happiness of mankind, that which really advances and elevates the Science of Husbandry, of all pursuits the most productive; that which holds in constant revelation the purest commingings of life and nature; that which is the most honest and unaffected in its teachings, is the kind of information—the kind of literature or science which is received and cherished by a competent farmer. And this is the kind of information which we desire to communicate. To collect and present in agreeable portraiture the ever-varying suggestions of science—to record the progressive developments of Agriculture, and to submit them to the consideration of our California farmers is, or should be, the peculiar object of our work. This is at any rate the course we shall adopt. Eschewing all partyisms in politics, all the affectations of society, and all the cant of religion, we shall devote ourselves to the improvement of Agriculture, to the embellishment of Homes, and to the elevation of Human Character."

To our patrons, our friends, and to all who feel an interest in the up-building of this great State, we ask your kind co-operation in our labor. We do not come before you simply to *crave aid* as a supplicant, we ask your free, generous, voluntary co-operation in the labor of diffusing that kind of information to our people at home and in the other States as shall make our State and its interests known truthfully.

The California Farmer, now in its Twelfth Year of labor, is the only Agricultural Newspaper on the coast. Five other journals of this kind have been started, expended thousands, lived a brief period, and then passed away, and are not. Of these, their objects, labors, etc., we intend to speak hereafter fully.

That some estimate of the cost of establishing and sustaining an Agricultural journal of this character may be known, we can say briefly that from the commencement, with the capital given to it then, over *One Hundred and Fifty Thousand Dollars* has been devoted to this cause. Every dollar of the income has been given to it; of this we shall speak, in detail, in future numbers of the Farmer.

This journal lives on, and shall live, by the blessing of God and good men, for it is to these that we look for support and encouragement. The Farmer, thank God, is an Independent Paper, bound to no party or clique, shackled by no interest that shall prevent its editor and proprietor from speaking freely on any and all subjects that belong to a Free Press, we intend to win the Good, the Brave, and the lovers of the Beautiful, to join us in our work of building up the best interests *of our earth*, the *Agricultural Interest*, which means all other interests, for Agriculture is the base, the foundation of all prosperity.

We most sincerely offer our grateful acknowledgments to those noble patrons who are with us, and we hope to add many more with our opening volume.

To the Press of this State, those who have occasionally spoken a kindly word of cheer, and thus *shown a good will*, we return thanks; their words shall be be *good seed for them*, and they shall not fail to reap a good harvest. Therefore, we wish every cotemporary in the great field of thought—*the Free Press*—an abundant success.

Again, and to close, we offer our gratitude for many kindly *deeds*, as well as *words*, in our long years of labor, and can only say to such:

"The liberal deviseth liberal things,
And by liberal things they shall stand."

ARTICLES RECEIVED AT THE CALIFORNIA FARMER EXHIBITION ROOMS, No. 320 Clay Street.

We have No. 1 of Gazley's Pacific Monthly, a periodical published in New York, by D. M. Gazley & Co., 34 Liberty street, New York. This magazine comes to us in handsome form, similar to the Atlantic Monthly, and the size of the Quarterlies, a work of eighty pages, and very finely illustrated. The whole work is in excellent style, and if it shall, as it purports to do, be a "history of the Resources of the Pacific, in all that relates to its highest character, its intellectual, moral and social, as well as its physical resources," it will be worthy the earnest patronage of our people. No. 1 opens well, both in the style of its typography and all its mechanical execution, and the literary department is truly worthy. We most sincerely commend it to the consideration of our readers, especially for the name it bears and the cause it pleads. Our periodical dealers can furnish copies. Price, $5 per year.

"Our Young Folks." This is an admirable new monthly, of which No. 9 has been laid on our table by the publishers, Tichnor & Field, Boston. This is a finely illustrated monthly for the "Young Folks," as it purports to be. It is issued in quarterly style, very handsomely, and the illustrations of an excellent character. This magazine costs $4 per annum. We have received from the publishers a complimentary copy. G. H. Bell, magazine dealer, Montgomery street, takes subscriptions to both the above works.

Music Received this Week.—We have to acknowledge a parcel of music from Kohler's. Among the pieces received is the touching, tender and patriotic song, entitled, *Bless me Father, and Let Me Go*, which we feel was worthy of publication in full. It is a California Song, words by Carrie Carlton, music by Geo. T. Evans, Esq., the able music composer and leader of the Academy of Music orchestra. We acknowledge also the following from Horace Waters, Esq., of New York: *The Sunny Side Set; Sweet Little Nell; Beautiful Annie*, (as sung by the Hutchinsons); *The Voice of the Army;* the words and music of these two by James G. Clark—all fine songs and popular. Also, *Maryland is Free.* This song will be found in full in our columns this week.

Quarterlies, and Monthly Literature.—We are indebted to G. H. Bell, Esq., of the general depot of all the fine European Quarterly and Monthly publications, for a collection of valuable works, per last steamer. Mr. Bell makes it a speciality to have the best periodical literature on this coast, and we are glad to notice the large circulation he is giving to such valuable literature. How much better it will prove for every family to have these standard works upon their tables than the miserable, trashy "yellow cover literature," that proves to the mind of the young like the eating into the heart of the young tree of the poisonous borer, or the canker worm upon its foliage. Among the works we have received and examined from Bell's, we would name the following as worthy the parlor table and library of every one who can appreciate or admire standard literature: The Eclectic Magazine; this work has completed sixty-three volumes; the new series begun Vo. 1 No. 1, 1865. This magazine is truly superb in all its departments; the engravings are of the highest order in the present number, the one of Cromwell refusing the crown of England, is worth a year's subscription. All the republications of the foreign Quarterlies are of the same high tone of reading, they are Reviews, and a condensation of the best literature of the age. The Art Journal of London, a most superb work; the Fine Arts Quarterly Review; the Photographic Journal, these are truly artistic works, of high character. Chambers' Journal, celebrated the world over; The Cornhill Magazine; London Society; Frazer's Magazine, a rare and costly work; Temple Bar Monthly, a work specially for town and country readers; London Punch, a work to laugh over and grow fat. To these can be added our own American publications, of which the Atlantic Monthly stands pre-eminently at the head of all, having, as we are glad to know, some two thousand copies now read on our coast, and rapidly increasing, and reflecting honor upon the publishers and the character of American literature; Gazley's new journal, the Pacific Monthly, spoken of above; also Our Young Folks. All of these we have copies of from Mr. Bell's collection, as well as the publishers. We speak at length of such works in this number, as it is the opening of the year and the time to commence subscriptions, the time too for all to discard reading useless and worse than useless trash, and become readers of valuable literature, and we cannot but commend the works above alluded to, and for which Mr. Bell is general agent for many, and selling agent for all. Mr. Bell's place of business is Montgomery street, corner of Merchant.

We have received the valuable and interesting Introductory Address of Professor H. H. Toland, at the opening of the Toland Medical College; also the Introductory Lecture of Professor Blake, on the Existing Mortality of Infants. Of both these we shall speak hereafter.

The Resources of California.

No one journal, nor a thousand issues of it, can picture but the mere outlines of the wonderful resources of these Pacific shores. Step by step, and little by little, we have given the dawning light of every new development, and as they gleamed upon us like the stars of early evening, so we have noticed them, until now they stand before the whole arch of our sky like the full blaze of the starry heavens on a clear night.

Our commercial journals, in their Annual Reports, present the aggregate and this shows the immense wealth already revealed. From that excellent record the Commercial Gazette we have been aided in the statics elsewhere given, and we intend to speak in a series of articles, in our new volume, of the many articles of great value which have been discovered and brought into use and are now manufactured and offered, which add to swell our resources and fill up the wealth of this great and rapidly growing State. We name some of the most prominent, which will be the theme of future remarks:

Axle Grease.—An article of extensive use, made by Hucks & Lambert, superior to any manufactured in the United States.

Asphaltum.—Now used largely for roofing and paving purposes.

Borax.—Already largely used.

Brick-making.—A supply for all the coast.

Cordage.—Manufactured extensively.

Cotton.—Already successfully grown.

Cement.—Equal to any in the world.

Castor Beans.—Can be grown to make all the Castor Oil of the United States.

Carriage-making.—No State in the Union can excel this State.

Dried Fruits.—The best the world ever saw.

Dried Meats.—Fish, Beef and Meats, the best.

Desiccated Vegetables.—Superior to any imported.

Foundries.—No State in the Union can exhibit better work than the Foundries of California.

Flax.—Can be grown to any extent.

Glassware.—We have a manufactory in successful operation in making wares equal to any imported.

Granite.—Enough to build a thousand cities, and varieties and shades of the richest character.

Glue.—Long time successfully made.

Harness-making, Whip Factories.—Main & Winchester's extensive warehouse is a proof that nowhere in our Union can this kind of work be excelled.

Hemp.—Grows wild, and cultivated with great success; machinery wanted to break it.

Hops.—We beat the world in Hops, in size, strength and flavor.

Kaolin.—The finest and purest, and we should make our own Porcelain-ware and not import it.

Leather.—The manufacturers of Leather are successful and scattered over our State.

Lumber.—From our "Big Trees" to our fine woods, we can equal the world in Woods and Timber. Enough to build navies or kingdoms.

Lime.—Lime and Santa Cruz are synonymous terms; we can plaster a world with this staple.

Mineral Paint.—Here we have a greater variety than ever before discovered.

Marble.—Finer or more beautiful the world never saw.

Maccaroni and Vermicelli.—Equal to best Italian.

Pianos.—No part of the world can excel us in the manufacturing of Pianos. The Jacob Zech Piano cannot be excelled.

Paper.—Paper mills at Santa Cruz and Marin counties make paper equal to any used. These mills will soon manufacture sufficient to supply the State.

Pemmican.—Meat cured, pulverized and mixed with fat. It contains much nutriment in small compass, and is of great use in long voyages of exploration.

Potteries.—These have been a success for years.

Petroleum.—They will soon "well up" a world of this gushing light.

Plaster.—The purest ever found.

Powder.—For blasting and sporting purposes.

Rice.—This great staple can be grown with much profit and success. Remember, 25,000,000 pounds are consumed in California annually.

Soap.—Manufactured largely.

Salt.—Our Salt Lakes, our Salt Mines, and Manufactories will salt and preserve the world.

Slate.—Already the workers of our Slate quarries are accomplishing much, and the billiard table beds are now of California Slate, and our buildings protected by it.

Silk.—The Silk Worm and its material, and the manufacture of Silk is a fixed fact, thanks to the energy of L. Prevost, of San Jose.

Sugar, Syrup, etc.—This is now the manufacture of our State, but in a secondary degree, from foreign material, refined. Soon from our own canefields and from the Sugar Beet we shall tell in millions of dollars annually.

Ship Building.—The steamers on our rivers and our coast steamers are a proof that California can equal the world, and the raising, launching and perfecting the iron-clad Camanche is a proof that California can beat the rest of Uncle Sam's workmen, do their work better, quicker and more of it.

Steam Engines and Boilers.—These are made in California of more perfect finish and power than usually made elsewhere.

Shoemaking, Hat Manufacture, Clothing.—These are all in successful operation and on an extensive scale.

Tobacco.—arge amounts are grown. We want experience and a protection from our State.

Turpentine and Rosin.—Of these articles a large business has been done, by the well known firm of Hucks & Lambert, the Pioneers of this product.

Wagons, Plows and Agricultural Machinery.—We have mechanics equal to any, and their work excels, *when they try*, the rest of the Union.

Our Wool, Wine and Grain.—We bring these three great and permanent staple products of our glorious State at the base of our list because they will be the foundations for the prosperity of California.

The Wool of California will, in a few brief years, count in tens of millions of dollars annually.

The Wine of California will follow suite, and become one of the great article of export, like Wool.

Our Grain will load hundreds of clipper ships annually. These are the great trio, the three points of the arch of our wealth—the right and left bases and the keystone—and other articles will fill the space. Of the arch we shall speak in future pages of the Farmer.

The truth is, there is no State in our glorious Union where all the varied enterprises of workingmen will be so successfully carried on as in our glorious State, and we are glad to herald the fact. Each of which, individually, we intend to speak of in future numbers.

Native Plants, Trees, Etc.

[We are truly glad to receive the annexed letter from "Orrilla." His pen speaks truths which we trust will awaken the attention of all who have a taste for Arboriculture, Horticulture or Floriculture. These are subjects that should demand the attention of every owner of a "Home." Our correspondent writes as one familiar with the subject of which he speaks, and writes well and truthfully. We fully agree with "Orrilla" relative to the importance of our own native trees, plants and flowers, there are no finer to be found in the world and the columns of the Farmer will give proof that for the past Eleven Years we have faithfully urged this subject, but because so important and noble a subject, would not pay *two per cent. per month*, it has never yet been "prospected," by the mass of our rich men.

It is a lamentable fact that our beautiful native plants have been sadly neglected or if cultivated, the attempt was "botched" by reason of ignorance and because it "would not pay"—a monthly dividend.]

Editor California Farmer:

Dear Sir,—Being a comparative stranger in your city and country, I may not be fully aware of *where* all the fine specimens of Native Plants, Trees, Shrubs, etc., are to be found. I have visited all of the principal gardens and nurseries and found but *few*, very few, of the splendid native plants indigenous to California, and which are so highly prized both in the East and in Europe. Why is it?

On visiting the grounds and conservatories of your wealthiest citizens, what do I find but a mixed collection of trees, plants and shrubs from all parts of the world, without any seeming object but *variety*. To a stranger visiting such a place, but little pleasure and profit are experienced; whereas, if there were a collection of the indigenous plants, all grown in their greatest perfection, what a treat it would afford to the real lover of nature. Why pick up a scrap from every part of the earth, when so much is here that is far more beautiful?

The most interesting collection of plants I ever saw were in the gardens and greenhouses of a gentleman in England, who had made the entire collection of the country in which he lived, had improved and hybridized them until they were the wonder and delight of all connoisseurs in such things.

So here; take the wild flowers, grow them with care and improve them, and make them superior to the foreign; make specimen plants of each that they have, not the ugly skeletons that are now seen deformed and staked up, not being able to sustain themselves. The most common plant, when attended to and properly trained, will be an ornament, and how much more when in full bloom, then it will be both beautiful in form and color. Can you not induce some of your many readers to try and get a collection of Native Plants, Trees, Shrubs, Bulbs, etc, and let it be known where and when they can be seen? Can you not say a word about the Plaza, and get some of them introduced there, so as to accustom your people to the sight of them? So in the cemeteries, what more appropriate?

Will not some of the wealthy citizens subscribe to and open a Botanic Garden? Thousands of persons through the country would send specimens, etc., for it, free of expense, and donate both money and stock.

As we are having exhibitions of Pictures, etc., why not of the most beautiful of nature's productions, Plants, Fruits and Flowers? If the gentlemen are too busy with their *feet*, cannot you induce the ladies to try their *hands?* Have a Ladies' Horticultural Club to meet and discuss which are the best Roses, Fuchsias, etc., how can they be best grown, and such like. Induce them to raise all kinds of Plants from seed, so as to obtain new varieties. Perhaps a word from your pen may awaken thought on these subjects, and stir up both the purchasers and growers of plants to a better state of things, producing something worthy to be hailed as coming from California.

Orrilla.

Grain Planting.—While our grain growers are now sowing their grain, we would suggest to them the planting of some portion of their land with the *Drill*, so as to make a careful experiment that will be of service to themselves and to the State.

Highland Rice.—Those who desire to test this valuable article, can have a sample parcel from our office, *free of cost.*

California Pianos.

California is indeed a progressive State. She will never retrogade in the *Mechanic Arts*, whatever she may do in politics or speculations.

Only about eight years ago and a beginning was made by our pioneer piano maker, Jacob Zech, to repair and tune pianos, and at that date two pianos were made and exhibited at the first Mechanics' Fair, as the work of a California maker. But now, in 1865, we can mark the steady, onward progress of this great enterprise, until the business demands a three-story brick building and steam power to carry on its extended operations. In 1856, two pianos only were made by Mr. Zech; in 1857, 20; in 1864, the number increased to 100; and up to 1865, over 500 splendid Pianos have been shipped from this celebrated manufactory. Mr. Zech has recently extended his manufactory, taking in all the upper stories of the next building, thus giving him rooms for the drying his woods, sawing, slitting, veneering, varnishing, and all the various departments of his business.

The whole establishment is full of interest, as showing the great progress of our State in all that appertains to its permanency and prosperity.

In the Exhibition Rooms we noticed one superb grand piano of the highest character, and *ten square* pianos—in value from $400 to $1,000 each. One of those superb ones made by Zech, and exhibited at the late Fair and for which the highest premium was awarded, has been sold in this city; it was the finest instrument ever made on this coast.

In the finishing rooms we counted 27 pianos in all the various stages of progress. Thus in about eight years, from merely a repairing business, it has grown into a manufactory of gigantic influence, giving employment to about twenty men and scattering money by the thousands monthly among the industrious men of our own city, and we are glad to say that such is the fame of the *Jacob Zech* piano, that their tone and finish is preferred in our schools and colleges over all others. Mr. Zech uses a large amount of California woods after the drying process which he gives to insure durability. Among the woods used are the Laurel, Ash, Rosewood, Pine, Spruce, etc., other woods, such as are not grown here, are imported by him.

Jacob Zech may be likened, in a measure, in his success as a manufacturer, to General Grant as a victorious General, if we would judge by the "legs" laying round, for we could count some 200 legs of pianos in his manufactory. This is an indication that he intends to stand strong, while in his business, on his *own legs*. Success to him.

Around the piano rooms—the exhibition rooms—we noticed the marks of triumph also, in the seven Diplomas, won as the victorious exhibitor over this State; also a superb Silver Pitcher and several *Gold Premiums* also won, and yet with all these evidences of merit, it is always a fact that exhibitors expend vastly more money in preparing for Fairs than the intrinsic value of the premiums won. It is the merit and honor attached to the prize that rewards the exhibitor. The Jacob Zech piano is always warranted for *Three years*, and kept in tune one year without cost to purchaser. Jacob Zech may now be properly called the only and principal Piano-maker, of any note, on this coast, and the success which attends his enterprise he has fairly won by his untiring industry, his thorough knowledge of the business, and his close application to it.

Mr. Zech has now in his *display rooms* some of the very finest instruments, those of the highest tone and finish, to which he invites the attention of the Principals of our colleges, Music Teachers, and others who desire instruments of the highest character.

Saddlery and Harness Making.—Says "Fighting Joe," as he lead on his charge, in one of his brave exploits, "I can ride easy now, for I ride in a California saddle, and guide my steed with a California Bridle." It will suffice to say, not only General Hooker, but General Carleton and many California Generals and Colonels and Majors, will testify to the great superiority of California Saddles for our Cavalry in their long and arduous and fatiguing duty. We shall give some interesting facts, touching this matter, in our next. The saddles, of which we allude, were made at the Warehouse of Messrs. Main & Winchester, of our city, whose extensive Warehouses and splendid work we shall speak of, in detail, in our Rambles among the Workshops and Warehouses of California in the series which we contemplate giving.

Rambles in the Country and Rambles over the City.—It is our intention to commence a series of "Jottings Down," with our next issue. We intend to note events, and sketch things as we *see them*—they shall be matters of fact. The object will be to make known the real condition of such matters as will interest the general reader, at home and abroad and benefit our State. They will be under the *Two* distinct heads above named, and will commence with No. 2 of this Volume.

New Seeds from Paris.—Messrs. François & Bulletti are now expecting, daily, a splendid lot of New Seeds, Garden, Flower and Grass Seed, all kinds, with every variety of Tobacco Seed, and all the new kinds of Peas and Beans. They have also a supply of the "Top Onion," of superior kind. See their card, in another column, Ornamental Trees. Office on Sansome street.

Daguerrean Partner Wanted.—We call attention to the card of an advertiser for a Business Partner in the Daguerrean Business. As we know the parties, the position and the business, we can say that it is a rare chance and an unusual opening for a man with from $3,000 to $4,000 capital, it is one of the best openings for a permanent business and a profitable investment that can be offered.

"Mudsills" no more.—Mr. Hammond, of South Carolina, who gave the name of "Mudsills" to others working men, is dead. Let the grave bury the memory of the wrong done to the hardy workingman.

☞ Dr. Bellows' great speech before the Portland (Maine) Lyceum, in our next.

[For the California Farmer.]

A Home of Taste.

["M. B. C." has our most hearty thanks for his most excellent letter. It speaks our heart-sentiments, and we know our readers will testify to the faithfulness of the Farmer for many years in urging these sentiments. Every line, sentence, and paragraph of our earnest correspondent is full of valuable truth, and if our citizens would heed the suggestions and give more time to the "Beautifying Home," the countenances of men would not wear that care-worn look, nor would their brows be full of wrinkles, so early in life. It is a fearful fact, and it is witnessed everywhere, that the *young men* of California grow old early—wrinkles and gray hairs precede early decay, insanity or suicide and the reason is the restless desire to "get rich," to the neglect of all personal comforts of life, save *indulgences* (these are not comforts), and the utter neglect of Home and its blessings.

Most earnestly do we commend the following Essay, and hope it will produce a good effect.

To those who desire to cultivate or gratify their highest tastes, let them go to the New Art Union Gallery, see the splendid works of our California artists and encourage them by ordering a picture of the artists.

Go to Robinson & Snow's and see the splendid pictures at their rooms; and to Swain's crockery store and procure those beautiful statuettes, etc., these beautify Home.

Then go to "Roman's" Bookstore and add to the Library, and not forget to visit the Floricultural Rooms now open on Bush street, opposite the Cosmopolitan, where you can add choice plants and beautiful flowers that send their fragrance to your senses, far preferable to the fumes of tobacco that consume both body and mind.

"Beautify Home," cherish Nature and Art and all their beautiful associations, and Nature and Art will bless you with joys, not found without their aid—

"For Nature never did betray,
The heart that loved her."]

What is it? Why are there not more of them? A home of taste is a tasteful home, wherein everything is a reflection of refined thoughts and chaste desires. It is a school of the heart in which human sympathies teach profounder lessons than are found in books, and the ornaments of walls and windows suggest a thousand modes of being cheaply happy. In such a home beauty presides over the education of the sentiments, and while the intellect is ripened by the many means which exist for the acquisition of knowledge, the moral nature is refined by those silent appeals of Nature and Art which are the foundations of Taste. No matter in what form the cultivation of Taste may manifest itself, in paintings and sculptures, in the analysis of scenery, in the grouping of flowers, in the embellishment of the window or the mantel, in the cultivation of criticism and the appreciation of what is true and beautiful in Art generally, refinement of manners, kindliness of feelings, and a deeper devotion of religion will be its sure attendants. But the home of Taste is not necessarily the result of lavish expenditure—the most humble may command it.

If the poor man cannot have the picture gallery, he can still gratify his love of Art by embellishing his walls with copies of works of Great Masters, brought within his reach by the multiplying skill of the copyist and the engraver. If he cannot have a library paneled with palm branches and containing a collection of "Aldines" on vellum, and "Caxtons" worth thousands of dollars, he can still command elegant editions of the greatest historians, philosophers and poets, to whom God gave the gift of expression.

In a Home of Taste, it does not require a fortune to set up a vase of flowers, or an aquarium, or a stand of bees, that shall sing to their master all day long, and entrap every spare moment of leisure he may be able to afford to shepherd them.

He who lays out his Garden in accordance with correct principles of taste, may find in it as much amusement and as genuine solace from the cares of life as if it were a domain of thousands of acres, —perhaps more so, for it is his own work and it represents his own ideas, it is a part of himself and hence redolent of heart-ease.

The pleasures of the Garden, the tending and taming of household pets, the culture of choice plants in the green-house and the window, seem to be much more remunerative both intellectually and morally than even the study of the higher departments of Art, because they keep us nearer to Nature, and compel us to be students of the great out-door world, whence our noblest inspirations and most harmonizing teachings are drawn.

It would be an anomaly to find a student of Nature, addicted to the vices that cast so many dark shadows on our social life. The man of taste will impress on everything about him an air of usefulness or elegance and will make the best of the roughest materials that fate may cast in his path. Why should the eye be compelled to gaze on ugly lines and awkward angles, false proportions and abominations intended as ornaments, when symmetry is at all times cheap, and accuracy of form the most useful and convenient. Whatever we look upon reflects our own mood; we see ourselves perpetually, as if all Nature and Art were but the repetition of a mirror—

"Our sleeping visions, waking dreams
Receive their shape and tone from what
Surrounds our life."

In the Home of Taste, there are pictures and vases, and stands of living flowers, that fill the mind with a sense of the exhaustlessness of form and color; there are houshold pets that daily teach us we may rule by love and not by fear; there are gatherings of all kinds from the World of Art and the World of Nature that demand attention and call for the exercise of skill, every one of which represents an idea and sets us thinking. Who then would not have a Home of taste? If you have it already, prize it and continually strive to make it more and more perfect, if not "Reform your pleasure bills," and see how you can scratch a little money from pursuits that are unprofitable to bestow in the embellishment, perhaps in the creation, of a little Territorial Paradise. M. B. C.

Advertising Directory.

We ask especial attention to the Advertising Directory in our columns this week. We believe we have one of the best lists of Business Houses ever placed in a public journal, and we can always call attention to such, and can confidently recommend them to our readers. We advertise none but the very best and most reliable Houses, and therefore confidence can be placed in them and the goods they offer, or the business they transact.

Agricultural Warehouse—J. D. Arthur & Son, corner of California and Davis streets.

Ambrotypes—A. P. Johnson, 649 Clay street.

Axle Grease—Hucks & Lambert, Minna street, between Second and Third.

Aquarium, Etc.—Miller & McKoon, 206 Bush street.

Beautiful Eggs for Sale—Farmer Office.

Books—A. Roman & Co., 417 and 419 Montgomery street.
Tyler Brothers, 632 Washington street.
Agricultural Books, Farmer Office, 320 Clay street.

Confectionery and Restaurant—Christian Good, 738 Washington street, opposite the Plaza.

Coal Oil, Lamps, Etc.—Stanford Borthers, 123 and 125 California street.

Crockery—R. A. Swain & Co., N. E. corner of Sansome and Pine streets.
Haynes and Lawton, corner Sansome and Merchant.

Cordage Manufactory—Tubbs & Co. agents, 613 Front street.

The New Terms of Our Colleges.

As it will be our aim always to serve the cause of Education, we shall devote a space in our columns to the time of the new Terms of the various Colleges, Academies, and Seminaries of learning, and if the Principals of each will send us information of the same, the time of each will be placed in this column; and if they will send us their catalogues we shall be happy to distribute the same from our Reading-room, to which we invite all who are interested in the Cause of Progress in California.

We hope we shall have the earnest co-operation of all Principals and Teachers, and to receive communications for publication that will advance the cause of Education. Our journal having a wide circulation, we can thus give extended notice to our Colleges and Schools, and materially help the cause, we therefore hope a new interest in the work. We cannot keep the public advised of changes unless we are notified.

PACIFIC NATIONAL BUSINESS COLLEGE—
At San Francisco, for Males,
J. K. Laudenslager, Principal.

FRENCH COLLEGE—
At San Francisicsco, for Males,
Prof. J. Mibielle, Principal.

OAKLAND SEMINARY FOR YOUNG LADIES,—
Commenced Monday, Jan. 9, 1865.
G. M. Blake, Principal.

SACRAMENTO SEMINARY—
For Young Ladies, commenced Jan. 2, 1865.
Mr. and Mrs. Perry, Principals.

SANTA CLARA COLLEGE, S. J.—
At Santa Clara, commenced the last week in August.
Rev. B. Villiger, S. J., President.

ACADEMY OF NOTRE DAME—
At San Jose, commenced August 23.
Sister Marie Cornelie, Lady Superior.

COLLEGIATE INSTITUTE—
For Young Ladies, 64 Silver street, commences January 4. *Miss M. Lammond, Principal.*

At San Francisco, commenced last Monday in August. *Rev. N. Congiato, S. J., President.*

Speculation in Grain and Flour.—See on "Produce Report," read the facts and judge. Speculation is rife. A few heavy men are trying to control the market. Soon the bubble will burst, then we shall see, what we shall see.

PACIFIC
National Business College,
SAN FRANCISCO, CAL.

Practical, useful Education for Young Men, Boys, and Men of Middle Age.

A BUSINESS EDUCATION FOR A BUSINESS MAN—THE RIGHT KIND OF AN EDUCATION FOR YOUNG MEN.—THIS IS THE BEST PLACE FOR MERCANTILE BUSINESS IN THE WORLD.

IMPORTANT TO THOSE WHO CAN DEVOTE A FEW WEEKS OR MONTHS TO STUDY, AND TO PARENTS WHO HAVE SONS TO EDUCATE.

THE BEST COURSE OF STUDY AND THE GREATEST AMOUNT OF PRACTICAL AND USEFUL INFORMATION ACQUIRED IN THE SHORTEST POSSIBLE TIME AND AT THE LEAST EXPENSE, TO INSURE SUCCESS IN LIFE.

"Acquire a Good Commercial Education, and you will as surely succeed in Life as that cause produces effect."—Abbott Lawrence.

MODEL COMMERCIAL COLLEGE.

THIS NOTICE IS INTENDED TO GIVE FULL INFORmation of the course of Study and operation of the Pacific National Business School, San Francisco,

We respectfully solicit from Young Men and Men of Middle Age, who would succeed in business, and Parents and Guardians who have Boys to educate, an examination of our system of Practical, Useful Education, the superiority it possesses over every other institution of learning on this coast.

This School claims superiority and great merit over other institutions professing to teach the Commercial branches, by its system of combining THEORY and PRACTICE, on the London Corn Exchange principle, it being done in no other School on this coast.

COURSE OF STUDY.

The plan adopted in teaching combines PRACTICE with THEORY; instead of being confined to Text Books, the pupils are exercised in making original entries of every-day business transactions; Journalizing, posting, balancing accounts, opening and closing a great variety of different sets of Books, both for individual and partnership business, where the business has been prosperous or adverse, thus qualifying the student for entering into the practical duties of the accountant in any kind of business.

THE COURSE OF INSTRUCTION

Consists of Double-Entry Book-keeping, embracing Wholesale, Retail, Commission, Manufacturing, Banking, Steamboating, Railroading, Individual, Partnership, Joint Stock, Compound, Company, Mining, Ranching, Farming, etc. In the routine of practical instruction the pupil becomes familiarized with changing books from single to double entry, changing stock books to partnership, and every form and principle known in well regulated establishments.

THERE WILL BE NO VACATION,

Each pupil receives individual instruction, and persons can therefore enter at any time.

TERMS.

Scholarships are issued which give the scholar the privilege of reviewing the course at any future time, free of charge, for SIXTY DOLLARS, with a deduction of FIVE DOLLARS when two enter from the same family or the same place at the same time. When four enter at the same time from the same place, TEN DOLLARS will be deducted from each scholarship.

THE TIME REQUIRED

To complete the course depends somewhat upon the previous education and ability of the student, usually from ten to sixteen weeks, scholarships granting the holders the privilege of completing the course regardless of time.

A common school education is all that is necessary to enter the course of this College advantageously.

For further particulars, call at the College, corner of Montgomery and California streets, or address
M. K. LAUDENSLAGER,
1 President Pacific National Business College.

FRENCH COLLEGE,
Corner Mason and Jackson Streets,
Principal.....Prof. J. MIBIELLE.

THE CLASSES OF THIS ESTABLISHMENT ARE opened since the 3d inst., and the select and attending scholars receive a solid instruction proportionate to their age and mental facilities.

The programme includes all the branches of tuition fitted for children from 6 to 12 years of age, as the first step for a higher teaching.

The English, French and Spanish Languages are taught practically and theoretically, by competent and special teachers.

Boarders can be accommodated in the establishment, where they will find the comforts and care of a home.

An evening class of French and Spanish is also open for young men every other day, at 7 o'clock, P. M. Call on the Principal from 9 A. M. to 12 M. 1

DAGUERREAN GALLERY INTEREST.

The owner of one of the best Daguerrean Galleries in our State, with the best run of business, with fine work room, handsomely furnished, display rooms and everything to make it attractive and profitable, desires to find a partner, an active partner, a real working partner, for the business department, so that the business, which is constantly increasing, may be retained, and another and important branch added to it, which the present proprietor cannot do without a good practical, working, business man.

For particulars, and all appertaining to it, address Editor Farmer. All Letters confidential. 1

MAN WANTED TO GROW SUGAR BEET.

A WEALTHY MAN, DESIROUS OF TESTING THE capabilities of our climate and soil for the cultivation of the Sugar Beet, and the manufacture of Sugar, desires to find a man who has had experience in growing the Sugar Beet for this purpose. To such a person a liberal offer will be made, and no other person need apply than one who has knowledge and experience.

Address or call on the Editor of the California Farmer. 1

A CARD
TO OUR PATRONS.

'Tis said *competition* is the life of trade. Fair, honorable competition, we never fear; but when *our name*, or the *same name*, is used to deceive others or injure our business, it becomes our duty to notify our patrons and friends that such is the case.

We were recently called upon by a person in this city, to supply a large order for more than One Thousand pounds of Seed of various kind, and also for several housand Seed Bags—these were said to be for a store or stores in the country.

It soon came to our knowledge that these Seeds were to establish a Seed Store on Washington Street, in this city, under the same *Sir*-name as ourselves. The secret and unfair manner in which these Seeds and Bags were attempted to be procured of us, was so singular and so unfair, that we had just suspicion of wrong intent. We soon learned that *falsehood* was told us, and we refused to supply the order, knowing that no other establishment on the coast had laid in the stock of Seeds as ourselves, and having every reason to presume that our name will be used in the sale of Seeds elsewhere, we feel it a duty to remind our Customers and Purchasers of Seeds everywhere, that they should all be careful in sending their orders, and to be particular in their directions.

We have been established nearly ten years in the Seed Business, and we trust that by the extent and system with which our business has been conducted, we have justly earned the reputation of a regular Seedsman.

We import our Seeds direct from the best houses in Europe and the Eastern Growers, we have the most extensive stock in California by a large extent, and purchasers need only call at our establishment to satisfy themselves that our business is so conducted as to meet their approbation and business.

We return our thanks to our many Customers for their liberal support for these many years past, and trust a continuance for many years to come.

We would remind all our Friends and Customers the necessity of being particular and to address all letters and orders to

Small Homestead Wanted.

A SMALL, NEAT AND PRETTY HOMESTEAD is wanted, within ten miles of this city. The amount of land must not exceed ten acres, and it must be good land and now in cultivation. The advertiser has a good Farm in Humboldt County which he would like to exchange if possible, or make the next best terms possible. Any person having such a place can hear of a purchaser by leaving a note addressed "J. L. B.," Farmer Office. 14

Home Miscellany.

MARYLAND IS FREE.

[The following is a thrilling "Freedom Song," recently issued by Horace Waters, Music Publishers, of New York. The words are by the Rev. George Lansing Taylor; Music—by Miss Fortune. These words and song are the key-note to the songs that will soon be sung in every State in our glorious Union. We received complimentary copies of the above from the publishers.]

MARYLAND! Maryland! beautiful Maryland!
Lying in light to the sun and the sea!
Shout from the mountain-sides!
Sing where each river glides!
Thunder with ocean's tides!
Maryland's free!
Maryland! Maryland! beautiful Maryland!
Thank God for Maryland! Maryland's free!

Maryland! Maryland! oft-chastened Maryland!
Long has oppression hung dark over thee!
Now every fetter breaks,
Now thy new life awakes,
Shout till the welkin shakes,
Maryland's Free!
Maryland! Maryland! etc.

Maryland! Maryland! conquering Maryland!
Blest are the patriots thy glory that see!
Sing for thy foes are dead!
Drown'd in war's billows red!
Thou art to Canaan led!
Maryland's free!
Maryland! Maryland! etc.

Maryland! Maryland! glorified Maryland!
Sanctified! Sealed with the blood of the free;
Now in thy streets no more,
Purified Baltimore,
New England's blood shall pour!
Baltimore's free!
Baltimore! Baltimore! Blood-redeem'd Baltimore!
Praise God for Baltimore! *Baltimore's free!*

Maryland! Maryland! penitent Maryland!
First from pollution and peril to flee!
First fruits of them that slept!
Where thy dark children wept
Freedom's bright robe hath swept!
Now they are free!
Weep for joy, Maryland! sing for joy, Maryland!
Shout for joy, Maryland! *Now they are free!*

Maryland! Maryland! Not alone, Maryland,
Sounds for *thy* ransom the sweet jubilee!
Millions that hear of it,
Awed by the fear off it!
Fired by the cheer of it!
Soon shall be free!
All the great southern land, down to fair Mexic's strand
Down to the Isthmus band, soon shall be free!

BLESS ME FATHER, LET ME GO.

[We give the following Patriotic Song—*a California Song.* Words by Carrie Carlton; Music—by George T. Evans. This New Song evinces the true patriotic fire that burns in the hearts of the Sons that will soon put down Rebellion and restore peace, joy, and prosperity again, to our blood-stained land. May Heaven grant that we may soon have the New Song of "Peace on Earth and Good Will to Man," when our whole country shall be again united and happy—One Flag, One Country, One Heart, for all.]

FATHER, hark! the drums are beating,
Lowly swells the bugle's notes,
And I long to join my comrades,
Where our starry banner floats.
'Tis my country calls me, Father,
And you've told me oft, you know,
Next to God, to love my country,
Bless me Father, let me go.

Chorus—Bless me, Father, let me go,
Bless me, Father, let me go,
Next to God, to love my country,
Bless me, Father, let me go.

I had thought to stay beside you,
While your life's sun low declined,
Thought to shield your white locks, Father,
From misfortune's chilling wind,
But my country's voice is calling,
And my arm seems nerved with steel,
'Tis your Willie, kneels before you,
Bless me, Father, while I kneel,
'Tis your Willie, kneels before you,
Bless me, Father, while I kneel.

Chorus—Bless me, Father, etc.

Let me take your blessing with me,
As I leave the cottage door,
For there's many a brave young soldier,
Never sees his hearth-stone more,
On the red field, wounded, dying,
It may be my latest joy,
Hark! the bugle's lowly calling,
Bless me, Father, bless your boy,
Hark! the bugle's lowly calling,
Bless me, Father, bless me, Father, let me go.

Chorus—Bless me, Father, etc.

Contrivance Proves Design.

[We give the annexed brief Essay from the "Wreath," the periodical published by the Young Lady Pupils of Miss Lamond's College, on Silver street, in this city. We commend such production, from a College of this kind. Far better will it be for our world when the minds of the young girls are trained to such studies. For in the contemplation of noble thoughts, like these, they are preparing themselves to take the place of teachers of *men*, hereafter. Our motto has ever been "Educate, wisely, the females of the land, for when the *Mother* in a family, is rightly educated, there will be no fear as to the Boys." Are not the mothers of the present generation to be the teachers of the men who are to wield the destinies of the great Pacific Coast, in the coming years of its greatness.]

All works, from those produced by the insect and the lower orders of animals to the many curious structures of man, prove design; but our interest in the works must not lead us to forget that it was the hand of God which gave, both to man and animals, power to produce them and to prove in the highest degree that wherever there is adaptation of means to an end there exists design. We must examine His mighty works: It was His grand design, which gave to man his reasoning powers, and to the lower animals instinct, suited to the varied exigencies of their situation.

The spider's web, with its numberless mystic windings, the fine, silky threads crossing and recrossing until the structure is of the desired strength; the ant-hill, the beaver's dam, the comb of the bee, composed of so many little cells, each arranged at the precise angle, which has been determined by difficult mathematical calculation to necessitate the least possible expenditure of space and material, the whole divided into apartments appropriated to some particular purpose—all show design in their construction.

Among the structures made by man, which clearly indicate an intelligent designing author, we find the steam engine, which consists of the barrel in which the piston is moved up and down by steam entering from pipes connected with the boiler. In these pipes are valves which regulated the quantity of steam and which are so arranged that the governor affects them in such a manner that, when too much steam is entering the boiler, it closes the valves, thereby narrowing the passage and lessening the supply of steam, and that, when there is too little, it opens them. On the surface of the water in the boiler is a float which when the water gets too low opens a valve, thus allowing more to enter; also in the boiler is placed a safety-valve which allows the surplus heat to escape, thereby preventing explosion. To the piston is attached a beam which is connected to a crank and wheel and transmits the motion and force to remote machinery. This machine clearly denotes that design must have existed in the contriver's mind before he made it. Its every part shows design, for each is adapted to effect some particular purpose, but it is where they are combined to form a whole, when we observe the wonderful results both in land and sea which are achieved by its agency, that we feel that it is indeed worthy to be called the "king of machines," and that the grandeur of the design breaks upon us.

Glance for a moment at the organism of the fish, in which design immediately forces itself upon the mind; see how perfectly every part is adapted to the mode of life of the animal and to the element which it inhabits. The specific gravity of its body, which is nearly the same as that of the water, renders it buoyant in that element, and its wedge shape both before and behind offers less resistance in swimming than any other animal, being very convex so as to enable the fish to see as perfectly in the water as man does in the air, show design.

But nothing in art, not even the finest piece of mechanism, displays as great design as the frame of man. The varied movements of the muscles, the act of respiration; the seat of life, the heart; and the blood, coursing through the veins and arteries, fill us with awe for the Grand Designer and makes us feel that man is "fearfully and wonderfully made."

When we look at our world we see everything contrived to give man happiness and comfort; nature, with her sturdy trees and delicately-tinted flowers, her minerals and shells; the blue sky, studded with its myriads of stars; the fountains and rills; the rivers and the mighty ocean; all indicate the designing hand of a great intelligent and beneficent Creator.

But these examples seem mere trifles in comparison with the grand design of God in forming the Universe, with the countless worlds revolving in space, each governed by a few simple laws, but throughout all displaying the power and wisdom of the Creator. We can say, O God, "How manifold are Thy works! in wisdom hast Thou made them all." HELIOTROPE.

Moral Gems.

If thou hide thy treasure upon the earth, how canst thou expect to find it in Heaven? Canst thou hope to be a sharer where thou hast reposed no stock? What thou givest to God's glory, and thy soul's health, is laid up in Heaven, and is only thine; that alone which thou exchangest or hidest upon the earth is lost.

If any hard affliction hath surprised thee, cast one eye upon the hand that sent it, and the other upon the sin that brought it; if thou thankfully receive the message, he that sent it will dicharge the messenger.

A good husband will not deny his wife anything suitable within his circumstances. It adds to his pleasures to see her happy, and he does all he can to promote it. The good wife also is not only a prudent manager of the domestic affairs of her husband, but by her advice and conduct she increases his joys in prosperity, and lessens his cares and sorrows in adversity. She is likewise the careful preserver of his health, and his kind and sympathetic attendant in sickness. Thus we see the superior advantages and pleasures of matrimony when two suitable persons are united as partners for life.

Remember that if thou marry for beauty, thou bindest thyself all thy life for that which perchance will not last or please thee one year; and when thou hast it, it will be to thee of no price at all; for the desire dieth when it is attained, and the affection perisheth when it is satisfied.

HINTS TO LADIES JUST ENTERED INTO THE HAPPY STATE.—As soon as the rites are consummated, shake off the veil of deceit which has so disguised you from your *lover*, and show your husband all your mental deformity. Having shown him the bright side of your character while you were ensnaring him, show what a fool he was, by giving him a specimen of your darkest traits in a batch. He will be certain to feel Lord Bacon's seven years as soon as prophesied. Believe that now life has no cares. With your maidenhood you shook them off, and took up indolent pleasures and wretched selfishness. Your husband is the scapegoat of all your sins and peccadilloes, and is slightly responsible for them. Do not neglect these privileges. Your principal business now is to adorn yourself. If you are handsome, so much the better will the richest clothes become you; or if plain, so much the more need of help to beauty. Never hesitate about obtaining any article on account of the expense—that is but a small affair—get whatever becomes, and as often as the fashions change, especially if your husband has an account at the store. The size of his income is of the least possible interest to you, although it may result in depriving you of your spoons.

Items from Home of the Free.

During the latter part of May and fore part of June, we were preparing the ground and planting corn, beans, and potatoes, and sowing oats and flaxseed—the work mostly done by girls. May 30th, two of the girls and their father sowed 26 bushels of flaxseed on about 30 acres—the girls sowing as much as their father. The same day three other girls drilled in parsnip and carrot seed. June 6th, one of the girls sowed in twenty-six and a half bushels of oats on thirteen acres, working eight hours. This was a hard day's work for her, but she sowed oats again the next day. June 13th, two of the girls, the youngest not quite sixteen years old, walked sixteen miles before noon. As I compare the vigorous health, strength and independence of these girls who have worked much of the time out of doors for several years, with the opposite qualities so common among the young women of America, my heart goes out in an earnest wish that many, yes, all others might enjoy the same advantages of physical development and education. What changes would be wrought in society, if women were as healthy, and strong in proportion to their weight, and as independent and as able to earn a comfortable living and acquire a competence as men are. These changes would be far-reaching and wide, and would all tend to human improvement and happiness.

We would like to find one or more persons with from five to fifteen thousand dollars capital to join us in this enterprise, to enable us to put up more buildings, make other improvements, and prepare for more extended operations. We cannot guarantee very large profits, but we think the enterprise will be perfectly safe, and will doubless pay fair interest. And what is more, we know of no way in which the same amount of money could be used to do so much good to mankind as in this.

There are many health institutions of various kinds scattered over the country for curing invalids, but they all practically ignore labor, especially out of doors, as a means of cure. True, they have movement cures, gymnastics, etc., and these are well enough in their place. But there is one disadvantage in them. They are usually engaged in solely as remedial measures, and the mind is constantly directed to the bad symptoms and diseased conditions to be overcome by the exercise, and recovery is hindered thereby. But let one labor, where there is strength sufficient, in company with others and under proper conditions, and the mind becomes interested in the work, and is drawn away from the unpleasant bodily conditions, and the vital forces are left to do their remedial work and build up the system undisturbed by mental irritation. Both man and woman were made to earn their bread in the sweat of the brow, and given organizations adapted to this purpose. This is the law of their being, and any violation of this law results in sickness and misery. And by obeying this with the rest of nature's laws, are health and happiness to be restored.

Nowhere are children of both sexes systematically trained to outdoor labor on principle, as a part of their education, and as a means of securing health and independence for a life of usefulness. Here we propose to do it, and who is ready to help us? Where is the philanthropist who is ready to bless mankind by using his money in establishing such a school? Let him speak.

Life Pictures.

Thousands go daily to the picture galleries and gazing with admiration upon the works of art—of man—and yet pass carelessly, heedlessly by the glorious works of Nature—of God. We do not speak only of the lovely picturesque scenery of green fields—of towering mountains—and sparkling lakes—or of the bright and glorious skies—for, soul-stirring as they are, it seem impossible that there are those so dead, so insensible, as not to have gazed almost awe-stricken at the sight. There are other pictures in nature—as beautiful, as touching: for instance, What picture is more beautiful than a young and blushing bride, looking up so fondly, so confidingly into her husband's face? With his protecting arm around her, fear is a stranger to her breast; and behold! he, the strong, stern man, how changed when near the young and delicate creature! See the sweet smile that plays around his lips; the love beaming in his eyes; and in what gentle tones he speaks to her!

Now again the scene changes: She is a young mother. What picture more beautiful than that? Behold! there she sits lovely as ever with her babe, her first-born, upon her knee; see how fondly, how proudly her eye rests upon him. What artist could give that look? Now she looks up inquiringly in her husband's face. He smiles on her and on her boy. Mark the scene! Note it well. Can we describe it? No.

Now there is still another added to the group—a fair-haired little girl. She is frightened; but now her brother (still almost a baby) is standing by her side, and tells her, in his pretty baby talk, "Don't be frightened, doggy won't bite." Already the manly spirit is displayed in protecting his weak and fragile sister. Now the little one puts out her hand in confidence and pats the huge animal. Again we see woman's trusting nature so clearly developed: her *big* brother says it will not bite, and so assured, she has no fear. Is not that a sweet picture?

Then again: We see a young girl watching over the sick bed of some dear one. How tenderly she raises the head; how gently she smooths the pillow; how quietly she moves about the room, fearing lest she disturb the sleeper. Does woman ever look more lovely than when hovering, like a guardian angel, over the couch of the distressed? Now again we see the affectionate son leading the steps of an aged parent, and think, 'twas he who first led the little tottering footsteps. Ah, well! both pleasing pictures, and yet sad; 'tis sad, to think, that when they enter on life, how many temptations they must pass through; how often they will stand upon the very edge of a yawning precipice, and should but one slight stone give way, they are lost! Then, 'tis sad to think that they have nearly reached the end of their long journey, and now they totter to the quiet grave!

Here, again, is a touching picture: An aged couple who, united in youth, having roamed together through this weary world, shared joys and sorrows, and now walk hand in hand toward the silent tomb!

VALUE OF AMUSEMENT.—The world must be amused. It is entirely false reasoning to suppose that any human being can devote himself exclusively to labor of any description. It will not do. Rest alone will not give him adequate relief. He must be amused. He must enjoy himself. He must laugh, sing, dance, eat, drink and be merry. He must chat with his friends, exercise his mind in exciting, gentle emotions, and his body in agreeable demonstrations of activity. The constitution of the human system demands this. It exacts variety of influences and motion. It will not remain in health if it cannot obtain that variety. Too much merriment affects it as injuriously as too much sadness; too much relaxation is as pernicious as none at all. But, to the industrious toiler, the sunshine of the heart is just as indispensable as the material sunshine is to the flower, but soon pine away and die if deprived of it.

Tobacco Raising and Grape Growing.

A MAN OF EXPERIENCE IN TOBACCO RAISing would like to enter into contract with some good man who has proper land and good location, and will have suitable buildings erected for that business. The advertiser has a thorough knowledge of the business in all its branches and can make it profitable to both. He is also familiar with Grape Growing, and can lay out a Vineyard and take care of it. He feels confident he can give satisfaction. A letter addressed to "Tobacco Grower," and left at the Farmer Office will be attended to. 17

Cashmere Goat.

A SPLENDID HALF-BLOOD CASHMERE GOAT can be had at a fair price, or will be leased on fair terms on application to the Editor of Farmer. 4

PATENT RIGHTS FOR SALE.

THE FOLLOWING PATENT RIGHTS OF NEW AND valuable inventions (of which we have models to show their value) are now offered for the States of California and Oregon, and Utah and Washington Territories.

NO. 1. THE MECHANIC'S SPIRIT LEVEL.

Patented September 13, 1859.

This Implement will be of great value to Contractors and Builders, being one of the most valuable inventions yet out. Builders will do well to examine the model.

NO. 2. IMPROVED CLOTHES REEL AND BAR.

Patented January, 3, 1860.

This valuable domestic piece of furniture can be used in the Laundry, the Kitchen, the Nursery, or Chamber, and can be made plain or ornamental; standing in the same relation as a piece of important furniture as does Wheeler & Wilson's Sewing Machines, neat when used and ornamental when not in use.

NO. 3. A CORN CULTIVATOR.

With this implement the soil is first thoroughly plowed and deeply pulverized, and on the return it smoothly and perfectly hills up and harrows the ground between the rows. A very new and valuable implement.

NO. 4. A MUSKETO BAR.

This will be much wanted in California. It is simple in its contrivance, perfect in its working, and can be affixed very cheap to all styles of bedsteads. Hotels, public houses and private families will find it a useful invention.

NO. 5. HYDE'S PATENT POST-DRIVER.

A most excellent labor and money-saving machine, for which we offer rights.

NO. 6. SEED-SOWER.

This is a new inventions, and one of great importance to all who sow grain, or any garden seeds. The working model can be seen at the Farmer's Reading-room.

Holding the rights to all these new inventions, we invite the public to call and see the models. All persons who may be desirous to purchase either County, City, Town, or Individual Rights, can do so on application to

ELECTRICITY

THE

GREAT REMEDIAL AGENT.

Electricity as a Remedial Agent has, until recently, been but little known. An Electric Battery has been a terror from childhood up because a little Battery gave a "start," and the thunder storm killed by lightning. Now it is better understood, and is and will be the sovereign remedy for many diseases heretofore considered incurable. The following series of articles and statistics, with facts and proof of the virtue of Electricity are worthy of attention. When it was promulgated that disease could be entirely eradicated from the system without the use of poisonous drugs, the unthinking, or those who do not look deeply into cause and effect, scouted the assertion as chimerical, and adduced strong evidence of its utter impossibility. Long articles, replete with arguments, seemingly unanswerable, of the position that only through the digestive system could the blood be purged of the accumulations of the poisons which constitute disease. A great cry went up from the interested in the continued supremacy of the old system of one poison to cure another, that Electricity, as a Curative Agent, had been tried and had proved to be of but little if any value—thinking, poor souls, the world of science stood at the same point it occupied one hundred years ago. They were wrong, while those old fogies were content if they cured one in every five patients there were those who were diving into the science of Electricity, and finally it was discovered that the trouble was in the instruments used. From that time to the present, improvements have rapidly advanced, until every disease in the catalogue of human ills has been either cured altogether, or checked so as to enable the sufferer to seek those changes of climate which ultimately perform a perfect cure. Diseases hitherto considered incurable, have been cured, and those diseases which took months, and even years, to cure by medical process, are now cured in a few weeks; and all by the *Improved Instruments* of Dr. J. H. Josselyn, Resident Physician at the Electropathic Institute, 645 Washington street, San Francisco. It is astonishing to see the number of patients and diversity of diseases that have been relieved by the Electropathic System. From early morn till late at night, his instrument is engaged, imparting health and strength to all who have the good fortune to obtain his services.

The charges, too, are not as heavy as by the old system, besides there is no medicine to pay for, let alone the unpleasantness of swallowing the nauseous stuff. During the time the Institute has been in operation, there has been more benefit to the human family derived from the system than from all other systems combined during the same period. Among the most troublesome diseases to which Californians have been exposed is Rheumatism; none has given the honorable practitioner more trouble to relieve, and no one has pretended to cure (if we except known empirics) permanently. But this subtle disease gives way before the Electropathic System in a very short time, enabling the sufferer to go about his business without pain or the fear and dread of a relapse. And so with most other diseases, considered incurable. We mention Rheumatism because of its abundance, but we could enumerate many other diseases full as troublesome, and some far more fatal in their results.

We allude to that kind of disease paraded by quacks in the journals of the day, a trouble which was never cured by medicine, only a little strength imparted by the use of tonics. The poor victim is kept taking medicines and paying for them until his last dollar is gone and then, as soon as he undertakes to work to obtain more funds, the trouble comes back in all its loathsomeness. To this disease Electropathy is peculiarly applicable, its action being upon the spermatic nerve, strengthens the secretory organs, and at the same time, creating an equilibrium in the system, thereby preventing an elapse.

We dwell upon this disease because it is the bane of the youth of California; and one about which there has been more deception used than all others put together. It is not necessary to enumerate all the diseases in the catalogue, for that would be occupying space to no purpose. Every disease has been under treatment by this system, and there are none but have received benefit either in this State or at the East.

There are at present very few Instruments in the world that can be depended upon. A good Instrument costs very heavy, and cannot be purchased unless ordered, and there are very few who are able to manufacture them, for want of knowledge of the healing principle. The only Instrument to be depended upon in this State is at the Electropathic Institute.

Connected with this system are the renowned Electro-Magnetic Baths. Here let us caution the public against the numerous imposters in the bathing line. The pure Magnetic Bath is one of the most effective aids in the removal of disease from the system, but if given at the wrong time is likely to aggravate trouble, and cases have been known where the patient has been injured so badly as to require months to remove the injury. Persons in quest of this Bath should be careful and not apply to a place where there is no physician to judge of the necessity of the remedy. In fact the only place where they can be obtained in all their purity is at the Institute, where the Resident Physician will always be happy to examine and see that they are not unseasonably administered, and if not necessary, advise the requisite remedy.

To Females,

the Directors would say, Electropathy is particularly applicable to your delicate and fragile systems, and to the numerous troublesome and painful diseases to which you are liable. Should you be irregular, a few treatments will restore the functions to the proper state without pain or inconvenience. Should you be weak and enfeebled, either general or local, this system imparts strength and vitality, making the recipient feel buoyant and youthful, where before they were languid and unable to enjoy the pleasures of life. One great blessing connected with Electropathy is, it purifies the system so thoroughly that it beautifies the complexion, making the coarse and freckled skin as pure and fair as possible, giving the patient a fresh and healthful look.

To the nervous, the Directors would say, that you can be entirely relieved from those dreadful feelings of evil foreboding and your system strengthened so that nothing can disturb the current of your life. Several cases of insanity, arising from a disarrangement of the nervous system, have been permanently cured by this system. The Directors, in issuing this pamphlet, do it in the hope that it may be the means of awakening the public, who have not studied into such things, to a sense of their duties, and if possible prevent those who have the care of a rising generation from poisoning their young charges with vile drugs, thereby entailing upon them troubles which in after life may cause them to curse the origin. Also, that those in need of remedial agents may know where they can find them without resorting to taking the thousand and one poisonous nostrums that are continually palmed off as sovereign panaceas for all the ills of humanity. Avoid them all, they are snares set to rob you, and to your bodily injury at the same time. The following is a list of the cases which have been successfully treated by the *Electropathic System*, at the Institute, during the first four years of its establishment. The record is good, and challenges admiration of the world:

Name of Disease.	No.
Rheumatism	1580
Neuralgia	1492
Dyspepsia	1467
General Debility	1410
Fever and Ague	1262
Dumb Ague	1210
Bronchial Affections	1106
Asthma	1049
Female Irregularities	1022
Mercurial	938
Scrofula—long standing	922
Paralysis	890
Disease of the Eye	832
Catarrh in the head	705
Catarrh in the lungs	608
Liver complaints	600
Incipient Consumption	582
Panama Fever	563
Deafness—total and partial	480
Mental Derangement	471
All other—and among which is almost every nameable disease	9,186
Total	21,373

The above shows what can be accomplished by combined energy when it has truth and science upon its side. The Electropathic Institute was started amid the cry of interested charlatans, who used all the power their riches and the prejudices of the public gave them to prevent its success. It has risen to a position that is beyond their baffled malice, and will be honored in the scientific world when they are forgotten, or only remembered for their crimes and impositions. A thinking public are fast consigning them to that oblivion their works merit. Let them go, they will not be missed.

Persons seeking remedial assistance, may wish to know something of the system by which diseases are so rapidly removed from the body. Electricity is a fluid of so subtle a nature that it can only be studied by its results. We know by its action it forces everything of a foreign nature in the body from the center to the surface, by its energy, while the vitality which it imparts fills up the vacuum, preventing thereby the subtle poisons from returning to the hitherto diseased parts; and here let it be understood that the Bath should never be administered until the disease has been forced to the surface, except, perhaps, in cases of cold where fever has not set in. Its action upon mercurial diseases is peculiar. The best authorities are of the opinion that it liquifies the mercury, which, when in a liquid state, by its own specific gravity forces itself out of the body. This result has been arrived at by testing the water after an Electro Magnetic Bath. After such tests have been found in the water the patient is not troubled any more with those pains peculiar to the diseases. In all other cases it forces to the surface and is washed off by the bath. The whole system in its application is a *luxury*, there being no pain or inconvenience attending upon it, but the reverse is the case, being one continued pleasure all the time. Try it, you that are suffering either from disease or the injudicious use of poisonous drugs, and you will be made to rejoice that you have had the courage to strike out from the beaten path.

Below are a few certificates from patients that have been cured at the Institute:

CERTIFICATES OF CURES.

The undersigned takes this method of acknowledging publicly the benefits he received from the treatment applied to him at the Electropathic Institute, while suffering under a terrible infliction:

This is to certify that I have been under Electropathic treatment at the Electropathic Institute, 645 Washington street. When I applied to Dr. Josselyn I was cramped up with rheumatism, and also had the coast ague. So bad was I that, without relief, I don't think I could have lived more than one week. The Doctor, with his instrument, relieved me the first treatment from all pain, and perfectly cured me of all I cordially recommend all afflicted to patronize this Institute for it is truly a blessing to the afflicted, and the operation is very pleasant. I wish to thus publicly thank Dr. Josselyn for his care and sympathy.

JOSEPH SEGER, of Bolinas Bay.

September 19, 1860.
State of California, City and County of San Francisco—ss.
Subscribed and sworn to before me, this 19th day of Sept., A. D, 1860.
P. BARRY, Notary Public.

SACRAMENTO, Oct. 10, 1860.

DR. JOSSELYN—Dear and Honored Sir: You requested me to let you know how I feel after being at home three weeks. Well, sir, I have been here a little over two weeks and there is no return of that very unpleasant trouble. My sleep is sound, and there is no disturbance of the regular laws of nature. I feel as strong as I ever did before bad habits had weakened my system. Not only is the general debility entirely disappeared, but the local trouble has gone. I feel so strong that there is no fear of its return. Considering that you only took one month to cure a disorder of seven years standing, I think your system almost miraculous. Accept my sincere thanks, and publish this if you please. I have sworn to it, as you will see. C. BOWMAN.

State of California, County of Sacramento—ss.
Subscribed and sworn to before me, this tenth day of Oct., A. D., 1860. CHAS. HART, Notary Public.

HORNITAS, Nov. 1st, 1860.

Well, Doctor, I am at home, and have been to work in the water for several days, and there is no return of the Rheumatism, as I call it; and Mercurial pains as you state them to be. I feel as gay as a lark, no pain or bad feelings, no stiffness, but perfectly well, and all done by you in three weeks, without one drop of medicine. You had hard work to make me believe before you commenced that you would cure me, but now I find it very easy to believe. Although my friends look rather incredulous, but they cannot doubt my sober earnestness. Doctor, you have my thanks, and I will benefit you all I can, by spreading your fame up in these parts.

Respectfully yours, GEO. PERKINSON, Jr.

To J. H. Josselyn, M. D., Resident Physician, at the Electropathic Institute

NEVADA, Nov. 6, 1860.

DEAR DOCTOR: Pursuant to agreement, upon my arrival, I sit down to pen you a few lines in acknowledgement of the great service you have rendered me, in relieving me of that painful case of neuralgia and rheumatism. When I look back and see the gallons of medicines I have swallowed to no purpose, and then to think how soon you cured me, I am astonished. You were only twelve days performing a cure of the trouble, for which I had taken medicine over six months. Dear Doctor, if you could see the wonder exhibited by my friends, who can hardly believe that a cure was performed without medicines, but here I have been cured, and I have not taken a drop of medicine from you, nor from any one else, while being treated by your splendid Instrument I shall try to show my gratitude by sending every sick man I come across to you. Yours, till death,

FRANCIS GARLAND.

To J. H. Josselyn, M. D., Resident Physician, Electropathic Institute.
State of California, County of Nevada—ss.
Subscribed and sworn to before me, this eighth day of Nov., A. D., 1860.
F. SPAULDING, Notary Public.

YREKA, Nov. 10th, 1860.

DR. JOSSELYN—Dear Sir: Your letter, dated October 16th, is before me. You wish to know how my bronchial troubles are. Now, Doctor, that looks a great deal like a joke. I once had such an affection of several years' standing, but thanks to your natural mode of treating disease, it has gone to be numbered with the things of the past. Since my return I have not felt the slightest trouble from it. When you pronounced me well I did not expect to ever hear from it again. Any one who sits under treatment of that *Improved Instrument* of yours will have the same feelings. It imparts vitality to the system so rapidly that confidence is at once established. I have to thank you that you did not refuse to treat me because I could not pay you the whole of your reasonable charge; inclosed is the balance due you, and God bless you for the kind treatment I received at your hands.

Yours, ever grateful, WM. GARDNER.

State of California, County of Siskiyou—ss.
Subscribed and sworn to before me, this tenth day of Nov., A. D., 1860.
B. F. WELLITS, Notary Public.

This is to certify that I, the undersigned, was troubled with dumb ague accompanied with rheumatism, very badly. My disease was taken in Washoe. After having exhausted medicines without benefit, I applied to Dr. Josselyn, at the Electropathic Institute, on the first day of November. After taking twenty treatments with his Improved Electropathic Instrument I am perfectly cured, having been entirely relieved of all pain or inconvenience. I feel as strong as I ever did when in the best of health. I cheerfully recommend all afflicted to his care, as being the best physician I ever became acquainted with. One great advantage, he uses no medicines, but cures by a process which is perfectly natural. The time occupied in my case was thirteen days. D. O. HARRA.

November 14th, 1860.
State of California, City and County of San Francisco—ss.
Personally appeared before me, D. O. Harra, and subscribed and sworn to the above certificate, on this fourteenth day of November, A. D., 1860.
P. BARRY, Notary Public.

SAN FRANCISCO, Aug. 3d, 1861.

To the Directors and Resident Physician of the Electropathic Institute.

SIRS: You requested of me a certificate of the cure you performed in my case. Below I append it:

This is to certify that I was troubled with a swelling which commenced in my ankles, and gradually extended upward until it effected my whole body. I sought the best medical aid in New York and Boston, and they all pronounced it dropsy. Hoping to retrieve my health, I visited California in February last. I consulted the Resident Physician at the Electropathic Institute; and now, after five months of treatment, and waiting to see its effects, I am pronounced well by competent judges. It did not take but three months of treatment to cure me, but I waited to see that it did not return. I feel perfectly assured from what I saw while under treatment that Electricity as applied at the Institute will cure any disease to which the human family is liable.

Now, gentlemen, you can make what use you please of this certificate. With my thanks to the Resident Physician for his kind attention, I subscribe myself,

Your thankful patient,
MRS. C. A. CARLTON

Opinions of the Press.

The advantages of electricity as a remedial agent, are universally admitted by the medical and scientific world. It requires, however, experienced skill to apply this remedy efficiently, and this skill of application is possessed in an eminent degree by Dr. J. H. Josselyn, of the San Francisco Electropathic Institute. Particulars of his method of practice can be obtained by reference to his advertisement in another column. The Doctor is well known to us as a scientific gentleman, and an ardent devotee to his profession. He is no pretender, but has conferred incalculable benefit on those who were so fortunate as to seek relief at his hands. For those who desire speedy and permanent relief from the rheumatic pains, so prevalent in this region, we can recommend no surer remedy, than a visit to Dr. Josselyn at his rooms in San Francisco, No. 645 Washington street.—[Placerville Republican.

ARE YOU SICK?—We wish to say a word to those that are sick. We have in this city an institution known as the Electropathic Institute, situated at 645 Washington street. The establishment is under the charge of Dr. J. H. Josselyn, a physician who has no superior in the city. He has been in charge of the Electropathic Institute for several years, and has been uniformly successful in his treatment of the numerous patients that have placed themselves under his charge. The Electric treatment will cure many diseases that cannot be reached by any other mode. Dr. Josselyn gives his personal attention to all of his patients, and is always ready to give advice to those that may call upon him. His charges are very moderate, and we cannot do the sick a greater favor than to recommend them to call on him before placing themselves in charge of another.—[San Francisco Daily Journal.

We call the attention of our readers to the advertisement of Dr. Josselyn's Electropathic Institute. Voluntary and unsolicited we make the following statement, proving its benefit effects, particularly in rheumatic cases. Some months since we were on an editorial trip, visiting the mountains. The stage-coach upset, and landed all the passengers, including the writer, below in the valley, where the Deer Creek overflowed by receiving the additional material, extraneous to its usual contents. For some hours exposed in our wet clothes, to night wind and weather, we soon felt the effects of the accident in the mountains—pains in the back, hip, and legs; so much so, that for weeks we hardly could walk. Treatments of all kinds were applied but without avail until our attention was called to the Electro-galvanic Baths and appliances of the above Institute. Thank God, after two weeks we have been fully restored, and enjoy now the free use of our limbs and body, as fully as previous to the involuntary bath in Deer Creek.—[Dr. H. SIEN.—Ed True Pacific Messenger.

ELECTROPATHY.—Electricity has long been classed among the most effective medical agents. It possesses great advantages over the systems of therapeutics heretofore relied upon as it reaches more certainly the seat of disease, especially in nervous or rheumatic complaints. The Electropathic Institute, No. 645 Washington street, under the charge of its able Resident Physician, Dr. J. H. Josselyn, has attained a well merited celebrity for the many cases which have resulted favorably from the skillful application of this invaluable remedy.—[Daily Morning Star.

A GOOD INSTITUTION FOR THE SICK.—One of the very best places in the city for the care of the sick is at the Electropathic Institute, 645 Washington street. The establishment is under the charge of Dr. J. H. Josselyn, a physician of great experience, and no one can do the sick no greater favor than to recommend them to give the Electropathic Institute a trial.—[Weekly Journal. 13

All Letters answered with promptness and pleasure. Office open from 9 a. m. to 9 p. m. Advice gratis.

J. H. JOSSELYN, M. D.,
Resident Physician.

FASLE.

"NOT yours the fault!" You say not yours!
You women keep some bitter cures
For our proud spirits! How I long
To think you have not done me wrong!
Believe me, this is half my pain,
To feel I cannot give again
Respect and trust, which were your due
When I *believed* you wholly true.

The words of love you said one day
You meant the next day to unsay;
And if I thought of them—what then?
I must be *fooled*, like other men:
Must learn, to woo is not to win;
That *women's* falsehoods are not sin;
Must bear what other hearts have borne;—
I give you, *false one*, scorn for scorn!

It was for *love* I vainly sued;
It was a *Woman* that I wooed—
Not *something* in a woman's guise,
To make my trusting heart a prize—
Rejoice to feel me in *her* power,
Play with her new toy for an hour,
Then fling it down with cruel jest,
And *mocking* scorn at my request?

No! it was something kind and *true*
I fancied that I *saw in you*;
Before a high *ideal* shrine
I laid this honest love of mine;
I woke to find that shrine a *dream*,
That maidens are not what they seem;—
Henceforth I'll guard *my heart* with care,
Thy *Falsehood* has not brought despair.

AN IRISHMAN, in describing America, said: "I am told that you might roll England thru it, an' it wouldn't make a dint in the ground; there's frish water oceans inside that ye might drownd ould Ireland in; an' as for Scotland, ye might stick it in a corner, an' ye'd never be able to find it out, except it might be by the smell o' whisky."

A POOR FRENCHMAN being aroused from sleep by his wife, with the cry, "Get up, Baptiste, there is a robber in the house," calmly replied, "Don't let us molest him. Let him ransack the house, and if he should find anything of value we'll take it away from him."

A CARD.

YEARS HAVE ELAPSED SINCE THE Subscribers first invited public attention to the peculiar properties of their Patent Axle-grease. At first their invention made but slow progress, but thanks to the liberal and appreciative spirit of a large portion of the teamsters and coach proprietors of California, the demand for their manufacture has gradually increased, and notwithstanding the many spurious imitations which from time to time have been introduced from the Eastern States to compete with their article, the H & L AXLE-GREASE has now acquired an unrivaled reputation, extending throughout the length and breadth of California, Oregon, and the neighboring Territories.

The subscribers return their grateful acknowledgments to a discerning public, who have so largely patronized them in all their enterprises which they are now happy to say, are beginning to be justly appreciated as belonging to our California industry.

The supply of material from the East having, in consequence of the war, been cut off, the subscribers turned their attention to the substitution of COAL-OIL as a basis o their manufacture, but after applying every means suggested by the modern application of the science of chemistry, they were reluctantly compelled to the conclusion that however fit COAL-OIL might be for illuminating purposes, and for which it stands unequaled, it was not at all adapted to make a permanently satisfactory Axle grease. In this dilemma the subscribers turned their views to the native produce of California, believing that large quantities of natural resin might be collected from the noble pine trees of her boundless forests.

Having invited attention to this subject, they have with steady progressive steps, advanced this interest until, at the present time, they have established a manufactory of Rosin and Turpentine at Forbestown, from which considerable quantities of both articles are daily manufactured, of such a quality as to find a ready market at fair prices.

It is hoped that increased efforts may continue to be put forth, and new discoveries made, so that California may soon be independent of all foreign supply, for we believe our lofty mountains and our mighty pine forests will yet give us that supply. The subscribers are now receiving native resin in sufficient quantities to be able to sell their celebrated AXLE-GREASE at a LOWER PRICE than any of the spurious COAL-OIL varieties which may hereafter be imported.

The Markets.

Wholesale Produce Report.

This represents the prices paid by the dealer to the producer.

Corrected weekly, by A. H. Todd & Co., corner of Clay and Drumm Streets.] January 20th.

The past week has been one of excitement in the Grain Market. Prices have rapidly advanced until the highest rates of the season have been reached. Holders are, to speak properly, wild, and buyers seem to have lost all views of caution and manifest a fear that they will not be able to get what they want. From $3 40 Wheat has gone to $4 50 per 100lbs, and Flour from $9 00 and $11 00 per brl to $12 00 and $13 00, The latter is not, our millers say, on a basis of Wheat prices.

That this advance is unfounded we firmly believe, if there is any truth in advices at hand from New York, Chile and Oregon. We have large parcels of Flour and Wheat *en route* that will soon be here, and of California Wheat our stock, though not large, is sufficient for our immediate use. If those who are holding and basing their calculations on higher prices will stop and consider and ascertain who the *"Corn Bulls"* are, and how they are operating at this time, we think their confidence will be less firm. It is our belief that the present rates will, so soon as a few heavy holders have fully accomplished their object, recede. The *longest* heads have *missed* their calculations in *this market before* and *failed* for *large amounts* to the discomfiture of many, and it is even possible we may have to recur to a second edition by the same party, in part, if they cannot control Bread Stuffs and grind starvation prices out of the poor who live from hand to mouth. In connection with the above we note another arrival of the modest amount of one thousand brls (1000 brls) Eastern Flour, ex Parsee, from New York. It is but just to say this Flour, like lots of Wheat that have recently come to market, has gone into store, and that we believe it is controlled by the clique of speculators who have fixed a high price temporarily on it. One thing is positive, there is little if any country or interior trade at present, and no actual demand exists to warrant or sustain the rates demanded. This argument should have some weight and convince those who are not of the *speculating fraternity* how weak the foundation is and of the probable short life it is to be.

Oats, Corn and Barley have partaken of the inflation that exists in the Wheat Market, while Beans, a substantial substitute for Flour, remains quiet or neglected. It remains for consumers to use care, prudence and economy. This course will have a salutary effect on speculation and check prices sooner than in any other way. Speculation and high prices always have an evil tendency; the few are benefited, if they carry their point, while the masses are impoverished.

The imported Chile Seed Wheat has been withdrawn or advanced to 5 cents per pound and the Barley, from same source, to 4 cents. Farmers, in many cases, for want of means to buy are compelled to use an inferior article for seed. This will prove detrimental to the best interests of our State.

Our receipts from all sources, for the past week, are as follows: Wheat, 6,315 sks; Barley, 1,953 sacks; Oats, 3,295 sks; Salt, 600 sks; Flour, 6,010 qr sacks; Potatoes, 6,832 sks; Bran, 958 sks; Middlings, 125 sks; Hay, 950 bales; Straw, 180 bales; Beans, 108 sks.

FOR SALE, TO LEASE, ETC.

A Magnificent Stock Farm For Sale.

WE HAVE ONE OF THE VERY FINEST STOCK FARMS for sale to be found in the State. The location is a Valley in the Coast Range, and in a situation unequaled for excellence. A place secluded from loss of Stock by mixing, etc.

There are 1200 acres all inclosed with a fine staked oak fence with strong riders, to this can be added as many thousands of Uncle Sam' acres as may be wanted. The fenced land is the best of bottom land. During the late dry weather a large amount of Stock has been driven to these hills for feed and have been profitably kept.

This Ranch produces a big yield of Wheat, Barley, Oats Corn, Root Crops, etc. Tobacco, Hemp, Flax, etc., can also be raised most profitably Floods never wash it, and it is never affected by drought.

On this Ranch are good, ordinary Buildings, Houses, Barns, Sheds, Corrals, Smoke Houses, etc, to this Plows, Harrows, Teams, working Oxen, etc., to do the work on the place.

On this Ranch there is now the following Stock:
One Jack of the very best character
100 Mules from 1 to 3 years old.
1 Stallion, No. 1.
20 American Mares, No. 1.
80 Mares one-half and three-quarter breed. These Mares are all in foal, mostly by the Jack, as Mules are a ready sale at high prices.
100 Horses, mixed Stock.
500 Head Horned Cattle, American Stock and half breed.
400 to 500 Swine, good Stock.

The Stock now on the place can be sold with the Ranch and thus put the purchaser into a business profitable at once This Ranch is so situated that a river surrounds the range on one side and mountains on the other to which the Stock have a fine run without any interference from any source, thus giving the Stock a complete swing. Without reducing the original Stock there can be sold annually from this Ranch 50 Mules, 30 Horses, 100 Beef Cattle, 300 fatted Hogs, worth in the aggregate $10 000, three fourths of which is clear profit

The timber is abundant Pine Oak, and other hard woods Tar, Pitch, and Turpentine can be made in abundance.

This is one of the Rare Chances, such an one as is seldom offered.

Easy terms as to payments: A portion of the money can remain on time if secured.

For all particulars call on the Editor of the Farmer. 22

Fine Farms for Sale.

YOU WHO WANT GOOD FARMS CAN SECURE them by applying to the Editor of the Farmer. The following can now be had:

FOUR VERY FINE FARMS in the splendid San Joaquin District, within a few miles of Stockton, all very productive.

Several STOCK RANCHES in various parts of the State, from $1,500 to $25,000; in all these, good and permanent settlers can find bargains. Address by letter, or in person, for particulars to Col. Warren, Editor of the Farmer. 23

Two Splendid Farms for Sale.

TWO SPLENDID FARMS FOR SALE, IMMEDIately, in one of the best localities in our State—one of the best chances ever offered for an immediate purchaser, parties wishing to close business contracts.

One Farm of 30 acres, and Orchard, worth $6,000, will be sold for about half that sum.

A large Farm, 5,000 acres, worth $15,000, will be sold for $10,000 or less. Inquire of Editor Farmer.

Kerby, Byrne & Co.

WILL OFFER

THIS DAY

JOB-WORK—Of every description, done with promptness, at fair rates orders will be faithfully attended to.

☞ All letters on business connected with the office should be addressed to PUBLISHER CALIFORNIA FARMER, San Francisco, Cal.

The Fish Market of San Francisco.

The "Fishermen's Association," of this city, having removed their market from Jackson street, below Front, to the buildings on Clay, Commercial and Liedesdorff streets, formerly known as the "New World Market," celebrated their new opening on the last Saturday of the year by this event. The new location possesses many advantages over the old one, in being near the Meat, Vegetable, Fruit, and Poultry Markets, on Clay, Merchant Washington and Sansome streets, and accessible to the several lines of city railways. The members of this organization, number upwards of two hundred experienced fishermen, possessing seventy boats and all the accessories to the successful and regular pursuit of their business, and the public can rest well assured that the market will be constantly supplied with all the varieties of fish that the season affords.

This market is exclusively a "Fish Market," and will be maintained as such; and as such will meet a *desideratum* long required by our citizens. The prices will be regulated daily according to the supply of Fish in the Market, and will be fixed at the lowest possible rates. The prices thus fixed for each kind of fish will be conspicuously posted throughout the market as a guide to both buyer and seller. The market will be open daily (Sundays excepted), from 5 o'clock, A. M., till 5 o'clock, P. M., and on Saturday nights till 10 o'clock.

Orders from the interior will be promptly attended to and Fish, carefully packed, will be forwarded to all parts of the State. The dealers in Sacramento, Stockton, San Jose, Marysville, Copperopolis, Sonora, Placerville, and Virginia City (Na.), have availed themselves of these facilities, and are daily receiving regular supplies from this market.

The opening of the New Market took place the last Saturday of the old year and was celebrated with all the ceremonies befitting the double occasion, *i. e.*, the departure of the old year and the incoming of the New Year's supply of Fish. The encouragement in the way of liberal patronage from a discriminating public, has been of the most flattering description. We have only to add, the hope that it will continue, as the Association is composed of hard working, enterprising men, who only desire the adoption by any competitors they may have in the fish-catching business of their own motto of "Live and let Live."

We give this notice of our Fish Market, in detail, as it is so closely connected with the "Comforts of Home," and also to show our friends upcountry how like clock-work we Californians systematize all our plans and organizations, even to our "Fish Markets." We are indebted to the Fishermen's Association for our weekly quotations of retail prices of Fish.

Subscriptions to the Farmer in Gold or Silver.

We feel called upon to refer all our subscribers, who need such a reminder, to our *Terms of Subscription*, which are Gold or Silver. Nearly two years ago we advertised to receive Treasury Notes *at par*, for subscription and for all old debts, and we continued the offer till *last August*, which gave ample time to all that desired to avail themselves of the offer, to do so; by that offer we made a loss of *thousands*—yet we were content. Our terms, since August, have been Gold and Silver, and all who remit Treasury Notes will be credited the market rates, as they can perceive our printed terms at the head of our columns as *our only terms*. When we thus advertised, many others, especially Farmers, received these notes at par, and so we agreed to do so. But this kind of payment now, in almost all cases, is simply a payment like a bankrupt of 45 or 50 cents on the dollar, and we hope none of our patrons desire to pay less than the amount due.

We give this notice now, as our *New Volume, No. 1*, commences with our next issue, and we hope those indebted to us will promptly remit and thus show their good will and prompt coöperation and patronage of the *only Agricultural Newspaper on the whole Pacific Coast.*

Business of California and the Pacific Coast.

We continue the sketch again of some of the leading resources of our State, and have again been aided in the compilations which appeared in the columns of our cotemporary, the Mercantile Journal, for statistics. The matter of each article we have, however, so often referred to in years past, that we now hope that our people will begin to realize the magnitude with which our productions and the vast resources of this State are wisely and earnestly regarded:

Fruits, Sauces, etc.—We have two packing and preserving establishments in this city, giving constant employ to a large number of persons. These packers put up large quantities of Fresh Tomatoes and other vegetables, their chief consumers being the steam packets on this coast running to and from Panama, etc. They also put up supplies of Peaches, Pears and other Fresh Fruits, besides Berries; also Jams and Jellies of the very best quality and various kinds. These same parties also have the control of the market so far as Pickles, Gherkins, etc., are concerned, besides making large quantities of Tomato Sauce, Catsup and the like. Thousands of gallons of Vinegar are also manufactured by them, thus driving out nearly all foreign competition. For two years past we have vainly endeavored to obtain some reliable data from leading dealers engaged in packing Can Fruits, Vegetables, etc., in this city, but the parties for the most part prefer to keep their own secrets.

Nuts.—The California crop of Peanuts was below that of the year previous, but the quality is so superior to the African as to render the latter article almost unsaleable.

Eastern Dried Peaches have ruled low most of the year. At present there is no stock of good quality, while of California Dried (with the skins on) there is a fair supply, but no sale even at the low rates demanded. As yet but few Apples have been dried on this coast.

Glass.—The silvering of plates began here a year or two since has proved a success, and this market is now furnished with Mirrors and Looking Glasses of superior quality silvered here, and at such low rates as nearly to exclude the imported article, as purchasers here avoid all the risks and damage usually incurred in the voyage of importation. We have a Glass Factory in this city in successful operation for the making of Bottles of all descriptions to order.

Paper.—In April the Santa Cruz Paper Manufacturing Company began to increase their supplies. They have since kept more or less stock in the hands of their city agent, and have finally succeeded, to a great extent, in cutting off Eastern supplies. We have now three Paper Mills in this State, two in successful operation, and the other, it is expected, will be in full operation in a month or so. Two are located at Santa Cruz—one of which turns out about 125 reams Straw Paper per diem. The other, the new one, is to manufacture Manilla and Printing Paper—is of 4 horse engine capacity, and will make about 2,000 pounds a day. The Pioneer Paper Mill, located at Taylorsville, Marin county, has been in operation since March, 1857. Its chief manufacture is Printing Paper; but it also makes Manilla and Wrapping Paper in variety. The past year has not been favorable to our manufacturers, owing to the great inflation of gold, thereby offering great inducements to importers, who, taking advantage of this, so flooded the market, and, like other goods, Paper found its way in storehouses. Printing Paper ranged from 12 to 15 cents per pound, and is now held at 14 cents. The Pioneer Paper Mill did not make its usual amount of Paper last year, but we learn is now driving day and night. Its proprietor has discovered that a fine White Paper can be made from one of our soft growing trees at a much less cost than rag stock, and without any rags at all. This mill has made 4,006 reams of Printing Paper and 3,607 of Wrapping during the past year.

Glue.—There are now several establishments in this State successfully prosecuting the manufacture of this article. The quality is good and highly approved by consumers in general.

Powder.—The California Powder Works are now, we believe, in successful operation in Santa Cruz county. The agent of the Company has furnished us with the following data as the result of their first year's labor; and encouraged by their experiments, a second Powder Company has already been incorporated in this city, but of their plans we have no details at present: "The Company's Mills are situated on the San Lorenzo River, two miles from Santa Cruz. Operations were commenced in May last, but owing to the scarcity of water from that time up to the date the rains began, and also owing to several delays consequent upon the alterations and derangements in some portions of the machinery, they have really been unable to work over one-third of the time. All is now, however, in complete order, and the Mills fairly started. Notwithstanding the many annoyances the Company have been subjected to, they have manufactured and disposed of about 9,000 kegs of Mining and Blasting Powder, which has been pronounced by all who have used it superior in strength and quality to the imported. This is easily accounted for, from the fact that the Powder is fresh, and not like the imported article subject to deterioration consequent upon a long sea voyage; and furthermore, none but the best of materials are used in its manufacture. Willow and Elder being abundant in the neighborhood of the Mills, the Company are thus enabled to produce the very best of carbon, which in itself is a very influential ingredient in the composition of Powder. The present capacity of the Mills is equal to 230 kegs per day, which quantity can easily be increased by one-half at a very small outlay to the Company.

Naval Stores.—Our market since the war began has undergone many and serious changes. Instead of being dependent upon the Southern States for our supplies of Tar, Pitch, Rosin and Spirits Turpentine, our own forests have been literally drawn upon; and Oregon also has contributed freely. California has six Distilleries of Spirits Turpentine in operation. For the following statistics we are indebted to Hucks & Lambert, of this city. Most of the six Distilleries have been running the entire season, or from the early part of March to the middle of November, while others have not been fully employed; but the produce from each, as near as we have been able to obtain advices, is as follows:

	Rosin.	Spts. Turp'ne.
Corder & Co., Marysville	2,250 bxs.	17,700 galls.
Gibson, Hucks & Lambert, Forbestown	1,560 "	12,250 "
Jones & Co., Dogdown	1,600 "	12,600 "
Pence & Co., Pence Ranch	900 "	7,250 "
Knox & Co., Brownsville	250 "	2,000 "
Total	6,560 bxs.	51,800 galls.
Average weight of Rosin at 300 lbs ₱ box	1,968,000 lbs.	
Turpentine		51,800 galls.

The above has given employment to about two hundred people, including choppers, gatherers and teamsters, who have collected and hauled from the Pine forests during the season over three million pounds of the crude Pitch.

Teaming and railway charges for hauling produce to Marysville have exceeded $10,000, and steamer freights to San Francisco nearly $10,000 more. These last, with the heavy revenue tax of twenty cents per gallon on the Turpentine, followed by the low prices it has realized at the hands of merchants and shippers, have been a heavy drawback, and will no doubt operate very unfavorably towards a larger extension of the enterprise in the forthcoming season. It may be that some of the manufacturers have exceeded the quantities placed against their names, but the statement presented may be received as a very close approximation to the entire produce, both of Turpentine and Rosin in California. We have been unable to gather any Oregon statistics, but that State has shipped as freely of Spirits of Turpentine, which with that from our own State has entered largely into local consumption, and displaced in a very great degree the imported or Eastern article, selling at about one-half the price, and thus compelling large re-shipments of Eastern stocks, and entailing a heavy loss upon those operating in that article. California Rosin has been quite an important item of export with us during the year, large purchases having been made and shipped to New York, costing here $10 50 to $12 per 280 pounds, while at the same time the local consumption of Soap Factories has been large and increasing. Present price $12 00@ $13 00 per barrel.

July 1, 1861, to July 1, 1862	149,808	293,074	5,812
July 1, 1862, to July 1, 1863	165,131	364,423	14,852
July 1, 1863, to July 1, 1864	163,623	376,046	22,661
July 1, 1864, to Dec 31, 1864	111,016	187,682	3,650

Salt.—The production of Domestic Salt continues steadily increasing. The quantity produced is already equal to the amount consumed in our State; a portion of it only, however, is suitable for manufacturing for table and dairy use, sufficient care not being exercised over its cleanly extraction from the ponds.

Hides.—The following has been the imports and exports for the past seven years:

	Imports No.	Exports No
1858	19,245	142,399
1859	24,897	151,364
1860	55,050	170,401
1861	38,991	177,998
1862	18,552	315,751
1863	12,280	308,189
1864	34,249	329,382

Our estimated home receipts are placed at 400,000. Of these our local tanneries have consumed 150,000. The shipments of hides have been very disastrous for the last 18 months, owing to the decreased demand in the Eastern markets and falling off of exports in manufactured Leather.

Tallow.—The production of Tallow during the past year has been steadily on the decrease, owing to the drought and the wretched condition of the cattle in general. In previous years, our Soap makers received their supply of Tallow almost without exception from the interior and lower coast, and the productions of our city rendering establishments were exported principally to England; while in 1864 the supplies from this country fell off gradually, until they dwindled down to almost nothing, and Soap factors had to depend upon city rendering, the production of which probably was not more than 75,000 or 80,000 pounds per month, being inadequate to the demand. Consequently a number of the small factors had to suspend operations in a measure, in hopes of buying larger and cheaper supplies by-and-by.

Lumber.—From the annual statement of the Lumber Dealers' Association, we condense the following statement of the lumber trade of San Francisco, for the year 1864, together with the stock on hand January 1, 1865:

Varieties.	Consumption. feet.	Importation. feet.	Stock on hand.
Pine	66,615,328	73,840,183	11,290,311
Redwood	41,591,177	40,425,472	4,539,794
Cedar	1,727,389	2,825,239	1,122,000
Pickets	772,750	824,070	196,620
Sugar Pine	.....	.....	580,000
Eastern Pine	.....	.....	136,000
Total	110,112,635	117,914,955	17,855,725

Wool.—Since our last annual review of the market, flock masters have sustained very heavy losses in their flocks, and their expenses have been more than doubled in providing extra range and extra herders; besides, provisions have been exceedingly dear and transportation enormously high, from the continuance of the drought, extending through a period of eighteen months. We are happy to note, however, an increase in the product of Wool, though very small in comparison with former years.

The tule lands, heretofore unavailable, were occupied during the summer by large bands of sheep, and many flocks ranged on good pasture in the Sierra Nevada mountains. Happily these ranges, ordinarily of no value, were of immense service in saving many thousand sheep, which would otherwise have perished. The rains commenced in November, and have continued in copious showers, with brief intermissions. The weather has been mild, and we have every indication of abundant pasturage the coming year.

Receipts of Wool from January 1st to December 31st, 1864:—

California, estimated	8,000,000lbs.
Oregon, estimated	216,800
Vancouver Island, estimated	68,200
Sandwich Islands, estimated	39,200
Total receipts	8,324,200lbs.
Shipments and consumption	8,203,192
Balance on hand in the country	121,008lbs.

Shipments of Wool from January 1st to December 31st 1864:

New York, per steamers	3,560,260lbs.
" sailing vessels	1,931,554 —5,491,814lbs.
Boston, sailing vessels	842,850
Punta Arenas, sailing vessels	1,012
Tahiti, sailing vessels	341
La Paz, per steamer	175
Total	6,336,192lbs.
Home consuption	1,867,000
Grand Total	8,203,192lbs.

Prices are lower than they were the previous year. Excessive importations prior to the high tariff on Wool, which went into operation last July, may be assigned as one of the principal causes for this declension. Again, the fluctuations in gold opening early in the Spring at $1 75, advancing to $2 80, then $2 35, contributed to the same result. Buyers were compelled to be very cautious, and could not afford to ship unless with sufficient margin against such sudden and great changes in the currency. Shippers buying here for "gold," and selling in the eastern markets for "paper," had to rely mainly upon exchange and premium on gold for their profits. But we think the high tariff will have the effect to exclude foreign Wool, and that we will have a better market the present year.

Gold has gradually advanced every year since the commencement of the war, and Wool has declined upon an average of one cent per pound each year, notwithstanding the vast improvement in quality, as shown in the following:

1862—6,400,000lbs. average price 21, is $1,344,000
1863—7,600,000lbs. average price 20, is 1,520,000
1864—8,000,000lbs. average price 19, is 1,520,000

The entire clip of the United States reached 100,000,000lbs. and we imported for the first six months, in 1864, 38,000,000lbs., for the last six months we have not yet the data to determine.

Steamers have taken the larger portion of the Wool at about $1 80 per hundred pounds freight in gold, against $1 75 per hundred pounds currency, by sailing vessels. We have retained 1,867,000lbs. for domestic use, a little less than the mills required last year.

Product of Wool for each year from 1855 to 1864, inclusive:

	Pounds.	Increase—Per cent.
1855	360,000	—
1856	600,000	66
1857	1,100,000	83
1858	1,428,000	30
1859	2,378,000	66
1860	2,260,000	37
1861	4,600,000	41
1862	6,400,000	40
1863	7,600,000	19
1864	8,000,000	5

The following statistics show the extent of shipments for the past four years:

	1861.	1862.	1863.	1864.
New York, bales	13,241	13,127	9,862	11,193
Boston	1,547	8,784	6,216	3,598
England	1,193	78	319	4
Other countries	3	626	—	—
Total, bales	15,987	22,615	16,397	14,795

We do not consider the quality of last year's clip equal to that of 1863, owing principally to the great want of water and feed, which always deteriorates the Wool. Less care has been shown by our farmers to improve their breed; and as it is an established fact that Eastern manufacturers will not pay the proportionate higher prices for fine grades, the prices for Wool in 1864 have not been equal to those of 1863. Up to the present date the Eastern markets have not been remunerative to shippers for their ventures.

Carpeting.—The Mission Woolen Mills, in this city, have successfully commenced making Carpets, Rugs, Etc.

Cordage.—The San Francisco Cordage Company have sold during the year 1,400,000 pounds of assorted sizes, and have also sold large invoices to be delivered in April next at Boston, gold price, with the cost of importation in gold added thereto. This Company is now adding to the Factory a large amount of the latest and most improved machinery at a heavy outlay, which they say will enable them, if necessary, to manufacture double the quantity of Cordage now produced by them. This additional machinery will be completed and in running order by the 1st of February next. Their orders for Hemp for the coming year have been largely increased. The Company's stock of Rope now on hand is 350,000 pounds, besides liberal supplies of Hemp, of which there are 370 bales in bond.

Leather.—Since May last, the supply from Oregon and our own State has been constantly increasing and the general stock accumulating. We allude particularly to all kinds of so-called heavy Leather—say Harness, Skirting, Bridle, Sole and Kip. The result has been to drive out nearly all imports of the descriptions named, as well as many other finer grades of Calf, Sheep, and other fancy dressed skins. The business of the past year has, however, been very dull and depressed for reasons above given. The quality of California Tanned Leather is good and preferred as a general thing to imported, but the price rules low, for the reason that manufacturers are operating on small means and are obliged to realize. As soon as the article is ready for market an offer is sought and sale effected, often at less than half the price of imported stock. This fact occasions the prices always to rule low.

Hops.—At the close of the year Eastern, of the growth of 1864, were jobbing at 50 cents, and California 25@30 cents, the latter too lightly packed and pressed to keep well. The California crop of 1864 was light, far below that of the year preceding. This trade is nearly monopolized by a single party, who seeks to control the market at all times. Our present stock is not large, but there are several invoices now on the way here from the East.

Letter from a Farmer in Colusa.

COLUSA, CAL., January 8th, 1865.

EDITOR CALIFORNIA FARMER:

I am an old resident of this county and not quite frozen out yet, though the past season has been very severe on farmers in this vicinity. A great many have left us to hunt a country where it rains more frequent, they having forgotten that it used to rain in great abundance here. Those who are left appear well satisfied to stay, knowing that it can rain here as much as in any other county in the State. Thank Heaven, we have had plenty of rain for this season, besides a great deal of our lands overflowed by the Sacramento river, from this we hope to raise fine crops this season, and make up for the past.

Now, Mr. Editor, wishing to continue my subscription for the FARMER (a paper I cannot do well without), you will find enclosed a $10 greenbacks (not knowing whether it is worth $5 in gold or not, as our mails are not very regular); you shall be the judge, and if there should be a balance due you let me know, and I will make it all right next time.

I see in your paper, that you intend distributing seeds to your subscribers this winter. Please send me a goodly lot of all kinds, I would like to put out a few Mulberry Trees this season, merely to see how they would do. Please let me know whether they can be got and what they are worth. I think the climate is as fine here for raising Silkworms as in San Jose. And if the trees will grow I will risk the balance. Please let me know what alfalfa seed is worth, and oblige,

Yours truly, S. K. A.

NEW INVENTION.—Mr. Campbell, a carpenter of Sacramento, has invented a very ingenious wine-press, of sufficient capacity to crush a ton of grapes in few minutes, will occupy only a trifling space, and can be removed from one location to another by two men. The motive power is of the hydraulic order, the juice of the grape as it exudes being, by the aid of a hand pump which can be worked by a lad of twelve years, used to give the hydraulic force necessary to produce a pressure or from one to ten tons, according to the size of the press. Application has been made for a patent, and soon this interesting invention will be offered to the public.

FEEDING POTATO TOPS.—An old correspondent of the Maine Farmer says: "I shock my tops, when pulled green, in the same manner that I do my beans, and when sufficiently dry to save, remove them to the barn as winter feed for stock; considering them worth something more than their weight of potatoes or turnips, by giving them one, two or three fodderings per week. I know of no vegetable substance they will eat more greedily, and I think it healthy for them thus fed. And if the mulching of trees is of sufficient importance to be attended to, I would go to the forest and take the fallen leaves of this and past years; or as soon would I take a load of hay from the barn, as spare the potato tops when pulled as green and good as most were this year."

THE LATE SEVERE FROST.—A severe cold snap has swept over our State and visited our city also. Ice made in San Francisco, this week, more than half an inch thick, and our streets were white with frost, till 9 o'clock in the morning. Our friend L. Provost, of San Jose, writes us that on the 22d inst., the frost was the severest he ever knew in the valley. The cold was so severe that it was with difficulty he could save his plants in his greenhouses without fires.

Agricultural Department.

How Much Education, and What Kind, do Farmers Need?

The answer to the first part of this question needs be but short. *All they can get.* But the pertinancy of this response may perhaps be made more apparent by a proper answer to the last part of the question—"*What kind?*"—which cannot be so readily answered; but, by your leave, I will attempt a concise description of what, to me, seems necessary for the complete farmer to understand.

First, the common branches—reading, spelling, writing and aritbmetic; with, perhaps, geography and grammar, as an addenda, depending somewhat upon circumstances.

Next, in importance, if he is an American, is a full and thorough knowledge of the English tongue, as it opens at once the doors to all the arts and sciences, and without which these portals remain in a manner closed.

In connection with the foregoing and following, should be pursued and never neglected, a physical education. For the farmer, whether he is to labor or superintend the labor of others, needs the full development of every nerve, bone and muscle, with a full knowledge of the most economical manner of applying their forces in himself, his laborers and animals. This physical development, education and training, need not interfere with any other occupation, for the mind cannot always labor, nor can it ever labor to advantage while the body lacks energy and force. It is this physical development which gives to the sons of farmers their superiority in every station of life. It is a true saying that "you can make anything of a farmer's son, but you can make a farmer of nothing else." Since the decline of the Roman Empire, the value of muscular strength and agility has been unappreciated, but the next generation must and will restore its popularity.

With these foundations to rest upon, he is prepared, if he is able to purchase, or borrow books, even independent of teachers, to enter upon the studies of the more abstruse sciences—not essential, it is true, to a laborer, but deeply essential to a director of his own power and that of others, to the economical employment of time, strength and money.

He should study botany, for a great share of his business is the rearing of shrubs and plants—the nature, habits, classes and descriptions of which are essential.

He should study zoology, for another part of his business is the rearing or employing of animals, the natures, habits and peculiarities of which he should understand.

He should study entomology, for he will have myriads of insects to contend with, and unless he combats them with that skill and discretion which a knowledge of their habits alone can give—his victory over them is at least doubtful.

He should study geology—it gives him a knowledge of the raw material, upon which he must workd iligently and understandingly, would he win success.

He should study meteorology and climatology, for there are adverse as well as genial winds, rains, snows, hails and frosts for him to counteract, or apply to his aid.

He should study chemistry—animal, vegetable, and mineral—for there are constant changes around him, in every kingdom of nature, for him to seize upon for his benefit, or to turn to his advantage.

Physiology, both animal and vegetable, is important as a study for him, for he must have a care for the health and prosperity of his beasts and plants, and a knowledge of their structures and the functions of their parts is indispensable.

Philosophy, as applied to his implements, carriages and machinery, comes also advantageously into use.

Does any one say this standard is too high—that it is unattainable by any one that labors on a farm and earns his bread? There is no institution so well adapted to the study of the higher branches as home—no teacher so faithful, impartial, successful and thorough as one's self—no halls so well adapted to study in as the broad vaults of heaven and the chimney-corner—and no place where the education of the body and mind can be so conveniently and profitably alternated as on the farm.

Do you wish to study botany—here are the plants in bloom in your very path. Do you wish to study zoology—here are the animals, your daily companions. If you would study entomology, the insects swarm around you, and their habits cannot be a matter of indifference. Does geology entice you—here is mother earth at your feet, inviting you to an acquaintance. Would you study meteorology and climatology—your farm has its observatories—what better place would you have? If physiology interests you—every animal you slay for domestic use or for market, is a subject for dissection. Would you study philosophy—remember that Newton's first lessons were taken in a solitary siesta under an apple tree. Would you hold communion with your own thoughts—would you reflect upon and digest what you have read—take hold of the plow, the hoe or the scythe, and your mind will be the more clear for your bodily exercise. It is not necessary to study that the book should be always in hand—the book of Nature is always open before you, and he who sows and reaps, as well as "he who runs, may read." Do you say that these studies are unnecessary to successful farming? Remember that the cultivated portions of the earth are fast losing their fertility, under the old traditionary system of farming, and that science alone, aided by experiment, perseverance and economy, brings them up to, and even above, their early standard. The farmer who discards science as unnecessary must emigrate to the newer portions of the earth, and be content with the society and the luxuries they afford; while he who would be surrounded with all the comforts and improvements of the age must remain where they flourish, and should add his mite of mind and talent for their promotion.—[Exchange.

HOW TO KEEP WHEAT FROM BEING EATEN BY BLACKBIRDS.—We clip the following from the Stockton Record, January 14th:

Mr. Shattuck, who lives some two miles this side of Woodbridge, has been very much annoyed by the myriads of blackbirds that hover over his fields, and pick up the wheat almost as fast as it escapes from the hand of the sower. After trying various expedients to rid himself of these pests, he finally hit upon the following, which he says acts like a charm: Take about a tea-cup full of coal oil to a bushel of wheat, mix it with a small quantity of lime, and work it thoroughly through the wheat. Mr. Shattuck says that he has wheat prepared in this way that lay exposed for several days before being harrowed in, without being touched by the blackbirds. The remedy is simple, cheap, and easily applied, and if as efficacious as represented, will save many a dollar at the present high price of seed.

A PROFITABLE FLOCK.—A Vermont paper mentions the case of a farmer who last Fall drove up to his barn 370 sheep to winter. He sold 84 lambs and fat sheep for market for $556; he sold his clip of wool for $754, and then had a flock of 70 head more than he had in the Fall. He thought his flock by no means presented an extraordinary case.

Splendid Horses.

We give the annexed article from Oregon papers, relative to the splendid horse stock of W. Myer, at Ashland Mills, Jackson county. His noble stallion, "Coburg," is one of the best animals on this coast. His progeny is very valuable:

JACKSON COUNTY AHEAD.—Heretofore Oregon horse raising has been principally confined to the rearing of 1:59 stock for the purpose of competing for some "six bits" purse, hung out by some county Jockey Club. Among the few who have turned their attention to raising draft horses, Mr. Myer, of this county, has probably arrived the nearest to perfection. His Coburg colts created quite a sensation at the State Fair. They took the first and second prizes, as best for all work; the first and second, as best draft horses; first and second as best, without reference to blood. The Review, State Journal, Advocate, Oregonian and Statesman all spoke in the highest terms of these colts. We clip the following extracts, which will give a good idea of them:

"About the nicest things of all were the three yearling colts, shown by Mr. Myer, of Jackson county. These were got by "Coburg," an English draft stallion, weighing 2,300 pounds, out of fine blooded mares, were much admired and generally considered to be the nearest to perfect for all work, seen in Oregon. Good horsemen unite without dissent in thinking this will prove the best cross ever introduced into the State, and Californians modestly acknowledge this to be the only thing seen here they cannot beat at home."—[Oregonian.

"W. Myer, from Jackson county, had on exhibition at the Fair three colts of the Coburg stock, two sorrels and a black. They were rising one year, and stood about fifteen hands high. They were the finest stock of the kind exhibited, and drew several premiums. They were sold for $500 each, one to Mr. Newton, of Corvallis, one to Mr. Mays, of Dayton, and the other to S. H. Miller, of Lebanon."—[Statesman.

EDUCATIONAL.

PACIFIC

National Business College,

SAN FRANCISCO, CAL.

Practical, useful Education for Young Men, Boys, and Men of Middle Age.

A BUSINESS EDUCATION FOR A BUSINESS MAN—THE RIGHT KIND OF AN EDUCATION FOR YOUNG MEN.—THIS IS THE BEST PLACE FOR MERCANTILE BUSINESS IN THE WORLD.

IMPORTANT TO THOSE WHO CAN DEVOTE A FEW WEEKS OR MONTHS TO STUDY, AND TO PARENTS WHO HAVE SONS TO EDUCATE.

THE BEST COURSE OF STUDY AND THE GREATEST AMOUNT OF PRACTICAL AND USEFUL INFORMATION ACQUIRED IN THE SHORTEST POSSIBLE TIME AND AT THE LEAST EXPENSE, TO INSURE SUCCESS IN LIFE.

"*Acquire a Good Commercial Education, and you will as surely succeed in Life as that cause produces effect.*"—Abbott Lawrence.

A MODEL COMMERCIAL COLLEGE.

THIS NOTICE IS INTENDED TO GIVE FULL INFORmation of the course of Study and operation of the Pacific National Business School, San Francisco,

We respectfully solicit from Young Men and Men of Middle Age, who would succeed in business, and Parents and Guardians who have Boys to educate, an examination of our system of Practical, Useful Education, the superiority it possesses over every other institution of learning on this coast.

This School claims superiority and great merit over other institutions professing to teach the Commercial branches, by its system of combining THEORY and PRACTICE, on the London Corn Exchange principle, it being done in no other School on this coast.

COURSE OF STUDY.

The plan adopted in teaching combines PRACTICE with THEORY; instead of being confined to Text Books, the pupils are exercised in making original entries of every-day business transactions; journalizing, posting, balancing accounts, opening and closing a great variety of different sets of Books, both for individual and partnership business, where the business has been prosperous or adverse, thus qualifying the student for entering into the practical duties of the accountant in any kind of business.

THE COURSE OF INSTRUCTION

Consists of Double-Entry Book-keeping, embracing Wholesale, Retail, Commission, Manufacturing, Banking, Steamboating, Railroading, Individual, Partnership, Joint Stock, Compound, Company, Mining, Ranching, Farming, etc. In the routine of practical instruction the pupil becomes familiarized with changing books from single to double entry, changing stock books to partnership, and every form and principle known in well regulated establishments.

PENMANSHIP.

The beautiful and easy system of specimen Penmanship is taught in this College, and the only place where it is taught on this coast.

CORRESPONDENCE

Is carefully explained, and rules and principles are laid down, the observance of which will lead to the highest attainment in this art.

It is known to all that there is a great deficiency existing in this commercial branch.

BUSINESS ARITHMETIC.

This is a branch of the greatest importance, and you can be assured will not be neglected.

LECTURES

Are given to the students on Commercial Law, Nature and Causes of Wealth, Political Economy, Advertising, and general topics relating to success in business.

DIPLOMAS.

Those completing the course and passing a satisfactory examination before the Examining Committee, will receive Diplomas of the Institution.

THERE WILL BE NO VACATIONS.

Each pupil receives individual instruction, and persons can therefore enter at any time.

TERMS.

Scholarships are issued which give the scholar the privilege of reviewing the course at any future time, free of charge, for SIXTY DOLLARS, with a deduction of FIVE DOLLARS when two enter from the same family or the same place at the same time. When four enter at the same time from the same place, TEN DOLLARS will be deducted from each scholarship.

THE TIME REQUIRED

To complete the course depends somewhat upon the previous education and ability of the student, usually from ten to sixteen weeks, scholarships granting the holders the privilege of completing the course regardless of time.

A common school education is all that is necessary to enter the course of this College advantageously.

For further particulars, call at the College, corner of Montgomery and California streets, or address

M. K. LAUDENSLAGER,
President Pacific National Business College.

Oakland Seminary for Young Ladies.

Mr. G. M. Blake.....Principal.
Mrs. I. G. Huggins.....Associate Principal.

THE SEVENTH YEAR OF THIS INSTITUTION COMmenced on

MONDAY, JANUARY 9th, 1865.

For Catalogues and other particulars apply to the Principal, corner of Eleventh and Washington streets, Oakland.

Catalogues can also be obtained at the Book Stores on Montgomery street, San Francisco. 23tf

Wanted a Farm Manager.

A PRACTICAL MAN, THOROUGHLY INFORMED in farming in a dry climate on a light loam on a porous subsoil. A Scotchman with a Californian or Australian experience preferred. Experience in a dry climate is absolutely necessary. Address, "Farmer," Lock Box 943, San Francisco P. O., giving particulars of past experience. 12

EDUCATIONAL.

Santa Clara College.

THE FOURTEENTH ANNUAL SESSION OF THIS INstitution will commence on MONDAY, August 29th. The plan of instruction embraces two regular courses—the Classical and the Commercial, besides a preparatory Department

TERMS:

Entrance, or Matriculation Fee, $15, payable only once.	
Board and Lodging, including Fuel and Light, the use of the Swimming Pond and Gymnasium per week	$4 75
Tuition in all Branches—Modern Languages excepted—per week	1 75
Washing and mending of articles washed, per week	1 00
Stationery: Paper, Ink, and Pens, per week	25
Medical attendance and Medicines (unless Parents wish to incur the risk of paying the full bill) per week	25
Total per week	$8 00
Total per session of forty-four weeks	$350
For the use of Instruments in Natural Philosophy, and of Chemicals, per month	$2 00
Modern Languages, viz: Spanish, French, German, Italian, per month, each	5 00
Piano, with the use of Instrument, per month	8 00
Flute, Clarionet, or Brass Instruments, each per month	5 00
Violin	8 00
Vocal Music, per month	2 00
Drawing of any kind, per month	6 00
Vacations, if spent in the College	35 00

School Books are furnished at Store Prices.

GRADUATION FEES.

For each Academical Degree	$10 00
Commercial Diploma	5 00

N. B.—In cases where there are more than two brothers each additional one pays only $200 per session.

For further information apply to the President of Santa Clara College, Santa Clara, Cal., or to Rev. A. Maraschi, S. J., St. Ignatius Church, Market street, between Fourth and Fifth, San Francisco. 3

Miss Lammond,

LATE PRINCIPAL OF

BENICIA SEMINARY,

HAS THE PLEASURE TO ANNOUNCE THAT she has purchased the Seminary for Young Ladies known as the

CALIFORNIA COLLEGIATE INSTITUTE,

formerly under the control of Mrs. M. B. SWEDENSTIERNA, and has removed there with her entire corps of

Superior Teachers and Professors.

The New Term Commenced

January 4th, 1865.

The location of this Institution (on the suburbs o the city) commands at once for its boarding pupils, the retirement of a country life, with the advantages of the finest professional talent from the city.

As Miss Lammond desires to make this a permanent Institution, no efforts will be spared to make it worthy of the patronage which has been so liberally extended to her during the past four years.

As the class of Boarding pupils is nearly filled, those desiring admission will find it necessary to apply early.

For further particulars, Catalogues may be obtained by addressing Miss Lammond, Principal of Benicia Seminary, until October 14th, after which communications must be sent to the Collegiate Institute, Corner Silver and Third streets, San Francisco.

M. LAMMOND,
10 Principal.

Academy of Notre Dame,

SAN JOSE, CAL.

THE FOURTEENTH ANNUAL SESSION of this Institution will commence on TUESDAY, AUGUST 23d. The course of instruction embraces all the branches of a polite and useful education. Its aim is to form young ladies to virtue, accustom them to early habits of order and economy, and to cultivate in them those qualities which render virtue both amiable and attractive.

TERMS:

Entrance, to be paid but once,	$15
Board and Tuition, per session,	$250
Washing, per session,	$50
Physician's Fees (unless it be preferred to pay the bill in case of sickness) per session,	$10

Piano, Vocal Music, Drawing, and Painting,

Form extra Charges, but there is no extra charge for the

French, Spanish, or German Languages; nor for Plain Sewing and Fancy Needle-Work.

PAYMENTS are required to be made half a Session in advance. Pupils will find it much to their advantage to be present at the opening of the Session. 2

Saint Catherine's Academy,

BENICIA, CALIFORNIA.

THE SCHOLASTIC YEAR OF THE SAINT CATHERINE'S ACADEMY, Benicia, commences the

Last Monday in August.

Terms, per annum, $280—payable, semi-annually in advance.

Music, Painting, and Drawing form Extra Charges; also, Books, Stationery, and Physician's Fees.

No deduction will be made to any pupil leaving the Academy before the expiration of the term—cases of sickness excepted.

Foreign Languages, Plain and Fancy Needle-work, form no Extra charge.

For further particulars, refer to the Superioress of the Academy. 4

Sacramento Seminary,

Boarding School for Young Ladies.

Tenth street, between F and G, SACRAMENTO.

The next Session commenced

January 2d, 1865.

For Circulars containing particulars, address

23 MR. or MRS. HARMON PERRY.

Benicia Law School.

THE FOURTH SESSION OF THE BENICIA LAW SCHOOL commenced on the

FIFTH DAY OF JANUARY, 1865.

And continue twenty-one weeks. A New Class will be formed at the commencement of the Term.

It is the design o the School, by a systematic and thorough course of instruction, to afford advantages for the Study of the Law which cannot be obtained by the usual method of reading in an office.

For Circular containing full information address

J. E. ABBOTT, Benicia,

EDUCATIONAL.

NAPA

COLLEGIATE INSTITUTE,

For Young Ladies and Gentlemen.

NAPA CITY, CALIFORNIA.

NAPA CITY, IN POINT OF LOCATION AND Climate, is unsurpassed in the State. It is about four hours' ride by steamboat from San Francisco, and three by stage from Benicia. There will soon be a daily boat from the former place, and there are now two daily stages from the latter. There are ext naive accommodations for Boarders in the College Building, with large and well-ventilated sleeping apartments. Teachers reside in the Building, and will have a constant oversight of the Students who are Boarders.

GOVERNMENT.

Young Ladies will receive no calls from any except Parents and Guardians. Ladies and Misses will not leave the College grounds, except in company with their Instructors. Young Men and Lads are not allowed to lounge about the Stores, Hotels, and Saloons of the village. All pupils are required to attend Church on the Sabbath. Parents will choose the place of worship for their children.

MILITARY DEPARTMENT.

This Department has been opened with a view to the permanent establishment of a Military Academy on this Coast. From three to four years will be requisite to complete the course in this Department. The State has furnished us the necessary equipments for such a school. The Drills will be attended to daily.

TUITION.

Spelling and Reading, per month	$2 50
Common English, with the above, per month	4 00
Higher English, with the above, per month	6 00
Latin and Greek, with the above, per month	8 00
Janitor's Fees, per month	25

EXTRAS.

No1.

COLLEGIATE INSTITUTE,

Benicia.

FOR MALES ONLY.

THE NEXT SESSION OF THE INSTITUTE

OPENED ON THE

Fifth of January, 1865.

THIS INSTITUTION HAS BEEN IN SUCCESSful operation ten years. Its facilities for Instruction and for the comfort of pupils are ample and good. The Instruction is divided into three parts—the Elementary Course, the Preparatory Collegiate Course, and the English or Scientific Course. Especial attention is invited to the latter Course, as being peculiarly suited to those who wish to obtain a liberal education, fitting them for almost any business in life, and yet want either time or inclination to pursue the dead languages. Persons wishing full particulars will receive a circular by applying to the Principal. Reference is made to our patrons, in every portion of the State.

Terms, Payable Three Months in Advance.

Pupils under Fourteen, Board and Tuition a month	$30 00
Pupils over Fourteen, Board and Tuition, per month	32 50
Washing, per month	2 50

No extra charge is made for Bookkeeping, nor for the Modern or Ancient Languages. No charge is made for Bedding, Rooms, or Lights. No entrance Fee is charged.

22 C. J. PLATT, Principal.

FRENCH COLLEGE,

Corner Mason and Jackson Streets,

Principal.....Prof. J. MIBIELLE.

THE CLASSES OF THIS ESTABLISHMENT ARE opened since the 3d inst., and the select and attending scholars receive a solid instruction proportionate to their age and mental facilities.

The programme includes all the branches of tuition stated for children from 6 to 12 years of age, as the first step for a higher teaching.

The English, French and Spanish Languages are taught practically and theoretically, by competent and special teachers.

Boarders can be accommodated in the establishment, where they will find the comforts and care of a home.

An evening class of French and Spanish is also open for young men every other day, at 7 o'clock, P. M. Call on the Principal from 9 A. M. to 12 M. 1

Miscellaneous.

Indian Corn Fiber—A New Paper Material.

The increasing consumption and advancing prices have for years been admonishing paper-makers and the public of the necessity for new paper material. Many substitutes have been tried. Straw, a cheap material, obtainable in unlimited quantities, was made available for coarse papers; but it has only met the demand in a very limited degree. A year ago, or more, some specimens of paper, said to have been made from maize-fiber, were exhibited at the rooms of the Department of Agriculture as the product of an experiment conducted in Austria under imperial patronage. It seems that the experiments have been persevered in and extended. The National Intelligencer says the Hon. Isaac Newton, the Commissioner of Agriculture, has just received from Austria a package containing the most remarkable results of the manufacture of Indian corn fiber. It embraces paper apparently equal to the finest linen paper, and evidently superior in point of durability. Some of it is thought to be a good substitute for parchment. Specimens of colored paper are remarkable for their evenness and delicacy. Tissue paper, very light and transparent, is included; tracing and drawing papers, preferred by artists to those of English and French manufacture; cigarette papers, black and brown; flower paper, in beautiful colors, for the making of artificial flowers; silk paper of several qualities—in all sixty samples of paper, thick and thin, white and colored, substantially useful and delicately ornamental. They constitute a wonder of ingenuity, and illustrate the power of invention to create new forms from common materials, and the utility of patient effort in developing the perfection of skill in industry. Nor is this all. Bleached and unbleached crash, of several kinds, are exhibited from the same material, the fiber of corn husks, or the outer covering of the ear, called in our Southern States *shucks*. But perhaps the most successful result, in heavy fabrics, is oilcloth for floors, of which two different colors are shown, both apparently of superior durability.

The process of paper-making has been for years in development. The spinning and weaving of maize fiber was commenced late in 1862. Both processes have been patented in Austria and other European countries, and in this country. These results have been attained under the direction of Dr. Chevalier Auer de Welsback, director of the imperial printing establishment at Vienna, and superintendent of the imperial paper mills at Schlœgelmuhl, Austria. All portions of the husk are converted into paper-stuff, spinning-stuff, or husk meal, which is mixed with common flour. Nineteen per cent. of paper fiber, ten of spinning material, and eleven of feed stuff are obtained, together making forty per cent., leaving a refuse of sixty per cent., much of it fine fiber and gluten, which may yet be filtered and utilized. Nor does the invention, even in its infancy, lack the important element of profit. An expenditure of 273,740 florins in the manufacture yielded a gross return of 379,000 florins, and a net profit of 105,260 florins, exclusive of rent and use of capital employed. More particular information may be gathered at the Department of Agriculture.

The editor of the Intelligencer says he has never seen more beautiful, or firmer, smoother, or tougher paper, of every variety, from the coarsest to the finest, than the specimens referred to above, made of corn shucks; indeed, they excel anything he has ever seen from cotton or linen.

Anecdote of Dr. Nott, of Union College.

On an evening preceding Thanksgiving many years ago, two students left the college, with the most *foul* intent of procuring some of the Doctor's fine fat chickens, that roosted in a tree adjoining the house. When they arrived at the spot, one ascended the tree, while the other stood with the bag, ready to receive the plunder. It so happened that the Doctor himself had just left the house, with the view of securing the same chickens for his Thanksgiving dinner. The rogue under the tree hearing some one approaching, immediately crept away, without notifying his companion among the branches. The Doctor came up silently, and was immediately saluted from above as follows:

"Are you ready?"

"Yes," responded the Doctor, dissembling his voice as much as possible.

The other immediately laying his hands on the old rooster, exclaimed:

"Here's old Prex, will you have him?"

"Pass him along," was the reply, and he was soon in the Doctor's bag.

"Here's marm Prex," said the all unconscious student, grabbing a fine old hen, "will you have her?"

"Yes," again responded the Doctor.

"Here's son John, will you have him?" "Here's daughter Sal, take her?" and so on until he had gone regularly through with the Doctor's family and chickens.

The old man walked off in one direction with the plunder, while the student, well satisfied with his night's work, came down and streaked it for the college. Great was his astonishment to learn from his companion that he had not got any chickens, and if he gave them to any one, it must have been to Doctor Nott. Expulsion, fines and disgrace, were uppermost in their thoughts until the next forenoon, when both received a polite invitation from their President, requesting the presence of their company to a Thanksgiving dinner. To decline was impossible, so with hearts full of anxiety for the result, they wended their way to the house, where they were pleasantly received by the old gentleman, and with a large party were soon seated around the festive board. After asking a blessing, the Doctor rose from his seat, and taking the carving knife, turned with a smile to the rogues and said: "Young gentlemen, here's old Prex, and marm Prex, son John, and daughter Sal," at the same time touching successively the respective chickens; "to which will you be helped?" The mortification of the students may be imagined.

KIND-HEARTEDNESS TO CHILDREN.—Blessed be the hand that prepares a pleasure for a child, for there is no saying when and where it may again bloom forth. Does not almost everybody remember some kind-hearted man who showed him a kindness in the dulcet days of his childhood? The writer of this recollects himself, at this moment, as a barefooted lad, standing at the wooden fence of a poor little garden in his native village, while with longing eyes he gazed on the flowers which were blooming there quietly in the brightness of a Sunday morning. The possessor came forth from his little cottage; he was a wood-cutter by trade, and spent the week at work in the woods. He had come into the garden to gather flowers to stick in his coat when he went to church. He saw the boy, and breaking off the most beautiful of his carnation—it was streaked with red and white—he gave it to him. Neither the giver nor the receiver spoke a word, and with bounding steps the boy ran home. And now here, at a vast distance from that home, after so many years, the feeling of gratitude which agitated the breast of that boy expresses itself on paper. The carnation has long since withered, but it now blooms afresh.—[Douglas Jerrold.

YOUTH ON SKATES.—If I have ever seen a specimen of superlative happiness, it is a boy on the ice. He's beyond the reach of adverse circumstances. There may be rents in his trousers—no matter, he'll keep warm with skating. His toes may look out upon the world with his ventilator boots. His populous hair exude through the "air structure" which he calls a cap. He may flutter a perpetual white flag at half-mast, but it is not a flag of truce—much less a flag of distress. No dinner to eat? Then all the more time to skate. No bed? Then he can sleep without taking off his skates. There is but one misfortune that can touch him: that is a disaster to his skates. There is no telling what depths of infamy he may or may not reach by-and-by: he may graduate into a jail-bird, a contractor, or a congressman. No matter; he is happy now and deserves to be, for he is innocent—innocent, even though he chew tobacco extensively, and swears when occasion seems to call for it. When you miss him in the street, be sure that his banner is flung to the breeze on some rare spot of ice. Then put your skates under your arm and look him up. When you find him you will find fun.

AN IMMENSE ESTABLISHMENT.—The Cambria iron works, at Johnstown, Penna., are being enlarged, though already the most complete and extensive establishment of the character in the country. These works give employment to about two thousand five hundred men, whose labor produces every week an average of over eight hundred tuns of railroad iron. The ore and coal necessary to produce this iron are taken out of the hills surrounding Johnstown, to the large and seemingly inexhaustible deposits of which the location of the rolling mill at that place is due. The monthly payments of the proprietors of the rolling mill to their employes, to neighboring farmers, lumbermen, etc., amounts to about $100,000; nine-tenths of which sum passes at once through the channels of home trade.

☞ A Post Office clerk tells the following: A man called at our general delivery one day, when I happened for the moment to be engaged elsewhere in the office. He whistled loudly. I stepped to the window and savagely inquired: "Whose dog are you whistling for?" "One of Uncle Sam's pups," said he quite composed. I had nothing to say. He evidently *cur*-tailed his answer.

HOTELS.

REVERE HOUSE.

Second Street, Opposite the Court House,

Napa City,

GOODRICH & DEMMITT, Proprietors.

THE UNDERSIGNED, having taken the above named well-known Hotel, and fitted the same up in superior style, would respectfully announce to the public that they are prepared to furnish excellent accommodations to permanent and transient guests.

The house is built in modern style, and the rooms are large, airy and pleasant. Families can be accommodated with elegant suits of rooms at reasonable rates.

THE TABLE AND BAR will be provided with all the substantials and luxuries to be procured in this market.

The location of the house is central and convenient. A fine Livery Stable adjoins the premises, and the Telegraph Office is next door. The offices of all the stages running out of town are in this Hotel.

☞ No effort will be spared to make the Revere House one of the best Hotels in the State. Public patronage solicited. GOODRICH & DEMMITT.

Legal Notice.

IN THE DISTRICT COURT OF THE TWELFTH Judicial District of the State of California, in and for the City and County of San Francisco.

LAURA A. MOWRY, Plaintiff, vs. SYLVESTER MOWRY, Defendant.

Action brought in the District Court of the Twelfth Judicial District of the State of California, in and for the City and County of San Francisco, and the complaint filed in said City and County of San Francisco, in the office of the Clerk of said District Court.

The People of the State of California send greeting to Sylvester Mowry, Defendant.

You are hereby required to appear in an action brought against you by the above named plaintiff in the District Court of the Twelfth Judicial District of the State of California, in and for the City and County of San Francisco, and to answer the complaint filed therein, within ten days (exclusive of the day of service), after the service on you of this summons,—if served within this County; or, if served out of this County, but in this District, within twenty days; otherwise, within forty days—or judgment by default will be taken against you, according to the prayer of said complaint.

The said action is brought to obtain a decree dissolving the bonds of Matrimony existing between the Plaintiff and Defendant and awarding to said Plaintiff the care and custody of Ellen Melissa and George Barton, the children of said parties, and for general relief and costs.

And you are hereby notified that if you fail to appear and answer the said complaint as above required, the said plaintiff will apply to the Court for the relief therein demanded.

Given under my hand, and the seal of the District Court of the Twelfth Judicial District of the State of California, in and for the City and County of San Francisco, this twenty-sixth day of October, in the year of our Lord one thousand, eight hundred and sixty-four.

HORACE WATERS, Ag't,
No. 481 Broadway, N. Y

THE DAY SCHOOL BELL.

40,000 copies issued. A new Singing Book for Schools and Seminaries, called the Day-School Bell, is now ready. It contains about 200 choice songs, rounds, duets, trios, quartetts, and choruses, many of them written expressly for this work, besides 32 pages of the Elements of Music, which are easy and progressive.

Among the large number of beautiful pieces may be found, "Uncle Sam's School," "Don't you hear the children coming," "Always look on the sunny side," "The little lass," and "Little Lad," "Oh, if I were a little bird," "Bird of beauty," "Pretty pair tree," "Anvil Chorus," "Meet me by the running brook," etc. It is compiled by Horace Waters, author of "Sabbath School Bell," Nos. 1 and 2, which have had the enormous sales of 825,000 copies. Prices—paper covers, 25 cents, $20 per 100; bound 30 cents, $25 per 100; cloth bound, embossed gilt, 40 cents, $35 per 100. 25 copies furnished at the 100 price. Mailed at the retail price.

SABBATH SCHOOL BELL, NO. 1,

contains 144 pages, and nearly 200 tunes and hymns, and is the most popular S. S. Book ever issued. Among the most popular pieces are "Kind Words," "Eden Above," "Christian Hero," "Beautiful Zion," "I ought to love my Mother," "The Angels told me so," "In the Light," "Rest for the Weary," etc. Prices—paper covers, 20 cents each, $15 per 100; bound 25 cents, $20 per 100: clothbound, embossed gilt, 30 cents, $25 per 100.

SABBATH SCHOOL BELL, NO. 2,

is an entire new work of 192 pages, and nearly two hundred and twenty-five tunes and hymns. One million of these Bells have been issued and are now ringing through this and other countries. Among the many choice pieces may be found, "Shall we meet beyond the River?" "There is a Beautiful World," "Sorrow shall come again no more," "Don't you hear the Angels coming?" "Thou, God, seest me," "Sabbath Bells chime on," etc. Prices of Bell No. 2. are same as Bell No. 1. Both numbers can be obtained in one volume, price, bound copy, 40 cents, $35 per 100; cloth bound, embossed gilt, 50 cents, $45 per 100. 25 copies furnished at the 100 prices. Mailed at the retail price.

WATER'S CHORAL HARP.

A new Sunday School Book of 160 pages of beautiful hymns and tunes. It contains many gems, such as "Shall we know each other there?" "Suffer little children to come unto me," "The Beautiful Shore," "Oh, 'tis glorious," "Leave me with my mother," "He leadeth me beside still waters," etc. Price, papers covers, 20 cents; $15 per 100. Bound, 25 cents, $20 per 100. Cloth bound, embossed gilt 35 cents. $30 per 100. Mailed at the retail price. It is edited by HORACE WATERS, author of "Sunday School Bells," Nos 1 and 2, which have had the enormous sale of over 800,000 copies.

Just published by HORACE WATERS,
No. 481 Broadway, New York.

THE NEW PATRIOTIC SONG BOOK

contains 96 pages of songs, duets, and choruses, both sacred and secular, including 14 pages of prayers for sick and dying soldiers, and soldiers' Scripture Manual. It is well suited for social singing, as well as Sabbath worship. Among the many beautiful pieces may be found, "Where liberty dwells is my country," "The Christian Hero," "Three cheers for our Banner," "Come sing to me of Heaven," Columbia, the Gem of the Ocean," "Freeman's Gathering," "Columbia's King forever," "Marching Along," etc. Prices—paper covers, cents, $10 per 100. Mailed at retail prices.

THE HARP OF FREEDOM

contains 32 pages of songs, duets, and choruses for Freedom. Among the choice pieces we would name, "Fair Freedom's morn," "O let my people go," "Over the mountain," "They worked me all the day," etc. Price 5 cents single, 50 cents per dozen, $3 per 100; postage 1 cent each

RUTH: A SACRED CANTATA

contains 126 pages. Words by Rev. Sidney Dyer, music by Prof. Call. This is an excellent book for concerts for the young. Prices—paper covers, 20 cents, $15 per 100; bound 25 cents, $20 per 100.

THE REVIVAL MUSIC BOOK

contains 73 pages of tunes and hymns, designed for revival prayer, and conference meetings. Price in paper covers single copies 10 cents, $8 per 100. Mailed at the retail price

THE ATHENÆUM COLLECTION

contains 512 pages of tunes and hymns, new and old of the choicest kinds, for church, Sunday school, revival, missionary, temperance, prayer, and conference, and all kinds of sacred and social meetings. The music in this book has life and animation in it, like "Shining Shore," "Rest for the Weary," "Shall we know each other there?" "Shall we meet beyond the River?" "There is a Beautiful World," "Kind Words," "Sweet Hour of Prayer," "There is a Land of Love," "Suffer little children to come unto me," "God save the Nation," etc. Prices—single copies, bound, 65 cents, $55 per 100; cloth bound, embossed gilt, 75 cents, $65 per 100 Mailed at the retail price.

HORACE WATERS, Ag't
481 Broadway, New York,
Publisher of the above Books.

THE

MOST PERFECT AND BEAUTIFUL

Musical Instrument

IN THE WORLD

FOR THE

American Home Circle.

WITH THE MOST PERFECT CONFIDENCE, we call the attention of the public to the AMERICAN ORGAN, as an instrument long desired in the Family Circle, and with our patent improvements is adapted to all kinds of Music, more especially to Sacred Music, with its sustained tones and harmonies, so much desired and sought for in American homes.

The AMERICAN ORGANS are superior to all other instruments of the kind, in many important particulars.

They are superior in their greater fullness and completeness of tone, volume and power. They are superior in expression, quickness of action, and elasticity of touch, rendering them perfect in rapid movements.

They are superior in quality and beauty of tone, and when controlled by the DOUBLE BELLOWS and BLOW PEDALS, Knee Swell, etc, the most charming effects can be produced, from the softest whisper of the Æolian harp to the full volume and power of the church Organ, thus enabling the performer to give expressions not to be found in any other instruments.

The TREMOLO stop has a pleasing and beautiful variety, sympathetic in quality, appealing to the tender emotions of the soul, producing effects the most charming and soothing; it is universally admired and appreciated. The KNEE SWELL gives the performer full control of the tone, enabling him to graduate from the *Pianissimo* to the *Fortissimo* at pleasure, and combines the effect of the Expression Stop of the French Organ in the AMERICAN ORGAN, more perfectly and easily managed.

With all these combinations and improvements of Double Bellows, Pedals and Swell, the AMERICAN ORGAN excels in Expression, Variety, and Power, and has all the quality and capacity of a full Orchestra, and in the hands of a master is capable of the most complete orchestral effects.

The AMERICAN ORGANS are superior in Mechanical finish of the action and interior portions of the Musical parts. The valves are of material expressely prepared to avoid all sticking, cracking, or decomposition, are thus durable and will be always in order.

The Keys, Reeds, etc, are perfect in their finish, and this gives the quickness and sprightliness of tone, brilliancy, etc, equal in every respect to the "percussion stop" of the French Organs, but not like them in danger of getting out of order.

The AMERICAN ORGANS are by far the most beautiful in exterior finish, forming a handsome piece of furniture for the Parlor, Boudoir, or Sitting Room, occupying but little space, and perfect and complete in every particular.

THE

AMERICAN ORGAN

Makes Home Attractive; and Refines and Elevates the Minds of All.

Beautiful in its Appearance and Effects.

The AMERICAN ORGANS are finished in Rich Rosewood Cases, varnished and polished, forming an elegant piece of Furniture. Also, in Black Walnut Cases, and in Oak, finished in oil, and especially adapted for Churches, Lecture and Lodge Rooms.

They take but little room, are only 35 inches high, and from 34 to 47 inches wide. *They cost but a trifle more than Melodeons*, and yet possess many times their advantages in musical capabilities.

The California Farmer.

SAN FRANCISCO:

FRIDAY.....JANUARY 27, 1865.

☞ Those who receive a number of the Farmer with this paragraph marked, may understand that it is sent to them for their examination, hoping it will meet their approval and induce them to subscribe, and ask their neighbors to do so.

Postmasters and others, who may receive the paper, will oblige us by soliciting subscriptions, or putting it in the hands of those that will. Subscriptions may commence at any time.

Send for Sample Papers and get up a club. Address

Publisher California Farmer, San Francisco.

TERMS OF ADVERTISING.

The charge for Advertising in the CALIFORNIA FARMER (payable in advance), is **One Dollar** for five lines, or less of space, in nonpareil type, for one insertion, and ten cents a line for any larger space. Each subsequent insertion half these rates. This it is believed affords the cheapest and best medium of reaching the Agricultural community on this coast. As heretofore, the right is reserved to reject any advertisements deemed objectionable.

☞ **Take a Copy.—Are You a Subscriber ?**

We have distributed many thousands of copies of this journal during the Fair Season, and we have a just reason to hope that among these thousands we shall find many persons who will desire to become subscribers to this paper, now the oldest newspaper of the kind on the Pacific coast, a journal, too, that has been wholly devoted to the Home Interests of of our State. Those who desire it, in our city, can have it left at their residences by a carrier, every week. See terms at head of column.

THE CALIFORNIA FARMER READING-ROOM AND MUSEUM OF NATURAL HISTORY.

20 Clay street—Marble Building—Up Stairs.

The Farmer's Headquarters.

The Editorial Rooms and Museum of the Farmer Office are always open, and an attendant ready to make a visit instructive to those who take an interest in the productions of our State. Samples of all productions: grains, grasses, fruits, models, inventions, minerals, and specimens in Natural History innumerable, are constantly being added.

Farmer's Reading-room.

Farmers and Mechanics, from the country, who visit San Francisco, should visit the Free Reading-room and Museum, at the Farmer Office. Members of the Press, and Strangers, are particularly invited to avail themselves of these rooms. Newspapers from every State to which we have access by mails, as well as Foreign Newspapers, Periodicals, and Magazines, are upon file and on the tables for use; a Good Library of hundreds of volumes, with works illustrative of Agriculture, Horticulture, and Floriculture, works for reference upon all Sciences, with a Cabinet of Minerals, Coins, and Curiosities of interest to the Naturalist, to which we invite all.

Immigration Office.

ew comers to California can always obtain all needed information about Lands, Farms, etc, at the Farmer's Reading room, 320 Clay street. Most cheerfully we bid all welcome to our Sanctum.

Patent Rights.

It has been, and will be, one of our specialties to aid all who desire to secure PATENT RIGHTS, and to give them information and assistance in preparing their papers. We can facilitate them greatly in this matter as we have all the Laws and Rules of Action touching these things. Many models can be seen at our Office and Reading-rooms, where all are invited freely.

TO READERS AND CORRESPONDENTS.

Our correspondent "Orrilla," speaks this week to our readers upon beautiful-leaved Plants and Wardian Cases, their uses and benefits.

We sincerely hope some readers at least will give heed to the subject of Plants and Trees, and the beautiful Leaves of each. These are the *Voices* that whisper to us so beautifully as the winds move them; and there are so many, as "Orrilla" says, that are so beautiful in themselves.

To one familiar with rare and beautiful Plants, perhaps there is no leaf more beautiful than the Anechtochilus Setacea, its deep green color, laced with bright gold threads, gives it the appearance of some piece of rare *artistic* work; and there are many more leaves that in themselves are *full of beauty*.

The remarks of our friend "Orrilla" upon a leaf, reminds us of some beautiful lines which were written in an Album kept in our garden in Massachusetts. A young English poet, who had been reclaimed from reckless intemperance by that great reformer, John B. Gough, visited us, and on presenting him with the gorgeous and beautiful leaf alluded to, his exclamation of wonder and delight induced us to ask him to favor us with his *thoughts upon the leaf*. With cheerfulness and alacrity he sat down and wrote, impromptu, the following exquisite and truthful lines:

A LEAF.

As through a little glass we see a wide expanse of air,
And earth and sky and field and tree spread out in beauty there;
So in the smallest thing of earth a leaf, a bud, a flower,
We may perceive the wondrous truth of an Almighty Power.

A wondrous field is shown us then, whose end we cannot see,
So far above all thoughts of men is its infinity;
A field where nothing rank can grow, a field forever green,
We scarce can catch a glimpse below—above 'twill all be seen.

In Nature there are are no degrees of beauty—all are one,
Each *leaf* is formed as wondrously as any *star* or *sun;*
Then scorn not e'en a little leaf on this sepulchral clod,
Read, mark and learn, and court belief, 'twill lead thy thoughts to God.

Warren's Nursery, May 29, 1845. J. D. Ross, of Boston, England.

The Poet gives voice to sublime thoughts, and bids us all inquire, who can paint like God?

We received a complimentary card to attend the reading of the Poem by Mrs. Richardson, of the "Northern Seer," by J. H. Warwick, Esq. We regret the loss of this intellectual treat, but our absence from the city precluded it.

Sacramento.—Rambles in the "Queen City," among workshops, in our next.

Sacramento is in a most prosperous state.

New Coin.—We are indebted to Dr. Feuchtwanger, of New York, for samples of their new coin—*one cent*—the style now proposed for United States currency. They are neat and like silver.

☞ We regret to leave out the "War Letter," but press of new advertisements, etc., compel us. It will appear next week.

We return thanks to our Sacramento friends and others, for the new subscribers kindly sent us, with other favors. Their advertisements will appear next week.

The State Agricultural Society and Board of Agriculture of California.

The Annual Meeting of the State Agricultural Society *vs.* the Board of Agriculture was held at Agricultural Hall, Sacramento, January 26th, at 2 o'clock, P. M. The meeting was called to order by C. F. Reed, Esq., President, who in a few brief words stated the objects of the meeting, and said that the first duty was for the old Board to give an account of their stewardships.

The reading of the doings of the last Annual Meeting was dispensed with, and the Secretary, I. N. Hoag, Esq., read the Report of the Board—a long and valuable report—(we shall publish it hereafter.) This Report was well received, and was accepted and placed on file.

The Secretary then read the Reports of Secretary and Treasurer, both of which were interesting and were satisfactory to the members present, were accepted.

The Report of the Treasurer made known the Receipts and Expenditures of the past year, by which the following exhibit is made:

Received during the year, from January 1st to December 31st, 1864	$13,053 00
Paid for expenses and premiums	10,591 03
Paid for outstanding warrants	2,461 97
Warrants against the General Fund, January 13th, 1864	18,526 55
Interest on the same from date of registry to January 13th, 1865	1,220 82
Total indebtedness at last date	19,747 37
Warrants redeemed	8,412 72
Outstanding warrants January 13th, 1865	11,334 65

Such a result for so disastrous a year was much better than was expected, and is highly creditable to the earnest laborers of the past year; it is an assurance that they mean the Society shall live and prosper. While this statement is being made, let it not be forgotten that to the citizens of Sacramento the success of such a result is owing, for they came forward with a noble generosity, and in spite of misfortunes and hard times, contributed voluntarily over $6,000 rather than have the year pass without a Fair.

After the reading all the Reports, and a recess of some twenty minutes, the election was held to fill the Board of Officers, when the following were elected:

C. F. Reed, Esq., *President;*

R. J. Walsh, Esq., A. G. Richardson, Esq., Rob't Beck, Esq., *Directors for three years.*

The President, on accepting his new term, in brief and appropriate words returned thanks for the honor conferred, and gave assurance he would give the cause his earnest labors.

After the usual congratulations of the members with each other, upon the recent success, and the present and prospective prosperity, the meeting adjourned until 7 o'clock, P. M.

EVENING SESSION.

After the meeting was called to order by the President, the Treasurer's Report having passed through the hands of an Auditing Committee and found all correct was reported upon by their Chairman, J. Arnold, Esq., accepted and placed on file.

The committee that had been appointed to present some alterations to the Constitution, made their report, through their Chairman, J. H. Carroll, Esq., which was read, the several articles taken up, acted upon, and passed unanimously.

The following resolution was offered and passed unanimously:

Resolved, That the thanks of the Society be tendered to their executive officers for their very able, interesting and complete Annual Report made to this meeting, and that we specially commend its suggestions and recommendations to the friends of agricultural improvement throughout the State.

Colonel Warren offered the following, which was adopted unanimously:

Resolved, In consideration of the unfortunate and embarrassed condition of the State Agricultural Society in 1864, which precluded the possibility of an agricultural exhibition of that year, the duties of the Secretary, I. N. Hoag, were peculiarly arduous for the new order of things; but the universally satisfactory manner in which his duties were performed, and the increased good will to the Society resulting therefrom, it is hoped that the valuable services of the same officer will be secured for the coming year, as likely to win many more friends to the Society and increase the best interest of this institution.

The evening session closed at 8 o'clock, after which the Board called a meeting for the election of Secretary and Treasurer, when I. N. Hoag, Esq., was chosen Secretary, and R. T. Brown, Esq., Treasurer, the former Treasurer, W. P. Coleman, Esq., having resigned, which resignation was accepted.

We are most happy to record the pleasing fact that the present annual meeting was the most pleasant, harmonious and satisfactory to all present of any which have occurred within the last six years. We mention this, and look upon it as a good omen of the future.

Some important Letters and Statistics, with the Report, will appear in our next.

Sowing Alfalfa.—Those who desire to be successful in planting fields of this *valuable Clover*, must remember that what is worth doing at all, is worth doing well. All lands to be planted with the Alfalfa should be plowed very deep, and the soil made fine by repeated plowings, 16 inches deep; 20 inches is better, as the root of the Alfalfa will penetrate from 3 to 10 feet deep in search of moisture. Alfalfa should not be sown till all danger is past from *hard frosts*, say February, then sow thick on well pulverized soil 16 to 20 lbs per acre, and cut down when a foot high; cut often, never let it grow rank or high. When thus harvested, it is the best hay in the world.

International Exhibitions Abroad.—*The Dublin International Art Exhibition* will commence in May 1865, and remain open till October. All who desire to exhibit should address P. L. Simonds, Esq., the Society of Arts, John street, Adelphi, W. C., London, England.

Prussian Exhibition of Industry.—There will be an International Exhibition opened in April to all Nations, at Stettin, Prussia. All goods sent will be *duty free*. The American Consul, C. J. Sundell, Esq., will assist all contributors with information, etc.

California Influence—Our Money and Men.

There is a very singular and mysterious influence around and about our State that seems to carry with it, and to be the "Voice of Destiny."

We have frequently reverted to the fact that the "Gold of California" annually sent East was about the amount of balance sent to Europe to equalize our exchanges, and that it was California Gold that kept the whole Eastern States from monetary convulsions, and that were it not for the supply forwarded from our State, there would have been a scene of monetary ruin unparalleled in the history of the world.

It will well be remembered that the burning of the steamer Golden Gate, and the loss of that treasure, was the last stone that knocked out the machinery and brought on the panic at that time; and we feel confident that had it not been for the constant and reliable flow of Gold from California, our country could not have carried on the war without a resort to a foreign loan, and perhaps not at all; for there seemed a peculiar Providence in the fact that we as a nation could and must rely upon our own resources, and the Golden State was the appointed resource to fill up the vacuum of our foreign drain, and thus save our country from foreign dependence. Our Money thus has accomplished this great good.

OUR MEN.

When the history of the war shall be written, we think *ample justice* will be done to the Golden State, and California will occupy one of the brightest pages of that history.

In all the early part of the rebellion there was a constant clash and collision among the leaders of our armies. Envy, jealousy and petty rivalry was eating into the very hearts of almost all the prominent leaders. There were constant recalls of our Generals and leading officers from their posts to attend on Courts of Inquiry to answer charges of disobedience of orders, breaches of discipline, betrayal of trust, cowardice, etc.; and it was not until the influence of the Golden State leadership was felt that order was restored. These are not mere words of praise and adulation for our State or our Generals, but they are fixed facts that will stand out in the pages of history in coming years, when the full details of the war shall be written and justice done to all.

We would not take one iota of just praise from any General or other officer, or any portion of our mighty army, for they were the patriot host that have saved our country and the world's liberty for all time to come; but our object is to point out facts.

The present condition of the army of the Union in regard to the great leaders is a peculiar one, and worthy special attention in connection with California's influence after *four years war*, and a host of leaders who have been victorious, who have fallen bravely in the cause. Who are the victorious leaders now?

We will name General U. S. Grant, General Sheridan, General Sherman, General Hooker—these are our great leaders now, all of whom have drawn inspiration and the fire of energy from the golden shores of California.

The lamented Baker fell a martyr with others. There were other California Generals, but like Lot's wife they looked back—but salt won't save them, nor history either. But the brave and noble leaders that now command the admiration of every Union heart and the world—these leaders are the men for the times and the men for the places they occupy, and we verily believe tha Heaven so ordained that this new State should so exert its influence for the salvation of the Union as she has done, and that the future historian of the war shall note down in letters of gold, when speaking of California influence, "California Gold" and "California Leaders" have saved the Union.

I. N. Hoag, Esq., Secretary of State Agricultural Society.

We are truly glad in making a record of the fact of the re-election of this gentleman *unanimously* by the Board of Agriculture, yesterday evening, to the important *working post*—the Secretaryship of the Society.

We know the arduous duties of this post, having in the early times of the Society labored *three years*, and can therefore know what he has had to do, especially in the peculiar condition of the Society during the past year, and it was for this reason that we felt it a duty and pleasure to move the vote of thanks he so well deserved and promptly received.

We are also particularly pleased to make this record from the fact, that on reaching Sacramento City on the day of meeting, the Sacramento Union had placed the name of T. B. Merry before the Community as a candidate for this office—when this fact was known the true friends of the Society and the Secretary were surprised that any person would or could desire to displace so worthy an officer, or seek to obtain the office. Mr. Merry a well known Reporter of Races, and familiar with "Horse"—the best Reporter of the Turf on this coast—is, we believe, the special Reporter on this subject for the Union. This may explain *why* the Union desired Mr. Merry to occupy so important a place as the Secretaryship of the Board of Agriculture of California.

The result of all such movements was settled when the Board met in the evening to elect their Secretary. When the question came up, T. L. Chamberlain, Esq., placed the name of I. N. Hoag, before the Board as Secretary. A second Director approved, and no other name being offered, the nominations closed. A third Director moved the vote be declared unanimous, when it was done earnestly with cheers. This state of feeling sealed the question O. K.

"Rambles in City and Country."—Our absence from the city to attend the annual meeting of the State Agricultural Society, and reports thereof, and statistical tables, compel us to leave out "Rambles," the sketch of the celebrated woman Mrs. Farnham, and much other matter till next issue, No. 3.

OBITUARY.

My Mother! Dead must be that soul to all the better feelings of Humanity and its own highest Nature that does not heave a quick and noble throb of feeling at the remembrance of that one to whom it owed its being—from childhood's earliest by-words and from the cradle-songs, lisped by the mother, come to us the fragrant memories of our best, purest and happiest days, and oh! how unnatural must that person be that will not hush every other thought and feeling, aspiration and desire, as they recall the life of toil, labor and anxiety which only a mother could do, feel and perform for the child of her own body and spirit. If children are worldlings—thoughtless, selfish or even forgetful of what is due to their loving parents while *they live*, when death takes the Parent from them, *memories* will then awaken all the past, and the Parent, though dead, will speak.

"Alas, how little do we appreciate a mother's tenderness while living! How heedless are we in youth of all her anxieties and kindness! But when she is dead and gone; when the cares and coldness of the world come withering our hearts; when we experience how hard it is to find true sympathy, how few love us for ourselves, how few will befriend us in our misfortunes; then it is, that we think of the mother we have lost."

How sweet and soul-cheering will it ever be to a son and a *daughter* who, when this relentless destroyer comes to take away a parent, shall recall only a life of filial obedience and love to the Father and Mother withdrawn from them forever. To the dutiful and affectionate child, recollection of the past will all be of happiness, and though it may be grievous to loose a loving parent, Death will have no sting and the Spirit of the Loved one, "gone before," will come again, and often come, to still the sigh and dry the tear, for there will be no memories but those of love, duty and affection, to recall.

We are led to these thoughts by recent afflictions which have befallen friends, to whom we offer our truest condolence and sympathy. We can mourn with those who mourn, for we, too, have both our dear and loving Parents in Heaven, and from them we often draw sweet consolation and support.

By the last steamer the news received give the the following:

"Died—On Monday, October 24th, at the residence of her son-in-law, W. S. Schaffer, Esq., at Harrisburg, Pa., after a long and severe illness, which she endured with the patience and fortitude of one whose firm faith and hope in Christ gave her support, Mrs. Anne Reeside, relict of David Reeside, late of Williamsburg, New York, formerly of Baltimore county, Maryland, aged 61 years."

The name of "Reeside," is intimately woven with the early traveling business of New York and Pennsylvania, years before Railroads and Steamers gave the facilities of the present day. The "Reeside Coaches" were on every road from Albany to New York city, and all over that portion of the country David Reeside was the great Stage Proprietor of those early times, and lived, a man celebrated for his energy. He left a very large estate, which, by the intricacies of the law was in court, nearly 20 years since his death, and the widow and children were deprived of the hundreds of thousads that should have fallen to them.

The same letter that brought the doleful news of the death of Mrs. Reeside to a daughter in California, brought the news of the loss of a dear brother also, who has just fallen fighting for his country, under Sheridan, in the Shenandoah Valley. It was a terribly heavy blow for a loving Daughter and Sister in California, to receive, having lately lost other dear relatives. Mrs. Reeside was the mother of Mrs. George Laws, recently of Marysville, now of this city, who as an affectionate and dutiful Daughter mourns a loss that earth cannot replace. Mother and Daughter were most tenderly allied, and this blow falls heavily indeed. Only those who have lost a mother can know how great that loss is.

"Ere yet a child hath drawn its earliest breath,
A Mother's Love begins—it grows till death!
Lives before life, with death not dies, but seems,
The very substance of *immortal dreams*."

"For if there be a human tear,
From passion's dross refined and clear,
'Tis that which pious parents shed,
Upon a duteous daughter's head."

The Cost of the War.

The annexed table presents the near approximation to the number of soldiers now employed "to keep the world in awe"—in other words, the "armed" men *fighting* to preserve "peace."

We give the list of foreign countries leaving out our own, and the estimated *annual* cost is not far from $400,000,000. Should we add the Union and Confederate armies—say 1,500,000 or more—the grand total would not be far from 2,000,000 men, then add the annual cost of this rebellion—cost of both sides—say $2,000,000,000 more—and we have the terrible spectacle of $2,500,000,000 (two thousand five hundred million dollars), annually spent to sustain the world's army, fighting to preserve the "Peace" of the world:

Country.	Population.	Army.
Austria	35,000,000	476,000
Belgium	4,500,000	100,000
Denmark	2,600,000	23,000
France	35,000,000	750,000
Germany	45,000,000	503,000
Great Britain	28,800,000	148,000
Greece	1,000,000	18,000
Holland	3,300,000	57,000
Italy	21,800,000	300,000
Portugal	3,500,000	16,640
Prussia	18,400,000	208,000
Russia	73,900,000	1,200,000
Spain	16,300,000	151,000
Sweden and Norway	5,000,000	156,000
Switzerland	2,500,000	339,000
Turkey	35,000,000	450,000
Total	331,600,000	4,895,640

The New Age.—This is the title of a new paper dedicated to the cause of Odd Fellowship. No. 1 is before us. The title is a significant one, for it is a *New* Age—the "Age of Freedom." Our new cotemporary, W. W. Broughton, Esq., comes before his patrons in a very neat dress. The general appearance of the New Age is very favorable, the articles well written, teaching sound doctrine. We most sincerely hope the Members of the Order will nobly sustain it. We wish it success.

[For the California Farmer.]

Wardian Cases.

[We call attention to the very pleasant sketch from "Orrilla," on Wardian Cases. Those who desire to see them in perfection, should go to the Floral Store opposite the Cosmopolitan Hotel.]

If flowers are so universally loved and accepted everywhere, as necessities of moral life, whatever can be done to render their culture easy and to bring them to perfection in the vicinity or within the household, must be regarded as a benefaction. The citizen may refresh himself with a sight of the country by traveling to it, he may have many choice things in his garden, but to grow the "fine gems of verdure," a Wardian Case is the only method. Not only may many Ornamental Plants be thus preserved, in their full beauty, but the rarest forms of vegetation, which refuse the tenderest care of skillful gardeners, under all ordinary circumstances, readily submit to domestication and attain their highest development of beauty in these cases, if the requirements of the wants are supplied. They were originated by Dr. W. B. Ward, of London, in 1829; they can be made of any shape or size and as cheap or expensive as the fancy of the possessor may desire. In fact it is a miniature Greenhouse, and in it we can rear our most favored plants in their greatest perfection, giving a moist atmosphere and preserving them from the dust, which are the most essential requisites in plant culture. No home of taste is complete without one or more of these cases, which are the gems of the wayside wanderings. How many of our little wildlings would here astonish and surprise us with their beauty under such care and attention—

"Gems of every form and hue,
Are glittering here in morning dew." Orrilla.

[For the California Farmer.]

Beautiful Leaved Plants.

All leaves are *beautiful* to the thoughtful and careful observer of Nature; the examination of each leaf reveals beauties that to the ordinary observer passes unnoticed. But we would call attention to the Ornamental or Variegated Foliage Plants. In many instances the leaves are more strikingly conspicuous, that the flowers among them only rank second in beauty. They are to be found among the ferns, grasses, flowering shrubs, trees, and the bulbous and herbacous plants. I doubt many of your readers have seen the magnificent collections in England, France, and all the East, and, if agreeable, I will from time to time give you some descriptions of them, with the hope that some of the lovers of the Beautiful will be induced to get up a collection, and so stimulate their neighbors, and increase the love for the Beautiful in Nature. The poet has said:

"Most beautiful the world is yet, and beautiful 'twill prove,
Whilst one single God-made creature remains to charms to love;
'Tis man's own sickly blindness makes the world formed alone,
Who know it most, see beauty most; who know least, see none." Orrilla.

The Late Storm.—The storm of the present week has been very severe; it has been one of the severest of the season. Rain has fallen in torrents in all of our principal cities, and over the State. Snow lies in great depth on the mountains; the wind blew a gale in many places, and some damage has been done; but nothing compared to the vast good that will result to the earth. This rain will act upon the earth like a healing balsam, extracting all the poison of the late frosts, the same as a good application to a burn or a scald takes out the injury—so the late rains to the earth.

Speech of Earl Russel.—Earl Russel has been installed rector of the Aberdeen University. In the course of a speech which he made on the occasion he said: "There is another portion of the globe where we still have to lament scenes of bloodshed. We still have to lament the blood arbitrament of war in America. We have to lament that that war has not yet been brought to a close. If there is any bright spot in the dark scene it is for the African race. I cannot but believe that the civil war in America, which-ever way it may end, whether there is to be a final separation, I cannot but believe that out of the events the African race are to receive their freedom."

Banks of the Sacramento.—The banks of the Sacramento river show marks of the overflow. For miles on both sides, on grass land, tules, orchards and gardens, there are pools of water and patches of sand remaining that show where the floods have been. Thus far the damage by the floods has been small. Perhaps in most cases producing more good than harm, drowning and killing gophers and insects innumerable, and enriching the soil at the same time by a deposit—a matter that more than pays by an increased crop any little damage that has been done.

Card to our Patrons.—We hope those of our patrons and friends who visit the city, will call at our Reading Rooms on Clay street, and see us. We are desirous to meet all, and receive all the items of interest they can give us on crops, preservation, stock, vintage, etc., and we hope they will bring any and all samples that will add to the interests of the Fair, especially samples of grasses, etc.

Daguerrean Partner Wanted.—We call attention to the card of an advertiser for a Business Partner in the Daguerrean Business. As we know both parties, the position and the business, we can say that it is a rare chance and an unusual opening. For a man with from $3,000 to $4,000 capital, it is one of the best openings for a permanent business and a profitable investment that can be offered.

Christian Good's Restaurant.—The very best restaurant in our city is at the head of the list. Everything you want is served up promptly, neat and fine, and it is always *good*

Letters from an Old Californian at the East

NEW YORK, Dec. 27, 1864.

NUMBER THIRTY-SEVEN.

Sleighing and Skating.

EDITOR CALIFORNIA FARMER:

For the first time since I have been in this city the sleighing has been good for a whole week, and the Fifth Avenue and the Park have presented the gayest possible appearance. Picture to yourself a graceful shell-like thing in the form of a swan—fill it with gaily-dressed women and rosy-looking men—almost envelop them in costly furs—then fancy the appearance of the four blooded horses, covered with bells and silver ornaments, and you get an idea of a common "turn out." No less exciting and attractive is the skating carnival on the large pond. It is impossible to avoid feeling an enthusiasm for the sport in the presence of at least twenty thousand people, who are gliding in all manner of ways around you. I can imagine nothing lovelier than a young girl who attracted my attention the other day, on the Fifth Avenue pond. She was very beautiful, and the flush of exercise and the enthusiasm which lighted up her face, would have charmed me if I had been a painter; but I almost forgot her beauty in the grace of her movements. She seemed to float in the air. Her costume was characteristic, and was in perfect good taste. She wore what is called a Polish dress, of black velvet, trimmed with sable, with a Polish cap and feather, and boots to match. Her long silken curls played about her face, and the wind seemed to delight in arranging them so as to add to the grace of her appearance. She was in company with a number of young people, but she seemed a queen in their midst.

The Holidays.

What brilliant sights there are to be seen in New York, to-be-sure. After a day in the Park, I went to the Opera, and as I looked around me at the splendor of the scene, I could not help wondering if in one day anywhere else a stranger could see more to attract him. All the parquet, balcony and dress circle were literally crowded with butterflies, the dazzle of whose wings made my eyes ache. The men, too, fresh from the hands of the hair-dresser, and wearing diamonds that shone like stars, looked unreal. The brilliant scenery of "Don Sebastian" seemed tame, when one glanced at the bright colors gleaming like fairy-work on every side. The quiet spectator asks himself: "Is this a time of National calamity? Are we really engaged in a terrific war?" But as his thoughts take this turn, he hears the lady in blue silk, with the magnificent opera cloak, whisper, "Fred, did you read of the sufferings of the Richmond people to-day, and Foote's speech; and do you really believe it is all true?" True! may God in his mercy grant that all that we read may not be true. Would that the Southern aristocrats, whose pride has brought about all this suffering on themselves, could alone be punished. But the lady in blue, when she spoke of the news from Richmond, evidently had not seen the death list of our soldiers who have died in Southern prisons, on the next page, nor the cause stated in the one fearful word, "starvation!" Well may we feel sad to witness such extravagance in the evening, when the morning papers had detailed such tidings of sorrow. When philosophers speak of our enlightened age, one remembers in answer Pope's truthful line, "Man's inhumanity to man."

Christmas was made merry indeed by the pithy message of Sherman, and the thought that his "present" may be one long step in the direction of that Peace which we all pray for. I went to hear the music at the Catholic Church on Twenty-Eighth street, and the crowd was so great that it was with difficulty I could get a seat, although I was nearly an hour early. The music was far inferior to what you can hear at St. Mary's, in San Francisco.

Monday was set aside as a holiday by general consent, but to the disappointment of everybody but the *poor*, a warm rain melted both the snow and the ice, and finished the sleighing and skating in a few hours. The exhibition of the Artists' Fund Society is one of the great pleasures of New York at present. The great musical event of the winter was the choral festival at Trinity Church. I am in raptures with the voice of one of the boys; Master Coker is his name. His solos often attract me to Trinity Church; and I would gladly travel ten, instead of three miles, to hear him.

New York is full of Californians this winter, and they are enjoying themselves very much. Rumor says that the Seligmans are preparing to start a bank in California. They will command a large capital, and will be rivals to Davidson. What do Californians think of the testimony of Fremont in the Weed-Opdyke suit? The General would not have been a very good man to have placed at the head of National affairs, judging by his management of his Mariposa claim. The great excitement of the hour "down town" is the speculation in oil. People talk of "oil" just as they did of "feet" in San Francisco, and the speculative feeling is daily increasing. M. A. S.

The New Terms of Our Colleges.

As it will be our aim always to serve the cause of Education, we shall devote a space in our columns to the time of the new Terms of the various Colleges, Academies, and Seminaries of learning, and if the Principals of each will send us information of the same, the time of each will be placed in this column; and if they will send us their catalogues we shall be happy to distribute the same from our Reading-room, to which we invite all who are interested in the Cause of Progress in California.

We hope we shall have the earnest co-operation of all Principals and Teachers, and to receive communications for publication that will advance the cause of Education. Our journal having a wide circulation, we can thus give extended notice to our Colleges and Schools, and materially help the cause, we therefore hope a new interest in the work. We cannot keep the public advised of changes unless we are notified.

PACIFIC NATIONAL BUSINESS COLLEGE—
At San Francisco, for Males,
J. K. Laudenslager, Principal.

To such a person a liberal offer will be made, and no other person need apply than one who has knowledge and experience.

Address or call on the Editor o the California Farmer. 1

A CARD

TO OUR PATRONS.

'Tis said *competition* is the life of trade. Fair, honorable competition, we never fear; but when *our name*, or the *same name*, is used to deceive others or injure our business, it becomes our duty to notify our patrons and friends that such is the case.

We were recently called upon by a person in this city, to supply a large order for more than One Thousand pounds of Seed of various kind, and also for several housand Seed Bags—these were said to be for a store or stores in the country.

It soon came to our knowledge that these Seeds were to establish a Seed Store on Washington Street, in this city, under the same *Sir*-name as ourselves. The secret and unfair manner in which these Seeds and Bags were attempted to be procured of us, was so singular and so unfair, that we had just suspicion of wrong intent. We soon learned that *falsehood* was told us, and we refused to supply the order, knowing that no other establishment on the coast had laid in the stock of Seeds as ourselves, and having every reason to presume that our name will be used in the sale of Seeds elsewhere, we feel it a duty to remind our Customers and Purchasers of Seeds everywhere, that they should all be careful in sending their orders, and to be particular in their directions.

We have been established nearly ten years in the Seed Business, and we trust that by the extent and system with which our business has been conducted, we have justly earned the reputation of a regular Seedsman.

We import our Seeds direct from the best houses in Europe and the Eastern Growers, we have the most extensive stock in California by a large extent, and purchasers need only call at our establishment to satisfy themselves that our business is so conducted as to meet their approbation and business.

We return our thanks to our many Customers for their liberal support for these many years past, and trust a continuance for many years to come.

We would remind all our Friends and Customers the necessity of being particular and to address all letters and orders to

Small Homestead Wanted.

A SMALL, NEAT AND PRETTY HOMESTEAD is wanted, within ten miles of this city. The amount of land must not exceed ten acres, and it must be good land and now in cultivation. The advertiser has a good Farm in Humboldt County which he would like to exchange if possible, or make the next best terms possible. Any person having such a place can hear of a purchaser by leaving a note addressed "J. L. B.," Farmer Office. 14

Home Miscellany.

THE OLD MAN DREAMS.

O for one hour of youthful joy!
Give back my twentieth spring!
I'd rather laugh a bright-haired boy
Than reign a gray-beard king.

Off with the wrinkled spoils of age!
Away with learning's crown!
Tear out life's wisdom-written page,
And dash its trophies down!

One moment let my life-blood stream
From boyhood's fount of flame!
Give me one giddy, reeling dream
Of life, all love and fame!

—My listening angel heard the prayer,
And, calmly smiling, said,
"If I but touch thy silvered hair,
Thy hasty wish hath sped.

"But is there nothing in thy track
To bid thee fondly stay,
While the swift seasons hurry back
To find the wished for day?"

—Ah, truest soul of womankind!
Without thee, what were life?
One bliss I cannot leave behind:
I'll take—my—precious—wife!

—The angel took a sapphire pen
And wrote in rainbow dew,
"The man would be a boy again,
And be a husband too!"

—"And is there nothing yet unsaid
Before the change appears?
Remember, all their gifts have fled
With those dissolving years"

Why, yes; for memory would recall
My fond paternal joys;
I could not bear to leave them all;
I'll take—my—girl—and—boys!

The smiling angel dropped his pen—
"Why, this will never do;
The man would be a boy again,
And be a father too!"

And so I laughed—my laughter woke
The household with its noise—
And wrote my dream, when morning broke
To please the gray-haired boys.

O. W. HOLMES.

SUNBEAMS.

A baby sat on his mother's knee,
On the golden morn of a Summer day,
Clapping his tiny hands in glee,
As he watched the shifting sunbeams play.

A sunbeam glanced through the open door,
With its shimmering web of atoms fine,
And crept along on the sanded floor
In a glittering, glimmering, golden line.

The baby laughed in his wild delight,
And clutched at the quivering golden band;
But the sunbeam fled from his eager sight,
And naught remained in the dimpled hand.

For a cloud had swept o'er the Summer sky,
And gathered the beam to its bosom gray,
And wrapped in a mantle of sombre dye
The glory and pride of a Summer's day.

Thus cheated sore in his eager quest
With a puzzled look that was sad to see,
He laid his head on his mother's breast,
And gazed in the dear face wistfully.

The cloud swept by and the beam returned;
But the weary child was slumbering now,
And heeded it not though it glowed and burned
Like a crown of flame on his baby brow.

And I thought: Ah! babe, thou art not alone
In thy bootless quest for a fleeting toy;
For we are all babes, little wiser grown,
In our chase for some idle and transient joy.

We are grasping at sunbeams day by day,
And get but our toil for our weary pains,
For ever some cloudlet obscures the ray,
And naught in the sordid grasp remains.

But when the lures of our youth depart,
And our empty strivings are all forgot,
Then, down in some nook of the peaceful heart,
The sunbeam glows when we seek it not.

[For the California Farmer.]

Improvement of Mind.

The improvement of mind is a matter of much consideration. The youthful mind, so plastic, is subject to impressions which are lasting as Time, and should be moulded in harmony with the great laws of life. Each element should blend with the true aspirations of high and noble motives. Do we feel ourselves competent to the task of rearing those bright treasures to become useful citizens of an enlightened community? Have we as parents and guardians, prepared ourselves to become teachers and examples to those who are looking to us for that wisdom and guidance which our position requires? Children are inspirationally taught to look to us for knowledge, and if we fail to supply their wants, they soon feel drawn to other and more attractive sources. How carefully then should we cultivate our own minds, to prepare us to train such beautiful flowers. Mothers, you who have such blessings given you, cannot be too careful of their happiness; not merely to please them by toys and dress, but to instill beautiful thoughts, which will be as lasting as Time, which will not change with fashion, but grow more beautiful as changes come, and they meet the cold, unfeeling world. Then will these truths, and mothers' kind words, come up to comfort and console them. Parents cannot be too well cultivated to rear their offspring; they are their natural teachers; and if instructions are denied at home, and are sought for abroad, mingling with the world at an early age blunts the finer feelings, which should be cherished and shielded until mature years have stamped the impress of Truth upon the mind, never to be erased. M. J. U.

[For the California Farmer.]

Thoughts.

Beautiful thoughts are the flowers that border our pathway to the spirit land. How should we then cultivate such blessings, when we are the happy recipients of their beauty and fragrance? Their presence enlivens and beautifies our passage to that home where the immortal flowers bloom, never to fade nor grow scentless. Bright thoughts are the sparkling gems of beauty; they flash out from darkness, and light the path for the weary and oppressed, and quicken the pulsations of the heart, which would otherwise hang heavy. These are the gems and flowers of spirit life, which will adorn and bless our beautiful home, while care and sorrow belong only to this life, and will be left at the portals of death, or separation of mortal from immortal. M. J. U.

Speaking Through Tears.

BY T. S. ARTHUR.

Old Mr. Malcom was a stern, serious man. Almost from the beginning, life had gone roughly with him. The young human plant had not grown up in a hot-house, carefully sheltered and tenderly nurtured; but on a bleak hillside, where the rough winds compacted every fiber of its nature, and twisted it into unhandsome shapes—where the hot sun dried up its moisture and stunted its growth. But the roots struck down deeply and took firm hold. There was strength, and toughness, and tenacity; though neither beauty nor grace.

With no heart to love him, and no hand to guide him into safe paths, Mr. Malcom went astray in the first years of early manhood—he went very far astray, debasing and degrading himself. A rough, hard, strong-willed young man, he brooked no remonstrances or reproofs; and if force of any kind were brought against him, he fought his way through with a fierce strength that made him a dangerous antagonist.

A new circuit preacher came into the neighborhood where he lived, when he was about twenty-five years of age, and held meetings in the school-house—a man of more than usual earnestness, who had great power in speaking. Considerable interest in spiritual things was awakened. Malcom heard him talked about, and, as was usual with him, when religion or ministers was the theme, answered scoffingly. Some of his acquaintances tried to get him to the school-house on Sunday to hear the new preacher; but he preferred the tippling shop and vicious companions.

One day, while the preacher still lingered in this part of his circuit, Malcom met him in the road. They were alone. The preacher had heard of Malcom, and Malcom had heard of the preacher—both men being noted in their way. The preacher stopped, with his mild, calm eyes fixed on Malcom's face. Malcom scowled and moved on.

"My brother," said the preacher, kindly, and held out his hand.

"Don't brother me, you sanctimonious old hypocrite!" exclaimed Malcom, facing round and confronting the preacher. He looked fierce and threatening.

"We are all the children of one Father," answered the preacher, in a low, calm voice, still holding out his hand.

In his blind passion, Malcom struck the preacher's hand, accompanying the act of violence with an oath of such deep profanity that the preacher shuddered and turned pale. He was a true servant of his Divine Master—of Him who, while on earth, went about doing good. The blow did not hurt him half so much as the evidence it gave of the man's fearful depravity. He did not feel it as aimed at himself, but at the Lord whose minister he was.

The preacher stood still, with his clear, penetrating eye resting on the man. A tender sorrow veiled his face.

"You have hurt me here, my friend," he said, gently, but not weakly or timidly, laying his hand against his breast. "My hand does not feel the blow you gave; but my heart is aching. I was solicitous for your good—I held out my hand and said 'Brother!'—I wanted to win you back to our Father's house, that you might dwell therein forever, good and happy. But you struck at and reviled me."

The good man's eyes were dim—his voice was low and tender—he was speaking through tears. When a man thus speaks, his words have power. Malcom's whole aspect changed in an instant. The demon went out of his heart; and a mild, repentant spirit looked through his eyes.

"My brother!" said the preacher, again extending his hand. Malcom now accepted the proffered grasp of good will. "My brother! son of our common Father in Heaven!" added the preacher, still speaking through tears, "why should we stand apart? What is it that comes between us?—Evil or good?"

"Evil, and not good," replied Malcom, in a voice so changed that it sounded new in his own ears.

"Put it away, and come over upon our side," said the preacher. There was a thrilling appeal in his tones. "You are a strong man, and we want you. God wants you; and He is calling you now through His servant. He has work for you to do; and all who do His work have a precious reward."

The two men sat down by the roadside, and talked long together; then, going into the woods, where human eyes might not see them, they knelt, and the preacher besought God's mercy and forgiveness for his long-erring but now repentant son.

From that time, Malcom's feet walked in another way. He left the paths of vice and sin, and became an active member of the church. The change was remarkable. In a single hour, his whole external life took on a new form. The tippler was no longer seen in dram shops; the scoffer at religion turned his steps to the house of prayer; the man of violence placed bit and curb on his cruel passions. In all matters of religion he was zealous. Strong-willed and persistent of character—tough and enduring—he naturally became a leader among his brethren. There was no softness about him His natural temperament remained. The forms of life, twisted, compacted, stunted in growth by the rough storms and hot suns of his early winters and summers, were not changed; but new purposes impelled him in a new direction. He was a better man and a better citizen. He was working to higher ends; but he found it easier to work on the material outside than inside of himself. He could change the aspect of things around him far more readily than he could change his natural inclinations—his habits of feeling; the states of mind which had become parts of his life as it were. With him the new order of things did not progress far beyond the reformation of his external; that regeneration, which proceeds, by gradual advances, deeper and deeper down to the very thoughts and purpose of the heart, changing the inner form to one of heavenly order and beauty, was something too interior for his experience—too interior, perhaps, for his comprehension. As he saw, he walked, and walked in the narrow way leading to life eternal.

Malcom never looked back, and never turned back. From the day he made a profession and joined the church, he was an active member, and always to be counted on. In a year he married an excellent young woman, also a member of the church. He established himself in business, and, through industry and attention thereto, prospered. At the age of thirty, he was made a class leader. Having the gift of language, united with much fervor of spirit, he was acceptable in this position. His class was always full; and the members thereof often spoke of the "precious seasons" they had together.

So the years went on. Mr. Malcom had children; human souls, whose lives coming through his life, took therefrom hereditary inclinations, and a form of life answering to his own. In the degree that regeneration had not proceeded inwardly with him, did they inherit perverse impulses. They were not what we call good children—gentle, obedient, loving. But active, self-willed, and prone to step aside into forbidden ways. They were constantly disturbing the unregenerate things of their father's mind, and so making him blind and impatient. Action and reaction between them were not often in reciprocal harmony, but almost always inadequate or antagonistic. The oldest son was an especial trial to his father. He resembled him strongly both as to personal appearance and disposition.

Mr. Malcom was not skilled in the law of love; and, therefore, his government with his children was based on the law of force. He tried to bend the cold iron by main strength, at the risk of snapping its tough, resisting fibers, instead of softening it by the heat of love, and then fashioning its impressible substance with gentler touches. What followed? If the iron did not break, it got ugly twists, or bent too far, taking always unhandsomer shapes with every effort of his blind strength.

So the contest went on between him and his oldest boy John, even from childhood to early manhood—between the cold, resisting iron and the strong hand.

"I will break his will if I break his heart!" Over and over again did Mr. Malcom come up to the fruitless work of reducing his son to obedience with this stern sentence on his lips. Punishment had been repeated so often, and with such increasing severity, that it had become cruelty. And yet there was no good result. The boy's character grew more and more unlovely, just as a piece of cold iron that is wrenched this way and that, and beat upon with passionate force, in the vain hope of compelling it to take a form of use or beauty.

As John approached manhood under this stern discipline, growing harder and stronger, and more self-willed, there began to appear signs of resistance. Mr. Malcom was startled and distressed. A painful sense of anxiety held back the angry impulses that struggled in his heart. A depressing weakness came over him. He had often prayed for his son; but never in the broken voice that now marked his petitions. If he had prayed for himself it would have been better—for a softer heart towards his child—for a spirit of tenderness and forgiveness—for love in the place of anger. The hindrances were with himself. He must overcome before he could overcome. But he did not see this.

John's twenty-first birthday came. On to this day the boy had looked with a restless impatience that had its groundwork in a sense of filial duty. While under age, he owed submission; and however hard it was to yield under his father's cold and exacting discipline, he felt himself bound to the general law of obedience. But now he stood, in thought, absolved from the requirements of this law. He was a man, and answerable only to himself. So he thought, and he was in earnest. He had been long enough wrenched and beaten upon. That kind of discipline must cease.

There was a race-course in the neighborhood, and a purse was to be run for on John's birthday. Races were held there three or four times in the year, and John was often present on these occasions, though at the risk of punishment if the fact became known to his father, whose interdiction was positive. It was his intention to go on this day openly. To go as a man who had a right to determine his own actions. If it made issue with his father, his father would have to give way. Parental dictation was at an end.

Mr. Malcom had left the breakfast-table, and was passing through the door, when he heard his wife say in a tone of surprised remonstrance—

"Oh no, no, John!"

"Yes, mother, I am going!" was answered.

"Going where?" asked Mr. Malcom, turning back.

No one answered. He looked at his wife, and he looked at John. Her face was troubled, his resolved.

"Where are you going, sir?" demanded the father, his brows gathering sternly.

"To the races," said the young man, calmly.

"What!" The frown deepened. The voice was a quick throb of anger.

"I am going to the races."

"No you are not! I lay my commands on you!"

John had a piece of thread in his hand. He held it up towards his father and snapped it in twain, saying—

"So I shall break them. I am of age to-day!"

The blood went out of Mr. Malcom's face; a sudden weakness fell upon him; he caught at the back of a chair, and stood with failing knees that pressed against each other. Anger died within him, giving place to a fear that trenched on despair. What hope for his son now? His wilful, wayward, disobedient son! His first born, who for twenty-one years had lain as a heavy burden on his heart. For whom he had wrestled with God in prayer so many hundreds and hundreds of times! His first born, now in the earliest flush of manhood, casting off obedience, and entering defiantly the ways that take hold on death and hell!

"Oh, John, John!" he said with a quiver in his voice, looking with tender reproach upon the young man, "that I should have lived to see this day! Only God knows all I have suffered for you—all the care, and anxiety, and dread, that have weighed down my soul for these many, many years. I have prayed that you might be shapen into a goodly stone for His temple, and not be cast out as a brand for the burning. I have tried to do a father's duty. Perhaps I have erred. He knows. But I meant right."

His voice fell to a sob. His eyes were wet. He stood, holding on to the chair, trembling and weak. Almost for the first time in his life he had spoken to this son through tears—with an appeal instead of a command.

The pieces of broken thread dropped from John's fingers. He rose to his feet, and going close to his father, caught his hand and said with a gush of feeling—

"Forgive me! I was angry. But I won't go."

Mr. Malcom's face sunk down upon his son's shoulder. Sobs shook his frame as if he were but a child. He was all broken up.

"If I have gained you, my son," he said, after a time, lifting his face that seemed lighted with sunbeams, "I shall be the happiest man in all this region. Oh, John! My boy! My child of a thousand prayers!"—still speaking through tears, and therefore with irresistible power—"Come and go with me! Let us walk side by side in the narrow way."

"Side by side, father, if you will," answered John, and now he spoke also through tears. "But you must be patient with me, and forbearing."

"I will be patient, John." And Mr. Malcom caught both hands of his son, and held them tightly. A great light was flooding his mind. He was beginning to understand something of the law of love—to comprehend its wonderful power. "Yes," he added, "I will be very patient with you, my son. I see it now. I have not been as patient a father in times past as I should have been. God bless you, and keep you from evil!"

The father laid his hand on his son's head; and as they stood thus, an angel bound their hearts together with chords of love that never were rent asunder.

Our Mother.—Alas, how little do we appreciate a mother's tenderness while living! How heedless are we in youth of all her anxieties and kindness! But when she is dead and gone; when the cares and coldness of the world come withering to our hearts; when we experience how hard it is to find true sympathy, how few love us for ourselves, how few will befriend us in our misfortunes; then it is, that we think of the mother, the good mother we have lost.

BOWEN BROTHERS,

WHOLESALE AND RETAIL DEALERS IN

STAPLE AND SELECT FANCY

GROECRIES,

Ship stores, Ranch and Farm Stores

OF EVERY KIND, AT LOW PRICES.

Particular attention is always given to the selection of our stock of Goods. Many articles are prepared SPECIALITIES, for our

FAMILY TRADE,

—SUCH AS—

BARTON & GUESTIER'S SALAD OIL, BONELESS SARDINES,
MESS MACKEREL IN KITS, GUAVA JELLY, CONDENSED MILK
FRENCH MUSHROOMS AND TRUFFLES, STILTON CHEESE,
ANCHOVY AND SHRIMP PASTE, POTTED HAM, BEEF, AND TONGUE
SPICED OYSTERS

BENT & CO'S WATER, MILK, BUTTER, WINE, AND GRAHAM CRACKERS

TEAS of every Variety, of the FINEST QUALITY, Imported expressly for our Family Trade.

HERKIMER COUNTY CHEESE, superior to any Cheese in the country.

SELECT WINES AND LIQUORS, the very purest, taken from Bond, as we keep none but the best; those that desire choice Table Wines, etc, or for Medicinal purposes, can rely upon what we offer them.

Messrs. Bowen Brothers commenced their business at an early day in Stockton, which they conducted successfully to themselves up to about the year 1850. Flattered with the success that had attended their efforts there and ambitious for a more extended field of operations, they accordingly, about the period above mentioned, established themselves in the City of San Francisco. Since then each returning year has continued to mark an expansion of their trade, until now their annual sales, in the aggregate, are exceeded by no other House in the State.

They have superior facilities for procuring their goods from the East, which gives them great advantages besides, they pride themselves in keeping articles of goods found in no similar establishment in the city.

These with every other article needed in the Culinary department of the Household, and the usual Family necessaries, furnished by the Grocer. It will be our aim and our pride to give satisfaction to all who may favor us with their patronage. In order to make the business of our Patrons light and pleasant, all orders left with us will be filled with care and dispatch, and Goods sent to any part of the city promptly, without cost of carriage.

Our friends from the Country that favor us with Orders, will have their goods sent to the wharves without expense of cartage. Every Order sent us will be attended to with the same care as if purchases were present.

Tobacco Raising and Grape Growing.

A MAN OF EXPERIENCE IN TOBACCO RAISing would like to enter into contract with some good man who has proper land and good location, and will have suitable buildings erected for that business. The advertiser has a thorough knowledge of the business in all its branches and can make it profitable to both. He is also familiar with Grape Growing, and can lay out a Vineyard and take care of it. He feels confident he can give satisfaction. A letter addressed to "Tobacco Grower," and left at the Farmer Office will be attended to. 17

Cashmere Goat.

A SPLENDID HALF-BLOOD CASHMERE GOAT can be had at a fair price, or will be leased on fair terms on application to the Editor of Farmer. 4

PATENT RIGHTS FOR SALE.

THE FOLLOWING PATENT RIGHTS OF NEW AND valuable inventions (of which we have models to show their value) are now offered for the States of California and Oregon, and Utah and Washington Territories.

NO. 1. THE MECHANIC'S SPIRIT LEVEL.

Patented September 13, 1859.

This Implement will be of great value to Contractors and Builders, being one of the most valuable inventions yet out. Builders will do well to examine the model.

NO. 2. IMPROVED CLOTHES REEL AND BAR.

Patented January, 3, 1860.

This valuable domestic piece of furniture can be used in the Laundry, the Kitchen, the Nursery, or Chamber, and can be made plain or ornamental; standing in the same relation as a piece of important furniture as does Wheeler & Wilson's Sewing Machines, neat when used and ornamental when not in use.

NO. 3. A CORN CULTIVATOR.

With this implement the soil is first thoroughly plowed and deeply pulverized, and on the return it smoothly and perfectly hills up and harrows the ground between the rows. A very new and valuable implement.

NO. 4. A MUSKETO BAR.

This will be much wanted in California. It is simple in its contrivance, perfect in its working, and can be affixed very cheap to all styles of bedsteads. Hotels, public houses and private families will find it a useful invention.

NO. 5. HYDE'S PATENT POST-DRIVER.

A most excellent labor and money-saving machine, for which we offer rights.

NO. 6. SEED-SOWER.

This is a new inventions, and one of great importance to all who sow grain, or any garden seeds. The working model can be seen at the Farmer's Reading-room.

Holding the rights to all these new inventions, we invite the public to call and see the models. All persons who may be desirous to purchase either County, City, Town, or Individual Rights, can do so on application to

COL. WARREN, Editor Farmer.

SEA ISLAND COTTON.

A SMALL INVOICE OF VERY SUPERIOR SEA Island Cotton can be had by application at the office of the CALIFORNIA FARMER. 20

ELECTRICITY

THE

GREAT REMEDIAL AGENT.

Electricity as a Remedial Agent has, until recently, been but little known. An Electric Battery has been a terror from childhood up because a little Battery gave a "start," and the thunder-storm killed by lightning. Now it is better understood, and is and will be the sovereign remedy for many diseases heretofore considered incurable. The following series of articles and statistics, with facts and proof of the virtue of Electricity are worthy of attention. When it was promulgated that disease could be entirely eradicated from the system without the use of poisonous drugs, the unthinking, or those who do not look deeply into cause and effect, scouted the assertion as chimerical, and adduced strong evidence of its utter impossibility. Long articles, replete with arguments, seemingly unanswerable, of the position that only through the digestive system could the blood be purged of the accumulations of the poisons which constitute disease. A great city went up from the interest in the continued supremacy of the old system of one poison to cure another, that Electricity, as a Curative Agent, had been tried and had proved to be of but little if any value—thinking, poor souls, the world of science stood at the same point it occupied one hundred years ago. They were wrong, while those old fogies were content if they cured one in every five patients there were those who were diving into the science of Electricity, and finally it was discovered that the trouble was in the instruments used. From that time to the present, improvements have rapidly advanced, until every disease in the catalogue of human ills has been either cured altogether, or checked so as to enable the sufferer to seek those changes of climate which ultimately perform a perfect cure. Diseases hitherto considered incurable, have been cured, and those diseases which took months, and even years, to cure by medical process, are now cured in a few weeks; and all by the *Improved Instruments* of Dr. J. H. Josselyn, Resident Physician at the Electropathic Institute, 645 Washington street, San Francisco. It is astonishing to see the number of patients and diversity of diseases that have been relieved by the Electropathic System. From early morn till late at night, his instrument is engaged, imparting health and strength to all who have the good fortune to obtain his services.

The charges, too, are not as heavy as by the old system, besides there is no medicine to pay for, let alone the unpleasantness of swallowing the nauseous stuff. During the time the Institute has been in operation, there has been more benefit to the human family derived from the system than from all other systems combined during the same period. Among the most troublesome diseases to which Californians have been exposed is Rheumatism; none has given the honorable practitioner more trouble to relieve, and no one has pretended to cure (if we except known empirics) permanently. But this subtle disease gives way before the Electropathic System in a very short time, enabling the sufferer to go about his business without pain or the fear and dread of a relapse. And so with most other diseases, considered incurable. We mention Rheumatism because of its abundance, but we could enumerate many other diseases full as troublesome, and some far more fatal in their results.

We allude to that kind of disease paraded by quacks in the journals of the day, a trouble which was never cured by medicine, only a little strength imparted by the use of tonics. The poor victim is kept taking medicines and paying for them until his last dollar is gone and then, as soon as he undertakes to work to obtain more funds, the trouble comes back in all its loathsomeness. To this disease Electropathy is peculiarly applicable, its action being upon the spermatic nerve, strengthens the secretory organs, and at the same time, creating an equilibrium in the system, thereby preventing an elapse.

We dwell upon this disease because it is the bane of the youth of California; and one about which there has been more deception used than all others put together. It is not necessary to enumerate all the diseases in the catalogue, for that would be occupying space to no purpose. Every disease has been under treatment by this system, and there are none but have received benefit either in this State or at the East.

There are at present very few Instruments in the world that can be depended upon. A good Instrument costs very heavy, and cannot be purchased unless ordered, and there are very few who are able to manufacture them, for want of knowledge of the healing principle. The only Instrument to be depended upon in this State is at the Electropathic Institute.

Connected with this system are the renowned Electro-Magnetic Baths. Here let us caution the public against the numerous imposters in the bathing line. The pure Magnetic Bath is one of the most effective aids in the removal of disease from the system, but if given at the wrong time is likely to aggravate trouble, and cases have been known where the patient has been injured so badly as to require months to remove the injury. Persons in quest of this Bath should be careful and not apply to a place where there is no physician to judge of the necessity of the remedy. In fact the only place where they can be obtained in all their purity is at the Institute, where the Resident Physician will always be happy to examine and see that they are not unreasonably administered, and if not necessary, advise the requisite remedy.

To Females,

the Directors would say, Electropathy is particularly applicable to your delicate and fragile systems, and to the numerous troublesome and painful diseases to which you are liable. Should you be irregular, a few treatments will restore the functions to the proper state without pain or inconvenience. Should you be weak and enfeebled, either general or local, this system imparts strength and vitality, making the recipient feel buoyant and youthful, where before they were languid and unable to enjoy the pleasures of life. One great blessing connected with Electropathy is, it purifies the system so thoroughly that it beautifies the complexion, making the coarse and freckled skin as pure and fair as possible, giving the patient a fresh and healthful look.

To the nervous, the Directors would say, that you can be entirely relieved from those dreadful feelings of evil forebodings and your system strengthened so that nothing can disturb the current of your life. Several cases of insanity, arising from a disarrangement of the nervous system, have been permanently cured by this system. The Directors, in issuing this pamphlet, do it in the hope that it may be the means of awakening the public, who have not studied into such things, to a sense of their duties, and if possible prevent those who have the care of a rising generation from poisoning their young charges with vile drugs, thereby entailing upon them troubles which in after life may cause them to curse the origin. Also, that those in need of remedial agents may know where they can find them without resorting to taking the thousand and one poisonous nostrums that are continually palmed off as sovereign panaceas for all the ills of humanity. Avoid them all, they are snares set to rob you, and to your bodily injury at the same time. The following is a list of the cases which have been successfully treated by the *Electropathic System*, at the Institute, during the first four years of its establishment. The record is good, and challenges admiration of the world:

Name of Disease.	No.
Rheumatism	1580
Neuralgia	1492
Dyspepsia	1467
General Debility	1410
Fever and Ague	1292
Dumb Ague	1210
Bronchial Affections	1106
Asthma	1049
Female Irregularities	1022
Mercurial	938
Scrofula—long standing	922
Paralysis	890
Disease of the Eye	832
Catarrh in the head	705
Catarrh in the lungs	608
Liver complaints	600
Incipient Consumption	582
Panama Fever	561
Deafness—total and partial	480
Mental Derangement	471
All other—and among which is almost every nameable disease	2,186
Total	21,373

The above shows what can be accomplished by combined energy when it has truth and science upon its side. The Electropathic Institute was started amid the cry of interested charlatans, who used all the power their riches and the prejudices of the public gave them to prevent its success. It has risen to a position that is beyond their baffled malice, and will be honored in the scientific world when they are forgotten, or only remembered for their crimes and impositions. A thinking public are fast consigning them to that oblivion their works merit. Let them go, they will not be missed.

Persons seeking remedial assistance, may wish to know something of the system by which diseases are so rapidly removed from the body. Electricity is a fluid of so subtle a nature that it can only be studied by its results. We know by its action it forces everything of a foreign nature in the body from the center to the surface, by its energy, while the vitality which it imparts fills up the vacuum, preventing thereby the subtle poisons from returning to the hitherto diseased parts; and here let it be understood that the Bath should never be administered until the disease has been forced to the surface, except, perhaps, in cases of cold where fever has not set in. Its action upon mercurial diseases is peculiar. The best authorities are of the opinion that it liquifies the mercury, which, when in a liquid state, by its own specific gravity forces itself out of the body. This result has been arrived at by testing the water after an Electro Magnetic Bath. After such tests have been found in the water the patients not troubled any more with those pains peculiar to the diseases. In all other cases it forces to the surface and is washed off by the bath. The whole system in its application is a *luxury*, there being no pain or inconvenience attending upon it, but the reverse is the case, being one continued pleasure all the time. Try it, you that are suffering either from disease or the injudicious use of poisonous drugs, and you will be made to rejoice that you are found the courage to strike out from the beaten path.

Below are a few certificates from patients that have been cured at the Institute:

CERTIFICATES OF CURES.

The undersigned takes this method of extending to the public the benefits he received from the treatment applied to him at the Electropathic Institute, while suffering under a terrible infliction:

This is to certify that I have been under Electropathic treatment at the Electropathic Institute, 645 Washington street. When I applied to Dr. Josselyn I was cramped up with rheumatism, and could hardly move or walk. So bad was I that, without relief, I don't think I could have lived more than one week. The Doctor, with one instrument, relieved me the first time I saw him, and in twenty days cured me of all. I cordially recommend all afflicted to patronize this Institute for it is truly a blessing to the afflicted, and the operation is very pleasant. I wish to thus publicly thank Dr. Josselyn for his care and sympathy.

JOSEPH SEGER, of Bolinas Bay.

September 19, 1860.
State of California, City and County of San Francisco—ss.
Subscribed and sworn to before me, this 19th day of Sept., A. D. 1860.
P. BARRY, Notary Public.

SACRAMENTO, Oct. 10, 1860.

DR. JOSSELYN—Dear and Honored Sir: You requested me to let you know how I feel after being at home three weeks. Well, sir, I have been here a little over two weeks and there is no return of that very unpleasant trouble. My sleep is sound, and there is no disturbance of the regular laws of nature. I feel as strong as I ever did before bad habits had weakened my system. Not only is the general debility entirely disappeared, but the local trouble has gone. I feel so strong that there is no fear of its return. Considering that you only took one month to cure a disorder of seven years standing, I think your system almost miraculous. Accept my sincere thanks, and publish this if you please. I have sworn to it, as you will see. C. BOWMAN.
State of California, County of Sacramento—ss.
Subscribed and sworn to before me, this tenth day of Oct., A. D., 1860. CHAS. HART, Notary Public.

HORNITAS, Nov. 1st, 1860.

Well, Doctor, I am at home, and have been to work in the water for several days, and there is no return of the Rheumatism, as I call it; and Mercurial pains as you state them to be. I feel as gay as a lark, no pain or bad feelings, no stiffness, but perfectly well, and all done by you in three weeks, without one drop of medicine. You had hard work to make me believe before you commenced that you would cure me, but now I find it very easy to believe. Although my friends look rather incredulous, but they cannot doubt my sober earnestness. Doctor, you have my thanks, and I will benefit you all I can, by spreading your fame up in these parts.
Respectfully yours, GEO. PERKINSON, Jr.
To J. H. Josselyn, M. D., Resident Physician, at the Electropathic Institute

NEVADA, Nov. 8, 1860.

DEAR DOCTOR: Pursuant to agreement, upon my arrival, I sit down to pen you a few lines in acknowledgement of the great service you have rendered me, in relieving me of that painful case of neuralgia and rheumatism. When I look back and see the gallons of medicines I have swallowed to no purpose, and then to think how soon you cured me, I am astonished. You were only twelve days performing a cure of the trouble, for which I had taken medicine over six months. Dear Doctor, if you could see the wonder exhibited by my friends, who can hardly believe that a cure was performed without medicines, but here I have been cured, and I have not taken a drop of medicine from you, nor from any one else, while being treated by your splendid Instrument I shall try to show my gratitude by sending every sick man I come across to you. Yours, till death,
FRANCIS GARLAND.
To J. H. Josselyn, M. D., Resident Physician, Electropathic Institute.
State of California, County of Nevada—ss.
Subscribed and sworn to before me, this eighth day of Nov., A. D., 1860.
F. SPAULDING, Notary Public.

YREKA, Nov. 10th, 1860.

DR. JOSSELYN—Dear Sir: Your letter, dated October 16th, is before me. You wish to know how my bronchial troubles are. Now, Doctor, that looks a great deal like a joke. I once had such an affection of several years' standing, but thanks to your natural mode of treating disease, it has gone to be numbered with the things of the past. Since my return I have not felt the slightest trouble from it. When you pronounced me well I did not expect to ever hear from it again. Any one who sits under treatment of that *Improved Instrument* of yours will have the same feelings. It imparts vitality to the system so rapidly that confidence is at once established. I have to thank you that you did not refuse to treat me because I could not pay you the whole of your reasonable charge; inclosed is the balance due you, and God bless you for the kind treatment I received at your hands.
Yours, ever grateful, WM. GARDNER.
State of California, County of Siskiyou—ss.
Subscribed and sworn to before me, this tenth day of Nov., A. D., 1860.
B. F. WELLITS, Notary Public.

This is to certify that I, the undersigned, was troubled with dumb ague accompanied with rheumatism, very badly. My disease was taken in Washoe. After having exhausted medicines without benefit, I applied to Dr. Josselyn, at the Electropathic Institute, on the first day of November. After taking twenty treatments with his Improved Electropathic Instrument I am perfectly cured, having been entirely relieved of all pain or inconvenience. I feel as strong as I ever did when in the best of health. I cheerfully recommend all afflicted to his care, as being the best physician I ever became acquainted with. One great advantage, he uses no medicines, but cures by a process which is perfectly natural. The time occupied in my case was thirteen days.
D. O. HARRA.
November 14th, 1860.
State of California, City and County of San Francisco—ss.
Personally appeared before me, D. O. Harra, and subscribed and sworn to the above certificate, on this fourteenth day of November, A. D., 1860.
P. BARRY, Notary Public.

SAN FRANCISCO, Aug. 3d, 1861.

To the Directors and Resident Physician of the Electropathic Institute.

SIRS: You requested of me a certificate of the cure you performed in my case. Below I append it:

This is to certify that I was troubled with a swelling which commenced in my ankles, and gradually extended upward until it effected my whole body. I sought the best medical aid in New York and Boston, and they all pronounced it dropsy. Hoping to retrieve my health, I visited California in February last. I consulted the Resident Physician at the Electropathic Institute; and now, after five months of treatment, and waiting to see its effects, I am pronounced well by competent judges. It did not take but three months of treatment to cure me, but I waited to see that it did not return. I feel perfectly assured from what I saw while under treatment that Electricity as applied at the Institute will cure any disease to which the human family is liable.

Now, gentlemen, you can make what use you please of this certificate. With my thanks to the Resident Physician for his kind attention, I subscribe myself,

Your thankful patient,
MRS. C. A. CARLTON

Opinions of the Press.

The advantages of electricity as a remedial agent, are universally admitted by the medical and scientific world. It requires, however, experienced skill to apply this remedy efficiently, and this skill of application is possessed in an eminent degree by Dr. J. H. Josselyn, of the San Francisco Electropathic Institute. Particulars of his method of practice can be obtained by reference to his advertisement in another column. The Doctor is well known to us as a scientific gentleman, and an ardent devotee to his profession. He is no pretender, but has conferred incalculable benefit on those who were so fortunate as to seek relief at his hands. For those who desire speedy and permanent relief from the rheumatic pains, so prevalent in this region, we can recommend no surer remedy, than a visit to Dr. Josselyn at his rooms in San Francisco, No. 645 Washington street.—[Placerville Republican.

ARE YOU SICK?—We wish to say a word to those that are sick. We have in this city an Institution known as the Electropathic Institute, situated at 645 Washington street. The establishment is under the charge of Dr. J. H. Josselyn, a physician who has no superior in the city. He has been in charge of the Electropathic Institute for several years, and has been uniformly successful in his treatment of the numerous patients that have placed themselves under his charge. The Electric treatment will cure many diseases that cannot be reached by any other mode. Dr. Josselyn gives his personal attention to all of his patients, and is always ready to give advice to those that may call upon him. His charges are very moderate, and we cannot do the sick a greater favor than to recommend them to call on him before placing themselves in charge of another.—[San Francisco Daily Journal.

We call the attention of our readers to the advertisement of Dr. Josselyn's Electropathic Institute. Voluntary and unsolicited we make the following statement, proving its beneficent effects, particularly in rheumatic cases. Some months since we were on an editorial trip, visiting the mountains. The stage-coach upset, and landed all the passengers, including the writer, below in the valley, where the Deer Creek overflowed by receiving the additional material, extraneous to its usual contents. For some hours exposed in our wet clothes, to night wind and weather, we soon felt the effects of the accident in the mountains—pains in the back, hip, and legs; so much so, that for weeks we hardly could walk. Treatments of all kinds were applied but without avail until our attention was called to the Electro-galvanic Baths and appliances of the above Institute. Thank God, after two weeks we have been fully restored, and enjoy now the free use of our limbs and body, as fully as previous to the involuntary bath in Deer Creek.—[Dr. H. BIEN.—Ed True Pacific Messenger.

ELECTROPATHY.—Electricity has long been classed among the most effective medical agents. It possesses great advantages over the systems of therapeutics heretofore relied upon as it reaches more certainly the seat of disease, especially in nervous or rheumatic complaints. The Electropathic Institute, No. 645 Washington street, under the charge of its able Resident Physician, Dr. J. H. Josselyn, has attained a well merited celebrity for the many cases which have resulted favorably from the skillful application of this invaluable remedy.—[Daily Morning Star.

A GOOD INSTITUTION FOR THE SICK.—One of the very best places in the city for the care of the sick is at the Electropathic Institute, 645 Washington street. The establishment is under the charge of Dr. J. H. Josselyn, a physician of great experience, and no one can do the sick no greater favor than to recommend them to give the Electropathic Institute a trial.—[Weekly Journal. 13

A WILL OR A WAY.

It was a noble Roman,
In Rome's imperial day,
Who heard a coward croaker
Before the battle say:
"They're safe in such a fortress;
There is no way to shake it."
"On, on!" exclaimed the hero,
"I'll find a way, or make it!"

Is fame your aspiration?
Her path is steep and high;
In vain he seeks the temple,
Content to gaze and sigh.
The shining throne is waiting,
But he alone can take it,
Who says with Roman firmness,
"I'll find a way, or make it!"

Is learning your ambition?
There is a royal road;
Alike the peer and peasant
Must climb to her abode;
Who feels the thirst for knowledge
In Helicon may slake it,
If he has the Roman will
To "find a way, or make it!"

In Love's impassioned warfare,
The tale has ever been
That victory crowned the valient,
The brave are they who win.
Though strong in Beauty's castle,
A lover still may take it,
Who says with Roman daring,
"I'll find a way, or make it!"

JOHN G. SAXE.

A clean house closed, is better than a dirty house aired; for the heat lets loose the gases of the dirt, and these you get; whereas, merely confined air is still pure air comparatively, if your room is clean. We must insist upon cleanliness, for there is so much dirt.

☞ "You had better ask for manners than for money," said a finely-dressed gentleman to a beggar boy who had asked for alms. "I asked for what I thought you had the most of," was the boy's reply.

A CARD.

YEARS HAVE ELAPSED SINCE THE Subscribers first invited public attention to the peculiar properties of their Patent Axle-grease. At first their invention made but slow progress, but thanks to the liberal and appreciative spirit of a large portion of the teamsters and coach proprietors of California, the demand for their manufacture has gradually increased, and notwithstanding the many spurious imitations which from time to time have been introduced from the Eastern States to compete with their article, the H & L AXLE-GREASE has now acquired an unrivaled reputation, extending throughout the length and breadth of California, Oregon, and the neighboring Territories.

The subscribers return their grateful acknowledgments to a discerning public, who have so largely patronized them in all their enterprises which they are now happy to say, are beginning to be justly appreciated as belonging to our California industry.

The supply of material from the East having, in consequence of the war, been cut off, the subscribers turned their attention to the substitution of COAL-OIL as a basis to their manufacture, but after applying every means suggested by the modern application of the science of chemistry, they were reluctantly compelled to the conclusion that however fit COAL-OIL might be for illuminating purposes, and for which it stands unequaled, it was not at all adapted to make a permanently satisfactory Axle grease. In this dilemma the subscribers turned their views to the native produce of California, believing that large quantities of natural resin might be collected from the noble pine trees of her boundless forests.

Having invited attention to this subject, they have with steady progressive steps, advanced this interest until, at the present time, they have established a manufactory of Rosin and Turpentine at Forbestown, from which considerable quantities of both articles are daily manufactured, of such a quality as to find a ready market at fair prices.

It is hoped that increased efforts may continue to be put forth, and new discoveries made, so that CALIFORNIA may soon be independent of all foreign supply, for we believe our lofty mountains and our mighty pine forests will yet give us that supply. The subscribers are now receiving native resin in sufficient quantities to be able to sell their celebrated AXLE-GREASE at a LOWER PRICE than any of the spurious COAL-OIL varieties which may hereafter be imported.

The Markets.

Wholesale Produce Report.

This represents the prices paid by the dealer to the producer.

Corrected weekly, by A. H. Tonn & Co., corner of Clay and Drumm Streets.] January 27th.

The Grain market shows less firmness than existed last week. Wheat and Flour have both declined in price. The arguments addressed by speculators are, we have six months from February to July before any effect can be made on the market by the new crop, seems futile in sustaining prices, for after having secured large parcels of Wheat and Flour, and advancing market rates, the offerings continue large, and holders seem disposed to sell rather than take the risk of a decline. This course will be one to force speculators to buy all that offers or see their own recede in price, and what we have with what we may expect from Chile New York and Oregon, will require a very heavy capital to control, and may swamp the operators, as it did in 1855-'56. The inclemency of the weather, though temporarily suspending trade, is such as to facilitate farmers in most cases, and give them an opportunity of plowing and planting the hills or uplands. We are led to believe, from the reports we receive from the country, that the amount of ground already plowed and planted is far in excess of any previous year in California, at this date. Hay, in consequence of light receipts, has advanced. The market otherwise is dull and inactive.

Our receipts from all sources, for the past week, are as follows: Wheat, 9,683 sks; Barley, 4,438 sacks; Oats, 3,292 sks; Salt, 433 sks; Flour, 2,706 qr sacks; Potatoes, 7,912 sks; Bran, 289 sks; Hay, 1895 bales; Straw, 100 bales; Beans, 472 sks; Buckwheat 42 sks; Onions, 30 sks; Corn, 13 sks; Wool, 29 bales.

Peach Seedlings Wanted.

ANY PERSON HAVING PEACH SEEDLINGS that they offer for sale, if they will send us a description of age, size, quantity and price, we can find them a customer, as a lot is wanted immediately.

FOR SALE, TO LEASE, ETC.

A Magnificent Stock Farm For Sale.

WE HAVE ONE OF THE VERY FINEST STOCK FARMS for sale to be found in the State. The location is a Valley in the Coast Range, and in a situation unequaled for excellence. A place secluded from loss of Stock by mixing, etc.
There are 1200 acres all inclosed with a fine staked oak fence with strong riders, to this can be added as many thousands of Uncle Sam's acres as may be wanted. The fenced land is the best of bottom land. During the late dry weather a large amount of Stock has been driven to these hills for feed and have been profitably kept.
This Ranch produces a big yield of Wheat, Barley, Oats Corn, Root Crops, etc. Tobacco, Hemp, Flax, etc., can also be raised most profitably. Floods never wash it, and it is never affected by drought.
On this Ranch are good, ordinary Buildings, Houses, Barns, Sheds, Corrals, Smoke Houses, etc, to this Plows, Harrows, Teams, working Oxen, etc., to do the work on the place.
On this Ranch there is now the following Stock:
One Jack of the very best character
100 Mules from 1 to 3 years old.
1 Stallion, No. 1.
20 American Mares, No. 1.
80 Mares one-half and three-quarter breed. These Mares are all in foal, mostly by the Jack, as Mules are a ready sale at high prices.
100 Horses, mixed Stock.
500 Head Horned Cattle, American Stock and half breed.
400 to 500 Swine, good Stock.
The Stock now on the place can be sold with the Ranch and thus put the purchaser into a business profitable at once. This Ranch is so situated that a river surrounds the range on one side and mountains on the other to which the Stock have a fine run without any interference from any source, thus giving the Stock a complete swing. Without reducing the original Stock there can be sold annually from this Ranch 50 Mules, 30 Horses, 100 Beef Cattle, 300 fatted Hogs, worth in the aggregate $10 000, three fourths of which is clear profit.
The timber is abundant Pine Oak, and other hard woods. Tar, Pitch, and Turpentine can be made in abundance.
This is one of the Rare Chances, such an one as is seldom offered.
Easy terms as to payments: A portion of the money can remain on time if secured.
For all particulars call on the Editor of the Farmer.
22

Pleasant Homesteads For Sale.

THE FOLLOWING PLEASANTLY located Properties, situated on the opposite side of the Bay, can be purchased at very reasonable prices and easy terms if applied for soon.

No. ONE—A Handsome Two-story Cottage, with seven rooms and seven closets, hard-finished, and every convenience inside, Small Buildings, Chicken House, Good Water, Gardens, and a very fine view of the Bay. Price about $3,000. Buildings perfectly new.

No TWO—Very similar Cottage, with eight rooms, and same good finish and conveniences inside and outside, and same views—price the same. Both the above have excellent soil in the garden, and some fruit trees ready for bearing. The fences are fine around the grounds, each about one acre.

No. THREE—A large House, built some three years, large Garden and about 150 Fruit Trees in bearing yielding a handsome income yearly. All these three Dwellings are within three minutes of the cars. Price, similar. These are really worthy special attentions. For all particulars inquire of the Editor of Farmer.

....ALSO....

A neat Cottage with eleven acres of land all covered with Fruit Trees, and small vines in abundance such as Blackberries, Raspberries, Strawberries, Gooseberries, etc. The income from the ground has been about $2,000 a year. The owner wishing to leave will sell at $6,000. A fine location and everything desirable—it will be sold at a bargain.

—LAND—

A Fine Building Lot all planted with Trees, about 500 of the best quality and in bearing. The Fruit alone will pay for the place in three years.

OTHER LOTS OF LAND.

We have several Fine Lots of Land, open; also some stocked with Fruit Trees, that can be offered on the most favorably terms to those who wish to secure desirable Homesteads.
Inquire for all the above of the Edito of Farmer. 19

A Beautiful Eden for Sale.

ONE OF THE MOST DESIRABLE Estates on the Pacific Coast is now offered for sale by reason of a desire of the owner to travel abroad and to regain his lost health—no other inducement could tempt the owner to part with it.
The Estate now offered is beautifully located in a retired valley away from any immediate neighborhood, free from noise, dust, etc., and shielded on all sides by lofty and picturesque hills giving a varied scenery, truly delightful, no season of the year without real beauty.
The whole Estate comprises a little less than ONE HUNDRED ACRES, the greater portion of it is covered with Orchard, Vineyard and Garden Grounds, comprising all that is desirable, and unsurpassed by any grounds in this State
The Orchard covers many acres, and the Vineyards are very extensive, and everything rare and desirable in these departments are here found.
Pleasantly built and located is the Cottage residence. This with Barns, Fruit Houses, Wine Cellars, and other appurtenances make the whole complete, a highly prosperous Garden Ground around the residence with large Orange, Lemon, Fig and Olive Trees in bearing gives the whole the true "Eden" appearance.
The productiveness of the place can be estimated when we say more than Ten Thousand Dollars is annually produced from the Orchard and Vineyard, and these can be easily and greatly enlarged.
This whole Estate can be had at a bargain if soon applied for.
The approximate value is about a THREE-YEAR INCOME, and any person having ready cash of some amount, who wishes to secure one of the finest Estates on this coast, can find the present a rare chance. No person need apply who has not ready money to a reasonable amount, and none but a real purchaser. To such, one of the best chances for a Fortune is now offered, as in good hands the Estate can be paid for with the income from the product in three or four years, sure.
For particulars apply to Editor of Farmer. 20

Fine Farms for Sale.

YOU WHO WANT GOOD FARMS CAN SECURE them by applying to the Editor of the Farmer. The following can now be had:

FOUR VERY FINE FARMS in the splendid San Joaquin District, within a few miles of Stockton, all very productive.
Several STOCK RANCHES in various parts of the State, from $1,500 to $25,000; in all these, good and permanent settlers can find bargains. Address by letter, or in person, for particulars to Col. Warren, Editor of the Farmer. 23

Two Splendid Farms for Sale.

TWO SPLENDID FARMS FOR SALE, IMMEDIately, in one of the best localities in our State—one of the best chances ever offered for an immediate purchaser, parties wishing to close business contracts.
One Farm of 30 acres, and Orchard, worth $6,000, will be sold for about half that sum.
A large Farm, 5,000 acres, worth $15,000, will be sold for $10,000 or less. Inquire of Editor Farmer.

Loan Wanted---$5,000.

WANTED, FOR TWO YEARS, $5,000 ON VALUable improved property in a neighboring County The property is worth treble the amount. Insurance on the buildings of $6,000 goes with the collateral. The money is wanted at a fair interest, which will be paid promptly. Inquire of Editor Farmer 7-t

RANDALL'S GREAT SHEEP BOOK.

A Complete Treatise on the Breeding, Management and Diseases of Sheep,

BY HON. HENRY S. RANDALL, LL. D.

Author of "Sheep Husbandry in the South," "Fine Wool Sheep Husbandry," Etc., Etc.

PUBLISHED BY

D. D. T. MOORE, ROCHESTER, N. Y.

THOUGH FIRST PUBLISHED ABOUT A YEAR ago, this work has already reached its TWENTY FIRST EDITION, and the demand thus far has been extraordinary. A new and revised edition is now ready and others will follow in such rapid succession that orders can hereafter be filled promptly. No volume in any branch of Agriculture ever had so rapid a sale or gave such universal satisfaction. The work is a first one, and unquestionably THE BEST AND MOST COMPLETE TREATISE ON SHEEP HUSBANDRY ever published in America. It is cordially welcomed and highly appreciated by both Press and People. Witness the following extracts from a few of the numerous Reviews and Letters the work has elicited:

OPINIONS OF PRESS AND PEOPLE.

From the New England Farmer, Boston.

"The Practical Shepherd" is a work that has long been needed by our people. It should be in the hands and head of every person owning sheep.

From the Country Gentleman and Cultivator.

As a whole, this book is unquestionably in advance of anything of the kind now before the public.

From the Maine Farmer.

The name of the author, Hon. H. S. Randall, is a guarrantee of its completeness and reliability.

From C. L. B. P. Johnson, Sec'y N. Y. State Ag'l Society.

It is the best practical Sheep Book, I think, ever published, and does great credit to Dr. Randall.

From the New York Tribune.

In this volume the author has exhausted the subject and given all that is necessary for any farmer to know about selecting, breeding, and a general management of sheep, in health or sickness. We heartily commend this work to all who wish for a sound and thorough treatise on sheep husbandry.

From the Michigan Farmer.

Mr. Randall has made the very best book extant on American Sheep Husbandry.

From the Ohio Farmer.

The reputation of the author—who ranks at the authority in this country upon all that pertains to the breeding and management of sheep—will induce a large and continued demand for "The Practical Shepherd."

From the Prairie Farmer.

The illustrations of sheep are by the best artists in New York, and well done. The letter press and paper are all that could be desired in a work of this description. It will undoubtedly meet with the large sale its merit demands.

From the Scientific American, New York.

It is vastly important that those who raise sheep should obtain all the information possible how best to manage their flocks, and we unhesitatingly recommend the "Practical Shepherd" as the most interesting and reliable work on the subject extant.

☞ THE PRACTICAL SHEPHERD is sold only by Agents and the Publisher. The demand for the work was for months greater than the supply, and hence it has not been offered or advertised in the Pacific States. It comprises 454 large duodecimo pages, and is printed, illustrated and bound in superior style. Price $2, Sent copies mailed, post-paid, on receipt of price.

Address
D. D. T. MOORE,
Editor Rural New-Yorker, Rochester, N. Y.

This Book will always be for sale at the Farmer Office.

Sewing Machines.

Our newspapers have recently been again flooded with criminations and recriminations about the *Humbuggery* and Fraud perpetrated at the Oregon State Fair, relative to the Florence and the Grover and Baker Sewing Machines, and it has proved most unfortunate for some of the members of the "Ladies' Committee," for it has shown "*How*" the Premiums were obtained. And even in Oregon, too, they drag in the *Clergymen*, as they did in our city, at the Mechanics' Fair. Would it not be better for all concerned if, in the selection of Committees on such occasions, Committess were selected six months before the Fair, having reference to the *article* to be exhibited, rather than *favorites* of any *exhibiter*, such Committees have always produced trouble and public reproach. *Sewing Machines* are invaluable to the country and indispensable to the comforts of well regulated "Homes," and it is all-important that the public should be kept well advised of the *Best Machines* and where to buy them. The recent newspaper controversy about the Oregon officers is really unfortunate for all parties, for we think any invention that requires such a course to make them public cannot be very good themselves—like the foaming tankard, the froth soon disappears.

The Wheeler & Wilson Sewing Machine has not required any such manifestations or notoriety to convince the public of its excellence. The excellent Agent here, J. H. Hayden, Esq., has been quietly pursuing the even tenor of his way, exhibiting the Wheeler & Wilson to the hundreds that daily call, showing the vastly superior excellence of this kind of Machine, then receiving the price of it, packing it away and shipping it to its ordered destination, where it always gives such universal satisfaction. Thus it is with the Wheeler & Wilson Sewing Machine, of which there are more sold than all other machines put together, on this coast, and we think it will prove it has been so over the whole United States, for the year 1864.

"Shallow waters near the *breakers* roar,
While the deep strong sea carries you safely o'er."

Keep Warm.

The prevailing *Influenza* is not only a very uncomfortable illness, but it exposes the system to serious ills and may endanger life.

A cold and cough may seem trifles, but they are the foundations of much suffering; the little children, with bare arms and legs, and exposed throats, are proofs that thoughtless mothers and nurses, who for fashion sake risk the health and life of many a sweet and unoffending innocent; and Lone Mountain now contains many a *little grave* that holds the ashes of those who were literally murdered for *fashion sake*.

"Keep warm—keep warm," should be posted on the *door posts* of our houses everywhere; for in San Francisco, especially in our cold and damp winters, our people do not guard the body as they should. Keep warm—wear flannels, leggings, tippets, anything woolen to guard the neck, chest, arms, legs and body from the fearful, searching winds.

Keep warm—sleep in Blankets, good soft Blankets, and you will enjoy a luxury not known before in—"cold nights," and in this advice we will be sustained by the medical faculty and all good, wise and loving mothers. And in order to provide the very best and softest Woolen Goods, we can refer you to

MESSRS. EGERY, BYRNE & CO'S WAREHOUSE.

This firm have, with an eye to the true wants of our people, the very best stock of all these articles to be had in our State.

—The Mazatlan times learns from the most reliable sources that a comprehensive scheme of emigration is determined upon, to open Sonora and Sinaloa to European and American settlement. The project has received the combined sanction of the French and Mexican Empires. Dr. Wm. M. Gwin, formerly United States Senator from California, has been selected to carry out the objects of this great enterprise, and we are informed that the security of settlers will be guaranteed by a military investment of these provinces by French troops.

Agricultural Address.

Annual Report of the Board of Directors of the State Agricultural Society.

GENTLEMEN:

This being the year in which no report to the Governor is required by law, the Board will reserve a more detailed report of the year's transactions until the proper time shall arrive, and proceed to give to the members of the Society a brief account of their stewardship, and to make such suggestions and recommendations as their experience and the condition of the Society and the State seem to demand.

One year ago, when we assumed charge of the affairs of the Society, it was at the close of a year of prosperity to all classes of industry in the State. The agriculturist had been blessed with a plentiful harvest, which had enabled and induced him to prepare for an expensive field of operations, with bright hopes that his renewed efforts would again be crowned with success. The miner, in addition to extracting from the placer deposits and quartz ledges the usual quantities of the precious metals, had extended his discoveries and developed new regions of unusual richness, and was confident in the prospect of a year of unequaled prosperity. The mechanic, the manufacturer, and all other classes of the community dependent on the two former for encouragement and support, had received a corresponding impulse and were looking forward to the new year cheered with confidence and hope.

Under the judicious and economical management of our immediate predecessors, the financial condition of the Society had been much improved. A portion of a large debt which had been allowed to accumulate against the Society during a series of previous years had been canceled. A change of administration had to a certain extent checked the increasing dissatisfaction and want of confidence so prevalent in the community toward the Society and its management. Under these circumstances, and with reliant expectation of material aid from the State, the Board met on the 9th of February, and by unanimous vote resolved to hold a general Fair of every Department of Industry of the State in the following September.

The Legislature, then in session, contrary to our expectations, and, as we think, acting upon a very short-sighted policy, withheld the usual appropriation for the payment of premiums. The much hoped-for rains, which had been deferred during the Winter, failed to fall in the Spring, and it soon become very evident that all the industrial interests of the State, which had but a short time before seemed so promising, must suffer materially, if not prove to a great extent a failure. The Board, therefore, rather than risk a general Fair, with so poor a prospect of a creditable exhibition, and with almost a certainty of a financial disaster, reconsidered its former action, and determined to conform its operations strictly and rigidly to the circumstances in which the State and the Society were placed. The law, however, establishing the Society and creating the Board of Agriculture and defining its duties, as well as the tenure by which the Society holds some of its most valuable property, required that a Fair of some description should be held. In an ordinary season, to select one branch of industry, however attractive or important, and bestow upon it the patronage and encouragement of the Society, to the neglect of all others, would be as unwise on the part of the Board as it would be unjust to those branches neglected. The effects of the drought, however, upon the cereals, and all the various crops of the husbandman; the scarcity of grazing for stock, compelling the owners of cattle and sheep to drive their herds and flocks to distant portions of the State and out of the State for subsistence; the empty treasury of the Society and the general scarcity of money among the people, admonishing the Board of the propriety of a light bill of expenses, all plainly indicated the character the Fair should assume in order to render it, even in one department, a success.

It was evident that no other course than the one pursued could, with safety to the existence and future prosperity of the Society, be adopted, and even as to this, the Board was in doubt.

At this period of affairs, the citizens of Sacramento, with a liberality equaled only by their enterprise and perseverance, came forward and, by subscription, placed at the disposal of the Board over five thousand dollars, to be awarded as purses and premiums for a horse show.

The sum of six thousand nine hundred and thirty dollars were offered in premiums and purses, so distributed as to render the exhibition a feature of attraction and a lesson of usefulness to the admirers of all classes of horses, from the sturdy draught to the fleet and beautiful thoroughbred. All preparations were carefully, economically and well completed, and the Fair was held. It proved a success in every respect beyond the most sanguine expectations of the Board. The maxim that "whatever is worth doing at all, is worth doing well," having been adopted in the beginning, it was strictly adhered to in every particular. The very liberality of the purses, and premiums offered, gave tone and character to the exhibition. The high value of the stakes to be lost or won gave everybody the impression that the Fair must be a grand success, and no one went away disappointed or dissatisfied. The superior grade and quality of the stock on exhibition indicates the certain and positive improvement we are making in this very important branch of agriculture. The game and speed exhibited by the California-bred contestants for purses, both in trotting and running races, places California proudly upon the turf record, by the side of, if not in advance of, any other State in the Union. Indeed, we think we may be permitted to say that the Fair of the State Agricultural Society of 1864, taking all things into consideration, has formed one of the brightest pages in the history of the turf, and very prominently foreshadows many brighter ones for our State and the Society in the future.

While we congratulate the members of the Society upon the many happy and useful lessons of the Fair as an exhibition, we are also glad to be able to inform them that, notwithstanding the extreme unfavorableness of the season, it has proved an unprecedented financial success. Every premium and purse were promptly paid as soon as awarded or won, and even more than were offered. Every item of expense made and audited by the Board has been promptly and satisfactorily canceled. The handsome sum of $8,412 72 of the old indebtedness of the Society has been discharged, leaving the present indebtedness, including interest to January 13th, $11,334 65, against $26,473 56 on the 12th day of March, 1863, when the Board of Agriculture was organized and the affairs of the Society were placed in its hands.

When we take into consideration the embarrassing circumstances, both pecuniarily and otherwise, in which the Society was found to be at that time, and the difficulties it has encountered and overcome since, and that it has still been able to work out, in less than two years, this substantial financial result, and regain to so large an extent the confidence and good will of the community, we are forced to the conviction that, with the enormous receipts of former years, the Society should to-day have occupied a very different position among the useful institutions of the State from the one in which we find it. Instead of being poor and its energies crippled with the incumbrance of a large debt, it should have been in the enjoyment of such means and facilities as would have enabled it to exert a powerful influence in the direction and development of all the material interests of the State.

The mineral cabinet of the Society has not received so great accessions during the last as during the preceding year, owing to the general depression of the mining interest, following the unhealthy excitement of 1862 and 1863. However, many valuable specimens have been added to the collection. The Amador County Agricultural Society has donated a cabinet of over two thousand specimens, mostly from the valuable copper mines of that county. And Amador claims, and is entitled to the distinction of being the banner county of the State, as regards contributions to the State Society's Cabinet.

Most of the newspapers and periodicals of the State, with a liberality not shown by the press in any other part of the world, have continued to furnish the Society with their regular issues. All these have been carefully filed away and preserved, and when bound will constitute an invaluable portion of the Society's library. It will contain a most complete general and local history of the State and its interests. The contributors are entitled to the thanks of the Board and the Society. And here we would also say that the California Steam Navigation Company, Wells, Fargo & Co., and the various stage and railroad companies in the State, have, by their uniform liberality, placed the Society under lasting obligations. Valuable contributions of statistical reports of various departments of the General Government have been received from our Senator, John Conness, and Representatives Higby, Cole and Shannon. The Society has also been the medium of the above named parties and Isaac Newton, Commissioner of Agriculture at Washington, for the distribution of a large number of the annual and bi-monthly reports of the Agricultural Department, as also of many varieties of new and valuable seeds. The latter have been given out to parties who have promised to exhibit the products, by sample, at the succeeding Fair; but owing to the drought, very few of those distributed last Spring have been heard from. No seeds, except a few packages of wheat, have been received yet this season. Vegetable seeds are usually received too late for use the same year, and hence many varieties are damaged by age. The attention of the Department has been called to this fact.

We are under obligations to B. B. Redding, Secretary of State, for Statutes of 1863–4; to W. C. Stratton, State Librarian, for Journals and Appendix of the Assembly and Senate; and to C. W. Wyman, of Massachusetts, for six volumes of the Transactions of the Massachusetts State Board of Agriculture—a valuable contribution.

The Society's reports for 1863 have been published and distributed throughout our own State, and many copies mailed to leading journals and agricultural and other industrial societies in the Atlantic States and Europe. Correspondence has also been opened with these institutions, with direct reference to increasing the size and usefulness of our library, and the Board confidently anticipates satisfactory results.

The Constitution of the Society has not been amended since the passage of the law creating the Board of Agriculture. To make it conform to the change in the management of the Society, some alteration will be necessary, and perhaps no time more appropriate for making such alterations will be found than the present meeting of the members. If the Society should conclude to make such alterations, the Board will suggest some additional ones, which, we think, will tend to enlarge the sphere of its usefulness, and to render its published transactions more practical, and give them a more reliable and authentic character. It has formerly been the custom of the Directors of the Society to appoint Visiting Committees, who have traveled, at great expense to the Society, on exploring expeditions, the scope of their observations embracing every department of industry through the whole length and breadth of the State, and even into adjoining States. These Committees have reported to the Board, for embodying in the published Transactions, with tiresome minuteness, where and how they went, and all they saw.

It is doubtful whether the benefits derived from such a custom are equal to the necessarily great outlay. It is believed that the objects for which the practice was instituted may be attained in a much more reliable and authentic manner, and with comparatively little expense. There are men of ability and practical experience in each particular branch of industry, in every part of the State, who would, no doubt, if requested, be willing to act as officers or Committees of the Board, in collecting and reporting to them, annually, facts and useful and reliable information in the particular department for which they are qualified and for which they should be appointed.

We have geologists of high character and standing among us, whose business calls them to a constant investigation of the geological structure and advancing development of our mining regions, and whose opinions have great weight, both at home and abroad. Let the Board appoint some one of these as the geologist of the Society, and ask of him a practical report of the character of our different mineral sections, and the progress and improvement annually made in mining. Such reports would be, of course, brief and adapted to the general reader, and being published in the annual transactions of the Society, would reach a class of readers who would never see the elaborate reports of the State Geologist, now in process of publication. And here we think it not improper to remark, that while the General Government is directing its inquiries and investigations to determine in what manner to manage or dispose of the public domain embraced within that portion of our State usually denominated mineral lands, so as at once to produce the greatest revenue to her treasury, and be of the most benefit to the occupants of the same, perhaps it might be well to inquire what the effect upon the future wealth and industry of the State would be were those lands to be disposed of in such a manner as to invite and induce the permanent occupancy and cultivation in vineyards, of those millions of acres located on the hill and mountain sides, and in the countless valleys, which, from actual experience and by the chemical analysis of the soil and the favorable atmospherical phenomena are proved capable of producing wines and raisins equal, if not superior, to the most excellent productions of the most favored wine-producing countries, not excepting the celebrated wines of the Johannisberg and delicious raisins of Malaga. Under our present system of mining regulations and laws very few of these acres will be thus cultivated until the title to the same is vested in the cultivator. Their management or sale becomes a serious question of State as well as national policy. It is the interest as well as the duty of the people of the State to indicate to the General Government the proper policy to be adopted in regard to them. It is better to take time by the forelock and control and direct that policy for our own interests and the best interests of the Government, than, when too late, to condemn a policy which may be to the detriment of both. Every department of industry is equally interested in the question, for when you touch the mines with the hand of oppression you oppress every other interest, and when you encourage and stimulate the development of the mines you encourage and stimulate every other pursuit. In this respect, if not in the actual investment of money, we are all miners and all cultivators of the soil. A Convention, embracing all the States and Territories on this side of the continent, called during the ensuing Summer, for the discussion of this subject, might lead to good results.

Our wine-making interest is becoming one of the greatest industrial interests of the State. It excels that of any other State in the Union. Yet there is not perhaps another branch of industry, in regard to the practical operations of which, there is so much ignorance among our people as this. The varieties of grapes best adapted to wine-making in our State, or in different localities of it; the chemical properties of the soil required for superior wines; the atmospherical influences of different localities; the manner of planting the vine and tilling the vineyard; the gathering and pressing the grape, and the fermenting and after-treatment of the juice or must until it is converted into wine—are all subjects about which our people have but very little practical or satisfactory information, and upon which there is prevailing, in all our agricultural communities, the most lively interest and intense desire for knowledge.

If the Board were to appoint some competent person as a chemist to the Society, who would, under its sanction and in his official character, receive and analyze for a fair compensation, to be paid by the applicant, the soils of different localities, and the juice of grapes grown in the different wine-growing districts, and keep a careful record of his operations, to be reported to the Board, and if at the same time they were to enlist in their service, as Committeemen, intelligent and practical cultivators of the vine and wine manufacturers in the different localities, who should also report their observations, experience and opinions to the Board, all to be embodied in the published transactions, they might perhaps be able to form some well defined landmarks, which may serve as incentives to enterprise and guides in the prosecution and development of this great resource of wealth and prosperity. If successful in the accomplishment of this object, the Society would have rendered a service to the people and the State greater and more lasting than if, by some supernatural power, they were to convert the whole bulk of Mount Diablo into gold dollars and distribute them equally between every man, woman and child within her borders.

The present anomalous condition of the general stock-raising interest of our State may well attract the serious apprehension of and engage the attention of the political economists and the best business minds among us. The annual record of death by starvation of a large percentage of the stock of our State, has become almost as much a matter of course as the periodical return of our rainy seasons. During the unusually dry season of the past Summer, a great number of stock were driven to the mountains of the Sierra Nevada and Coast Range, where they found an abundance of food to carry them safely through the dry season, but to return to the valley ranges to enrich the soil with their decaying carcasses. Many others were driven to the low land surrounding the confluence of our large rivers, where sufficient feed for the subsistence of nearly half of the stock in the State, during the Summer seasons, has for years past been allowed to go to waste annually; but, when forced from these luxuriant fields, by the sudden rise of the waters, the same destructive fate awaited them as did those from the mountains. The last was an extraordinary season, it is true, but if the owners of large herds of stock would pursue the same course in ordinary seasons that they did the last they would make a great improvement over the usual custom of pasturing them on the same ranges during the Summer on which they are compelled to keep them during the following Winter.

But to reform and correct the evils and drawbacks attending stock-raising seems to require a pretty thorough revolution in the whole farming system. The owners of large herds and flocks will be compelled to reduce them to such a number as they can provide Winter food for; and the farmers who have heretofore turned their attention almost exclusively to grain raising, will find it much more profitable to raise a greater variety of crops, and include in their annual sales of the products of the farm, a few young horses, fat cattle, sheep and hogs. The statement of two or three facts will serve to illustrate the extraordinary and disastrous condition of this branch of industry, as it is now seen. During the last Summer, when it became evident that the hay crop in a large portion of the State must prove a failure, and consequently command a high price, many persons resorted to the tule lands at the mouths of the San Joaquin, Sacramento and Consumnes rivers, in search of the desired article. Here they found thousands of acres of natural meadows, upon which were cut and secured, according to statistics collected by the Secretary of this Board, and careful estimates made by men of good judgment engaged in the business, not less than fifty thousand tuns of a very fair quality of hay. According to the same estimates, there were left standing uncut at least an equal amount. Yet within sight of these extensive meadows, much of them unclaimed and unappropriated by anybody, large flocks of sheep and herds of cattle have been reduced by starvation since the rainy season commenced from twenty-five to fifty per cent. in numbers, and probably thirty-three per cent. in the weight of those yet alive. Again, when this hay was cut and freighted to localities where principally demanded for use, the expense upon it, per tun, as a general thing, amounted to more than an ordinary stock cow or bullock would sell for, and consequently to Winter such an animal upon it, would cost more money than the animal would sell for when wintered.

These are extraordinary cases in an extraordinary season, but to a certain extent they occur every year, and to the full extent may occur again. To prevent such recurrence, and to bring about a healthy change in the management of this branch of agriculture, are objects worthy the attention of those who may hereafter control the transactions of this Society and the economies of the great interests of the State.

The vast amount of staging on this coast, and the transportation of goods and machinery from navigation to the various mining localities in this State, Nevada and the surrounding Territories will, until such times as railroads shall supercede these modes of conveyance, continue to create a great demand for valuable horses and mules, and large quantities of grain for their subsistence. To raise a horse or a field of grain may not generally require a greater degree of skill than is possessed by any ordinary farmer. But to raise and prepare for market a large number of good horses with profit to the owner, and well adapted to the business for which they were intended, requires a good degree of knowledge of the principles of breeding, the economies of feeding such animals, and the judgment to apply such principles and economies for the attainment of the end in view.

To make a given number of acres of land produce the largest amount of grain and other food that it is capable of producing, without deterioration of the soil, for a series of years, requires a much greater degree of skill and scientific knowledge than is usually exercised, at least by the generality of farmers in this country.

The truth of this latter statement will be apparent when it is proved, as it has been, by statistics collected by our Secretary during the past year from reliable sources, that most of the grain land in California will, when Summer-fallowed, produce eight-tenths more grain per acre than when plowed and sown after the rainy season sets in. Yet not one-twentieth of the land devoted to grain raising for years past has been Summer-fallowed.

It is proper to remark, however, that great improvement in the manner of preparing the soil and putting in the seed this season over past years is manifest in every part of the State. The efforts of this Board, through its Secretary, in calling the attention of farmers to the importance of this subject, and the drought of the past season, have both contributed to this change. It is hoped that hereafter grain raising will be conducted with greater economy and upon principles which guarantee greater and more certain success. As another good effect of the drought may be mentioned the interest it has awakened in many parts of the State upon the subject of irrigation. The experience of those who have practiced irrigation for a number of years past proves that most any of our lands situated back from the river bottoms proper, and which have heretofore been considered capable of producing only small grains, and these only in favorable seasons, may, by the judicious use of water, be made to produce in abundance and with almost absolute certainty most any crop embraced in the husbandman's vocabulary in any climate or country. This experience has also established another important fact that the best and only time necessary to use this water is during the Winter season, when all our creeks and rivers are full and capable of supplying almost any quantity desired. A thorough saturation of the soil at this time serves to mature any crop, or two or three different kinds of crops in a season, without further irrigation. The people of the counties of San Joaquin, Los Angeles and Yolo have been the first to avail themselves of these important lessons upon an extensive scale.

C. M. Weber, of San Joaquin county, has, during the last season, introduced water over his own land, and that of some of his neighbors, with the most gratifying results.

The particulars as to length of canal or amount of land that may be irrigated have not been received, though written for some time since.

By means of a ditch and reservoir, eleven miles in length, tapping the San Gabriel river, in Los Angeles county, forty thousand acres of land which has been hitherto used only for grazing purposes, is now being irrigated and converted into one of the most fertile portions of that county, already so justly celebrated for the variety and excellence of its productions.

In Yolo county there are five main ditches, tapping Cache creek in as many different places, with an aggregate length of twenty-five miles, besides a great number of branches, all capable of irrigating at least one hundred thousand acres of as good land as the State contains. Nicholas Wycoff, the engineer who located most of the ditches

in Yolo county, and the engineer of Swamp Land District No. 18, lying mostly in that county, says, in a letter to the Secretary, "the day is not far distant when the waters of Cache and Putah creeks, in ordinary seasons, will be used upon the land, and not be suffered to pass into the tules, except at high floods—thus assisting to reclaim those valuable lands."

The people of Colusa county are also moving in this matter. They propose to take the water from the Sacramento river, at any point above low water mark, so as not to interfere with navigation, and turn it through a canal which, including one main branch, will be one hundred and twenty miles in length, over an area of some three hundred thousand acres of back valley land in that and the northern part of Yolo county. The scheme is pronounced entirely practical by competent engineers who have made the preliminary surveys, and the people are determined to accomplish the enterprize and reap its benefits. In view of these facts, and the probability of other similar enterprises, may we not look forward to the time when most of the surplus waters of our creeks and rivers during the rainy seasons will be used to irrigate and render immensely productive all the higher lands of our valleys? As a secondary though very important result of the accomplishment of such a system of irrigation, great assistance would be rendered in permanently reclaiming the tule lands, and the improvements of our farmers, and the towns and cities on the immediate banks of the rivers would be thus relieved, to a great extent, from danger by overflows.

The mechanical and manufacturing industries of the State, though partaking of the general depression of the past year, and suffering somewhat from the state of the currency, which has encouraged importations, have, notwithstanding, continued to enlist in their prosecution a gratifying increase of capital, and to extend their enterprises and scope to a greater variety of the articles necessarily used in carrying on the various industrial pursuits, and in supplying the necessities and luxuries of every department of life.

Leather of the various kinds, boots and shoes, harness, saddles, whips, every description of cordage, building materials, granite, marble, lime, plaster, cement, wagons and carriages, railroad, passenger and freight cars; woolen goods, such as blankets of all kinds, flannels of every description, cloths and cassimeres, carpets; hats, caps, and various kinds of clothing; glue, asphaltum, gunpowder, matches, tar, pitch, resin, mineral paint, spirits of turpentine, salt, soap, yeast powders, starch, vinegar, pickles, every variety of preserved fruits, jams, raisins, figs, maccaroni and vermacelli, castor oil, petroleum, wines, brandies and the various kinds of spirituous and malt liquors; paper of every variety; glass bottles of all kinds demanded, earthen and stone ware; wood, tin and wire ware; mining, mill and steamboat machinery, and machinery of every kind in use; agricultural implements and various other articles are manufactured in the State with greater or less success. Very many, in sufficient quantities to supply the home demand and keep up a very good and remunerative export trade, while others are struggling against the persevering competition of importations.

Preparations, upon extensive scales, are now being made to add to this list, railroad locomotives, shot, and lead pipe. The experiment of smelting copper has already proved so much of a success as to warrant the confident expectation that all our copper ores will soon be smelted within our State, and thus produce a complete revolution in our copper mining interest. The experience of nations proves that no classes of industries aid more in enriching and rendering a State independent than mechanics and manufactures. California has greater natural facilities for becoming an extensive manufacturing State than any other in the Union, and her isolated position furnishes a strong reason for fostering and encouraging them.

For the advancement and improvement of all these objects, and, indeed, all the industries of the State, was this Society instituted. While the holding of annual Fairs, at which the products and improvements of every department of industry are exhibited for comparison and instruction, and to stimulate emulation and enterprise, is calculated to do great good, and should therefore be continued; yet, for the financial success of the Society, the Fairs should be made to assume such a character as will prove at once the most attractive and least expensive. It should be no ground of complaint should the Board adopt this policy.

There are other and less superficial mediums through which, in addition to the one just named, the Society may render itself equally beneficial to our present population and their material interests, and enlarge and extend its sphere of usefulness, so as to enhance more perceptibly and certainly the State's future prosperity.

Among these may be mentioned a means already adverted to, the appointment of competent Committees to investigate and report upon the present condition and best means of improvement in each branch of industry. These reports should assume the character of short, practical, and to some extent scientific, treatises, wholly Californian in their character and application. The Society should also own an experimental farm, with All the facilities and appliances for practically teaching and illustrating agriculture, in all its branches, as adapted to the peculiarities of our soil and climate. It should possess an extensive mineral, mechanical and agricultural museum for illustrating our natural history, our mineral riches, and our advancement in the useful arts and sciences. It should enjoy the advantages of a philosophical and chemical laboratory and an extensive library of useful and practical knowledge, for exemplifying and explaining the truths of science as applicable to the various industrial pursuits of life.

Add to these, by authority of law, the facilities of collecting agricultural and other important statistics, in an authoritative and authentic manner; and the Society would then occupy that position of usefulness for which it was originally organized, but to which few such societies attain for want of some definite aim and some constant and steady hand to guide them.

The official management of the Agricultural Societies of New York and Massachusetts have respectively been under the control of B. P. Johnson and C. L. Flint almost since their first organization. These Societies, either of them are an honor to any country or nation, to say nothing of the States in which they are located.

The importance of reliable agricultural and other statistics to the successful and intelligent conduct of a Government, and to the advantageous direction and development of the resources of a State, are too obvious to require an argument; and particularly so in a new State, with resources so diversified as ours—and yet we regret to record the fact that we have not now, as a State, and never had any system by which such statistics have been or can be collected. In older and more thickly settled communities, with their superior facilities for communication, it has been found practical to collect such statistics, through voluntary agents, who, without compensation, except the consciousness of serving their country, devote their time and energies to the subject, and, under a system of reports to one common head, produce a result sufficiently correct for all practical purposes. But in a State where the facilities for travel, except on general routes to a few important localities, are so limited and expensive as in ours, and where so few of our farmers have become so permanently fixed and devoted to their occupation as to inspire that interest in the cause necessary for such an undertaking, and so few are able to afford the time and means for its faithful execution, such a system will be found, as it has already been found by the last two years' efforts of this Board, almost totally inoperative. The present system of reports by the County and District Assessors to the Surveyor General has proved to be equally unreliable and uncertain. Only from one-half to two-thirds of the counties in the State being reported at all, and these reports in many instances being mere rough estimates instead of actual and careful counts. Statistics thus partial and unreliable, in the opinion of the Board, tend rather to depreciate the value and magnitude of our industrial resources, and to injure and prejudice the importance and standing of our State, both among our own people and abroad, than otherwise.

Without narrating the history of the efforts of this Board, during the session of the last Legislature, advised as they were by our immediate predecessors, and seconded by every District and County Agricultural Society in the State, to rectify these evils, and to obtain the passage of a law which would in our opinion have provided an efficient and effective system by which reliable statistics relating to all our industries and productions would have been obtained, we will venture to express the hope that our next Legislature will take a more practical and comprehensive view of the material wants of the State, and will comprehend and supply the necessity of a system by which, through the proper channels, we may possess ourselves of a full sheet exhibiting all our productions and our present and future capacities. One short statute that would effectually accomplish this object, would be of more real and lasting benefit to our State than a whole volume of such laws as usually emanate from each session of our Legislature. Upon this subject and the necessity of State aid to Agricultural Societies, Dr. E. S. Holden, President of the San Joaquin District Agricultural Society, than whom no man in the State understands the State's necessities better, holds the following language in his last annual address before that Society:

"Last year this Society, together with several other similar associations, petitioned our Legislature to appropriate a few thousand dollars for premium money, but our Solons failed to see the benefit of such appropriations; they failed to see that three-fourths of their constituents were producing by the sweat of their brows their very existence, their bread and butter. But there was one thing they could easily comprehend, and that was the value of bribe money to create and aid a host of rascally franchises, yearly springing up from San Diego to Siskiyou, from the Sierra to the Pacific.

"Farmers and mechanics, protect your own interests—those interests which contribute so largely to the wealth and independence of nations. Elect, as it is in your power to do, Legislators who can comprehend the interests of Agriculture and Manufactures, and who will honestly protect them."

With all these appliances and facilities for usefulness, well managed, the published reports of the transactions of the Society would become most interesting and authentic exponents of the agricultural capacities, the mineral wealth, the manufacturing enterprise and the general resources of the State. Distributed among our own people, they would furnish constant incentives and valuable guides to improvement. Distributed in the Atlantic States and in the rich and populous countries of the eastern continent, they would serve as the most economical and effective agents to attract immigration to our State that could possibly be employed. Teach the skilled cultivator of the vine and the experienced manufacturer of wine, in the agricultural portions of Germany, France, Italy and other old wine-growing countries, that the wine crop has never proved a failure in California since its first introduction by the priests, 150 years ago—that owing to the peculiar adaptation of the soil and climate of our State to the growth of the vine, and the average annual product per acre, here, under good cultivation, is six hundred gallons, while that of the German States and France is not over one hundred and seventy-five, and that of Italy—the best wine-producing country in the world outside of California—is less than four hundred and fifty gallons. Teach them that there is in California over twenty millions of acres of the very best of land for vineyards, and that each head of a family can become the owner of one hundred and sixty acres of the same, by coming here and settling upon and improving it—and will not such information, rendered authentic by our official reports, turn their heads towards California? Will they remain longer than necessity compels them in their own country, where but few of them have any interest in the soil and can obtain but a poor subsistence as the reward of their daily labors? Teach these facts to foreign capitalists, and enterprising and skillful manufacturers, and they, also, will seek our shores for the profitable investment of their means, and a more adequate return for their enterprise and skill. We should soon have springing up in the various favorable localities in our State extensive wine-cellars, the owners of which would purchase the grape or must from the producer, and after subjecting it to careful and skillful treatment for the proper length of time necessary to convert into an article of that superior quality rendered susceptible by the unequaled wine properties of the grape, and not till then, it would be found in the market for sale and consumption. The immediate effects of this change in the management of our wine interests would be a certain and reliable increased demand for the grape and must, and a proportional increased production. The mere grape juice, of from from four to six months of age, made by those professing but very little skill in its manufacture, and possessing perhaps less, would disappear from among us, and our home and foreign demands would be supplied with the various kinds of wines, equal, if not superior, to the most excellent and high-priced foreign brands.

A very large portion of the sugar consumed in the southern countries of Europe is now manufactured in France from the common white sugar beet. It is a demonstrated fact that this article can be produced in the rich alluvial soil of our valleys and tule land in greater quantities per acre, and with less labor, than in any other portion of the civilized world. By chemical analysis, science assures us that, owing to the peculiarly favorable properties of our soil, the California production possesses a greater quantity of saccharine matter than the same article produced in any part of France. Taken in connection with the present and prospective high ruling prices of sugar, we have here another branch of industry promising a liberal compensation for skilled labor and a munificent return for the investment of capital, managed and directed by the lights of science and practical experience.

The cultivation of silk also, by the experience of competent judges, for some ten years, in our State, has proved to be a perfect success. The mulberry tree flourishes here with a luxuriance known in no other country. The absence of moisture and explosive electricity in the atmosphere, during the season of feeding and hatching the worms and securing the cocoons, are circumstances which render our State more favorable for the prosecution of this pleasant and important branch of industry than any other country in which silk is produced.

It is a historical fact that the seasons in the principal silk-producing countries in the south of Europe have for years past been growing more cold and moist, and hence less favorable to the production of silk. These are significant facts, which may very profitably be taken into account by those who are to control the future material destiny of our State. It may not be improper here to state that J. Morenhout, Consul of France at Los Angeles, lately sent five samples of cotton produced in that county by as many different persons, to the Minister of Agriculture and Commerce in France, who, after having the same carefully examined by competent judges, returned in his official report that the samples were all identical in quality, and would command then about the same price as the short silk cotton of the Southern States, from $62 to $63 per one hundred pounds. The experiment will be thoroughly tested in that county this year. By experiments extending through a series years in various parts of our State, it is conclusively proved that raisins, figs, almonds, prunes, olives, all articles of commerce, and consequently not liable to overstock any market, can be produced here in equal perfection and greater abundance than in any other part of the world. In a word, to sum up the foregoing statements, we may say we know we have within our borders the elements of greatness and prosperity equal, if not superior, to those of any other State in the Union. Then, what do we lack? what do we need? The answer most emphatically is, *labor and capital*. We cannot attain material greatness or prosper well without these—without both; and capital for investment in our material resources will not, for obvious reasons, precede labor, it would follow. Then labor is the first great necessity. And how shall we obtain it? The General Government, through agents and the distribution of favorable information, is wisely and successfully exerting her means and energies to induce emigration to the United States. According to the report of the New York Commissioners of Immigration, the number of immigrants that arrived at that port during the eleven months ending the 30th of November, 1863, was 146,519, against 76,306 during 1862—showing an increase in one year of nearly fifty per cent. from extra exertion. But does the Pacific coast or California receive any portion of that immigration, or any immediate benefit from it? Very little, if any at all. The moment the new-comer sets foot on shore at New York or any other eastern port he is hurried off to Illinois, Indiana, Kansas, or some other new State east of the Rocky Mountains, but never to California; hence, those States, with far less natural advantages, except as to convenient location for immigration, outstrip us in the race to wealth and general prosperity. The Pacific Railroad will, when finished, to a certain extent remove this barrier which now isolates us from the great center of our country's population. But till that time California must work out the problem of increasing her labor and capital, and of developing her own resources herself. Let California bestir herself, if she would not fall back from her present relative position among her sister States. Let her make independent and extra exertions to induce a tide of immigration to set in toward her shores before that great field for enterprise and improvement is opened up in the Southern States, to attract and hold the tide from her. Let her send out, through the Golden Gate, such a flood of reliable information in regard to her unequaled productions, her inexhaustible resources and capacities, to those great beehives of industry in the Old World as will cause a lively swarming out of their families of workers, so intent upon securing the unequaled benefits within their grasp here, that no half-way port will attract them from their destination.

Why should not the route from the various emigrating ports of the Old World to San Francisco, by way of Panama, become the line of attraction and travel to those who are seeking an asylum and a home in America? Bring this about, and our march is onward, our destiny certain.

To assist in the conveyance of this information, and accomplishing these objects, what channel so appropriate, what means so effective as the State Agricultural Society, when it shall occupy the position and enjoy the facilities we claim for it?

To place the Society in this position, and in command of these facilities, liberal State aid will be required. The front door of the State treasury will have to be opened by the command of the people, and some of their money used for the accomplishment of these objects. And why not? Facts and statistics are at hand to prove that no people ever became permanently prosperous, or State rich and powerful, until this policy was adopted and adhered to. And that no people or State ever adopted this policy, and continued it judiciously, without becoming intelligent and happy, and rising high in the scale of individual and national greatness.

England annually appropriates millions to auxiliary Societies, similar to ours, for the encouragement of her agricultural and manufacturing interests, and the world pays tribute to her enterprise and prosperity. France, following her example, has become a power upon the earth. Germany, by early adopting this policy, has made herself an empire of knowledge and a university to the world.

Among our family of States, New York and Massachusetts are noble examples of an enlightened liberality. Then let California profit by good examples and be wise, as she would be great.

We did intend to discuss another important question to California—the establishment of an Agricultural College. But the space allowable in a report embracing so many objects is not equal to the importance of the subject. We therefore recommend the appointment of a Committee by our successors to take this subject under consideration at some future time previous to the meeting of the next Legislature.

All of which is respectfully submitted.

CHARLES F. REED, President.

Several valuable letters were received by the Secretary, touching subjects referred to in the Report. The following is an extract from one received from Dr. E. S. Holden the day after the meeting. Dr. Holden has been one of the best friends the cause of Agriculture has had in our State. The subject is one of much interest, and we call special attention to it. Other letters and extracts will be given hereafter:

"I have ascertained some interesting facts in regard to the profitable results by irrigation from Captain Weber's ditches, which are supplied by water from the Calaveras until June, the month the river usually dries up. The several ditches run about five miles and irrigate about two thousand acres, or ten farms, small sections of which were last year cultivated to wheat; the balance produced oat hay, and a superior article. The estimated value of crops on the two thousand acres is $25,000, and without irrigation the crops would have been an entire failure. The above is the only system of ditches for irrigation in this county. The result of this first attempt of irrigating on a large scale has been so profitable and sure, many other enterprises of the kind will be undertaken in this county. Californians will find out in time that water is not only quite necessary, but the cheapest fertilizer."

The best cough drops for young ladies—wear thick shoes, dress all over, and stop lacing.

HORACE WATERS' COLUMN.

THE

HORACE WATERS MODERN

IMPROVED OVERSTRUNG BASS

Full Iron Frame Pianos

are built of the best and most thoroughly seasoned materials and will stand any climate. The tone is very deep, round, full, and mellow; the touch elastic. Each Piano warranted for five years. Prices from $225 to $700.

☞ A liberal discount to Clergymen, Churches, Sabbath Schools, Lodges, Seminaries, and Teachers.

HORACE WATERS, Ag't,
No. 481 Broadway, N. Y

THE DAY SCHOOL BELL.

40,000 copies issued. A new Singing Book for Schools and Seminaries, called the Day-School Bell, is now ready. It contains about 200 choice songs, rounds, duets, trios, quartetts, and choruses, many of them written expressly for this work, besides 32 pages of the Elements of Music, which are easy and progressive.

Among the large number of beautiful pieces may be found, "Uncle Sam's School," "Don't you hear the children coming," "Always look on the sunny side," "The little lass," and "Little Lad," "Oh, if I were a little bird," "Bird of beauty," "Pretty pair tree," "Anvil Chorus," "Meet me by the running brook," etc. It is compiled by Horace Waters, author of "Sabbath School Bell," Nos. 1 and 2, which have had the enormous sales of 825,000 copies. Prices—paper covers, 25 cents, $20 per 100; bound 30 cents, $25 per 100; cloth bound, embossed gilt, 40 cents, $35 per 100. 25 copies furnished at the 100 price. Mailed at the retail price.

SABBATH SCHOOL BELL, NO. 1,

contains 144 pages, and nearly 200 tunes and hymns, and is the most popular S. S. Book ever issued. Among the most popular pieces are "Kind Words," "Eden Above," "Christian Hero," "Beautiful Zion," "I ought to love my Mother," "The Angels told me so," "In the Light," "Rest for the Weary," etc. Prices—paper covers, 20 cents each, $15 per 100; bound 25 cents, $20 per 100: clothbound, embossed gilt, 30 cents, $25 per 100.

SABBATH SCHOOL BELL, NO. 2,

is an entire new work of 192 pages, and nearly two hundred and twenty-five tunes and hymns. One million of these Bells have been issued and are now ringing through this and other countries. Among the many choice pieces may be found, "Shall we meet beyond the River?" "There is a Beautiful World," "Sorrow shall come again no more," "Don't you hear the Angels coming?" "Thou, God, seest me," "Sabbath Bells chime on," etc. Prices of Bell No. 2, are same as Bell No. 1. Both numbers can be obtained in one volume, price, bound copy, 40 cents, $35 per 100; cloth bound, embossed gilt, 50 cents, $45 per 100. 25 copies furnished at the 100 prices. Mailed at the retail price.

WATER'S CHORAL HARP.

A new Sunday School Book of 160 pages of beautiful hymns and tunes. It contains many gems, such as "Shall we know each other there?" "Suffer little children to come unto me," "The Beautiful Shore," "Oh, 'tis glorious," "Leave me with my mother," "He leadeth me beside still waters," etc. Price, papers covers, 20 cents; $15 per 100. Bound, 25 cents, $20 per 100. Cloth bound, embossed gilt 35 cents. $30 per 100. Mailed at the retail price. It is edited by HORACE WATERS, author of "Sunday School Bells," Nos 1 and 2, which have had the enormous sale of over 800,000 copies.

Just published by HORACE WATERS,
No. 481 Broadway, New York.

THE NEW PATRIOTIC SONG BOOK

contains 96 pages of songs, duets, and choruses, both sacred and secular, including 14 pages of prayers for sick and dying soldiers, and soldiers' Scripture Manual. It is well suited for social singing, as well as Sabbath worship. Among the many beautiful pieces may be found, "Where liberty dwells is my country," "The Christian Hero," "Three cheers for our Banner," "Come sing to me of Heaven," Columbia, the Gem of the Ocean," "Freeman's Gathering," "Columbia's King forever," "Marching Along," etc. Prices—paper covers, cents, $10 per 100. Mailed at retail prices.

THE HARP OF FREEDOM

contains 32 pages of songs, duets, and choruses for Freedom. Among the choice pieces we would name, "Fair Freedom's morn," "O let my people go," "Over the mountain," "They worked me all the day," etc. Price 5 cents single, 50 cents per dozen, $3 per 100; postage 1 cent each

RUTH: A SACRED CANTATA

contains 126 pages. Words by Rev. Sidney Dyer, music by Prof. Call. This is an excellent book for concerts for the young. Prices—paper covers, 20 cents, $15 per 100; bound 25 cents, $20 per 100.

THE REVIVAL MUSIC BOOK

contains 73 pages of tunes and hymns, designed for revival prayer, and conference meetings. Price in paper covers single copies 10 cents, $8 per 100. Mailed at the retail price

THE ATHENÆUM COLLECTION

contains 512 pages of tunes and hymns, new and old of the choicest kinds, for church, Sunday school, revival, missionary, temperance, prayer, and conference, and all kinds of sacred and social meetings. The music in this book has life and animation in it, like "Shining Shore," "Rest for the Weary," "Shall we know each other there?" "Shall we meet beyond the River?" "There is a Beautiful World," "Kind Words," "Sweet Hour of Prayer," "There is a Land of Love," "Suffer little children to come unto me," "God save the Nation," etc. Prices—single copies, bound, 65 cents, $55 per 100; cloth bound, embossed gilt, 75 cents, $65 per 100 Mailed at the retail price.

HORACE WATERS, Ag't
481 Broadway, New York,
Publisher of the above Books.

Miscellaneous.

Marriage Elevates the Character.

People may think as they please, but the truth is, that till one becomes the head of a family and a father, he can scarcely be called a man. Exceptions there are, honorable, conspicuous. Instances may be pointed out, though far from common, it is believed, where one not advanced to the dignity supposed, and so not subjected to its numerous trials and victories; defeats, too, sometimes it must be confessed; have yet had hearts as liberal and expanded, as any who have assumed conjugal and parental responsibilities. Nevertheless, in general, those helps are needed to direct what there is unselfish, serious, generous and sympathizing in the soul. Men, and women too, grow hard by living for themselves alone. With little or nothing exterior to disturb their emotional natures, their affections are apt to settle quietly around themselves as a center, and finally crystalize there. Such a person may be a miracle of virtue and propriety, beautiful even in its transparent purity, but after all as hard as the diamond, if not as cold.

One needs the claims upon him as husband and father, to take him out of himself and awaken his solicitudes and cares for others. The wear and tear he is subjected to from these relations do him good. They are wholesome exercises for the heart, as labor is for the muscles. We may not tell exactly why it is so, but of the existence of the fact there is striking evidence in the experience of the mother, who loves that child best, which has given her most anxiety and trouble. For whom is all the tenderness of the father lavished? Is it not upon his wayward boy, his prodigal son? The parent is chastened and made better by having wife and children dependent on him for pleasure, comfort and support. The little vexations, sometimes great ones, perhaps, which they occasion, do him no harm, but the contrary. His own character is matured while he is laboring and suffering to shape that of others. He who does not suffer, cannot know half the sufferings there are in man.

Not only is the heart of a man better by assuming the obligations of a husband and father, but his mind is also greatly improved. A new horizon opens to him. Before, he was traveling through the world in a valley; he now ascends to higher ground, and for the first time sees mankind as they are, and begins to comprehend society, its origin, its work, and destiny. He now awakens to the glorious call of duty, instead of pleasure, to which he only listened before. Not that pleasure is denied him now, but it comes of itself in the train of duty discharged, instead of being solicited as formerly, for its own sake. This revolution, produced by his change of position, is marked upon his countenance where it is no less visible than in his changed conduct. The man is stamped upon it in every serious, thoughtful lineament, where cheerfulness and sedateness have taken the place of meaningless gaiety, frivolity and want of sober aim. If any one says he is acquainted with very many single persons of large and sympathetic hearts, and minds full of liberal thoughts; it is granted. Place that man, so admirably endowed by nature, at the head of a family for which he was doubtless intended, and he would be twice a man, and his usefulness increased four-fold.—[Newark Sentinel.

The Sunny South in Coming Years.

"Behind the clouds the sun is shining."

Henry Ward Beecher gives a truly prophetic picture of the fair sunny southland in her coming years, and although she is now passing a fiery ordeal, yet the future of the South will be a bright one—for there are noble hearts there still, amid all the darkness of the sanguinary, bloody and fearful fratracidal war now going on. As Lamartine says: "Revolutions never go backward."

We look for the brightness beyond the clouds. Rev. Ward Beecher says:

"In respect to the South, you are to recollect that she has pursued a course of finance which will relieve her at once of all pressure of national debt. There is no one of her statesmen that ever looks out doubtfully into the future. There is no question at all about her coming situation in that regard. But then we are to take into consideration, in looking into the future of Southern society, the stimulating effects of her new social condition. In twenty-five years—in a single generation—free labor will not only pay for the market-price of every slave that she will have lost by emancipation in a money form, but will make her rich over and above that. Among the things that I could desire to see, is the wonderful recuperation of these Southern States in wealth, and popular intelligence and patriotism, and substantial unity. For I tell you, when, with their fervid zeal and outspoken manliness, this people are once brought upon the platform of regenerated and real Democracy, they will put to shame the temporizing patriotism of many and many a man that dwells in New York. During the Revolutionary war a majority of the inhabitants of both Kings and Queens counties were tories. Mr. Jefferson declares that in New York all the influential merchants and literary men were largely monarchists. The hereditary tendencies in favor of monarchical, and against Democratic forms of government, in New York, are as old as the Revolution. And I expect to see the day when there shall be more genuine propagandism of liberty in Georgia than in New York. I expect, if I live to be as old as my father was, to see more enthusiasm for liberty on the sugar and cotton plantations of the South than we have ever seen in the relatively cold and reserved New England and Middle States. Great as is the disparity between the tendencies of the North toward liberty and the slave tendencies of the South, when the cause of the North has prevailed, and has been accepted by the South, you must not be surprised if the South are the representative people for liberty of this continent. And when this shall take place, what antagonism can there be between the South and the North?"

THE SIAMESE TWINS.—Some time since we clipped the following from an exchange:

A correspondent of the Macon (Georgia) Telegraph, who lately visited the Siamese twins, gives the following account of them: Your readers have no doubt seen these remarkable individuals, the Siamese twins, but few of them, perhaps, have been to their houses and seen them in their domestic relations. Though united by a ligament, as strong as life itself, they live a mile apart—spend alternately three days at one and the other's house—and allowing no circumstance to deter their departure from one to the other when the regular time arrives. The one at whose house you visit them leads the conversation and acts as master of ceremonies, while the other speaks only as occasion or politeness may require. One has eight and the other nine children, but one of them is in the war, the rest being girls and little boys. The twins are good neighbors, intelligent men, and thoroughly patriotic. They are, to all appearances, two separate and different men, with very little social resemblance, and a marked contrast of character. One is much the most positive, self-willed and uncompromising. They are seldom both sick at the same time. Why should death result from a separation of persons so unlike, and so little subject to be afflicted by each other's infirmaties?

Here is a subject for the physioligists of the age. If these two strange beings thus *united*, are so different in character, will, power and feeling; if the sickness of the one does not affect the other, why may not the chord that unites them be severed with safety? for it is self-evident, if *fatal* sickness comes to one, the other must die, if still united. Why not sever the chord now? Let medical men answer.

EDUCATIONAL.

Miss Lammond,

LATE PRINCIPAL OF

BENICIA SEMINARY,

HAS THE PLEASURE TO ANNOUNCE THAT she has purchased the Seminary for Young Ladies known as the

CALIFORNIA COLLEGIATE INSTITUTE,

For Young Ladies,

No, 64 Silver Street,

SAN FRANCISCO, CAL.,

formerly under the control of Mrs. M. B. SWEDENSTIERNA, and has removed there with her entire corps of

Superior Teachers and Professors.

The New Term Commenced

January 4th, 1865.

The location of this Institution (on the suburbs o the city) commands at once for its boarding pupils, the retirement of a country life, with the advantages of the finest professional talent from the city.

As Miss Lammond desires to make this a permanent Institution, no efforts will be spared to make it worthy of the patronage which has been so liberally extended to her during the past four years.

As the class of Boarding pupils is nearly filled, those desiring admission will find it necessary to apply early.

For further particulars, Catalogues may be obtained by calling upon or addressing

MISS M. LAMMOND,
10 Principal.

Oakland Seminary for Young Ladies.

Mr. G. M. Blake.....Principal.
Mrs. I. G. Huggins.....Associate Principal.

THE SEVENTH YEAR OF THIS INSTITUTION COMmenced on

MONDAY, JANUARY 9th, 1865.

For Catalogues and other particulars apply to the Principal, corner of Eleventh and Washington streets, Oakland.

Catalogues can also be obtained at the Book Stores on Montgomery street, San Francisco. 21tf

EDUCATIONAL.

PACIFIC

National Business College,

SAN FRANCISCO, CAL.

Practical, useful Education for Young Men, Boys, and Men of Middle Age.

A BUSINESS EDUCATION FOR A BUSINESS MAN—THE RIGHT KIND OF AN EDUCATION FOR YOUNG MEN.—THIS IS THE BEST PLACE FOR MERCANTILE BUSINESS IN THE WORLD.

IMPORTANT TO THOSE WHO CAN DEVOTE A FEW WEEKS OR MONTHS TO STUDY, AND TO PARENTS WHO HAVE SONS TO EDUCATE.

THE BEST COURSE OF STUDY AND THE GREATEST AMOUNT OF PRACTICAL AND USEFUL INFORMATION ACQUIRED IN THE SHORTEST POSSIBLE TIME AND AT THE LEAST EXPENSE, TO INSURE SUCCESS IN LIFE.

"*Acquire a Good Commercial Education, and you will as surely succeed in Life as that cause produces effect.*"—Abbott Lawrence.

A MODEL COMMERCIAL COLLEGE.

THIS NOTICE IS INTENDED TO GIVE FULL INFORmation of the course of Study and operation of the Pacific National Business School, San Francisco,

We respectfully solicit from Young Men and Men of Middle Age, who would succeed in business, and Parents and Guardians who have Boys to educate, an examination of our system of Practical, Useful Education, the superiority it possesses over every other institution of learning on this coast.

This School claims superiority and great merit over other institutions professing to teach the Commercial branches, by its system of combining THEORY and PRACTICE, on the London Corn Exchange principle, it being done in no other School on this coast.

COURSE OF STUDY.

The plan adopted in teaching combines PRACTICE with THEORY; instead of being confined to Text Books, the pupils are exercised in making original entries of every-day business transactions; journalizing, posting, balancing accounts, opening and closing a great variety of different sets of Books, both for individual and partnership business, where the business has been prosperous or adverse, thus qualifying the student for entering into the practical duties of the accountant in any kind of business.

THE COURSE OF INSTRUCTION

Consists of Double-Entry Book-keeping, embracing Wholesale, Retail, Commission, Manufacturing, Banking, Steamboating, Railroading, Individual, Partnership, Joint Stock, Compound, Company, Mining, Ranching, Farming, etc. In the routine of practical instruction the pupil becomes familiarized with changing books from single to double entry, changing stock books to partnership, and every form and principle known in well regulated establishments.

PENMANSHIP.

The beautiful and easy system of specimen Penmanship is taught in this College, and the only place where it is taught on this coast.

CORRESPONDENCE

Is carefully explained, and rules and principles are laid down, the observance of which will lead to the highest attainment in this art.

It is known to all that there is a great deficiency existing in this commercial branch.

BUSINESS ARITHMETIC.

This is a branch of the greatest importance, and you can be assured will not be neglected.

LECTURES

Are given to the students on Commercial Law, Nature and Causes of Wealth, Political Economy, Advertising, and general topics relating to success in business.

DIPLOMAS.

Those completing the course and passing a satisfactory examination before the Examining Committee, will receive Diplomas of the Institution.

THERE WILL BE NO VACATIONS.

Each pupil receives individual instruction, and persons can therefore enter at any time.

TERMS.

Scholarships are issued which give the scholar the privilege of reviewing the course at any future time, free of charge, for SIXTY DOLLARS, with a deduction of FIVE DOLLARS when two enter from the same family or the same place at the same time. When four enter at the same time from the same place, TEN DOLLARS will be deducted from each scholarship.

THE TIME REQUIRED

To complete the course depends somewhat upon the previous education and ability of the student, usually from ten to sixteen weeks, scholarships granting the holders the privilege of completing the course regardless of time.

A common school education is all that is necessary to enter the course of this College advantageously.

For further particulars, call at the College, 747 Market street, or address

M. K. LAUDENSLAGER,
President Pacific National Business College.

Santa Clara College.

THE FOURTEENTH ANNUAL SESSION OF THIS INstitution will commence on MONDAY, August 29th. The plan of instruction embraces two regular courses—the Classical and the Commercial, besides a preparatory Department

TERMS:

Entrance, or Matriculation Fee, $15, payable only once.
Board and Lodging, including Fuel and Light, the use of the Swimming Pond and Gymnasium per week.....$4 75

School Books are furnished at Store Prices.

GRADUATION FEES.

For each Academical Degree.....$10 00
Commercial Diploma..... 5 00

N. B.—In cases where there are more than two brothers each additional one pays only $200 per session.

For further information apply to the President of Santa Clara College, Santa Clara, Cal., or to Rev. A. Maraschi, S. J., St. Ignatius Church, Market street, between Fourth and Fifth, San Francisco. 3

Sacramento Seminary,

Boarding School for Young Ladies.

Tenth street, between F and G, SACRAMENTO.

The next Session commenced

January 2d, 1865.

For Circulars containing particulars, address

21 MR. or MRS. HARMON PERRY.

FRENCH COLLEGE,

Corner Mason and Jackson Streets,

Principal.....Prof. J. MIBIELLE.

THE CLASSES OF THIS ESTABLISHMENT ARE opened since the 3d inst., and the select and attending scholars receive a solid instruction proportionate to their age and mental facilities.

The programme includes all the branches of tuition fitted for children from 6 to 12 years of age, as the first step for a higher teaching.

The English, French and Spanish Languages are taught practically and theoretically, by competent and special teachers.

Boarders can be accommodated in the establishment, where they will find the comforts and care of a home.

An evening class of French and Spanish is also open for young men every other day, at 7 o'clock, P. M. Call on the Principal from 9 A. M. to 12 M. 1

EDUCATIONAL.

NAPA

COLLEGIATE INSTITUTE.

For Young Ladies and Gentlemen.

NAPA CITY, CALIFORNIA.

NAPA CITY, IN POINT OF LOCATION AND Climate, is unsurpassed in the State. It is about four hours' ride by steamboat from San Francisco, and three by stage from Benicia. There will soon be a daily boat from the former place, and there are now two daily stages from the latter. There are extensive accommodations for Boarders in the College Building, with large and well-ventilated sleeping apartments. Teachers reside in the Building, and will have a constant oversight of the Students who are Boarders.

GOVERNMENT.

Young Ladies will receive no calls from any except Parents and Guardians. Ladies and Misses will not leave the College grounds, except in company with their Instructors. Young Men and Lads are not allowed to lounge about the Stores, Hotels, and Saloons of the village. All pupils are required to attend Church on the Sabbath. Parents will choose the place of worship for their children.

MILITARY DEPARTMENT.

This Department has been opened with a view to the permanent establishment of a Military Academy on this Coast. From three to four years will be requisite to complete the course in this Department. The State has furnished us the necessary equipments for such a school. The Drills will be attended to daily.

TUITION.

Spelling and Reading, per month.....$2 50
Common English, with the above, per month..... 4 00
Higher English, with the above, per month..... 6 00
Latin and Greek, with the above, per month..... 8 00
Janitor's Fees, per month..... 25

EXTRAS.

Modern Languages, each, per month.....$2 00
Music, with Piano, per month..... 3 00
Embroidery, per month..... 3 00
Painting in Oil and Water Colors, per month..... 4 00
Board with Furnished Rooms, per week..... 5 00
Board with Furnished Rooms, Light, Fuel, and Washing, per week..... 6 50
Military Branches, per month..... 3 00
Sword Exercises, twelve lessons..... 8 00

CALENDER.

The Collegiate year is divided into two Sessions of 21 weeks each. The first Session will begin July 25 and end December 16. The second Session will begin January 2 and end May 28. The Winter vacation will be two, and the Summer vacation eight weeks long.

☞All articles of clothing should be plainly marked. Pupils will furnish their own Sheets, Pillow-cases, Towels, Napkins, and Lamps.

☞Payments, half-yearly in advance. Pupils can enter at any time, and be charged from the time of entering. No deduction will be made for absence, except in cases of protracted illness. The month sconsist of four weeks each.

For further particulars address

W. S. Turner, A. M.,
21-11 Principal.

St. Ignatius College.

(INCORPORATED APRIL 30th, 1859.)

The Fifth Annual Session of this Institution will Commence on August 22d.

THE DESIGN of the Institution is to give a thorough English, Classical, Mathematical, and Philosophical Education.

The Course of Studies Embraces

THE GREEK, LATIN, AND ENGLISH LANGUAGES,

POETRY, RHETORIC,
ELOCUTION, HISTORY,
GEOGRAPHY, ARITHMETIC,
BOOK-KEEPING, MATHEMATICS.

Mental, Moral, and Natural Philosophy.

The study of MODERN LANGUAGES is optional. Besides the Classical, there is a preparatory Department for the Younger Students.

TERMS PER MONTH.

Tuition in the Grammar Dep't. . . $5 00
" " Higher Dep't. . . 8 00
" Preparatory Dep't. . . 3 00
No1

Academy of Notre Dame,

SAN JOSE, CAL.

THE FOURTEENTH ANNUAL SESSION of this Institution will commence on TUESDAY, AUGUST 23d. The course of instruction embraces all the branches of a polite and useful education. Its aim is to form young ladies to virtue, accustom them to early habits of order and economy, and to cultivate in them those qualities which render virtue both amiable and attractive.

TERMS:

Entrance, to be paid but once, - - - - - - - - $15
Board and Tuition, per session, - - - - - - - - $250
Washing, per session, - - - - - - - - - - - - $50
Physician's Fees (unless it be preferred to pay the bill in case of sickness) per session, - - - - $10

Piano, Vocal Music, Drawing, and Painting,

Form extra Charges, but there is no extra charge for the

French, Spanish, or German Languages; nor for Plain Sewing and Fancy Needle-Work.

PAYMENTS are required to be made half a Session in advance. Pupils will find it much to their advantage to be present at the opening of the Session. 2

Saint Catherine's Academy,

BENICIA, CALIFORNIA.

Last Monday in August.

Terms, per annum, $250—payable, semi-annually in advance.

Music, Painting, and Drawing form Extra Charges; also, Books, Stationery, and Physician's Fees.

No deduction will be made to any pupil leaving the Academy before the expiration of the term—cases of sickness excepted.

Foreign Languages, Plain and Fancy Needle-work, form no Extra Charge.

For further particulars, refer to the Superioress of the Academy. 4

S. D. & H. W. SMITH'S

American Organs.

SIBERIA OTT, Wholesale Agent,

748 Broadway, New York City.

THE

MOST PERFECT AND BEAUTIFUL

Musical Instrument

IN THE WORLD

FOR THE

American Home Circle.

WITH THE MOST PERFECT CONFIDENCE, we call the attention of the public to the AMERICAN ORGAN, as an instrument long desired in the Family Circle, and with our patent improvements is adapted to all kinds of Music, more especially to Sacred Music, with its sustained tones and harmonies, so much desired and sought for in American homes.

The AMERICAN ORGANS are superior to all other instruments of the kind, in many important particulars.

They are superior in their greater fullness and completeness of tone, volume and power. They are superior in expression, quickness of action, and elasticity of touch, rendering them perfect in rapid movements.

They are superior in quality and beauty of tone, and when controlled by the DOUBLE BELLOWS and BLOW PEDALS, Knee Swell, etc, the most charming effects can be produced, from the softest whisper of the Æolian harp to the full volume and power of the church Organ, thus enabling the performer to give expressions not to be found in any other instruments.

The TREMOLO stop has a pleasing and beautiful variety, sympathetic in quality, appealing to the tender emotions of the soul, producing effects the most charming and soothing, it is universally admired and appreciated. The KNEE SWELL gives the performer full control of the tone, enabling him to graduate from the *Pianissimo* to the *Fortissimo* at pleasure, and combines the effect of the Expression Stop of the French Organ in the AMERICAN ORGAN, more perfectly and easily managed.

With all these combinations and improvements of Double Bellows, Pedals and Swell, the AMERICAN ORGAN excels in Expression, Variety, and Power, and has all the quality and capacity of a full Orchestra, and in the hands of a master is capable of the most complete orchestral effects.

The AMERICAN ORGANS are superior in Mechanical finish of the action and interior portions of the Musical parts. The valves are of material expressly prepared to avoid all sticking, cracking, or decomposition, are thus durable and will be always in order.

The Keys, Reeds, etc, are perfect in their finish, and this gives the quickness and sprightliness of tone, brilliancy, etc, equal in every respect to the "percussion stop" of the French Organs, but not like them in danger of getting out of order.

The AMERICAN ORGANS are by far the most beautiful in exterior finish, forming a handsome piece of furniture for the Parlor, Boudoir, or Sitting Room, occupying but little space, and perfect and complete in every particular.

THE

AMERICAN ORGAN

Makes Home Attractive; and Refines and Elevates the Minds of All.

Beautiful in its Appearance and Effects.

The AMERICAN ORGANS are finished in Rich Rosewood Cases, varnished and polished, forming an elegant piece of Furniture. Also, in Black Walnut Cases, and in Oak, finished in oil, and especially adapted for Churches, Lecture and Lodge Rooms.

They take but little room, are only 35 inches high, and from 34 to 47 inches wide. *They cost but a trifle more than Melodeons*, and yet possess many times their advantages in musical capabilities.

The California Farmer.

SAN FRANCISCO:

FRIDAY..... FEBRUARY 3, 1865.

☞ Those who receive a number of the Farmer with this paragraph marked, may understand that it is sent to them or their examination, hoping it will meet their approval and induce them to subscribe, and ask their neighbors to do so.

Postmasters and others, who may receive the paper, will oblige us by soliciting subscriptions, or putting it n the hands of those that will. Subscriptions may commence at any time.

Send for Sample Papers and get up a club. Address

Publisher California Farmer, San Francisco.

TERMS OF ADVERTISING.

The charge for Advertising in the CALIFORNIA FARMER (payable in advance), is **One Dollar** for five lines, or less of space, in nonpareil type, for one insertion, and ten cents a line for any larger space. Each subsequent insertion half these rates. This it is believed affords the cheapest and best medium of reaching the Agricultural community on this coast. As heretofore, the right is reserved to reject any advertisements deemed objectionable.

Purchasing Agency.

Having had the experience of over thirty years in dealing n Trees, Plants, Seeds, and Agricultural Implements, we feel that we are fully competent by our experience in purchasing such articles to make a saving of from five to fifteen per cent for the great mass of purchasers. We will therefore offer to make purchases for all who wish our services, of any of those articles named, or for any articles of merchandise for our Farmers or Ranchmen, and ship the same as they shall direct.

In order that we may do their business in the most satisfactory way for them and ourselves, we shall wish that all who send orders should be as explicit as possible as to their wants—describing as minutely as they can; and, where they desire our judgment, we will do our best to suit them.

Our charge will be Five per cent. together with the cost of packing, freight, drayage, etc. Orders should inclose satisfactory references or the Cash; or bills could be sent by Express, to be collected on delivery.

We shall be happy to attend to the purchase and shipment of Trees, Seeds, Plants, etc., as this is our especial "hobby," and we know we can satisfy all that send us their business attend to.

TO AGRICULTURAL SOCIETIES ABROAD

Exchange of Seeds, Books, Etc.

Having established large and spacious Reading Rooms, in this city, which contain Libraries, Cabinets, and hundreds of Newspapers, all free to those who wish to enjoy the benefits thereof, we now ask coöperation from all Agricultural Associations in the Old States and Europe, for the *Exchange of Seeds, Specimens, Books, Etc.* We shall be happy to reciprocate any and all favors, and comply with any direction made to us connected with such an enterprise.

Traveling Agents Wanted.

We want four or five good men, who are qualified as practical thinking men, to travel, take notes of Agriculture, and canvass the State in relation to its growth and progress. To men qualified for such business, men with good qualifications, a good offer will be made. *None need apply who are not familiar with the principles and practical working of Agriculture*, for we cannot believe that men that don't feel an interest in such cause can ever be successful in such a work.

☞ Take a Copy.—Are You a Subscriber?

We have distributed many thousands of copies of this journal during the Fair Season, and we have a just reason to hope that among these thousands we shall find many persons who will desire to become subscribers to this paper, now the oldest newspaper of the kind on the Pacific coast, a journal, too, that has been wholly devoted to the Home Interests of of our State. Those who desire it, in our city, can have it left at their residences by a carrier, every week. See terms at head of column.

THE CALIFORNIA FARMER READING-ROOM AND MUSEUM OF NATURAL HISTORY.

20 Clay street—Marble Building—Up Stairs.

The Farmer's Headquarters.

The Editorial Rooms and Museum of the Farmer Office are always open, and an attendant ready to make a visit instructive to those who take an interest in the productions of our State. Samples of all productions: grains, grasses, fruits, models, inventions, minerals, and specimens in Natural History innumerable, are constantly being added.

Farmer's Reading-room.

Farmers and Mechanics, from the country, who visit San Francisco, should visit the Free Reading-room and Museum, at the Farmer Office. Members of the Press, and Strangers, are particularly invited to avail themselves of these rooms. Newspapers from every State to which we have access by mails, as well as Foreign Newspapers, Periodicals, and Magazines, are upon file and on the tables for use; a Good Library of hundreds of volumes, with works illustrative of Agriculture, Horticulture, and Floriculture, works for reference upon all Sciences, with a Cabinet of Minerals, Coins, and Curiosities of interest to the Naturalist, to which we invite all.

Immigration Office.

ew comers to California can always obtain all needed information about Lands, Farms, etc, at the Farmer's Reading room, 320 Clay street. Most cheerfully we bid all welcome to our Sanctum.

Transactions of Agricultural Societies.

We would ask of those Societies in the Atlantic States and Europe, to whom we send our Journal, to send us the transactions of their several Socities, so that we may give the benefit of their perusal to visitors, from the several states, who are callers at our Reading-rooms. By this means we can lay before them the progress of Agriculture in their former homes, and thus advance the interest of both Atlantic and Pacific States.

New Comers.—Homesteads.

Those New Comers to our State can always be sure to find valuable Homesteads, already highly improved, and for sale on favorable terms, by applying at our Office. New Comers who want important positions, as Superintendents of Farms Millers, etc, can always be informed of favorable chances.

☞ SEND MONEY BY EXPRESS.

reason of the present uncertainty of our mails and post office arrangements, we would request those of our patrons who remit us money in letters, to do so through Wells, Fargo & Co's Express, or register them, then they will come safely and promptly. Letters are so long delayed and so repeatedly lost that we make this request—we will cheerfully bear the extra expense.

Patent Rights.

It has been, and will be, one of our specialties to aid all who desire to secure PATENT RIGHTS, and to give them information and assistance in preparing their papers. We can facilitate them greatly in this matter as we have all the Laws and Rules of Action touching these things. Many models can be seen at our Office and Reading-rooms, where all are invited freely.

TO READERS AND CORRESPONDENTS.

A Home of Taste.—We ask the special attention of our readers to the very excellent communication in this week's number, of our valued correspondent, "M. B. C.," who has drawn one of the prettiest pictures we have had presented to our view for a long time. We hope, however, that his admirable essay will lead many of our readers to make the attempt to Beautify their Homes, and see if they cannot at least lay the foundation of a "Home of Taste." Our correspondent is indeed familiar with the subject, and we sincerely hope this em-bass-y (M. B. C.) will be successful.

We know our readers will peruse with interest our "War Letter," although it was so long kept back by our mails, it is the fault of the Department.

The great length of the Annual Agricultural Address must be our only excuse for the omission of much matter prepared for this number.

The "Fisher Girl," by C. French Richards, is received, and will appear next week.

Rambles in the Country—No. 1.

As we promised in our No. 1, we intend to give a brief sketch of our whereabouts each week, and this will show our readers that we are not an *idle* Editor, but earnestly engaged in our work.

The State Agricultural Society's Annual Meeting, at Sacramento, required that we should visit the *Levee City*, therefore our first "Ramble" was to the city of the Fires and Floods—that Queen City of the Plains—the *City of Trials* and the *City of Fortitude.*

How well is foretold in sacred history the eventual triumph of the "Brave of Heart;" the good, the true, the enduring; when we remember this most wonderful city, we cannot but recall those passages of that history, that *endureth forever.* That Good Book says:

"The *Fire* shall not *consume* them, neither shall the *Floods destroy* them," and "though they fall *seven times*, yet shall they *rise again*." And literally Sacramento has fallen in perils and trials seven times, yet she has *risen again*, and never has that city worn the appearance of a more healthful trade, or her citizens looked more cheerful or in fact been more *prosperous* and prospectively more certain of enduring success than at this present moment.

We had opportunity, when not engaged at the meetings, to look over the city a little, although it was the *stormy week*, and we saw enough to convince us that Sacramento is now on the highway to permanent prosperity.

STREETS AND BUSINESS MEN.

The *streets of the city* having been raised are in general good order, especially the large business streets. The old and well-established business houses are doing a good, healthy and prosperous trade. Had we a whole page left we would give a list of the standard business men who pay large taxes promptly in gold, and have some left to help every good word and work, as the best of noble charities testify.

CHURCHES AND SCHOOLS.

The Churches are all well filled, the Pastors well cared for and the people happy.

The Schools are numerous and filled with intelligent children. Sacramento numbers 2,474 children, and $2,894 56 is allowed by the State as their portion. There are several fine Private Schools and Colleges (see notice of Sacramento Seminary in another column), and these are all well patronized, and are in a prosperous state.

THE WORK-SHOPS AND INDUSTRY.

We had but little time to visit these, but we began our work and visited the Carriage Manufactory of Messrs. Rippon & Hill, on J street, above Tenth. This has been established for some several years and has turned out quantities of most superior work, both in finished buggies and wagons, also durable work in common Farm and Railroad carts. Some idea of their business may be formed when we say that in dull times they have, the last year, made about fifty Buggies and Wagons, and seventy-five carts for the Pacific Railroad, and have large orders on hand to execute.

The cost of wagons are from $250 to $600, and buggies cost from $300 to $500. The success of the Pacific Railroad has given a large amount of money to the mechanics of our State; they of all others should be its friend, and they should remember the "*Dutch Flat* Wagon," down this way. The large wagons may go as high up as Donner Lake. Messrs R. & H. employ a large number of hands, and as much California wood as is good. We can cheerfully recommend to all who wish good work, a Buggy or Carriage of any kind, Wagon or Cart to call upon this firm and they will not be the losers, but largely the gainers.

We called at the Plowmaking Establishment of Mr. Crookite—recently the Ready Brothers, and formerly that of Mr. Marshall, all former patrons and readers of the Farmer. The plows from this Workshop have turned up many thousand acres. Mr. Cronkite, and his predecessors, have been very successful in making the large Gang Plow, now extensively used among grain growers. Mr. C. has also been making a large number of extra size Cultivators with eleven teeth, or prongs, like the bull-tongue plow, made to cut from six to twelve feet wide; excellent to use on summer-fallowed land. They cost $45, and he has made about 60 since last October. Mr. C. has also made a monster Plow, called the Sacramento Clipper, to work with six yoke of oxen, and cut 14x20 inches deep. These plows cost about $50 and are used to work heavy lands, especially in the mountains, among the brush and rooty land. Mr. C. has sold *twenty* of these to go to Washoe and Humboldt counties, Nevada, and they are used to make roads also. He has made about forty in all.

There are numerous plow and wagonshops on J street, all busy, of which we shall note hereafter. We are glad to see the mechanics busy—that is one of the good signs of the times.

From the workshops we dropped into the Capitol building, to see how industrious the State officials were—all at their posts, smiling, cheerful and "content as Swimley's boarders," as they say in the Levee city, for *California State officials* do not have to wait for their hire, as there is *over one million of dollars* in the State Treasury and all bonds and interest due (the Pacific Railroad bonds especially) paid in gold, in spite of all that "My lord the Cardinal," of Dutch Flat, may say to the contrary.

What other State in the Union more prosperous than our own? A million dollars in the vaults! If our Governor is *Low*—Lo! he has filled the State Treasury.

J street merchants are doing a good business—teams loading for the interior, to start when the roads will let them go; Dry Goods and Fancy Goods stores well sustained; Gardens putting on their beautiful robes of Spring, and Sacramento!—she is a "Garden of herself,"—has as many beauty spots as any city in the land. The residence of the Governor is one of the finest among the many very beautiful Homes.

There is so much to admire in Sacramento—the energy of those who have nobly struggled and nobly triumphed—they will yet gloriously triumph, and the New Capitol building slowly rising, yet will be a magnificent structure, whatever it may cost. Sacramento will be, ere long—with the *New Capitol*, the *Pacific Railroad triumphant*, her Churches, Colleges, Schools, fine streets, beautiful gardens, etc. Oh, yes! the glory of Sacramento will yet ring peans of praise from those who have long looked upon her misfortunes as hopeless, and they will join in the song of her redemption.

ARTICLES RECEIVED AT THE CALIFORNIA FARMER EXHIBITION ROOMS, No. 320 Clay Street.

We have received the Catalogue of the "Art Union of California." This is a very handsome specimen of a catalogue, and embraces a list of pictures on exhibition at the Rooms, all classified, together with the Constitution, By-Laws and list of officers of the institution. The Art Union deserves the most earnest consideration of our citizens, and it is to be hoped that all who take an interest in beautiful paintings will become members at once, and thus enable the Society to accomplish great good, even the first year. We are truly glad to make record of the fact that nearly two hundred members are already enrolled upon the register. It should also be kept in mind that every dollar paid on memberships is to be returned to subscribers annually, in the distribution of Paintings, so that members paying only $5 may secure a picture worth $500. Ladies can become members, and thus secure prizes of great value. The Hall of the Art Union is at 312 Montgomery street. Open every day and evening.

We have received catalogues of the Meadville, Pa., Theological School, for the academic year of 1864–65. This catalogue embraces a list of officers and students, together with a large Board of Trustees and Professors, all showing the school to be one of high order and merit.

We have received a copy of the San Francisco Medical Press, edited by Drs. Henry Gibbons and Beverly Cole. This number is full of matter interesting to those engaged in medical science. The Press contains many articles of great value, and it is to be hoped that it will continue to flourish long, very long. We shall take occasion soon to speak of the Press in detail.

We have received copies of the statement made to the Senate Committee of the Nevada Legislature, touching the Central Pacific Railroad; also, Hon. D. H. Haskell's speech upon the resolutions to aid the enterprise. These subjects will receive due attention.

New Music Again.—We have by last steamer a collection of fine Music, sent us complimentary from the Music Rooms of Horace Waters, the great music dealer on Broadway, New York. Among the choicest we find "*Pleasant Memories*," a Polka; "*Our dear New England Boys*," a song of allusion to the battle-field, and a fine one; "*There's Rest for all in Heaven*," another admirable song. These three songs are all by Mrs. Parkhurst. "*Thou art Dreaming*," a Serenade by Crilly; "*Dost thou ever Think of Me, Love?*" one of Russell's very best. Mr. Waters' is the very headquarters in all New York of all new music and instruments. His music is found generally at Kohler's, the headquarters of the Pacific coast.

We have received a case of very superior Preserved Fruits (fresh) from Mr. Wilcox, of Fruit Vale. We have had fruits of many celebrated fruit dealers abroad, but we are satisfied none can beat our own California fruits. Mr. Wilcox's fruits are very superior.

Report of the Agricultural Board of the State Agricultural Society.

We have given a large space in the Farmer of this week, to the exclusion of much other matter which we had promised, and we have done so, that we might lay before the whole State and the Agricultural Societies abroad, as our journal reaches them all, this most excellent Report.

We are glad to do so, for it is the first full and detailed Report that has gone out for nearly ten years that has carried with it the truly cheering fact of a united, earnest and pleasant Annual Meeting, and such facts we are right glad to herald; and although the present Board of Directors are not mainly agricultural men, or engaged in this pursuit, we are glad to know, they are earnest to have the State Society built up and become free of debt and embarrassment, and go on and do a good work for the State.

We can say that the President and working Board are determined to do all in their power to win the good will of the agriculturists of the State and induce them to coöperate with them.

The present Report, as will be seen when read, and it should be read by all our farmers, has taken up all the most important matters, and presents points of interest worthy of note. We are glad to notice this, although it will readily be seen by all who have been constant readers of the California Farmer for the past ten years, that the subjects are those which we urged most earnestly in years gone by. Now they come up again, and in a place and at a time when they can be brought into active practice and complete success.

If the agriculturists of the State will but call on the very able Secretary of the Society, I. N. Hoag, Esq., at the rooms, they will learn and receive much that will advantage them.

We are glad, indeed, for the sake of Sacramento, to give so cheerful and excellent a report from the State Agricultural Society. We earnestly wish it a triumph for the sake of the cause we serve.

Splendid Statues.—We would call public attention to the perfect and splendid Bronze Statues of Columbus, Beethoven and Mozart, which were brought from Europe by A. Kohler, Esq., and are now to be seen at his store, on Washington street. These Statues are of the very best order, and would grace any Gallery of Art. Why not *place such* splendid Statues in the Pioneer Hall, Mercantile Library or Odd Fellows' Hall? Why will not some of our *rich* men buy and donate?

PREMIUMS FOR THE FARMER.

Desirous to offer inducements to all who will form Clubs for this journal, we offer the following:

For every Club of Five, and $25, we give Atlantic Monthly and Godey's Lady's Book for one year.

For every Club of Ten, and $50, we give Atlantic Monthly, Godey, Harper's Monthly, and Arthur's Magazine.

For Clubs of Twenty, and $100, we give Atlantic Monthly, Harper's Magazine, Godey, Arthur, Gazley's New Pacific Monthly, the Eclectic Magazine, or any of the Quarterlies, and an extra copy of the Farmer.

This will furnish any family with a library for a little brief labor to extend our circulation.

The Sacramento Seminary.

When at the Levee City, we paid a visit to this most excellent institution, and was highly gratified. Mr. and Mrs. Perry have indeed an institution worth fostering, worthy the generous aid and co-operation of parents in that city.

We can attest to the true maternal care of the pupils, for over the whole college building there is an "air of Home," and the happy cheerfulness of the pupils show this.

Their cheerful, happy, healthful look,
We read as plainly as a book.
Young plants thus nurtured with a guardian love,
Must thrive and grow bright plants, a living grove.

The recitations, we were pleased to note, were proofs of not only good scholarship, but faithful teaching. We can in truth rejoice with the people in such Schools and Seminaries.

With Mr. and Mrs. Perry, the principals, are associated four excellent assistants, for Languages, and Vocal and Instrumental Music. We gathered the following as the plan of this Seminary, and we give it with the hope of making it wider and better known, as it is our wish to do all we can for such fountains of knowledge and happiness.

The design, as announced in the first prospectus of the Seminary two years ago, was to build up in that city a seminary for young ladies, which should afford facilities for the acquirement of a thorough and complete education. From motives of prudence, the Seminary was first opened as a day school. The interest manifested in the enterprise by many of the best and most intelligent residents of that city, and the increasing prosperity of the school during each successive term, gave the assurance that a Seminary for Young Ladies was demanded, and would be well sustained in that city, so central a part of California. The principals, therefore, felt warranted in taking another step in the prosecution of their original design, and have purchased a good substantial brick edifice in the most desirable locality of the city, and are now prepared to accommodate boarding pupils, and will continue to make such additions to the buildings, grounds and school apparatus as shall be required to render it a pleasant and profitable home for young ladies who wish to complete a thorough course of study.

A Good Sign for Sutterville.

The Cause of Education is in good hands, at Sutterville, judging from the following vote and generous action of the citizens of that place. We clip the following from the California Teacher, for February—an excellent number—just laid on our table, and we hope every Californian Teacher in the State will have it, it costs but *one dollar a year*:

Sutterville.—We have received the following interesting letter from Mr. A. H. McDonald, the teacher of the Sutterville school:

Sutterville, Sacramento County.

Editors California Teacher:—Knowing that you and your readers are interested in the progress of education, I wish to inform you of our triumph to-day. Several years ago, there was a fine large school-house built here, and provided with cheap and old-fashioned seats; also, destitute of maps, charts, or in fact anything attractive except the location. Three weeks ago, after consultation and much hesitancy, our trustees posted notices, calling an election, to vote on the proposition of levying a tax of five hundred dollars to finish and furnish the school-house, and make other necessary improvements. Adoptieg the maxim of our excellent and energetic County Superintendent, "that it is just as necessary to use strategy in educating children as killing men," the proposition was not agitated much, save among those friendly to it. The result was just *one* dissenting vote; so that in a short time we shall have a comfortable house, furnished with all the modern improvements. During the election an incident occurred which shows the value placed on children in this district. A widow having several children was notified to leave the house she occupied. She spoke of moving to another district; but our trustees, alive to the loss of so many children to the district, started a subscription list and in two hours had a house bought and paid for, which she can occupy free while she remains in the district. When she leaves the house is to be sold for the benefit of the school.

At our last Institute, several teachers proposed to inform each other, through the California Teacher, how they succeeded with, and how they thought the adopted course of study in the unclassified schools would operate. So far as I have tried it, I think it will work well. yet I think it will take time to introduce it all, and I think it might be somewhat amended.

The following notice to County Superintendents we give for public benefit:

School Law.—County Superintendents who desire additional copies of the School Law, can be supplied by sending their orders to the State Superintendent. A limited number of State Registrars will also be furnished on application.

Home Comforts.—Messrs. Bowen Brothers get as many blessings as any traders that we can call to mind among those who sell the *needed home comforts*. It is a well known fact, however, that this firm do make it their pride to procure for their customers only the *very best articles*; they are now celebrated for this everywhere, and those of our farmers and other families who purchase their family stores in our city, we most earnestly recommend them to make the acquaintance of this excellent trading house.

—The Supreme Court stands adjourned until the 6th of February.

(For the California Farmer.)

A Home of Taste—No. 2.

Dear reader, will you take a walk with me and visit such a place, perhaps you have some doubt as to there being such a spot in this busy, money-making and money-loving city. We will leave Montgomery street and go back on the more elevated grounds where we can obtain a view of the bay and adjacent country; presently we stop before a small house where all appears in striking contrast with its larger and more showy neighbors who have received all the embellishments of the Builder and Painter; to make them appear handsome. What is it that stops us at this small but attractive place? there is such coyness about it, that we are tempted to go in and ask permission to view the garden; small as it is, we do so, and are met by one who not only grants us the desirable favor but proceeds to point out what might have escaped our notice. We are astonished at such plants as we see before us, and ask if they are not some new and rare variety, until assured by our fair guide that they are the common ordinary varieties found all over the city, but that the specimens before us have received some attention as to soil and training. Dear reader, we are afraid you will doubt our veracity when we describe the plants to you. Roses, some in small tree form, loaded down with their burden of sweets, some in pyramid, equally full, each a specimen, fit to place on the Exhibition tables of any European Horticultural Society—not a branch out of place, not a flower crowded for room, each in its proper location—they were not tied up and supported like a lot of sickly patients in a hospital, but had vigor enough to brave even the blasts that might blow on them; they were not starved, as most of the plants that are put out. Fuchsias, such flowers and quantities would not be believed—Pansies, Daisies, Mignonette, Stocks, Verbenas, Heliotropes, Geraniums, each in its proper position to produce the best effect by contrast, each plant in the best of health and vigor and its flowers longer and finer and more abundant, so that it really seemed as if they were some new and more prolific kind. We cannot now take the space to give you the arrangement of these. Do look at that beautiful collection of Native Ferns, Mosses and Grasses, growing so luxuriantly in that cool shady corner on these stones; and that rustic stand filled with drooping plants around the edge and that lovely Fuchsia in the centre with its coral bells. What are those vines climbing over the porch and around the windows? But before we have received a reply to all of these inquiries we are politely invited to enter the house and see its arrangements. As we enter the porch we find its sides are encased with glass and closed by a sash door, the roof is covered with glass and instead of (as is usual) a cold dreary place waiting for admittance, we find a cosy place filled with choice plants, vines, birds, hanging baskets and brackets with vases—a miniature conservatory. As we enter the hall, lighted from the porch, what do we see? A magnificent Camelia in full bloom, every flower as pure and *white* as "white can be," each leaf shining as if varnished showing that it is in perfect health. Drooping plants from vases, cacti of strange form detain See the ivy growing around the door-frames and over the pictures. We pass to the parlor, what do we see as we enter? At the window-curtains not of damask or lace, but Nature's own beautiful vines and leaves, forming such a screen as the most cunning workman will never be able to form or the greatest artists ever paint; under these, in the window is an aquarium with its clear, transparent water, with bright green aquatics giving off their oxygen and creating the water so that it requires no change for months. What a contrast to the cramped up lives of the poor fish in a globe here they have all the elements necessary for their health and comfort, and sport among the rocks and plants as if in their Native haunts. Over this hangs a large shell filled with Native Ferns and Mosses, when watered, the dripping are caught in the aquarium below. On the mantel are curious cacti in various shapes, with specimens of rare woods and fossils. Around the walls are pictures which have been the work of some dear friend; some are the dried leaves and flowers either of Home or some noted locality, the collections of some pleasant tour, bringing back to memory all the reality of the time and place; or the contributions of some friend in a far-off part of the globe; a bouquet of violets or grasses dried and preserved at some particular time and event; in fact everything about the whole establishment has a history and an association connected with it. We could go on and fill this paper with a description of the various articles of interest in the "Home of Taste." There are Wardian Cases, with their beautiful forms of verdure, all growing in the greatest perfection and loveliness. Stands and cabinets of shells, animals, curious seeds, dried plants, fossils, etc; in fact it is a museum of Natural History wherein *everything* has a history from the floor to the ceiling, and from the cellar to the garret, each room has its special use and contains its appropriate articles suited for the occupant. The "Home of Taste" is not made by the Upholsterer and the Furniture-man, but it is the work of love, of those who have Taste and use that Taste through life, and make sacred all that becomes a part of their household. Every article of use has its peculiar history, and is prized accordingly. Who has not seen the old antique Furniture, China, etc., of our forefathers and in this age of contempt for the past, with its ballowed associations, wondered *why* our old grandmothers and aunts, set such store on what had been handed down to them from an earlier stage? In this fast age how little of this feeling is retained—and even among those who have some remaining it is driven out for fear they will be called "Old Fogies."

Now, dear reader, I have only given you a hint, besides, of what this "Home of Taste" is, and what any one can have by a little thought and care. Much that is spent for many unnecessary things would go far towards creating such a spot as I have described—and who would not be proud to be the possessor of it?

M. B. C.

Deferred Letter from the Battle-field.

CAMP OF 57TH REG. N. Y. VOLS. IN THE FIELD,
Front of PETERSBURG, July 28, 1864.

EDITOR CALIFORNIA FARMER:

Amidst the uninterrupted roar of musketry, the deep booming of cannon, the whistling of bullets, the whizzing of solid shot, and the screaming of the bursting shells, I write you. After an absence on the sick list, of nearly two months, I returned here just one week ago this day, and since then there has been powder enough burned on our lines for a vigorous young war of comely proportions, in any other country outside the universal Yankee Nation.

You, as others have done, may ask why General Grant does not take Petersburg? What can he be doing with all his men and all the mighty resources at his command? Why the long delay? Because he is not ready. He wishes to make sure work of the matter when he does begin. Perhaps no one not in the army has any adequate idea of the vast and almost insurmountable difficulty to be met and overcome in besieging a strongly fortified city. In our approach to the place we were confronted with a strong line of earthworks, extending a distance of about twelve miles, on which were mounted at intervals twenty-three batteries, so placed as to sweep the whole line with a front or enfilading fire. They were carried at the point of the bayonet, and yet others and still others beyond those are yet before us. They are more formidable than any yet overcome. The highest engineering skill, and the most herculean labor must be performed before the Army of the Potomac goes into the city of Petersburg, not two miles distant from where I am now writing. Its spires and many of its private and public buildings can be very distinctly seen from my tent.

Officers and men are working in the most heroic manner to carry out the great programme of the General. In ancient or modern times there has been nothing like it. It is said that the city is defended by one thousand guns, but I doubt it. There are probably over five hundred now in position, bearing on our forces. But the time is hastening when the order to move will be issued, when the tens of thousands of men, now scattered along these lines apparently doing nothing, will spring to their places, and form an unbroken, unwavering line, that will sweep away everything and everybody that opposes its onward and triumphant progress to victory and glory.

Gen. Grant has the whole matter in his own hands. He, and he alone, is responsible for the success of his own plans, and surely when so much depends upon every move, as bearing upon the final result, the people should be patient and hopeful. Our cause is in good hands, and our friends may rest assured that when the men and material are all in the right place to be efficient co-workers with him in the great national problem, his hand will touch the electric wires, and the vast *human* machinery will be in position, and will move on with a wide and irresistible sweep that, like the mighty avalanche, crushes, buries forever, or drives everything before it, as it thunders along from the mountain to the plain.

General Grant will be successful. Petersburg and Richmond will fall. Lee will fight and be conquered, surrender to Grant, or run. Grant is not idle, the soldiers are not idle. He took Vicksburg when he was ready. He will do the same here at the right time.

BERMUDA HUNDRED, Va., August 10th.

Two days after the above was written, General Grant ordered the advance to be made. The result of that, to us, disastrous move has already been spread before the public. The long and short of the whole matter is, some one or more of the subordinates failed to comprehend General Grant's orders, or to carry them out fully. Hence the defeat, for the time being. But there is not a man in the whole Army of the Potomac that for a moment doubts the final result, or that it will soon be reached.

Immediately after the fort was blown up there commenced one of the most terrific artillery fires I ever heard. Imagine every fire cracker used in your city on the Fourth of July to be a twelve, thirty, or eighty pound gun, or a large proportion of each, and that a few thousand packages were set off at once, and should continue from 5 o'clock, A. M. until 3, P. M., with short intermissions, with the incessant rattle of musketry, the whistling of bullets, the whizzing of solid shot, the screaming of shells, bursting and plowing up the earth in every direction, or crashing through huge oaks and pines, hurling their shattered fragments far and wide—with the wild thrilling shouts of the charging column as it advanced. Running, fighting, cheering, dying—with the smoke and dust covering the whole field for miles—the long lines of ambulances bearing off the wounded; officers, aids and orderlies rushing from and to every point upon their fiery steeds; the scores of stretchers, each carried by two or four men, with the bleeding and mangled forms of their companions in toils and perils; regiments, brigades, divisions, and corps wheeling into line at double-quick, or moving in mass to some point where they are to deploy into line and take their positions; and farther imagine that the line of battle extended three or four miles, and you may have some idea of the fierce conflict before Petersburg, on the 30th of July, 1864. I was upon the field continuously, except a few brief intervals in the rear helping the wounded. God grant that I may never behold another such a day and scene, unless it is to be crowned with the most complete success.

As stated before, this defeat was owing to some misapprehension of the orders given, or to a failure in some part of the command to carry out the directions of the General as he had a right to expect, after he had placed ample resources in the hands of all who were to take part in the great work. The soldiers here all know this, and feel it, and we hope the whole country will at least be as hopeful as the brave soldiers here on the ground, who have thus far done the fighting, who have not a single doubt as to their ability to do the work, if properly led, whenever the commanding General shall give the word. Let all loyal citizens be hopeful and confident. We must expect some reverses, but instead of supineness and despondency, they should urge us to still more active exertions, and a more unalterable determination to fight on, to fight ever, until the rebellion is crushed, and the Union restored. We have the men, the means, the talent and energy to do this, and it will, must and shall be done, and no earthly power can prevent it.

These disasters are schooling the great national heart to a higher standard of moral courage and power, and will bind the masses of the people more firmly together, and not only speedily end the war, but make us the greatest power on the earth, attracting to our wide domain the wise, the true and good from every land, by the simplicity of the vast machinery of its Government and the magnificent grandeur of its irresistible power.

J. BURRS.

Advertising Directory.

We ask especial attention to the Advertising Directory in our columns this week. We believe we have one of the best lists of Business Houses ever placed in a public journal, and we can always call attention to such, and can confidently recommend them to our readers. We advertise none but the very best and most reliable Houses, and therefore confidence can be placed in them and the goods they offer, or the business they transact.

AMBROTYPES—A. P. Johnson, 649 Clay street.
AXLE GREASE—Hucks & Lambert, Minna street, between Second and Third.
AQUARIUM, ETC—Miller & McKoon, 206 Bush street.

The New Terms of Our Colleges.

As it will be our aim always to serve the cause of Education, we shall devote a space in our columns to the time of the new Terms of the various Colleges, Academies, and Seminaries of learning, and if the Principals of each will send us information of the same, the time of each will be placed in this column; and if they will send us their catalogues we shall be happy to distribute the same from our Reading-room, to which we invite all who are interested in the Cause of Progress in California.

We hope we shall have the earnest co-operation of all Principals and Teachers, and to receive communications for publication that will advance the cause of Education. Our Journal having a wide circulation, we can thus give extended notice to our Colleges and Schools, and materially help the cause, we therefore hope a new interest in the work. We cannot keep the public advised of changes unless we are notified.

PACIFIC NATIONAL BUSINESS COLLEGE—
At San Francisco, for Males,
M. K. Laudenslager, Principal.

FRENCH COLLEGE—
At San Francisco, for Males,
Prof. J. Mibielle, Principal.

A CARD TO OUR PATRONS.

'TIS said *competition* is the life of trade. Fair, honorable competition, we never fear; but when our *name*, or the *same name*, is used to deceive others or injure our business, it becomes our duty to notify our patrons and friends that such is the case.

We were recently called upon by a person in this city, to supply a large order for more than One Thousand pounds of Seed of various kind, and also for several thousand Seed Bags—these were said to be for a store or stores in the country.

It soon came to our knowledge that these Seeds were to establish a Seed Store on Washington Street, in this city, under the same *Sir-name* as ourselves. The secret and unfair manner in which these Seeds and Bags were attempted to be procured of us, was so singular and so unfair, that we had just suspicion of wrong intent. We soon learned that *falsehood* was told us, and we refused to supply the order, knowing that no other establishment on the coast had laid in the stock of Seeds as ourselves, and having every reason to presume that our name will be used in the sale of Seeds elsewhere, we feel it a duty to remind our Customers and Purchasers of Seeds everywhere, that they should all be careful in sending their orders, and to be particular in their directions.

We have been established nearly ten years in the Seed Business, and we trust that by the extent and system with which our business has been conducted, we have justly earned the reputation of a regular Seedsman.

We import our Seeds direct from the best houses in Europe and the Eastern Growers, we have the most extensive stock in California by a large extent, and purchasers need only call at our establishment to satisfy themselves that our business is so conducted as to meet their approbation and business.

We return our thanks to our many Customers for their liberal support for these many years past, and trust a continuance for many years to come.

We would remind all our Friends and Customers the necessity of being particular and to address all letters and orders to

Small Homestead Wanted.

A SMALL, NEAT AND PRETTY HOMESTEAD is wanted, within ten miles of this city. The amount of land must not exceed ten acres, and it must be good land and now in cultivation. The advertiser has a good Farm in Humboldt County which he would like to exchange if possible, or make the next best terms possible. Any person having such a place can hear of a purchaser by leaving a note addressed "J. L. B.," Farmer Office. 14

Home Miscellany.

Idle Hands.

BY T. S. ARTHUR.

Mr. Thornton came home at his usual midday hour, and as he went by the parlor door, he saw his daughter, a young lady of nineteen, lounging on the sofa with a book in her hands. The whirr of his wife's sewing machine struck on his ears at the same moment. Without pausing at the parlor, he kept on to the room from which came the sound of industry.

Mrs. Thornton did not observe the entrance of her husband. She was bending close down over her work, and the noise of her machine was louder than his footsteps on the floor. Mr. Thornton stood looking at her for some moments without speaking.

"Oh, dear!" exclaimed the tired woman, letting her foot rest on the treadle, and straightening herself up, "this pain in my side is almost beyond endurance."

"Then why do you sit, killing yourself there?" said Mr. Thornton.

Mr. Thornton's aspect was unusually sober.

"What's the matter? Why do you look so serious?" asked his wife.

"Because I feel serious," he answered.

"Has anything gone wrong?" Mrs. Thornton's countenance looked slightly troubled. Things had gone wrong in her husband's business more than once, and she had learned to dread the occurrence of disaster.

"Things are wrong all the time," was replied, with some impatience of manner.

"In your business?" Mrs. Thornton spoke a little faintly.

"No, nothing specially out of the way there; but it's all wrong at home."

"I don't understand you, Harvey. What is wrong at home, pray?"

"Wrong for you to sit in pain and exhaustion, over that sewing machine, whilst an idle daughter lounges over a novel in the parlor. That's what I wished to say."

"It isn't Effie's fault. She often asks to help me. But I can't see the child put down to household drudgery. Her time will come soon enough. Let her have a little ease and comfort while she may."

"If we said that of our sons," replied Mr. Thornton, "and acted on the word, what efficient men they would make for the world's work! How admirably furnished they would be for life's trials and duties!"

"You are wrong in this thing, all wrong," continued the husband. "And as to ease and comfort, as you say, if Effie is a right-minded girl, she will have more true enjoyment in the consciousness that she is lightening her mother's burdens, than it is possible to obtain from the finest novel ever written. Excitement of the imagination is no substitute for that deep peace of mind that ever accompanies and succeeds the right discharge of daily duties. It is a poor compliment to Effie's moral sense to suppose that she can be content to sit with idle hands, or to employ them in light frivolties, while her mother is worn down with toil beyond her strength. Hester, it must not be!"

"And it shall not be!" said a quick, firm voice.

Mr. Thornton and his wife started, and turned to the speaker, who had entered the room unobserved, and been a listener to nearly all the conversation we have recorded.

"It shall not be, father!" And Effie came and stood by Mr. Thornton. Her face was crimson; her eyes flooded with tears, through which light was flashing; her form drawn up erectly; her manner resolute. "It isn't all my fault," she said, and she laid her hand on her father's arm. "I've asked mother a great many times to let me help her, but she always puts me off, and says it's easier to do a thing herself than to show another. Maybe I am a little dull. But everyone has to learn, you know. Mother did not get her hand in fairly with that sewing machine for two or three weeks, and I'm certain it wouldn't take me any longer. If she'd only teach me how to use it, I could help her a great deal. And indeed, father, I'm willing!"

"Spoken in the right spirit, my daughter," said Mr. Thornton, approvingly. "Girls should be usefully employed as well as boys, and in many things most likely to be required of them when they become women in the responsible position of wives and mothers. Depend upon it, Effie, an idle girlhood is not the way to a cheerful womanhood. Learn and do, now, the very things that will be required of you in after years, and then you will have a required facility. Habit and skill make easy what might come hard, and be felt as very burdensome."

"And would you have her abandon all self-improvement?" said Mrs. Thornton. "Give up music, reading, society——"

"There are," repled Mr. Thornton, as his wife paused for another word, "some fifteen or sixteen hours of each day, in which mind or hand should be rightly employed. Now let us see how Effie is spending these long and ever recurring periods of time. Come, my daughter, sit down. We have this subject fairly before us. It is one of a life-long importance to you, and should be well considered. How is it in regard to the employment of your time? Take yesterday, for instance. The records of a day will help us to get towards the result after which we are now searching."

Effie sat down, and Mr. Thornton drew a chair in front of his wife and daughter.

"Take yesterday, for instance," said the father. "How was it spent? You rose at seven, I think?"

"Yes, sir; I came down just as the breakfast bell was rung," said Effie.

"And your mother was up at half past five, I know, and feeling so weak that she could hardly dress herself. But for all this, she was at work until breakfast time. Now, if you had risen at six, and shared your mother's work until seven, you would have taken an hour from her day's burdens, and certainly lost nothing from your music, self-improvement or social intercourse. How was it after breakfast? How was the morning spent?"

"I practiced on the piano an hour after breakfast."

"So far, so good. What then?"

"I read 'The Cavalier' until eleven o'clock."

Mr. Thornton shook his head, and asked, "After eleven, how was the time spent?"

"I dressed myself and went out."

"At what time did you go out?"

"A little after twelve o'clock."

"An hour was spent in dressing?"

"Yes, sir."

"Where did you go?"

"I called for Helen Boyd, and we took a walk down Broadway."

"And came home just in time for dinner? I think I met you at the door."

"Yes, sir."

"How was it after dinner?"

"I slept from three until five, and then took a bath, and dressed myself. From six until tea time, I sat at the parlor window."

"And after tea?"

"Read 'Cavalier' until I went to bed."

"At what hour?"

"Eleven o'clock."

"Now we can make up the account," said Mr. Thornton. "You rose at seven and retired at eleven. Sixteen hours. And from your account of the day, but a single hour was spent in anything useful—that was the hour at your piano. Now, your mother was up at half-past five, and went to bed, from sheer inability to sit at her work any longer, at half-past nine. Sixteen hours for her, also. How much reading did you do in that time?"

And Mr. Thornton looked at his wife.

"Reading! Don't talk to me of reading! I've no time to read!"

Mrs. Thornton answered a little impatiently. The contrast of her daughter's idle hours with her own life of exhausting toil, did not affect her very pleasantly.

"And yet," said Mr. Thornton, "you were always very fond of reading, and I can remember when no day went by without an hour or two passed with your books. Did you lie down after dinner?"

"Of course not."

"Nor take a pleasant walk on Broadway? Nor sit at the parlor window with Effie? How about that?"

There was no reply.

"Now, the case is a very plain one," continued Mr. Thornton. "In fact, nothing could be plainer. You spend from fourteen to sixteen hours every day in hard work, while Effie, taking yesterday as a sample, spends about the same time in what is little better than idleness. Suppose a new adjustment were to take place, and Effie were to be employed in helping you eight hours every day, she would still have eight hours left for self-improvement and recreation, and you, relieved from your present over-tasked condition, might get back a portion of the health and spirits of which these too heavy household duties have robbed you."

"Father," said Effie, speaking through tears that were falling over her face, "I never saw things in this light. Why haven't you talked to before? I've often felt as though I'd like to help mother. But she never gives me anything to do; and if I offer to help her, she says, 'You can't do it,' or, 'I had rather do it myself.' Indeed, it isn't all my fault!"

"It may not have been in the past," replied Mr. Thornton. "But it certainly will be in the future, unless there is a new arrangement of things. It is a false social sentiment that lets daughters become idlers, while mothers, fathers and sons take up the daily burden of work, and bear it through all the busy hours."

Mrs. Thornton did not come gracefully into the new order of things proposed by her husband and accepted by Effie. False pride in her daughter, that future lady ideal, and an inclination to do all herself, rather than take the trouble to teach another, were all so many impediments. But Effie and her father were both in earnest, and it was not long before the mother's face began to lose its look of weariness, and her languid frame to come up to an erect bearing. She could find time for the old pleasure in books, now and then, for a healthy walk in the street, and a call on some valued friend.

And was Effie the worse for this change? Did the burden she was sharing with her mother depress her shoulders, and take the lightness from her step? Not so. The languor engendered by idleness, which had began to show itself, disappeared in a few weeks; the color came warmer into her cheeks; her eyes gained in brightness. She was growing, in fact, more beautiful, for a mind more cheerfully conscious of duty was molding every lineament of her countenance into a new expression.

Did self-improvement stop? O, no! From one to two hours were given to close practice every day. Her mind becoming vigorous in tone, instead of enervated by idleness, chose a better order of reading than had been indulged in before, and she was growing toward a thoughtful, cultivated, intelligent womanhood. She also found time, amid her home duties, for an hour twice a week with a German teacher, and she began, also, to cultivate a natural taste for drawing. Now that she was employing her time usefully, it seemed wonderful how much time she found at her disposal for useful work.

How cheerful and companionable she grew! She did not seem like the Effie Thornton of a few months before. In fact, the sphere of the whole household was changed. As an idler, Effie had been an burden on all the rest, and the weight of that burden had been sufficient to depress, through weariness, the spirits of all. But now that she was standing up, self-sustained, but a sharer in the burden of each, all hearts came back to a lighter measure, beating rythmically and in conscious enjoyment.

[For the California Farmer.]

The Future.

When we look forward into the future, how little do we see, that assures us of length of life, or brighter prospects. But all uncertain do we take the step, as it were, in the dark. We make our plans as we will, we may promise ourselves that the morrow may bring some pleasing associations, but we only awaken to find our joys turned to sorrow and disappointment. But, hope, high hope, buoys us up to renew our journey, and thus we are led on, step by step, through changes and trials, until the final change comes, which unveils the great mystery of death, to our eyes. Could we foresee the path we must tread, who could for a moment have the courage to travel on? No heart would be brave enough to encounter the trials which beset them. But with our ignorance of the future, and Hope lending her Syren voice to win us onward, we trust her in child-like simplicity, and go on rejoicing, oftentimes at the verge of destruction. How wisely has it been ordained by the Father, that we should be unconscious of our future life, as it would destroy all interest of life in our earthly existence; we should remain in apathetic indifference to existence and usefulness. But the uncertainty brings Hope, and Hope gives Life, which animates us to press onward, surmounting obstacles, overcoming pain and anguish, with the consolation that the future will be brighter, and our life will yet be clothed in flowers. Thus we journey on, hoping for the best, trusting in God, who has wisely hidden these things from us.

M. J. U.

[For the California Farmer.]

Life.

Life is an inner essence of an opening flower, whose beauteous whole is developed by the outward aroma of all Nature's sympathies. It is a part of all existence, from the smallest speck to the final Godhead; a principle which is never lost, but always was, and will have no end. The God-given power to carry on the boundless changes, to perfect the whole. Life is the subtle element of all Creation, it is the Spirit of all matter.

M. J. U.

[For the California Farmer.]

What is Truth!

An honest love for the natural blending of Holy Aspirations with Nature's teachings. To speak and act with an honest conscious feeling that leaves an impress of beauty on all that we say or do. Truth is Divine, it is Eternal; it is the substance of all we see or know; it is life; it is order; it will stand when all else is changed; it is Light, Holiness, Love; it reaches from center to circumference; it is without end, and who can fathom it! Its hight, who can soar to; its depth, who can descend—length and breadth are unattainable; yet it lies within us, its bursting beauties are within our control, can we mar or deface it? or will it stand Eternal, a silent record, throughout the changing ages of Time, like the sun, though mild for a season, will roll out in beauty, to gladden the more for its obscurity.

M. J. U.

HOTELS.

REVERE HOUSE.

Second Street, Opposite the Court House,
Napa City,
GOODRICH & DEMMITT, Proprietors.

BENT & CO'S WATER, MILK, BUTTER, WINE, AND GRAHAM CRACKERS

TEAS of every Variety, of the FINEST QUALITY, Imported expressly for our Family Trade. HERKIMER COUNTY CHEESE, superior to any Cheese in the country.

SELECT WINES AND LIQUORS, the very purest, taken from Bond, as we deal in none but the best; those that desire choice Table Wines, etc, or for Medicinal purposes, can rely upon what we offer them.

Messrs. Bowen Brothers commenced their business at an early day in Stockton, which they conducted successfully to themselves up to about the year 1860. Flattered with the success that had attended their efforts there and ambitious for a more extended field of operations, they accordingly, about the period above mentioned, established themselves in the City of San Francisco. Since then each returning year has continued to mark an expansion of their trade, until now their annual sales, in the aggregate, are exceeded by no other House in the State.

They have superior facilities for procuring their goods from the East, which gives them great advantages besides, they pride themselves in keeping articles of goods found in no similar establishment in the city.

These with every other article needed in the Culinary department of the Household, and the usual Family necessaries, furnished by the Grocer. It will be our aim and our pride to give satisfaction to all who may favor us with their patronage. In order to make the business of our Patrons light and pleasant, all orders left with us will be filled with care and dispatch, and Goods sent to any part of the city promptly, without cost of cartage.

Our friends from the Country that favor us with Orders, will have their goods sent to the wharves without expense of cartage. Every Order sent us will be attended to with the same care as if purchases were present.

PATENT RIGHTS FOR SALE.

THE FOLLOWING PATENT RIGHTS OF NEW AND valuable inventions (of which we have models to show their value) are now offered for the States of California and Oregon, and Utah and Washington Territories.

NO. 1. THE MECHANIC'S SPIRIT LEVEL.

Patented September 13, 1859.

This Implement will be of great value to Contractors and Builders, being one of the most valuable inventions yet out. Builders will do well to examine the model.

NO. 2. IMPROVED CLOTHES REEL AND BAR.

Patented January, 3, 1860.

This valuable domestic piece of furniture can be used in the Laundry, the Kitchen, the Nursery, or Chamber, and can be made plain or ornamental; standing in the same relation as a piece of important furniture as does Wheeler & Wilson's Sewing Machines, neat when used and ornamental when not in use.

NO. 3. A CORN CULTIVATOR.

With this implement the soil is first thoroughly plowed and deeply pulverized, and on the return it smoothly and perfectly hills up and harrows the ground between the rows. A very new and valuable implement.

NO. 4. A MUSKETO BAR.

This will be much wanted in California. It is simple in its contrivance, perfect in its working, and can be affixed very cheap to all styles of bedsteads. Hotels, public houses and private families will find it a useful invention.

NO. 5. HYDE'S PATENT POST-DRIVER.

A most excellent labor and money-saving machine, for which we offer rights.

NO. 6. SEED-SOWER.

This is a new inventions, and one of great importance to all who sow grain, or any garden seeds. The working model can be seen at the Farmer's Reading-room.

Holding the rights to all these new inventions, we invite the public to call and see the models. All persons who may be desirous to purchase either County, City, Town, or Individual Rights, can do so on application to

ELECTRICITY

THE

GREAT REMEDIAL AGENT.

Electricity as a Remedial Agent has, until recently, been but little known. An Electric Battery has been a terror from childhood up because a little flattery gave a "start," and the thunder storm killed by lightning. Now it is better understood, and is and will be the sovereign remedy for many diseases heretofore considered incurable. The following series of articles and statistics, with facts and proof of the virtue of Electricity are worthy of attention. When it was promulgated that disease could be entirely eradicated from the system without the use of poisonous drugs, the unthinking, or those who do not look deeply into cause and effect, scouted the assertion as chimerical, and adduced strong evidence of its utter impossibility. Long articles, replete with arguments, seemingly unanswerable, of the position that only through the digestive system could the blood be purged of the accumulations of the poisons which constitute disease. A great cry went up from the interested in the continued supremacy of the old system of one poison to cure another, that Electricity, as a Curative Agent, had been tried and had proved to be of but little if any value—thinking, poor souls, the world of science stood at the same point it occupied one hundred years ago. They were wrong, while those old fogies were content if they cured one in every five patients there were those who were diving into the science of Electricity, and finally it was discovered that the trouble was in the instruments used. From that time to the present, improvements have rapidly advanced, until every disease in the catalogue of human ills has been either cured altogether, or checked so as to enable the sufferer to seek those changes of climate which ultimately perform a perfect cure. Diseases hitherto considered incurable, have been cured, and those diseases which took months, and even years, to cure by medical process, are now cured in a few weeks; and all by the *Improved Instruments* of Dr. J. H. Josselyn, Resident Physician at the Electropathic Institute, 645 Washington street, San Francisco. It is astonishing to see the number of patients and diversity of diseases that have been relieved by the Electropathic System. From early morn till late at night, his instrument is engaged, imparting health and strength to all who have the good fortune to obtain his services.

The charges, too, are not as heavy as by the old system, besides there is no medicine to pay for, let alone the unpleasantness of swallowing the nauseous stuff. During the time the Institute has been in operation, there has been more benefit to the human family derived from the system than from all other systems combined during the same period. Among the most troublesome diseases to which Californians have been exposed is Rheumatism; none has given the honorable practitioner more trouble to relieve, and no one has pretended to cure (if we except known empirics) permanently. But this subtle disease gives way before the Electropathic System in a very short time, enabling the sufferer to go about his business without pain or the fear and dread of a relapse. And so with most other diseases, considered incurable. We mention Rheumatism because of its abundance, but we could enumerate many other diseases full as troublesome, and some far more fatal in their results.

We allude to that kind of disease paraded by quacks in the journals of the day, a trouble which was never cured by medicine, only a little strength imparted by the use of tonics. The poor victim is kept taking medicines and paying for them until his last dollar is gone and then, as soon as he undertakes to work to obtain more funds, the trouble comes back in all its loathsomeness. To this disease Electropathy is peculiarly applicable, its action being upon the spermatic nerve, strengthens the secretory organs, and at the same time, creating an equilibrium in the system, thereby preventing an elapse.

We dwell upon this disease because it is the bane of the youth of California; and one about which there has been more deception used than all others put together. It is not necessary to enumerate all the diseases in the catalogue, for that would be occupying space to no purpose. Every disease has been under treatment by this system, and there are none but have received benefit either in this State or at the East.

There are at present very few Instruments in the world that can be depended upon. A good Instrument costs very heavy, and cannot be purchased unless ordered, and there are very few who are able to manufacture them, for want of knowledge of the healing principle. The only Instrument to be depended upon in this State is at the Electropathic Institute.

Connected with this system are the renowned Electro-Magnetic Baths. Here let us caution the public against the numerous imposters in the bathing line. The pure Magnetic Bath is one of the most effective aids in the removal of disease from the system, but if given at the wrong time is likely to aggravate trouble, and cases have been known where the patient has been injured so badly as to require months to remove the injury. Persons in quest of this Bath should be careful and not apply to a place where there is no physician to judge of the necessity of the remedy. In fact the only place where they can be obtained in all their purity is at the Institute, where the Resident Physician will always be happy to examine and see that they are not unreasonably administered, and if not necessary, advise the requisite remedy.

To Females,

the Directors would say, Electropathy is particularly applicable to your delicate and fragile systems, and to the numerous troublesome and painful diseases to which you are liable. Should you be irregular, a few treatments will restore the functions to the proper state without pain or inconvenience. Should you be weak and enfeebled, either general or local, this system imparts strength and vitality, making the recipient feel buoyant and youthful, where before they were languid and unable to enjoy the pleasures of life. One great blessing connected with Electropathy is, it purifies the system so thoroughly that it beautifies the complexion, making the coarse and freckled skin as pure and fair as possible, giving the patient a fresh and healthful look.

To the nervous, the Directors would say, that you can be entirely relieved from those dreadful feelings of evil foreboding and your system strengthened so that nothing can disturb the current of your life. Several cases of insanity, arising from a disarrangement of the nervous system, have been permanently cured by this system. The Directors, in issuing this pamphlet, do it in the hope that it may be the means of awakening the public, who have not studied into such things, to a sense of their duties, and if possible prevent those who have the care of a rising generation from poisoning their young charges with vile drugs, thereby entailing upon them troubles which in after life may cause them to curse the origin. Also, that those in need of remedial agents may know where they can find them without resorting to taking the thousand and one poisonous nostrums that are continually palmed off as sovereign panacea for all the ills of humanity. Avoid them all, they are snares set to rob you, and to your bodily injury at the same time. The following is a list of the cases which have been successfully treated by the *Electropathic System*, at the Institute, during the first four years of its establishment. The record is good, and challenges admiration of the world:

Name of Disease.	No.
Rheumatism	1580
Neuralgia	1492
Dyspepsia	1467
General Debility	1410
Fever and Ague	1292
Dumb Ague	1210
Bronchial Affections	1106
Asthma	1049
Female Irregularities	1022
Mercurial	938
Scrofula—long standing	922
Paralysis	890
Disease of the Eye	832
Catarrh in the head	705
Catarrh in the lungs	608
Liver complaints	600
Incipient Consumption	582
Panama Fever	563
Deafness—total and partial	480
Mental Derangement	471
All other—and among which is almost every nameable disease	2,186
Total	21,373

The above shows what can be accomplished by combined energy when it has truth and science upon its side. The Electropathic Institute was started amid the cry of interested charlatans, who used all the power their riches and the prejudices of the public gave them to prevent its success. It has risen to a position that is beyond their baffled malice, and will be honored in the scientific world when they are forgotten, or only remembered for their crimes and impositions. A thinking public are fast consigning them to that oblivion their works merit. Let them go, they will not be missed.

Persons seeking remedial assistance, may wish to know something of the system by which diseases are so rapidly removed from the body. Electricity is a fluid of so subtle a nature that it can only be studied by its results. We know by its action it forces everything of a foreign nature in the body from the center to the surface, by its energy, while the vitality which it imparts fills up the vacuum, preventing thereby the subtle poisons from returning to the hitherto diseased parts; and here let it be understood that the Bath should never be administered until the disease has been forced to the surface, except, perhaps, in cases of cold where fever has not set in. Its action upon mercurial diseases is peculiar. The best authorities are of the opinion that it liquifies the mercury, which, was in a liquid state, by its own specific gravity forces itself out of the body. This result has been arrived at by testing the water after an Electro Magnetic Bath. After such tests have been found in the water the patient is not troubled any more with those pains peculiar to the diseases. In all other cases it forces to the surface and is washed off by the bath. The whole system in its application is a *luxury*, there being no pain or inconvenience attending upon it, but the reverse is the case, being one continued pleasure all the time. Try it, you that are suffering either from disease or the injudicious use of poisonous drugs, and you will be made to rejoice that you have had the courage to strike out from the beaten path.

Below are a few certificates from patients that have been cured at the Institute:

CERTIFICATES OF CURES.

The undersigned takes this method of acknowledging publicly the benefits he received from the treatment applied to him at the Electropathic Institute, while suffering under a terrible infliction:

This is to certify that I have been under Electropathic treatment at the Electropathic Institute, 645 Washington street. When I applied to Dr. Josselyn I was cramped up with rheumatism, and also had the coast ague. So bad was I that, without relief, I don't think I could have lived more than one week. The Doctor, with his instrument, relieved me the first treatment from all pain, and perfectly cured me of all (except in twenty treatments, without the use medicines I cordially recommend all afflicted to patronize this Institute for it is truly a blessing to the afflicted, and the operation is very pleasant. I wish to thus publicly thank Dr. Josselyn for his care and sympathy.

JOSEPH SEGER, of Bolinas Bay.

September 19, 1860.

State of California, City and County of San Francisco—ss.

Subscribed and sworn to before me, this 19th day of Sept., A. D. 1860. P. BARRY, Notary Public.

SACRAMENTO, Oct. 10, 1860.

DR. JOSSELYN—Dear and Honored Sir: You requested me to let you know how I feel after being at home three weeks. Well, sir, I have been here a little over two weeks and there is no return of that very unpleasant trouble. My sleep is sound, and there is no disturbance of the regular laws of nature. I feel as strong as I ever did before bad habits had weakened my system. Not only is the general debility entirely disappeared, but the local trouble has gone. I feel so strong that there is no fear of its return. Considering that you only took one month to cure a disorder of seven years standing, I think your system almost miraculous. Accept my sincere thanks, and publish this if you please. I have sworn to it, as you will see. C. BOWMAN.

State of California, County of Sacramento—ss.

Subscribed and sworn to before me, this tenth day of Oct., A. D., 1860. CHAS. HART, Notary Public.

HORNITAS, Nov. 1st, 1860.

Well, Doctor, I am at home, and have been to work in the water for several days, and there is no return of the Rheumatism, as I call it; and Mercurial pains as you state them to be. I feel as gay as a lark, no pain or bad feelings, no stiffness, but perfectly well, and all done by you in three weeks, without one drop of medicine. You had hard work to make me believe before you commenced that you would cure me, but now I find it very easy to believe. Although my friends look rather incredulous, but they cannot doubt my sober earnestness. Doctor, you have my thanks, and I will benefit you all I can, by spreading your fame up in these parts.

Respectfully yours, GEO. PERKINSON Jr.

To J. H. Josselyn, M. D., Resident Physician, at the Electropathic Institute

NEVADA, Nov. 8, 1860.

DEAR DOCTOR: Pursuant to agreement, upon my arrival, I sit down to pen you a few lines in acknowledgement of the great service you have rendered me, in relieving me of that painful case of neuralgia and rheumatism. When I look back and see the gallons of medicines I have swallowed to no purpose, and then to think how soon you cured me, I am astonished. You were only twelve days performing a cure of the trouble, for which I had taken medicine over six months. Dear Doctor, if you could see the wonder exhibited by my friends, who can hardly believe that a cure was performed without medicines, but here I have been cured, and I have not taken a drop of medicine from you, nor from any one else, while being treated by your splendid Instrument I shall try to show my gratitude by sending every sick man I come across to you. Yours, till death,

FRANCIS GARLAND.

To J. H. Josselyn, M. D., Resident Physician, Electropathic Institute.

State of California, County of Nevada—ss.

Subscribed and sworn to before me, this eighth day of Nov., A. D., 1860. F. SPAULDING, Notary Public.

YREKA, Nov. 10th, 1860.

DR. JOSSELYN—Dear Sir: Your letter, dated October 16th, is before me. You wish to know how my bronchial troubles are. Now, Doctor, that looks a great deal like a joke. I once had such an affection of several years' standing, but thanks to your natural mode of treating disease, it has gone to be numbered with the things of the past. Since my return I have not felt the slightest trouble from it. When you pronounced me well I did not expect to ever hear from it again. Any one who sits under treatment of that *Improved Instrument* of yours will have the same feelings. It imparts vitality to the system so rapidly that confidence is at once established. I have to thank you that you did not refuse to treat me because I could not pay you the whole of your reasonable charge; inclosed is the balance due you, and God bless you for the kind treatment I received at your hands.

Yours, ever grateful, WM. GARDNER.

State of California, County of Siskiyou—ss.

Subscribed and sworn to before me, this tenth day of Nov., A. D., 1860. B. F. WELLITS, Notary Public.

This is to certify that I, the undersigned, was troubled with dumb ague accompanied with rheumatism, very badly. My disease was taken in Washoe. After having exhausted medicines without benefit, I applied to Dr. Josselyn, at the Electropathic Institute, on the first day of November. After taking twenty treatments with his Improved Electropathic Instrument I am perfectly cured, having been entirely relieved of all pain or inconvenience. I feel as strong as I ever did when in the best of health. I cheerfully recommend all afflicted to his care, as being the best physician I ever became acquainted with. One great advantage, he uses no medicines, but cures by a process which is perfectly natural. The time occupied in my case was thirteen days. D. O. HARRA.

November 14th, 1860.

State of California, City and County of San Francisco—ss.

Personally appeared before me, D. O. Harra, and subscribed and sworn to the above certificate, on this fourteenth day of November, A. D., 1860. P. BARRY, Notary Public.

SAN FRANCISCO, Aug. 3d, 1861.

To the Directors and Resident Physician of the Electropathic Institute.

SIRS: You requested of me a certificate of the cure you performed in my case. Below I append it:

This is to certify that I was troubled with a swelling which commenced in my ankles, and gradually extended upward until it effected my whole body. I sought the best medical aid in New York and Boston, and they all pronounced it dropsy. Hoping to retrieve my health, I visited California in February last. I consulted the Resident Physician at the Electropathic Institute; and now, after five months of treatment, and waiting to see its effects, I am pronounced well by competent judges. It did not take but three months of treatment to cure me, but I waited to see that it did not return. I feel perfectly assured from what I saw while under treatment that Electricity as applied at the Institute will cure any disease to which the human family is liable.

Now, gentlemen, you can make what use you please of this certificate. With my thanks to the Resident Physician for his kind attention, I subscribe myself,

Your thankful patient,
MRS. C. A. CARLTON

Opinions of the Press.

The advantages of electricity as a remedial agent, are universally admitted by the medical and scientific world. It requires, however, experienced skill to apply this remedy efficiently, and this skill of application is possessed in an eminent degree by Dr. J. H. Josselyn, of the San Francisco Electropathic Institute. Particulars of his method of practice can be obtained by reference to his advertisement in another column. The Doctor is well known to us as a scientific gentleman, and an ardent devotee to his profession. He is no pretender, but has conferred incalculable benefit on those who were so fortunate as to seek relief at his hands. For those who desire speedy and permanent relief from the rheumatic pains, so prevalent in this region, we can recommend no surer remedy, than a visit to Dr. Josselyn at his rooms in San Francisco, No. 645 Washington street.—[Placerville Republican.

ARE YOU SICK!—We wish to say a word to those that are sick. We have in this city an institution known as the Electropathic Institute, situated at 645 Washington street. The establishment is under the charge of Dr. J. H. Josselyn, a physician who has no superior in the city. He has been in charge of the Electropathic Institute for several years, and has been uniformly successful in his treatment of the numerous patients that have placed themselves under his charge. The Electric treatment will cure many diseases that cannot be reached by any other mode. Dr. Josselyn gives his personal attention to all of his patients, and is always ready to give advice to those that may call upon him. His charges are very moderate, and we cannot do the sick a greater favor than to recommend them to call on him before placing themselves in charge of another.—[San Francisco Daily Journal.

We call the attention of our readers to the advertisement of Dr. Josselyn's Electropathic Institute. Voluntary and unsolicited we make the following statement, proving its benefecent effects, particularly in rheumatic cases. Some months since we were on an editorial trip, visiting the mountains. The stage-coach upset, and landed all the passengers, including the writer, below in the valley, where the Deer Creek overflowed by receiving the additional material, estreneous to its usual contents. For some hours exposed in our wet clothes, to night wind and weather, we soon felt the effects of the accident in the mountains—pains in the back, hip, and legs; so much so, that for weeks we hardly could walk Treatments of all kinds were applied but without avail until our attention was called to the Electro-galvanic Baths and appliances of the above Institute. Thank God, after two weeks we have been fully restored, and enjoy now the free use of our limbs and body, as fully as previous to the involuntary bath in Deer Creek.—[Dr. H. BIEN.—Ed True Pacific Messenger.

ELECTROPATHY.—Electricity has long been classed among the most effective medical agents. It possesses great advantages over the systems of therapeutics heretofore relied upon as it reaches more certainly the seat of disease, especially in nervous or rheumatic complaints. The Electropathic Institute, No. 645 Washington street, under the charge of its able Resident Physician, Dr. J. H. Josselyn, has attained a well merited celebrity for the many cases which have resulted favorably from the skillful application of this invaluable remedy.—[Daily Morning Star.

A GOOD INSTITUTION FOR THE SICK.—One of the very best places in the city for the care of the sick is at the Electropathic Institute, 645 Washington street. The establishment is under the charge of Dr. J. H. Josselyn, a physician of great experience, and no one can do the sick no greater favor than to recommend them to give the Electropathic Institute a trial.—[Weekly Journal. 13

All Letters answered with promptness and pleasure. Office open from 9 a. m. to 9 p. m. Advice gratis.

J. H. JOSSELYN, M. D.,
Resident Physician.

A CARD.

YEARS HAVE ELAPSED SINCE THE Subscribers first invited public attention to the peculiar properties of their Patent Axle-grease. At first their invention made but slow progress, but thanks to the liberal and appreciative spirit of a large portion of the teamsters and coach proprietors of California, the demand for their manufacture has gradually increased, and notwithstanding the many spurious imitations which from time to time have been introduced from the Eastern States to compete with their article, the H & L AXLE-GREASE has now acquired an unrivaled reputation, extending throughout the length and breadth of California, Oregon, and the neighboring Territories.

The subscribers return their grateful acknowledgments to a discerning public, who have so largely patronized them in all their enterprises which they are now happy to say, are beginning to be justly appreciated as belonging to our California industry.

The supply of material from the East having, in consequence of the war, been cut off, the subscribers turned their attention to the substitution of COAL-OIL as a basis o their manufacture, but after applying every means suggested by the modern application of the science of chemistry, they were reluctantly compelled to the conclusion that however fit COAL-OIL might be for illuminating purposes, and for which it stands unequaled, it was not at all adapted to make a permanently satisfactory Axle grease. In this dilemma the subscribers turned their views to the native produce of California, believing that large quantities of natural resin might be collected from the noble pine trees of her boundless forests.

Having invited attention to this subject, they have with steady progressive steps, advanced this interest until, at the present time, they have established a manufactory of Rosin and Turpentine at Forbestown, from which considerable quantities of both articles are daily manufactured, of such a quality as to find a ready market at fair prices.

It is hoped that increased efforts may continue to be put forth, and new discoveries made, so that California may soon be independent of all foreign supply, for we believe our lofty mountains and our mighty pine forests will yet give us that supply. The subscribers are now receiving native resin in sufficient quantities to be able to sell their celebrated AXLE-GREASE at a LOWER PRICE than any of the spurious COAL-OIL varieties which may hereafter be imported.

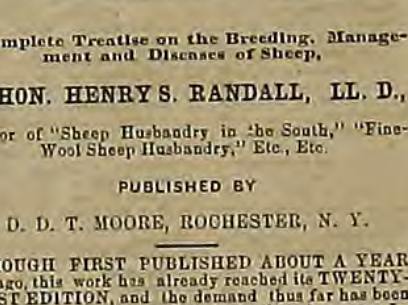
RANDALL'S GREAT SHEEP BOOK.



A Complete Treatise on the Breeding, Management and Diseases of Sheep,

BY HON. HENRY S. RANDALL, LL. D.,

Author of "Sheep Husbandry in the South," "Fine-Wool Sheep Husbandry," Etc., Etc.

PUBLISHED BY

D. D. T. MOORE, ROCHESTER, N. Y.

THOUGH FIRST PUBLISHED ABOUT A YEAR ago, this work has already reached its TWENTY-FIRST EDITION, and the demand thus far has been extraordinary. A new and revised edition is now ready, and others will follow in such rapid succession that all orders can hereafter be filled promptly. No volume on any branch of Agriculture ever had so rapid a sale or gave such universal satisfaction. The work is a timely one, and unquestionably THE BEST AND MOST COMPLETE TREATISE ON SHEEP HUSBANDRY ever published in America. It is cordially welcomed and highly approved by both Press and People. Witness the following extracts from a few of the numerous Reviews and Letters the work has elicited:

OPINIONS OF PRESS AND PEOPLE.

From the New England Farmer, Boston.

"The Practical Shepherd" is a work that has long been needed by our people. It should be in the hand and head of every person owning sheep.

From the Country Gentleman and Cultivator.

As a whole, this book is unquestionably in advance of anything of the kind now before the public.

From the Maine Farmer.

The name of the author, Hon. H. S. Randall, is a guarrantee of its completeness and reliability,

From C. L. B. P. Johnson, Sec'y N. Y. State Ag't Society.

It is the best practical Sheep Book, I think, ever published, and does great credit to Dr. Randall.

From the New York Tribune.

In this volume the author has exhausted the subject, and given all that is necessary for any farmer to know about selecting, breeding, and a general management of sheep, in health or sickness. We heartily commend this work to all who wish for a sound and thorough treatise on sheep husbandry.

From the Michigan Farmer.

Mr. Randall has made the very best book extant on American Sheep Husbandry.

From the Ohio Farmer.

The reputation of the author—who ranks as THE authority in this country upon all that pertains to the breeding and management of sheep—will induce a large and continued demand for "The Practical Shepherd."

From the Prairie Farmer.

The illustrations of sheep are by the best artists of New York, and well done. The letter press and paper are all that could be desired in a work of this description. It will undoubtedly meet with the large sale its merit demands.

From the Scientific American, New York.

It is vastly important that those who raise sheep should obtain all the information possible how best to manage their flocks, and we unhesitatingly recommend the "Practical Shepherd" as the most interesting and reliable work on the subject extant.

☞ THE PRACTICAL SHEPHERD is sold only by Agents and the Publisher. The demand for the work was, for months, greater than the supply, and hence it has not been offered or advertised in the Pacific States. It comprises 454 large duodecimo pages, and is printed, illustrated and bound in superior style. Price $2, Sample copies mailed, post-paid, on receipt of price.

JOBBERS

OF FLOUR, WHEAT, BARLEY, OATS, CORN, CORN Meal, Bran, Shorts, Middlings, Ground Feed, Potatoes, Onions and Seed Grain of all kinds. A good assortment at the lowest market rates always on hand.

Office—No. 45 Clay street, Corner of Drum, SAN FRANCISCO.

N. B.—Ours is one of the oldest Commission Houses in the city. Consignments of Produce solicited.

Terms for buying or Selling Grain, Flour or Wool: Amounts under $5000, 2½ per cent; $5000 and over, 2 per cent. And on Stock, Hay, Fruit, Potatoes, Butter, Cheese, Poultry, Eggs, etc, amounts under $3000, 5 per cent; over $3000, 3 per cent. Liberal Cash Advances on Consignments. Prompt returns and the highest market prices guaranteed.

The Markets.

Wholesale Produce Report.

Tals represents the prices paid by the dealer to the producer.

Corrected weekly, by A. H. Todd & Co., corner of Clay and Drumm Streets.] February 3d.

There is no material change to note in our Grain and Produce Market. Arrivals, of late, have been heavy, but no large offerings on the market, consequently holders have succeeded in sustaining prices, which are nominally the same as last week.

The large receipts of Chile Flour, we are told, is going into Bond and consequently has no direct tendency to depress prices.

Our receipts from all sources, for the past week, are as follows: Wheat, 7,669 sks; Barley, 4,695 sacks; Oats, 4,171 sks; Potatoes, 5,962 sks; Beans, 646 sks; Salt, 400 sks; Flour, 68,905 qr-sacks; Bran, 155 sks; Hay, 2,729 bales; Straw, 200 bales; Corn, 4,257 sks; Onions, 80 sks.

A REAL BUSINESS MAN, WITH CAPITAL OF $2,000 to $3,000, who desires to inv st in a very safe and profitable business already established, may hear of an opportunity by addressing with real signature, S. S. F., care of Farmer Office. All communications strictly confidential 20 tf

FROM OUR EXCHANGES.

—At a recent gathering of Good Templars at Pilot Hill, El Dorado county, there were present David Fairchild and wife, aged respectively 64 and 70 years; their eldest daughter, Mrs. Julia A. Creque, and her two children, Miss Sophronia G. Creque and Master Fred. Creque, all members of the Order and devoted to the cause. The age of the temperance family amount in the aggregate to two hundred and twenty-four years.

—The Committee of Ways and Means in the Nevada Legislature has recommended a property tax of 95 cents on the $100; a tax of one per cent. on the proceeds of the mines; a stamp tax similar to the Federal stamp tax; a tax of one dollar on each passenger leaving the State; a poll tax of $4 on each male between 21 and 70 years of age.

The Superintendent of Public Schools, in Siskiyou county, says he can give employment to about a dozen school teachers at the present time, at salaries ranging from $60 to $75 per month. None but those competent need apply.

—The Los Angeles News says the work of one year more will place the mines of Southern California upon the list amongst the richest mines which have ever been worked in the Pacific States or Territories.

—The citizens of Bloomfield, Sonoma county, will celebrate Washington's Birthday in a becoming manner. The proceeds of the ball are to be given to the fund for the benefit of the sick and wounded soldiers.

—Siskiyou county, in proportion to the population claims to be the banner county of the State, in contributions to the Sanitary Fund, having given at different times $11,260 50.

—There are 86,504 children in California entitled to the benefits of the School Fund. The apportionment is at the rate of $1 17 per head, or $101,209 68.

—Chas. T. Meader, of Stockton, has purchased of Thomas Hardy his one-fourth interest in the Union Copper Mine, at Copperopolis. The entire mine is valued at $2,000,000.

—The Grass Valley National disapproves the organization of a Stock Board in that town, on the ground that it will create a mistrust in the richness of the mines of that vicinity.

—Charles E. Jenkins, of Company E California Battalion writes, that out of 104 men who went into the service, only eight or nine survive.

—A Stage Line is contemplated, upon the opening of spring, from Red Bluff to the Owyhee and Boise mines, Idaho Territory.

—A lake twenty miles long and six wide has been discovered east of the Sink of Humboldt river. It has been named Lake View Lake.

—Gov. Low has appointed Austin Sperry, J. G. Gassman and E. S. Holden, Directors of the State Insane Asylum.

—A piece of ore was taken of the Belcher mine, near Virginia city, a few days since, which yielded at the rate of $15,300 97 per ton, in gold and silver.

—Brigham Young, in a letter in the Deseret News, encourages the representation of dramatic performances among the Mormons.

—The San Francisco and Marysville Railroad Company have been consolidated, under the name of the California Pacific Railroad Company.

—A vein of beautiful marble has recently been discovered near the town of Columbia, Tuolumne county.

—San Jose occupies the position of the third city in the State, as indicated by the vote at the last election.

—A new Masonic Hall is soon to be erected on the corner of Sixth and K streets Sacramento.

—The Petaluma Journal favors the sale of the mineral lands.

—Skating, by moonlight, is one of the amusements of the male and female residents of Aurora.

—The colored people of Yreka have organized a Church.

DAGUERREAN GALLERY INTEREST.

The owner of one of the best Daguerrean Galleries in our State, with the best run of business, with fine work room, handsomely furnished, display rooms and everything to make it attractive and profitable, desires to find a partner, an active partner, a real working partner, for the business department, so that the business, which is constantly increasing, may be retained, and another and important branch added to it, which the present proprietor cannot do without a good practical, working, business man.

For particulars, and all appertaining to it, address EDITOR FARMER. All Letters confidential. 1

ORNAMEFTAL TREES, PLANTS, Etc.

W. R. STRONG'S American Seed Store,

NO. 206 J STREET, SACRAMENTO,

IMPORTERS

—AND—

WHOLESALE AND RETAIL DEALERS IN

Garden Seeds, Tree Seeds, Grasses, Etc.

The Largest and Best Collection of Seeds for the Garden, Field and Orchard that can be found in all the upper section of the State.

THE UNDERSIGNED BY AN EXPERIENCE OF many years has made himself familiar with the character of the seeds especially wanted for the great Sacramento Valley, or any portion of our State, and he has taken pains to import, from the very best sources in Europe and the States, only those of the most reliable character and quality, such as are adapted to our climate, all guaranteed PURE and FRESH, and such as he can most cheerfully offer to his customers.

The Collection of Seeds will embrace every desirable variety of

GARDEN,
FLOWER,
—AND—
FRUIT SEEDS,
Together with
AGRICULTURAL SEEDS

For every Department including all the New GRASSES, GRAINS, etc.

Ornamental Tree,

....AND....

SHRUB SEED.

Choice Flower Seeds,

Over Two Hundred Varieties, and these of the very CHOICEST KINDS.

GRASSES.

A large Collection of all the Valuable Clovers and other Grasses suitable for high or low lands.

A large Invoice of Alfalfa, or Chile Clover, of the last crop, best quality, imported to order, will be offered this year also.

California-raised Alfalfa, of a very superior quality, and of extraordinary purity.

Cotton Seed, Seed Rice, and Tobacco Seed,

All these of the most approved sorts.

Bulbous Roots

In great variety. In this collection will be found Hyacynths, Tulips, Naracissus, Crocus, Lillies, Gladiolus, and all choice Bulbous Roots that flourish well in our clime.

It has been the object and aim of the undersigned to import and prepare for his patrons a collection of Seeds superior to any yet offered in this section and he is now opening over fifty large packages, of many thousand pounds of new and choice Seeds, all of this year's growth, just received by the last steamer, to which he would call their especial attention.

He can assure those that desire pure and reliable Seeds, that they can send their orders with full confidence that they will be attended to, and filled the same as if they were present themselves.

Catalogues of the Seed of this warehouse will be sent to all applicants.

A fine collection of Fruit Trees, Grape-vines, Ornamental Trees, Flowering Plants and Shrubs will always be found in the yards connected with this Store, during the season of transplanting.

Agricultural Books, Pruning Knives, etc., always on hand.

W. R. STRONG,
20 206 J street, Sacramento.

ORNAMENTAL TREES,

Fruit Trees,

GARDEN PLANTS,

—AND—

—OF—

Ornamental Trees,
Fruit Trees,
Garden Plants,
—AND—
Flowering Shrubs.

This collection consists of all the very best

EVERGREEN TREES,
ORNAMENTAL TREES,
FLOWERING SHRUBS,
GARDEN PLANTS, etc.

With an extensive NURSERY AND GARDEN they are enabled to offer a MOST SUPERB COLLECTION, such as is rarely found.

Purchasers of TREES, PLANTS, FLOWERS, etc., are invited to call at our office,

605 Sansome Street,

Also at the Post Office Yard, where Evergreens and Fruit Trees can be seen.

Orders solicited and promptly filled.

C. FRANCOIS & C. BULLETTI,
23tf Wholesale and Retail Dealers.

Peach Seedlings Wanted.

ANY PERSON HAVING PEACH SEEDLINGS that they offer for sale, if they wil send us a description of age, size, quantity and price, we can find them a customer, as a lot is wanted immediately.

FOR SALE, TO LEASE, ETC.

A Magnificent Stock Farm For Sale.

WE HAVE ONE OF THE VERY FINEST STOCK FARMS for sale to be found in the State. The location is a Valley in the Coast Range, and in a situation unequaled for excellenc. A place secluded from loss of Stock by mixing, etc.

There are 1200 acres all inclosed with a fine staked oak fence with strong riders, to this can be added as many thousands of Uncle Sam's acres as may be wanted. The fenced land is the best of bottom land. During the late dry weather a large amount of Stock has been driven to these hills for feed and have been profitably kept.

This Ranch produces a big yield of Wheat, Barley, Oats Corn, Root Crops, etc. Tobacco, Hemp, Flax, etc., can also be raised most profitably. Floods never wash it, and it is never affected by drought.

On this Ranch are good, ordinary Buildings, Houses, Barns, Sheds, Corrals, Smoke Houses, etc, to this Plows, Harrows, Teams, working Oxen, etc., to do the work on the place.

On this Ranch there is now the following Stock:

One Jack of the very best character
100 Mules from 1 to 3 years old.
1 Stallion, No. 1.
20 American Mares, No. 1.
80 Mares one-half and three-quarter breed. These Mares are all in foal, mostly by the Jack, as Mules are a ready sale at high prices.
100 Horses, mixed Stock.
500 Head Horned Cattle, American Stock and half breed.
400 to 500 Swine, good Stock.

The Stock now on the place can be sold with the Ranch and thus put the purchaser into a business profitable at once. This Ranch is so situated that a river surrounds the range on one side and mountains on the other to which the Stock have a fine run without any interference from any source, thus giving the Stock a complete swing. Without reducing the original Stock there can be sold annually from this Ranch 50 Mules, 30 Horses, 100 Beef Cattle, 300 fatted Hogs, worth in the aggregate $10 000, three fourths of which is clear profit.

The timber is abundant Pine Oak, and other hard woods. Tar, Pitch, and Turpentine can be made in abundance.

This is one of the Rare Chances, such an one as is seldom offered.

Easy terms as to payments: A portion of the money can remain on time if secured.

For all particulars call on the Editor of the Farmer. 22

Pleasant Homesteads For Sale.

THE FOLLOWING PLEASANTLY located Properties, situated on the opposite side of the Bay, can be purchased at very reasonable prices and easy terms if applied for soon.

No. ONE.—A Handsome Two-story Cottage, with seven rooms and seven closets, hard-finished, and every convenience inside, Small Buildings, Chicken House, Good Water, Gardens, and a very fine view of the Bay. Price about $3,000. Buildings perfectly new.

No TWO.—Very similar Cottage, with eight rooms, and same good finish and conveniences inside and outside, and same views—price the same. Both the above have excellent soil in the garden, and some fruit trees ready for bearing. The fences are fine around the grounds, each about one acre.

No. THREE.—A large House, built some three years, large Garden and about 150 Fruit Trees in bearing yielding a handsome income yearly. All these three Dwellings are within three minutes of the cars. Price, similar. These are really worthy special attentions. For all particulars inquire of the Editor of Farmer.

....ALSO....

A neat Cottage with eleven acres of land all covered with Fruit Trees, and small vines in abundance such as Blackberries, Raspberries, Strawberries, Gooseberries, etc. The income from the ground has been about $2,000 a year. The owner wishing to leave will sell at $6,000. A fine location and everything desirable—it will be sold at a bargain.

—LAND—

A Fine Building Lot all planted with Trees, about 500 of the best quality and in bearing. The Fruit alone will pay for the place in three years.

OTHER LOTS OF LAND.

We have several Fine Lots of Land, open; also some stocked with Fruit Trees, that can be offered on the most favorably terms to those who wish to secure desirable Homesteads.

Inquire for all the above of the Edito of Farmer. 19

A Beautiful Eden for Sale.

ONE OF THE MOST DESIRABLE Estates on the Pacific Coast is now offered for sale by reason of a desire of the owner to travel abroad and to regain his lost health—no other inducement could tempt the owner to part with it.

The Estate now offered is beautifully located in a retired valley away from any immediate neighborhood, free from noise, dust, etc, and shielded on all sides by lofty and picturesque hills giving a varied scenery, truly delightful, no season of the year without real beauty.

The whole Estate comprises a little less than ONE HUNDRED ACRES, the greater portion of it is covered with Orchard, Vineyard and Garden Grounds, comprising all that is desirable, and unsurpassed by any grounds in this State.

The Orchard covers many acres, and the Vineyards are very extensive, and everything rare and desirable in these departments are here found.

Pleasantly built and located is the Cottage residence. This with Barns, Fruit Houses, Wine Cellars, and other appurtenances make the whole complete, a highly prosperous Garden Ground around the residence with large Orange, Lemon, Fig and Olive Trees in bearing gives the whole the true "Eden" appearance.

The productiveness of the place can be estimated when we say more than Ten Thousand Dollars is annually produced from the Orchard and Vineyard, and these can be easily and greatly enlarged.

This whole Estate can be had at a bargain if soon applied for.

The approximate value is about a THREE-YEAR INCOME, and any person having ready cash of some amount, who wishes to secure one of the finest Estates on this coast, can find the present a rare chance. No person need apply who has not ready money to a reasonable amount, and none but a real purchaser. To such, one of the best chances for a Fortune is now offered, as in good hands the Estate can be paid for with the income from the product in three or four years, sure.

For particulars apply to Editor of Farmer. 20

Fine Farms for Sale.

YOU WHO WANT GOOD FARMS CAN SECURE them by applying to the Editor of the Farmer. The following can now be had:

FOUR VERY FINE FARMS in the splendid San Joaquin District, within a few miles of Stockton, all very productive.

Several STOCK RANCHES in various parts of the State, from $1,500 to $25,000; in all these, good and permanent settlers can find bargains. Address by letter, or in person, for particulars to Col. Warren, Editor of the Farmer. 23

Two Splendid Farms for Sale.

TWO SPLENDID FARMS FOR SALE, IMMEDIately, in one of the best localities in our State—one of the best chances ever offered for an immediate purchaser, parties wishing to close business contracts.

One Farm of 30 acres, and Orchard, worth $6,000, will be sold for about half that sum.

A large Farm, 5,000 acres, worth $15,000, will be sold for $10,000 or less. Inquire of Editor Farmer.

Loan Wanted---$5,000.

WANTED, FOR TWO YEARS, $5,000 ON VALUable improved property in a neighboring County. The property is worth treble the amount. Insurance on the buildings of $6,000 goes with the collateral. The money is wanted at a fair interest, which will be paid promptly. Inquire of Editor Farmer 7-t

Grasses for Tule Lands.

SOLANO COUNTY, February 6th, 1865.

Mr. Editor:—I come to you for some information about the kind of Grasses we should plant on our Tule Lands. Some of our lands have water on them till very late, some have more or less water all the year; what shall we do? What kind of Grasses shall we plant? Will you kindly advise us. Yours,

MANY SETTLERS ON TULE LANDS.

In answer to our correspondent, we would reply that there are many kinds of Grasses that should be tried on these Tule Bottoms, that would produce a fine crop of Hay, for this we suppose is the object of the inquiry—or rather Hay and Feed for stock.

Our Tule Lands reclaimed will, ere long, be found to be invaluable, whatever some writers may say of the loss of stock on the Tule Bottoms.

We would suggest to "Many Cultivators of Tule Lands," a thorough and careful trial of the various American and European Grasses, which are described so well by Hon. C. L. Flint, Secretary of the Board of Agriculture, of Massachusetts, in his admirable book on "Grasses and Forage Plants." This is a book especially useful to all Tule Land men. There are so many kinds that will do well and pay well that we are surprised that when the Hay Crop pays so well, new grasses have not been cultivated.

Timothy or Herds-grass should be grown and would do well on redeemed Tule. Then there is the "Meadow-fescues," in great variety. *Moore's Seed Store on California street*, can supply those who wish to try these grasses.

If those who inquire of us will but purchase the Book we name, they will learn of all the various kinds of grasses suited to each case. We will give a list of their characteristics soon.

SPENT TAN FOR POTATO ROT.—A gardener residing at Troyes, says the Irish Agricultural Gazette, states that he has discovered an effectual cure for the potato disease. Having observed that everybody living in the quarter of the town occupied by tanners escaped the cholera, he determined to try the virtue of tan when planting potatoes. For that purpose he placed a shovelful of tan in the trench under the seed in a part of a field, and planted the remainder in the ordinary way. On digging out the potatoes, he found that those which were planted near the tan were perfectly sound, while the others were diseased. He found, further, that potatoes were preserved in the Winter by spreading tan on the floor of the storehouse.

New Furniture Auction House.—We call attention to the card of Messrs. E. D. Bailey & Co., Auction and Commission Merchants, on Pine street. Mr. Bailey is experienced in the business, and is well known and qualified for it. Mr. Norcross is also one of our highly esteemed citizens, and well adapted to the mercantile and commission business. The friends of these gentlemen will be glad to know of their location, and will, we are sure, give them a good business. Those who have Houses, Furniture, or any other property to sell at auction or otherwise, can rely upon these gentlemen, who will accomplish as much for them as any other House of the kind in our city.

Grape Vines—Cuttings.—We call the attention of all who wish to secure Cuttings, of *genuine sorts* of the Grape, to the card of Mr. Shaw. Such as are offered by him we know to be reliable, having been tested by their fruits.

The Fence Question.

[The following Letter of one of our largest Sheep Raisers, in Monterey county, appeared in the Alta recently. We call special attention to it. These are remarks worth noting, and we shall be glad if our readers will take up the subject, criticise and reply.]

SAN JUAN (Monterey Co.), January 18th, 1865.

Mr. Editor:—In Mr. G. Tyng's communication of January 11th, he seems to think that there are other products than grain that the farmer may profitably grow to compete with like productions from abroad. The argument, of course, is, that if he is simple-minded enough to continue growing grain when other fields are open to him more profitable, why, let him go unprotected. What these other products are he does not inform us. I am something of a farmer myself, but I know of no thing that American farmers in this State can do with greater prospect of success, than raise wheat. If there are others, the farmer would still find that the same difficulties were in his way, and that there was no alternative but to build fences; and that I say is, in this country, tantamount to bankruptcy. We must start with this proposition: that to fence the lands of this country will compel an expense above any profits derivable from it—that we unnecessarily cripple the industry of all who engage in agriculture by forcing them to fence the land. The reason that fencing elsewhere is found to be desirable, and profitable for communities, is not valid here, for the plain reason that we have not the material for fences. If men deny that, then I have nothing to say.

HIGH-PRICED MEATS AND GRAINS.

Of one thing I am certain—that is, that grain growing has been a failure—that, too, in the most productive soil I have ever seen, with a climate for the laborer unrivaled, giving him as it does, a longer season to secure his crops—a great advantage. The least valuable of our pursuits as farmers is cattle-growing, for the reason that there are other kinds of meat just as good, and which can be grown much cheaper. Meat is not the only thing we live upon. If, for want of a fair field and equal rights we cripple our grain-growers, is there not as great a likelihood of high-priced breadstuffs as of high-priced meats? We do not ask the cities and mines to pay more than either are worth; but that much we must have, or quit our business. He who expects high priced meats or breadstuffs in California, is looking for a thing he will never see, unless we persevere in a system that is alike ruinous to both the growers of meat and of bread. There is no danger of high-priced meats in this State for this plain reason—that in spite of all difficulties sheep-growing will be profitably followed. Sheep can be raised for the wool, and mutton can and will be sold cheaply. They do not ask protection, as they can, and undoubtedly will, be grown without it, but justice would make the business one of the finest possible—not so much on account of the added value of the meat sold, as of the increased facilities of management and security of food for the animals. Now the cattle-men of the State have got to admit that sheep can and will be grown, in spite of all trespass on the part of the cattle. Can they, the cattle-men, look forward with any confidence, when they know that for every pound of mutton more there is in the market there is a pound less of beef wanted? This will last just as long as there is a greater supply of beef in the State than the market demands. When the amount is only equal to the demand, then beef goes up, no matter what be the price of mutton or any other meats. Nothing will prevent mutton being the staple meat of this State, because it is grown profitably for wool, and will be so grown if there is not a pound of mutton sold. I come to the conclusion, that the great ranches devoted to cattle-growing must be turned to other account, if the owners desire success. The grain-grower has, on his part, the right to supply some, and no inconsiderable portion, of the beef of the country. Having a few cows for dairy purposes, he raises a few good bullocks for the shambles. In the aggregate, from all the grain-growers of the State, should come to market a large supply of the best of beef. The present system has bereft them of part of the profits of their business—a part legitimately belonging to grain-growing. The offal product of their farms would be turned into good beef if there was anything remunerative in beef-growing, but that being worthless, their straw and stubble go for little or nothing.

THE QUESTION OF POLICY NEXT.

The writer again says: "It seems a mistaken policy that would pamper any one branch of our productive capacity at the expense of the rest." Do we ask legislation unfriendly to the grazing of stock for the benefit of the grain-grower? By no means—but we do say, to all, and every farmer and grazier of the State, "commit no trespass." We start with the proposition that this State cannot be fenced—at least only by slow degrees, as the farmer gains money and time. Why compel all interests except cattle-growing to bear the burden of fencing? Cattle of the right kind can be just as cheaply herded, dollar for dollar, as sheep. It does not come from cattle-breeders with good grace to pass unfriendly laws towards sheep husbandry, and then declaim against legislation not unfriendly even, but only just and equal for all.

If beef-growing was benefited by the liberty of grazing the whole country, there would appear to be some reason, though a very unfair one, for their unfriendly attitude towards other interests. Does not everybody know that it has been an utter failure? For six years past the best brains in the State could not make money growing beef. Is it good sense or just to continue the same system? We do not say that because cattle-growing "don't pay, therefore suppress it," but because cattle-growing, besides impoverishing the owners, ruins us, therefore put the same restrictions upon that interest that are put upon us, so that we may all live and do well together.

The ruined cattle-man says, "I am a poor cripple, don't stone me now." I have seen that same "cripple," as he calls himself, for ten years, a very giant, laying the whole country under contribution, respecting no rights of property, carrying it with a high hand, unscrupulously taking what did not belong to him; now he suffers by visitation of God, and he calls with a loud voice, "Don't stone me, I am a cripple." Like many another, he does not see the good of chastening. He is better off to-day than he was before his affliction. The aggregate cattle of the State now are worth more than they were two years ago, and instead of exciting our sympathies, we see that he is better off for being, in his sense, crippled. If he would consent to be just, he would be always better off for it, but unless he submitted to legislation that will give equal rights to his neighbor, he will be no better than a cripple always. Give him ten years more of license, and he will run the same career of ruin and outrage that has marked his history for the ten years past. He may live to see that respect to his neighbors' rights is the key to his own success. If he does not find prosperity there, he will never see it.

THE CAUSES OF THE FAILURE.

The force of habit and the condition of mind growing out of continued pursuit of any business, unfits many minds for seeing wherein lie the causes of failure; men doomed to hard labor are not the firs to see wrong and seek remedies. Here is where the good legislator gives a friendly hand, and lifts his fellow from the pit; but, my fellow-farmer, we look in vain for the good law-maker. In these times he is not looking around to see if he can do you or I any good, but, cat-like, watches our actions to see what good he can arrive at for himself. If we trust him, we lean upon a rotten stick. Let him see that we demand a change, and none will be so ready to swear devotion to our cause as he. I can conceive a condition of affairs such as that good men make laws, looking far ahead of our own poor conceptions of what would be best, and disregarding our clamor, do us good despite ourselves; but now, I fear, if we get anything good, we have to know it ourselves, and tell those we send to pass such laws as we want. Let us be agreed upon this change, and it will be easy to make it. I have heard it whispered that it takes time and money to get laws made now-a-days—commodities of which we have none to spare. We can do away with that necessity by consent or agreement among ourselves. We need to look at this thing long and well; we have twelve months yet to think it over. Let us hear from all sections of the State. Give us reasons why, if you object, and arguments to justify your opposition.

WM. H. HOLLISTER.

USING THE HUMBOLDT CANAL TO IRRIGATE LAND.—We learn from the Humboldt Register that a great work has been commenced, by which tens of thousands of acres of land will be brought into use. Speaking of the work, that paper says:

"This is a character in which not many have viewed this giant undertaking. Crossing a sixty mile sweep of rich bottom land, bringing the whole body of the Humboldt river through by a cut-off, which secures in less than sixty miles all the fall which nature required in 200 miles of river, this work will repay, in agricultural benefits alone, the entire cost of construction. Unfortunately, as is often the case in such enterprises, a due proportion of the benefits will not soon—not so soon as we wish they would—be received by the energetic Ginaca and confreres. The large tracts of land now producing nothing but "aromatic shrubs," known under the general term of sagebrush, which Prof. Silliman and other silly men style "irreclaimable desert," are found by irrigation, to be capable of golden harvests. It has been so proved along the Humboldt canal, from which water has been turned upon those waste places. No better ground for vegetables and cereals can be found."

MYSORE HEXACENTRE.

We give an illustration of this beautiful climbing plant, to show the style in which many of our climbing plants can be grown.

We would suggest to all who have a taste for the beautiful, to cultivate our finest plants in this style. There are many plants that can easily be grown in Pots or Tubs that will be a beautiful ornament to every dwelling. We name some of the finest, viz: Stephanotus Floribunda, Jasminum (red and white), Wisteria Consequana, Solya Heterophylla, Ipomeas, etc.; such, with the white and yellow Banksia Roses, would make a gorgeous collection. We hope they will be tried, and that "Orrilla's" beautiful pictures of a "Home of Taste" may be extensively verified.

True Patriotism.

We cannot refrain from giving the following burst of true patriotic feeling, from a man of *seventy years of age.* This is an example for the young men of California. Here we have, most truly, a Cincinnatus in the field—a brave old man, of *seventy* years of age, and in poor health, yet burning with a desire to "go to the front." Who will stand back when we have such appeals?

SONOMA, January 31st, 1865.

COL. WARREN:—In reading your excellent paper, of the last issue, I saw your generous offer of a sample of Upland Rice, gratis. Having a small piece of land, in a most excellent state of culture, I cannot deny myself the pleasure of the experiment of planting a small crop.

Although my health is so bad as to be considered as "laid on the shelf," for the greater part of seven years, yet the glorious news of the prospect of crushing out the greatest rebellion the world has ever known, so strengthens me, to hope yet to live to see its death-blow, of which I have never harbored the remotest doubt. My father bore arms five years in the Revolutionary War, and it was not my age (although 70 years), that prevented me from going to "the front," but sickness; therefore I must content myself with the fact that many of my relations are with Sherman in his triumphal march for the last three years, and some of them on the Potomac.

N. B.—In regard to the planting of the Rice, the manner and the time, I must be dependent on you. Please drop me a line, with the seed.

Yours truly, S. B. B.

[We have gladly sent the seed, and other seeds, too, of the best. May such men live forever—aye, such men can never die.]

THE NEW WOOLEN FACTORY.—When we were at at Oregon City a few days since, we went with Mr. L. E. Pratt, Superintendent, to view the new building in process of completion for the Oregon City Woolen Mills. This is altogether the handsomest and most substantial structure in the State, the foundations being laid from a broad base that insures it against danger from the occasional floods that sweep down the Willamette. All this is of solid masonry and hewn stone, while the superstructure is a heavy wall of best quality of brick. In the lower part will be the scouring, fulling and finishing rooms. On the next floor will be the weaving and dressing rooms, and in the upper floor and attic will be the machinery for carding and spinning. The building is one hundred and ninety feet long by fifty feet wide, and Mr. Pratt has not long since returned from the East, where he has purchased the latest and best machinery, with many modern improvements that have come into use since the Salem Mills were erected, thus doing away with cumbersome tenter bars and dry houses, and improving the old method of fulling cloth. It is hoped that the machinery will arrive early in the spring, and that the mills will commence operations before the first of July. A projection of fifty feet from the center of the main building will be erected the coming season, and, when finished and in operation, the Oregon City Woolen Mills will be the most creditable institution in the State of its kind, and quite an object of pride to Oregon, and especially to the enterprise of Oregon City, whose great future will in time be determined by just such works, that the illimitable water power invites the erection of at that place.—[Weekly Oregonian.

True Education.

Teach young boys that which they will practice when they become men.—[Agesilaus, King of Sparta.

There is a "Model Institution" of Learning at Poughkeepsie, New York, for the *practical* education of Young Men, to fit them for any business in life. This College is called "Eastman's" College, and is one of the most valuable Institutions in our country, and we are truly glad that the same Plans of Education for Young Men, is about to be introduced into our city—we refer to the New *Commercial College* of Mr. Laudenslager, whose circular appears in our columns. From a Document published in New York, we give a Letter of Commendation of the System, from Elihu Burritt, the "Learned Blacksmith," and an Extract from a Letter commendatory from the late Hon. Horace Mann, the late President of Antioch College. Better testimony could not be given of the value of such a College. We trust Young Men will not let this opportunity pass but secure its benefits.

NEW BRITAIN, Connecticut.

H. G. Eastman, Esq.,

My dear sir: I have felt a great interest in the claims and success of your admirable School of Business. At each visit, my impression of its happy adaptation to the wants of the present day, was strengthened and deepened. Indeed, no institution could be more *American*—more characteristic of the improvement of the age. The practical education imparted is so ample, varied, and utilitarian, that any young man who takes a fair and honest advantage of it, must be fitted for any department of business which he may choose for life, whether he becomes a merchant, banker, manufacturer or farmer. To gain this in a few months, what would cost years of business life to acquire without such instruction, is a privilege which should commend your institution to the patronage of the whole business community. I would congratulate you on the high character of your college in Oswego, and on the success which has crowned your efforts in this department of education. I am glad you have transferred your sphere of labor to such a central, accessible and pleasant locality as Poughkeepsie; a city which is so admirably adapted for an institution of this kind.

Wishing you the largert success, I am truly yours.

ELIHU BURRITT.

If a father wishes to give his son a legacy that will endure while life exists, let him send him to an institution where he can obtain a general practical business education, and he will have the satisfaction of knowing that he has given him that which is better than houses, lots or farms, or even gold or silver; these may take wings and fly off suddenly, but this knowledge will endure while life and reason exist.—[Extract from Hon. Horace Mann's Letter.

Ornamental Trees at the Mission Dolores.

We received the following communication a few days since and gladly give the reply:

SAN FRANCISCO, January 26th, 1865.

EDITOR CALIFORNIA FARMER:

Will you please inform me, through the columns of your ever-welcome paper, what kind of a tree would be most likely to flourish and thrive at the Mission Dolores. I have a piece of property on the side-hill; I expect to make a homestead of it and would like to plant a few hardy ornamental trees that would help to beautify the spot. *I cannot afford to bestow much attention on the grounds*, so please tell me of something that will help to adorn a poor man's home, and oblige, yours,

FAIRMOUNT.

"Fairmount" says he lives on a "hill-side," he should therefore copy Nature; let him take a ride into the interior of our State a *single day*, and take a lesson from Nature. See how Nature plants a "hill-side," always different from a plain, and with different trees and shrubs; so should those who live on "hill-sides." Would our correspondent make *his* "Homestead" a Fairmount, indeed? Then he *must* bestow *attention* on the *ground;* must prepare it well as a *foundation*, then what is planted will thrive and grow. Could we see the plan of the grounds we could better tell as to the character of trees and shrubs, for according to the extent of the ground, should be the size of trees, when grown—to illustrate: No one would wish a tree forty feet high in a garden spot only ten feet square; so no one would be satisfied with a lilac on a ten acre lot. But supposing "Fairmount" to have a pretty homestead—same 100-vara lot or so—we would recommend to him, as a class of trees, the elm, ash and maple, interspersed with ever-greens—our own species some of the best—with that beautiful tree the Eucalyptus, and that graceful evergreen Cupressus Mycrocarpia. Cherry-trees are beautiful, as an ornamental tree, they are good form and when in bloom one of the finest in a group.

If the grounds are extensive and undulating, clumps of trees and shrubs should be scattered in those points that would please the eye when looking from the different rooms of "Home."

We would gladly aid "Fairmount," if he would favor us with a call, and show him drawings that would not only please but aid and interest him.

KIND WORDS TO THE FARMER.—We have carefully treasured the kind notices bestowed upon this Journal, for its Twelfth Year. We do appreciate them and shall not fail to regard them as evidences of a noble and generous spirit. Those Journals that please to notice our *Premium List, as advertised*, we will reciprocate them, to the fullest extent, in kind.

Agricultural Department.

Fuel for the Million.

We take the following from the N. Y. Tribune. These are only extracts of a long article. We desire our readers to note what the writer says about *peach tree firewood*—a subject which this journal urged many years ago—and some of our astute journals ridiculed the idea:

The question of what is to be done for fuel seems a strange one for people to discuss, whose immediate ancestors were engaged all their lives at hard labor, cutting down forests, and burning the trees upon the ground. Their whole object was to destroy. Now the question is, how to save timber and fuel trees. The great forests are being swept off at a rapid rate. In the few years that the Erie Railway burned wood, the hills upon each side were almost denuded. It is so everywhere along railways. It is estimated that the railways of Ohio have consumed wood at the rate of twelve thousand acres per annum. It would require a period of thirty years to re-grow this wood. Independent of railways, the ordinary consumption of families has so far stripped some portions of the country, where coal is inaccessible, that fuel is now a very serious item in the account of family expenses.

* * * * * *

The same economy that many a farmer practices in the apparel of himself and family, if exercised in the economy of fuel, would enable them to enjoy many comforts of which they are now deprived.

But this is not all. Economy in growing and saving fuel trees enhances the value of the farm.

Many a farm is now greatly deteriorated in value by the annual destruction of the timber land. It is there that economy is most needed. It should be rigidly practiced upon all farms where timber or fuel trees are sparse. Wherever forest trees are not abundant, it is not only economy, but duty, to carefully select all the trees to be cut. I used to go through the wood-lands, months in advance of the choppers, and select and mark the trees that might be felled. As long as there were wind-falls, I would allow no tree to be cut. By care of a small wood lot, timber was grown faster than it was consumed. We not only cut away old and decaying trees, but we preserved the young shoots, and they soon grew into a thick forest. A beautiful grove now stands upon the border of one of the western prairies, where there was nothing but a few old, scattering trees and "stood grubs," thirty years ago, simply because I preserved the young shoots until they got a fair start.

* * * * * *

Where I sit now writing, the bad economy of cutting the trees from rocky hill-sides and tops is everywhere apparent. Land has been denuded that is not worth a dime an acre for its annual pasturage. At the same time other tracts in the neighborhood still bear the original growth, which are the best lands on the farms. They were left to grow trees, in some cases because most distant from the dwelling, and in others because the land was a little swampy—the very spots that should have been cleared and drained, and the rocky hill-sides left to grow trees.

In one instance, within sight, there is a large farm-house upon the apex of the highest land in the vicinity. It is true that the owner can, from his door-step, look down upon the Palisades of the Hudson on the one hand, and Long Island Sound upon the other; but O, how bleak in Winter! If that house had been located upon the hill-side, and that hill-top left to grow its native oaks and chestnuts, the value of ten acres of such forest would enhance the value of that farm ten thousand dollars, to say nothing of its value to the rest of the neighborhood as a "wind-breaker." It was bad economy to cut the timber from that hill-top. There are many similar places all over the country. It would be good economy to replant a great many hill-tops.

The best season to fell trees for timber or fuel is still a mooted question. It is pretty well settled that it lasts best where liable to decay if cut and seasoned before using, when the bark peels freely. The advocates of cutting at that season also contend that it also makes the best fuel. Still, as that is such a busy season on the farm, it is possible to overbalance the economy by the misappropriation of labor. So it is probable that in point of economy, the best time to cut fuel is in early winter, before much snow falls to impede operations, or prevent finding the wood that is down and should be first consumed. * *

I have heretofore recommended prairie farmers to plant peach trees for fuel. I reiterate that advice, and include a great many others beside prairie farmers. Plant peach pits in nursery rows, and set the trees in position at one or two years of age, and if any of them happen to bear good fruit, let them bear; but if they do not, you will have some cheap, good fuel.

I have also recommended the planting of ailanthus seeds to grow fuel. I reiterate that advice. The trees will grow where no other tree will live, and the wood is good fuel. The boles of the trees make durable fence posts, if cut in Summer and thoroughly seasoned before setting in the ground. When the boles are large enough to saw into boards, they will make beautiful cabinet work or inside finishing.

I close with an earnest appeal to American farmers to plant trees, and to treat those now growing as though they were living representatives of Heaven's greatest and best gifts to earth.

Ought Farmers to Labor?

I have been much interested by the discussion which has been carried on in your paper regarding, the question "Ought Farmers to Labor?" Like most questions which have two nearly equally balanced sides, there is much truth on both. It depends almost entirely upon the amount of labor which is necessary to conduct the business of his farm. If a farmer does not absolutely require the service of two men during the year, and yet his labor is more than one man can perform, I think he is much wiser if he employs but the one, and does the balance of the labor himself. But, if on the other hand, he requires the service of three or four men steadily, the amount of general oversight which is required is sufficient to employ his whole time, and he is as industrious a man as he who takes the plow by the handle and drives himself. Your correspondent S. W., seems to think otherwise, in his article of November 10th; although I believe that he intends to rebuke more especially the idea which J. B. holds out in his Oct. 20th, which implies that it is degrading to labor; and still farther that a farmer and gentleman could not be synonymous terms. Not, indeed, in so many words, but the tenor of that article as well as the one of Dec. 8, suggests it. Men of capital, engaging largely in farming, owning 500 or 1,000 acres, are too apt to look with contempt, as they roll by in their carriage, upon the smaller farmer, who, seated on his team wagon, is honestly endeavoring, may be, to muddle out of debt, which he has had to incur in purchasing his farm. And therein these same men of capital show their own ignorance and narrow-minded prejudice in placing the dollars as the standard of worth. "All men are born free and equal," say the formers of our laws; and let not those suppose, who are born with a golden spoon in their mouths, that their lot is more enviable than he who comes into the world with nothing but his hands to enable him to earn his bread. Where much is given much is required; and where a man has wealth and an educated mind, far heavier is the load of debt which is resting upon his shoulders, than upon the laborer, who owning and knowing almost nothing goes forth to his toil with scarcely a care. Every man is bound by a mortgage according to his capacity. So I see no reason why one can rejoice more than another.

I may have a little more to say to my fellow-farmers on a kindred topic, but as my article is quite long enough, I will continue another time.—[W., New Jersey, in Country Gentleman.

The Value of Corn and Corn Meal.

The Shakers of Lebanon, Conn., in their communications to the Department of Agriculture, at Washington, make a statement relative to the value of this grain for food of stock—both conditions—ground and whole. Their report is found in the volumes of the Department, as follows:

The experience of more than thirty years leads us to estimate ground corn at one-third higher than unground, as food for cattle, and especially for fattening pork; hence it has been the practice of our society for more than a quarter of a century to grind all our provender. The same experience induces us to put a higher value upon cooked than upon raw meal; and for fattening animals, swine particularly, we consider three of cooked equal to four bushels of raw meal. Until within the last three or four years, our Society fattened annually, for thirty years, from forty to fifty thousand pounds of pork, exclusive of lard and offal fat; and it is the constant practice to cook the meal, for which purpose six or seven potash kettles are used.

Notwithstanding that there is abundance of testimony to the same effect, there are a great many farmers who are in the habit of practicing the wasteful method of feeding corn in the ear to hogs, horses, cattle, etc., or of feeding raw meal in fattening stock. The testimony above given, with much other like it, would certainly, if duly considered, put an end to such wasteful methods of feeding. Many would probably give up feeding raw meal were it not that they find the cooking of it quite a troublesome process. To such we would suggest that there is an easy method which is nearly as good as thorough cooking, and which consists in pouring boiling water on the meal that is to be fed twelve or twenty-four hours afterward. This plan we have adopted for years in feeding swine and milch cows, and in finishing off the fattening of beeves, and are sure that meal thus prepared is worth twice as much as raw meal.

INDIAN MEAL AND CORN BREAD.—A bushel of corn, says the Michigan Farmer, contains more nutriment than a bushel of wheat; but corn meal should not be ground fine, as it will not keep sweet. There is no grain that can be put to so many good uses and served up in so many different ways as corn and corn meal. First we have green corn, roasting ears and soup in the early, and the dried corn soup and hominy, the balance of the year. These dishes every good housekeeper knows how to prepare, being the most simple in the culinary art. And then by grinding it into meal, what visions of delicious eating float before the eyes. First we have the corn cake, made of meal and water, and a little salt, if you are too poor to use eggs and milk, mixed into a dough and baked on a griddle. Then corn bread, which can only be made properly by about one housekeeper in ten. Then mush and milk, and fried mush. We have never seen the individual that did not like one or the other. Many fail in making good mush by not boiling it enough. When it is merely scalded it has a raw taste. Then there is a very good corn meal pudding, made by stirring the meal into scalded skim milk, until it is as thick as gruel, and when cool, add ginger, cinnamon, nutmegs, and cut suet, and some raisins, citron, peaches, and a fine cut apple. It should bake an hour or more, according to size. This is a good pudding. And then see into how many dishes corn becomes a palatable and favorite mixture. It is the cheapest and most wholesome food that man can live on, and should be on the table of both rich and poor more frequently than it now is, in some of its many forms.

Farming Tools.

With a properly constructed tool, kept in the best condition, work can usually be well and conveniently done in a reasonable length of time. With a poor tool, in bad condition, the same amount of work will be ilfy done in twice or thrice the time. Such being the case, it does not require long to come to the conclusion that poor tools are among the most expensive things that any cultivator of the soil can have on his premises. It costs much time, much useless hard work, much vexation to keep them. Suppose a farmer has a plow of such a pattern that it does not turn over the soil properly, and requires much more force to pull it through the soil than if it were well made Here is a loss from not having his land plowed properly, which will show itself in meager crops; a loss of time in not doing as much work in a day as could be done with a good plow; a great loss from the needless expenditure of strength on the part of the team, using it up, and decreasing its value; and a great loss, though not easily computed in dollars and cents, from the vexation and mental depression, caused by working with poor tools. Suppose a hoe is ill-shaped and rusty, it is evident that loss results from the less amount of work done with it. Suppose a harness is so made that it galls the horses, loss inevitably ensue. Numerous other examples might be mentioned where it is plain that poor tools are expensive things.

The Winter is the proper season for making arrangements for the next Summer's tools. Every farmer knows how many and what kinds of tools, he can profitably use. He can now manufacture such as can be made in his own workshop, examine catalogues and price lists of manufacturers, look over the stock which dealers have on hand, inquire of his neighbors as to the merits of implements he has not tried, and purchase and get tools home ready to commence work in the Spring. By so doing he will have his tools on hand when wanted, and will not have to leave his farm in the hight of the working season to select and bring home the implements for carrying on his work.

Farmers, Save Your Straw.

Large quantities of grain straw are annually burned on our fields, and the very owners lose cattle the same winter for want of food. Hear what a Michigan farmer says:

I have saved from one to four tons of hay every Winter for the last eight years, simply *by cutting straw for my cows*, three or four in number, wetting it in *hot water*, and mixing a very little bran with it, say about one quart to the bushel, or just enough for a flavoring to make them eat it. This makes a most excellent kind of food for any kind of stock, but cows in particular will do better and give more milk when kept on this than they will if fed on the best of dry hay alone. It is well to put in a spoonful of salt to the bushel, or one teaspoonful to each cow, to make it more palatable, as also for the health of the animal. This also makes good feed for working teams. By having their grain ground into fine meal, and mixed with cut straw, they will do better than on the same amount of grain with the best of hay. This I have tried to my satisfaction, and if any one doubts it, he has only to try it and be convinced. It certainly requires more labor to care for stock in this way, but every man works for profit, and this I consider to be the most profitable work a farmer can do, especially in the Winter season.

Profits of Raising Sorghum.

Will it pay to raise Sorghum? This question is often asked by people who are unacquainted with raising Sorghum, but ask a man who has raised it, and the answer is, "*It will pay.*" I have raised cane and made molasses for the last four years. The smallest yield that I have had was 60 gallons per acre, and the greatest 244. Last fall we made 70 gallons for one man, which he said was raised on one-fourth of an acre of ground; and for another man, who had one-half of an acre, 71 gallons. This last man lives within half a mile of the village, and sells his molasses to his neighbors, by whom it is preferred to southern molasses, for $1 25 per gallon. Now the best yield, 280 gallons per acre, by giving one-half for making, at $1 per gallon, will be $140 per acre. Take the smallest yield, 60 gallons per acre, and allow one-half for making, leaves 30 gallons, or an income of $30 per acre. From the above any one can readily see whether it will pay to raise Sorghum or not.—[Almon Maltby, in the Western Rural.

HOTELS.

REVERE HOUSE.

Second Street, Opposite the Court House,

Napa City,

GOODRICH & DEMMITT, Proprietors.

THE UNDERSIGNED, having taken the above named well-known Hotel, and fitted the same up in superior style, would respectfully announce to the public that they are prepared to furnish excellent accommodations to permanent and transient guests.

The house is built in modern style, and the rooms are large, airy and pleasant. Families can be accommodated with elegant suits of rooms at reasonable rates.

THE TABLE AND BAR will be provided with all the substantials and luxuries to be procured in this market.

The location of the house is central and convenient. A fine Livery Stable adjoins the premises, and the Telegraph Office is next door. The offices of all the stages running out of town are in this Hotel.

☞No effort will be spared to make the Revere House one of the best Hotels in the State. Public patronage solicited. GOODRICH & DEMMITT.

Napa, Oct. 1st, 1864. 13

HORACE WATERS, Ag't, No. 481 Broadway, N. Y

THE DAY SCHOOL BELL.

40,000 copies issued. A new Singing Book for Schools and Seminaries, called the Day-School Bell, is now ready. It contains about 200 choice songs, rounds, duets, trios, quartetts, and choruses, many of them written expresaly for this work, besides 32 pages of the Elements of Music, which are easy and progressive.

Among the large number of beautiful pieces may be found, "Uncle Sam's School," "Don't you hear the children coming," "Always look on the sunny side," "The little lass," and "Little Lad," "Oh, if I were a little bird," "Bird of beauty," "Pretty pair tree," "Anvil Chorus," "Meet me by the running brook," etc. It is compiled by Horace Waters, author of "Sabbath School Bell," Nos. 1 and 2, which have had the enormous sales of 825,000 copies. Prices—paper covers, 25 cents, $20 per 100; bound 30 cents, $25 per 100; cloth bound, embossed gilt, 40 cents, $35 per 100. 25 copies furnished at the 100 price. Mailed at the retail price.

SABBATH SCHOOL BELL, NO. 1,

contains 144 pages, and nearly 200 tunes and hymns, and is the most popular S. S. Book ever issued. Among the most popular pieces are "Kind Words," "Eden Above," "Christian Hero," "Beautiful Zion," "I ought to love my Mother," "The Angels told me so," "In the Light," "Rest for the Weary, etc. Prices—paper covers, 20 cents each, $15 per 100; bound 25 cents, $20 per 100: clothbound, embossed gilt, 30 cents, $25 per 100.

SABBATH SCHOOL BELL, NO. 2,

is an entire new work of 192 pages, and nearly two hundred and twenty-five tunes and hymns. One million of these Bells have been issued and are now ringing through this and other countries. Among the many choice pieces may be found, "Shall we meet beyond the River?" "There is a Beautiful World," "Sorrow shall come again no more," "Don't you hear the Angels coming?" "Thou, God, seest me," "Sabbath Bells chime on," etc. Prices of Bell No. 2. are same as Bell No. 1. Both numbers can be obtained in one volume, price, bound copy, 40 cents, $35 per 100; cloth bound, embossed gilt, 50 cents, $45 per 100. 25 copies furnished at the 100 prices. Mailed at the retail price.

WATER'S CHORAL HARP.

A new Sunday School Book of 160 pages of beautiful hymns and tunes. It contains many gems, such as "Shall we know each other there?" "Suffer little children to come unto me," "The Beautiful Shore," "Oh, 'tis glorious," "Leave me with my mother," "He leadeth me beside still waters," etc. Price, papers covers, 20 cents; $15 per 100. Bound, 25 cents, $20 per 100. Cloth bound, embossed gilt 35 cents, $30 per 100. Mailed at the retail price. It is edited by HORACE WATERS, author of "Sunday School Bells," Nos 1 and 2, which have had the enormous sale of over 800,000 copies.

Just published by HORACE WATERS, No. 481 Broadway, New York.

THE NEW PATRIOTIC SONG BOOK

contains 96 pages of songs, duets, and choruses, both sacred and secular, including 14 pages of prayers for sick and dying soldiers, and soldiers' Scripture Manual. It is well suited for social singing, as well as Sabbath worship. Among the many beautiful pieces may be found, "Where liberty dwells is my country," "The Christian Hero," "Three cheers for our Banner," "Come sing to me of Heaven," Columbia, the Gem of the Ocean," "Freeman's Gathering," "Columbia's King forever," "Marching Along," etc. Prices—paper covers, cents, $10 per 100. Mailed at retail prices.

THE HARP OF FREEDOM

contains 32 pages of songs, duets, and choruses for Freedom. Among the choice pieces we would name, "Fair Freedom's morn," "O let my people go," "Over the mountain," "They worked me all the day," etc. Price 5 cents single, 50 cents per dozen, $3 per 100; postage 1 cent each

RUTH: A SACRED CANTATA

contains 126 pages. Words by Rev. Sidney Dyer, music by Prof. Cull. This is an excellent book for concerts for the young. Prices—paper covers, 20 cents, $15 per 100; bound 25 cents, $20 per 100.

THE REVIVAL MUSIC BOOK

contains 73 pages of tunes and hymns, designed for revival prayer, and conference meetings. Price in paper covers single copies 10 cents, $8 per 100. Mailed at the retail price

THE ATHENÆUM COLLECTION

contains 512 pages of tunes and hymns, new and old of the choicest kinds, for church, Sunday school, revival, missionary, temperance, prayer, and conference, and all kinds of sacred and social meetings. The music in this book has life and animation in it, like "Shining Shore," "Rest for the Weary," "Shall we know each other there?" "Shall we meet beyond the River?" "There is a Beautiful World," "Kind Words," "Sweet Hour of Prayer," "There is a Land of Love," "Suffer little children to come unto me," "God save the Nation," etc. Prices—single copies, bound, 65 cents, $55 per 100; cloth bound, embossed gilt, 75 cents, $65 per 100 Mailed at the retail price.

HORACE WATERS, Ag't 481 Broadway, New York,

Publisher of the above Books.

NEW INSTRUMENTAL MUSIC,

"Idlewild," "Polka Caprice," by M. Keller: "Morning Prayer," by W. F. Muller; "Summer House of Roses," gallop, by Mrs. Parkhurst; "Le Viri Polka;" "West Point March;" 25c each. "Omstepe Waltz;" "L'Armetee Waltz, "Frederica Waltz," J. G. Bernard, 40c each. "We are coming Father Abraham," "Always look on the Sunny Side," "Brilliant Variations," by Charles Grobe, 50c each. "Shall we know Each Other There," for Guitar, by Bloomer, 25c. "Sunny Side," set of 20 easy arrangements for the piano, 10 by James Bellak, and 10 by Mrs. Parkhurst, 15c each. Mailed free.

HORACE WATERS, Publisher, No. 481 Broadway.

NEW VOCAL MUSIC.

"Land of the Brave and Free," Rev. G. S. Plumley; "Your Fortune is too Small for Me," Comic Song, Maurice; "I will Wait at the Gate for Thee," E. Holden; "We parted with a Cheerful Smile," M. Keller; "One by one the Stars of Evening," "The Flowers Bloom in Linden Vale," S. Lawrence; "The Morning is Dawning," H. S. Leland; "There is a Beautiful world," "Shall we Meet Beyond the River?" "The Angel's are Hovering Near," "The Year of Love," "How Softly on the Bruised Heart," Mrs. Parkhurst; "Kindly Words and Smiling Faces," J. R. Thomas; "For the Dear Old Flag I Die," "Oh, Why am I so Happy?" S. C. Foster; "Sabbath Bells Chime On," Lowry, 25 cents each, mailed free.

Miscellaneous.

You Can Take My Hat.

We were once coming over the railroad from Washington city to Baltimore, when we observed a peculiar sort of man sitting hard by—a tall, slim, good-natured fellow, but one who somehow seemed to bear the impress of a person who lived by his wits, written upon his face. A friend who was with me, answered my inquiry as to who he was and at the same asked me to keep between the object of my notice and himself, lest he should come over to our seat, as my companion said he knew him but did not wish to recognize him there.

"That is Beau H——," said he "a man that is universally known in Washington as one of the most accomplished fellows in the city, always ready to borrow of, or drink with you. He never has any money, however, and I am curious to know how he will get over the road without paying, for he will surely do it some way."

"Probably he has got a ticket—borrowed the money to buy it with, or something of that sort," I said.

"Not he. Beau always travels free, and boards in the same way. He never pays money, when wit or trick will pass current in their place," said my friend.

"What a shocking bad hat he has got on," I observed, noticing the dilapidated condition of his beaver.

"It's some trick of his, doubtless; for the rest of his dress, you will observe, is quite genteel."

"Yes, I see."

My friend went on to tell me how Beau had done his tailor out of a receipt for his last year's bill, and the landlady at his last boarding place, and various other specimens of his ingenuity and wit.

"He owed me ten dollars," said my friend, "but in attempting to collect it of him one day, I'll be hanged if he didn't get ten more out of me; so I think I shall let the matter rest there, for fear of doubling the sum once more."

At this moment the conductor entered the opposite end of the car to gather the tickets from the passengers, and give them checks in return. Many of them—as is often the case with travelers, who are frequently called upon, on populous routes, to show their tickets—had placed theirs in the bands of their hats, so that the conductor could see that they were all right, and not trouble them to take them from their pockets at each stopping place.

I watched Beau to see what his expedient would be to get rid of his paying for his passage. As the conductor drew nearer, Beau thrust his head out of the car window, and seemed absorbed in contemplating the scenery on that side of the road. The conductor spoke to him for his ticket—there was no answer.

"Ticket, sir," said the conductor, tapping him lightly on the shoulder.

Beau sprang back in the car knocking his hat into the road, and leaving it in one minute nearly a mile behind. He looked first at the conductor, then out of the window after his hat, and in a seeming fit of rage exclaimed:

"What the d—l do you strike a man that way for? Is that your business?—Is that what the Company hires you for?

"I beg your pardon, sir; I only want your ticket," repied the condutor, meekly.

"Ticket! O, yes, it's all very well for you to want my ticket, but I want my hat" replied the Beau, bristling up.

"Very sorry, sir, really, I merely wished to call your attention, and I took the only means in my power," said the conductor.

"You had better use a cane the next time you wish to attract a person's attention, and hit him over the head with it, if he happens to be looking the other way!" replied the indignant Beau.

"Well, sir, I will apologize to you again, if you wish. I have done so once already," said the now disconcerted condutor.

"Yes, no doubt, but that don't restore my property; that's gone."

"Well, sir, I cannot talk any longer, I'll take your ticket, if you please," said the conductor.

"Supposing you stop the train and go back and see!" said the hatless Beau, with indignant scorn depicted on his face.

"Well, sir, I shall pass you free over the road, then," said the conductor, attempting to go about his duty.

"The price of a ticket," said Beau, "is one dollar; my beaver cost me a V. Your good sense at once shows you that there is a balance of at least four dollars in my favor."

The conductor hesitated. Beau looked like a gentleman, to one not perfectly posted up in the human face; he was well dressed, and his indignation appeared most honest.

"I will see you after I have collected the tickets," replied the conductor, passing on through the car.

Beau sat in silent indignation, frowning at every body until the official returned, and came and sat down by his side. Beau then in an earnest undertone, that we could overhear occasionally, talked to the conductor like "a Dutch uncle," and we saw the crest-fallen man of tickets pay the hatless passenger four dollars.

The trick was at once seen through by both my friend and myself, and the next day, over a bottle of wine at the Monument House, Beau told us he was hard up, hadn't a dollar, picked up an old hat at Gasby's hotel in Washington, put his cap in his pocket, and resolved that the hat should carry him to Baltimore; and did, with four dollars into the bargain.

THE MOISTURE ON A LAMP CHIMNEY.—Probably most of our readers who use petroleum lamps have observed that when the lamp is first lighted the luster of the chimney is dimmed, and the flame is obscurely seen, with the outlines not sharply defined. In a minute or two the dimness disappears, and the glass presents its usual clear and transparent appearance. This phenomenon is doubtless produced by the deposit of water upon the inner surface of the chimney. Petroleum is composed of hydrogen and carbon, and both of the elements in burning combine with the oxygen to form carbonic acid, and the hydrogen combining with oxygen to form water. Both, on their first production, are in the gaseous form, and the carbonic acid being incondensible, except under very great pressure, passes off as an invisible gas; but the water, though at first in the form of steam, requires to be cooled only down to 212 deg. to be condensed into the liquid form. As it comes in contact with the cold walls of the chimney, it is cooled to this point, when it deposits itself as a fine dew over the inner surface of the glass. This water, being very pure, transmits light more freely than the glass, but being deposited in hemispherical drops, the curved surfaces so refract the rays of light from their straight track as to prevent the formation of a clearly-defined image in the eye. The thin film of dew, though translucent, is not transparent. So soon as the heat of the flame rises the temperature of the chimney to 212 deg., the water is re-evaporated, and passes off as invisible steam, leaving the glass transparent as before.

—C. P. Williams, a distinguished Philadelphia mineralogist, has recently arrived in Nevada, on a tour of inspection.

—A man's good breeding is the best security against other people's ill manners.

A HINT TO GARDENERS.—As our houses and gardens are always infested with vermin, it is satisfactory to know that benzine, an article become sufficiently well known as a detergent, is no less efficacious as an agent in insecticide. One or two drops are sufficient to asphyxiate the most redoubtable insect pest, be it beetle, cockchafer, spider, slug, caterpillar, or other creeping thing. Even rats and mice will speedily decamp from any place sprinkled with a few drops of the patent benzine. A singular fact connected with this application of benzine is, that the bodies of the insects killed by it becomes so rigid that their wings, legs, etc., will break rather than bend, if touched. Next day however, when the benzine has evaporated, supleness is restored.—[Western Rural.

EDUCATIONAL,

Miss Lammond,

LATE PRINCIPAL OF

BENICIA SEMINARY,

HAS THE PLEASURE TO ANNOUNCE THAT she has purchased the Seminary for Young Ladies known as the

CALIFORNIA COLLEGIATE INSTITUTE,

For Young Ladies,

No, 64 Silver Street,

SAN FRANCISCO, CAL.,

formerly under the control of Mrs. M. B. SWEDENSTIERNA, and has removed there with her entire corps of

Superior Teachers and Professors.

The New Term Commenced

January 4th, 1865.

The location of this Institution (on the suburbs o the city) commands at once for its boarding pupils, the retirement of a country life, with the advantages of the finest professional talent from the city.

As Miss Lammond desires to make this a permanent Institution, no efforts will be spared to make it worthy of the patronage which has been so liberally extended to her during the past four years.

As the class of Boarding pupils is nearly filled, those desiring admission will find it necessary to apply early.

For further particulars, Catalogues may be obtained by calling upon or addressing

MISS M. LAMMOND,
10 Principal.

Oakland Seminary for Young Ladies.

Mr. G. M. Blake.....Principal.
Mrs. I. G. Huggins.....Associate Principal.

THE SEVENTH YEAR OF THIS INSTITUTION COMmenced on

MONDAY, JANUARY 9th, 1865.

For Catalogues and other particulars apply to the Principal, corner of Eleventh and Washington streets, Oakland.

Catalogues can also be obtained at the Book Stores on Montgomery street, San Francisco. 23tf

EDUCATIONAL.

PACIFIC

National Business College,

SAN FRANCISCO, CAL.

Practical, useful Education for Young Men, Boys, and Men of Middle Age.

A BUSINESS EDUCATION FOR A BUSINESS MAN—THE RIGHT KIND OF AN EDUCATION FOR YOUNG MEN.—THIS IS THE BEST PLACE FOR MERCANTILE BUSINESS IN THE WORLD.

IMPORTANT TO THOSE WHO CAN DEVOTE A FEW WEEKS OR MONTHS TO STUDY, AND TO PARENTS WHO HAVE SONS TO EDUCATE.

THE BEST COURSE OF STUDY AND THE GREATEST AMOUNT OF PRACTICAL AND USEFUL INFORMATION ACQUIRED IN THE SHORTEST POSSIBLE TIME AND AT THE LEAST EXPENSE, TO INSURE SUCCESS IN LIFE.

"Acquire a Good Commercial Education, and you will as surely succeed in Life as that cause produces effect."—Abbott Lawrence.

A MODEL COMMERCIAL COLLEGE.

THIS NOTICE IS INTENDED TO GIVE FULL INFORmation of the course of Study and operation of the Pacific National Business School, San Francisco,

We respectfully solicit from Young Men and Men of Middle Age, who would succeed in business, and Parents and Guardians who have Boys to educate, an examination of our system of Practical, Useful Education, the superiority it possesses over every other institution of learning on this coast.

This School claims superiority and great merit over other institutions professing to teach the Commercial branches, by its system of combining THEORY and PRACTICE, on the London Corn Exchange principle, it being done in no other School on this coast.

COURSE OF STUDY.

The plan adopted in teaching combines PRACTICE with THEORY; instead of being confined to Text Books, the pupils are exercised in making original entries of every-day business transactions; journalizing, posting, balancing accounts, opening and closing a great variety of different sets of Books, both for individual and partnership business, where the business has been prosperous or adverse, thus qualifying the student for entering into the practical duties of the accountant in any kind of business.

THE COURSE OF INSTRUCTION

Consists of Double-Entry Book-keeping, embracing Wholesale, Retail, Commission, Manufacturing, Banking, Steamboating, Railroading, Individual, Partnership, Joint Stock, Compound, Company, Mining, Ranching, Farming, etc. In the routine of practical instruction the pupil becomes familiarized with changing books from single to double entry, changing stock books to partnership, and every form and principle known in well regulated establishments.

PENMANSHIP.

The beautiful and easy system of specimen Penmanship is taught in this College, and the only place where it is taught on this coast.

CORRESPONDENCE

Is carefully explained, and rules and principles are laid down, the observance of which will lead to the highest attainment in this art.

It is known to all that there is a great deficiency existing in this commercial branch.

BUSINESS ARITHMETIC.

This is a branch of the greatest importance, and you can be assured will not be neglected.

LECTURES

Are given to the students on Commercial Law, Nature and Causes of Wealth, Political Economy, Advertising, and general topics relating to success in business.

DIPLOMAS.

Those completing the course and passing a satisfactory examination before the Examining Committee, will receive Diplomas of the Institution.

THERE WILL BE NO VACATIONS.

Each pupil receives individual instruction, and persons can therefore rater at any time.

TERMS.

Scholarships are issued which give the scholar the privilege of reviewing the course at any future time, free of charge, for SIXTY DOLLARS, with a deduction of FIVE DOLLARS when two enter from the same family or the same place at the same time. When four enter at the same time from the same place, TEN DOLLARS will be deducted from each scholarship.

THE TIME REQUIRED

To complete the course depends somewhat upon the previous education and ability of the student, usually from ten to sixteen weeks, scholarships granting the holders the privilege of completing the course regardless of time.

A common school education is all that is necessary to enter the course of this College advantageously.

For further particulars, call at the College, 747 Market street, or address

M. K. LAUDENSLAGER,
President Pacific National Business College.

Santa Clara College.

THE FOURTEENTH ANNUAL SESSION OF THIS INstitution will commence on MONDAY, August 29th. The plan of instruction embraces two regular courses—the Classical and the Commercial, besides a preparatory Department

FRENCH COLLEGE,

Corner Mason and Jackson Streets,

Principal.....Prof. J. MIBIELLE.

THE CLASSES OF THIS ESTABLISHMENT ARE opened since the 3d inst., and the select and attending scholars receive a solid instruction proportionate to their age and mental facilities.

The programme includes all the branches of tuition fitted for children from 6 to 12 years of age, as the first step for a higher teaching.

The English, French and Spanish Languages are taught practically and theoretically, by competent and special teachers.

Boarders can be accommodated in the establishment, where they will find the comforts and care of a home.

An evening class of French and Spanish is also open for young men every other day, at 7 o'clock, P. M. Call on the Principal from 9 A. M. to 12 M. 1

EDUCATIONAL.

NAPA

COLLEGIATE INSTITUTE.

For Young Ladies and Gentlemen.

NAPA CITY, CALIFORNIA.

NAPA CITY, IN POINT OF LOCATION AND Climate, is unsurpassed in the State. It is about four hours' ride by steamboat from San Francisco, and three by stage from Benicia. There will soon be a daily boat from the former place, and there are now two daily stages from the latter. There are extensive accommodations for Boarders in the College Building, with large and well-ventilated sleeping apartments. Teachers reside in the Building, and will have a constant oversight of the Students who are Bonders.

GOVERNMENT.

Young Ladies will receive no calls from any except Parents and Guardians. Ladies and Misses will not leave the College grounds, except in company with their Instructors. Young Men and Lads are not allowed to lounge about the Stores, Hotels, and Saloons of the village. All pupils are required to attend Church on the Sabbath. Parents will choose the place of worship for their children.

MILITARY DEPARTMENT.

This Department has been opened with a view to the permanent establishment of a Military Academy on this Coast. From three to four years will be requisite to complete the course in this Department. The State has furnished us the necessary equipments for such a school. The Drills will be attended to daily.

TUITION.

Spelling and Reading, per month	$2 50
Common English, with the above, per month	4 00
Higher English, with the above, per month	6 00
Latin and Greek, with the above, per month	8 00
Janitor's Fees, per month	25

EXTRAS.

Modern Languages, each, per month	$2 00
Music, with Piano, per month	8 00
Embroidery, per month	3 00
Painting in Oil and Water Colors, per month	4 00

Piano, Vocal Music, Drawing, and Painting,

Form extra Charges, but there is no extra charge for the

French, Spanish, or German Languages; nor for Plain Sewing and Fancy Needle-Work.

PAYMENTS are required to be made half a Session in advance Pupils will find it much to their advantage to be present at the opening of the Session. 2

Saint Catherine's Academy,

BENICIA, CALIFORNIA.

THE SCHOLASTIC YEAR OF THE SAINT CATHERINE'S ACADEMY, Benicia, commences the

Last Monday in August.

Terms, per annum, $230—payable, semi-annually in advance.

Music, Painting, and Drawing form Extra Charges; also, Books, Stationery, and Physician's Fees.

No deduction will be made to any pupil leaving the Academy before the expiration of the term—cases of sickness excepted.

Foreign Languages, Plain and Fancy Needle-work, form no Extra Charge.

For further particulars, refer to the Superioress of the Academy. 4

S. D. & H. W. SMITH'S

American Organs.

SIBERIA OTT, Wholesale Agent,

748 Broadway, New York City.

THE

MOST PERFECT

AND

BEAUTIFUL

Musical Instrument

IN THE WORLD

FOR THE

American Home Circle.

WITH THE MOST PERFECT CONFIDENCE, we call the attention of the public to the AMERICAN ORGAN, as an instrument long desired in the Family Circle, and with our patent improvements is adapted to all kinds of Music, more especially to Sacred Music, with its sustained tones and harmonies, so much desired and sought for in American homes.

The AMERICAN ORGANS are superior to all other instruments of the kind, in many important particulars.

They are superior in their greater fullness and completeness of tone, volume and power. They are superior in expression, quickness of action, and elasticity of touch, rendering them perfect in rapid movements.

They are superior in quality and beauty of tone, and when controlled by the DOUBLE BELLOWS and BLOW PEDALS, Knee Swell, etc, the most charming effects can be produced, from the softest whisper of the Æolian harp to the full volume and power of the church Organ, thus enabling the performer to give expressions not to be found in any other instruments.

The TREMOLO stop has a pleasing and beautiful variety, sympathetic in quality, appealing to the tender emotions of the soul, producing effects the most charming and soothing. It is universally admired and appreciated. The KNEE SWELL gives the performer full control of the tone, enabling him to graduate from the *Pianissimo* to the *Fortissimo* at pleasure, and combines the effect of the Expression Stop of the French Organ in the AMERICAN ORGAN, more perfectly and easily managed.

With all these combinations and improvements of Double Bellows, Pedals and Swell, the AMERICAN ORGAN excels in Expression, Variety, and Power, and has all the quality and capacity of a full Orchestra, and in the hands of a master is capable of the most complete orchestral effects.

The AMERICAN ORGANS are superior in Mechanical finish of the action and interior portions of the Musical parts. The valves are of material expressly prepared to avoid all sticking, cracking, or decomposition, are thus durable and will be always in order.

The Keys, Reeds, etc, are perfect in their finish, and this gives the quickness and sprightliness of tone, brilliancy, etc, equal in every respect to the "percussion stop" of the French Organs, but not like them in danger of getting out of order.

The AMERICAN ORGANS are by far the most beautiful in exterior finish, forming a handsome piece of furniture for the Parlor, Boudoir, or Sitting Room, occupying but little space, and perfect and complete in every particular.

THE

AMERICAN ORGAN

Makes Home Attractive; and Refines and Elevates the Minds of All.

Beautiful in its Appearance and Effects.

The AMERICAN ORGANS are finished in Rich Rosewood Cases, varnished and polished, forming an elegant piece of Furniture. Also, in Black Walnut Cases, and in Oak, finished in oil, and especially adapted for Churches, Lecture and Lodge Rooms.

They take but little room, are only 35 inches high, and from 34 to 47 inches wide. *They cost but a trifle more than Melodeons*, and yet possess many times their advantages in musical capabilities.

WHOLESALE and RETAIL at very Lowest Prices, with full arrangements to give Dealers Exclusive Territory. Send for Illustrated Price Circular.

The California Farmer.

SAN FRANCISCO:

FRIDAY.....FEBRUARY 10, 1865.

☞ Those who receive a number of the Farmer with this paragraph marked, may understand that it is sent to them for their examination, hoping it will meet their approval and induce them to subscribe, and ask their neighbors to do so.

Postmasters and others, who may receive the paper, will oblige us by soliciting subscriptions, or putting it in the hands of those that will. Subscriptions may commence at any time.

Send for Sample Papers and get up a club. Address

Publisher California Farmer, San Francisco.

TERMS OF ADVERTISING.

The charge for Advertising in the CALIFORNIA FARMER (payable in advance), is **One Dollar** for five lines, or less of space, in nonpareil type, for one insertion, and ten cents a line for any larger space. Each subsequent insertion half these rates. This it is believed affords the cheapest and best medium of reaching the Agricultural community on this coast. As heretofore, the right is reserved to reject any advertisements deemed objectionable.

Purchasing Agency.

Having had the experience of over thirty years in dealing in Trees, Plants, Seeds, and Agricultural Implements, we feel that we are fully competent by our experience in purchasing such articles to make a saving of from five to fifteen per cent for the great mass of purchasers. We will therefore offer to make purchases for all who wish our services, of any of those articles named, or for any articles of merchandise for our Farmers or Ranchmen, and ship the same as they shall direct.

In order that we may do their business in the most satisfactory way for them and ourselves, we shall wish that all who send orders should be as explicit as possible as to their wants—describing as minutely as they can; and, where they desire our judgment, we will do our best to suit them.

Our charge will be Five per cent, together with the cost of packing, freight, drayage, etc. Orders should inclose satisfactory references or the Cash; or bills could be sent by Express, to be collected on delivery.

We shall be happy to attend to the purchase and shipment of Trees, Seeds, Plants, etc., as this is our especial "hobby," and we know we can satisfy all that send us their business attend to.

TO AGRICULTURAL SOCIETIES ABROAD

Exchange of Seeds, Books, Etc.

Having established large and spacious Reading Rooms, in this city, which contain Libraries, Cabinets, and hundreds of Newspapers, all free to those who wish to enjoy the benefits thereof, we now ask coöperation from all Agricultural Associations in the Old States and Europe, for the *Exchange of Seeds, Specimens, Books, Etc.* We shall be happy to reciprocate any and all favors, and comply with any direction made to us connected with such an enterprise.

Traveling Agents Wanted.

We want four or five good men, who are qualified as practical thinking men, to travel, take notes of Agriculture, and canvass the State in relation to its growth and progress. To men qualified for such business, men with good qualifications, a good offer will be made. *None need apply who are not familiar with the principles and practical working of Agriculture,* for we cannot believe that men that don't feel an interest in such cause can ever be successful in such a work.

☞ Take a Copy.—Are You a Subscriber?

We have distributed many thousands of copies of this journal during the Fair Season, and we have a just reason to hope that among these thousands we shall find many persons who will desire to become subscribers to this paper, now the oldest newspaper of the kind on the Pacific coast, a journal, too, that has been wholly devoted to the Home Interests of our State. Those who desire it, in our city, can have it left at their residences by a carrier, every week. See terms at head of column.

THE CALIFORNIA FARMER READING-ROOM AND MUSEUM OF NATURAL HISTORY.

20 Clay street—Marble Building—Up Stairs.

The Farmer's Headquarters.

The Editorial Rooms and Museum of the Farmer Office are always open, and an attendant ready to make a visit instructive to those who take an interest in the productions of our State. Samples of all productions: grains, grasses, fruits, models, inventions, minerals, and specimens in Natural History innumerable, are constantly being added.

Farmer's Reading-room.

Farmers and Mechanics, from the country, who visit San Francisco, should visit the Free Reading-room and Museum, at the Farmer Office. Members of the Press, and Strangers, are particularly invited to avail themselves of these rooms. Newspapers from every State to which we have access by mails, as well as Foreign Newspapers, Periodicals, and Magazines, are upon file and on the tables for use; a Good Library of hundreds of volumes, with works illustrative of Agriculture, Horticulture, and Floriculture, works for reference upon all Sciences, with a Cabinet of Minerals, Coins, and Curiosities of interest to the Naturalist, to which we invite all.

Immigration Office.

New comers to California can always obtain all needed information about Lands, Farms, etc, at the Farmer's Reading room, 320 Clay street. Most cheerfully we bid all welcome to our Sanctum.

Transactions of Agricultural Societies.

We would ask of those Societies in the Atlantic States and Europe, to whom we send our Journal, to send us the transactions of their several Societies, so that we may give the benefit of their perusal to visitors, from the several States, who are callers at our Reading-rooms. By this means we can lay before them the progress of Agriculture in their former homes, and thus advance the interest of both Atlantic and Pacific States.

☞ SEND MONEY BY EXPRESS.

reason of the present uncertainty of our mails and post office arrangements, we would request those of our patrons who remit us money in letters, to do so through Wells, Fargo & Co's Express, or register them, then they will come safely and promptly. Letters are so long delayed and so repeatedly lost that we make this request—we will cheerfully bear the extra expense.

Patent Rights.

It has been, and will be, one of our specialties to aid all who desire to secure PATENT RIGHTS, and to give them information and assistance in preparing their papers. We can facilitate them greatly in this matter as we have all the Laws and Rules of Action touching these things. Many models can be seen at our Office and Reading-rooms, where all are invited freely.

TO READERS AND CORRESPONDENTS.

We have received a dedicatory song to "Morning and Evening," by "Bethel Bay," for our next.

The Communication from Oregon, on Management of Fairs and Premiums on Sewing Machines, is and will be to those who have read the recent advertisements of the management of that Sewing Machines affair, as explained by the President of the Oregon State Fair, quite an amusing incident—yet there is much to show how such things are done.

We have also received from our correspondent, M. J. U., MSS. copy of the "True Aim of Life," which will appear in Home Department, soon.

We are promised a series of Essays on the Vine, and Wine Making, from a Scientific gentleman, well qualified for the work. They will soon appear.

Distribution of Seeds.—The subscribers to the California Farmer, when they visit the city, are specially invited to our Room, No. 320 Clay street, up stairs, in order that they may receive the Seeds which we are now delivering. They should have these seeds. We distribute to subscribers free of charge.

OUR PREMIUM LIST.

THE TWELFTH YEAR OF THE FARMER.

We ask the special attention of all our patrons and friends to the offering we make in a List of Premiums for our Twelfth Year of the Farmer. We here offer them a good opportunity to supply themselves with a fine collection of the best periodicals in the land in return for a little effort, on their part, to extend the cause of our Journal, the Science of Agriculture and all the interests of Home. We make liberal offers and feel confident that we shall have the pleasure of furnishing many of our friends a goodly number of the best Periodical of the day.

We make this offer with the hope that many of our friends in the country, in places remote from the general circulation of our best Periodicals, will know many persons who would be glad to have such works, were it not for the heavy cost of them. They can now obtain them easily if they will give but a little of their time, interest and influence in extending the circulation of the Farmer among their friends.

These Premiums are open to all. To our friends, Postmasters, News Agents, and all.

We have increased our List, since its first offer, so as to embrace some large and valuable Prizes, with the hope of inducing the Guardians of Home, the Wives and Mothers of those who value the Cause of Education to coöperate with us, by so doing every woman who can secure a List of their friends, can secure a Good Library and a "Sewing Machine," also; and in many localities of our State, where we have never canvassed, we have no doubt many an influential mother can earn, in a few days, one of the best of the Sewing Machines offered by us.

Protestant Orphan Asylum.

This noble Institution held its Fourteenth Anniversary Exercises at Platt's Hall.

This Institution is coeval almost with the history of our Golden State; almost as soon as the flush of the gold excitement had lulled, the hearts of our people turned to the claims of Humanity, and first was that of the homeless orphan—and from that time—the early year of 1851, the Orphans have always been kindly cared for. The exercises of the evening were most deeply interesting. Upon the platform in "a crescent form were arranged the orphaned group," some 150 children; they looked very cheerful and happy, were very neatly dressed, and attended by the Guardians of Asylum. The Hall was crowded by our best citizens, those who have always stood by our best institutions. The crowded hall was a proof that such charities are linked with the hearts of our people.

The order of exercises were as follows: Prayer by the Rev. Mr. Wythe; a song by the Euterpeans was well received; a wee Tom Thumb toddled forward and recited the poem "A Little Child;" after another song, Mr. Rankin read the Report of the Managers—then more singing, and recitations and songs by the Orphans, which were interesting, these were followed by a most earnest, appropriate address of W. H. L. Barnes, Esq. Mr. Barnes was very happy in his remarks, they were to the point—well did he remark, as he pointed to those Orphan Children, then appealing to the wealthy of *to-day*, for their coöperation, ye, who to-day, may be in health, rich, happy, ere another year, Death may make your children orphans; misfortunes make you penniless, and your children may sit here with these little ones, fed, clothed, and cared for, by perhaps, some of the bounty you give now while you are able—such was the sentiment of the speaker, and this should always prompt every one in the bestowment of their charities. Give with the true spirit, and your money will all come back to you and yours sevenfold.

The songs of the children were deeply interesting, and all the exercises were of the highest character. "It was good to be there," and we truly rejoiced to see so very large an attendance. We shall try to publish the reports in full hereafter.

Cotton Culture.

There is considerable excitement at the present time relative to cotton culture, and large companies have been formed for Southern California and Mexico, and the present year there will be quite a number of small plantations made in different parts of our State, particularly down south.

We would here state that the kind of seed planted in the Middle States is what is called the *green seed*, with us here the *brown seed* is most used, this is the seed from our southern *Upland Cotton*, and seed from Mexico. "Sea Island" Cotton will be much planted, and will be a profitable and productive crop to raise.

Cotton in this State should be planted about April or May, to do well, upon thoroughly plowed ground. The ground should be harrowed well and made fine, and the rows should be five feet apart. Our soil is generally rich enough; the soil should be a light alluvial, with a southern exposure; if the land has been closely cropped, give it some good fertilizer—guano is good and cheap.

Plant five seeds in a hill, hills one foot apart in the rows, and cover lightly. When the plants are one foot high, thin out, leaving but one plant, and cultivate as you would corn.

Watchmaking—Removal.—C. Haine, the Watchmaker, recently at 623 Montgomery street, has opened his place of business at 511 Montgomery street, next to the Telegraph Office. Mr. Haine is an artist with a Watch, he knows the movements of a Watch as well as a mother does her child, and can arrange it and put it in order as well. Mr. H. is a man for this business, particularly, and will give all his time to the repairing and regulating Clocks, Time-pieces and Watches, at moderate rates, and is prepared to furnish Watchmakers with all the materials needed for their use.

ARTICLES RECEIVED AT THE CALIFORNIA FARMER EXHIBITION ROOMS, No. 320 Clay Street.

We are indebted to Hon. Isaac Newton, of the Agricultural Department of Washington for a series of valuable Documents—the Bi-Monthly Report of the Department—which we shall take pleasure to distribute; also copies of the most excellent Essay, by Lewis Bellman, Esq., (addressed to the Industrial Classes), on Agricultural Colleges, illustrating the nature and kind of education to be given in Agricultural Colleges, their several kinds and courses of Instruction considered, with a general plan of the College Buildings, etc. This is a valuable Essay, and has been most highly approved of. We shall take pleasure in distributing the copies kindly sent us. Also several copies of the Agricultural Report of 1863—one of the best numbers yet issued from the Department.

Splendid Specimens of Ore.—We have received splendid specimens of *Ore* from the Monitor Ledge, Monitor District—the gleaming ore looking so dazzling—we dare not tell how rich it is, nor how many feet wide, this week; we will consider over it. The sample can be seen at our office.

Those beautiful *Rural Hanging Brackets* for Statuettes, Vases, etc., kindly sent us by Messrs. Miller & McKoon, Florists, opposite the Cosmopolitan Hotel, with the fragrant Boquets, were duly received and appreciated. If those who love sweet Flowers and pretty Vases of rural design would but call there, they would be richly repaid. Miller & McKoon have a very fine collection of Ornamental Plants for decorating *Home*.

We received a valuable parcel, kindly sent to our sanctum by an unknown friend. The gift we truly prize, and shall not fail to remember the giver in our orizons.

Grapes and Grape Vines.

The art of growing vines and making Wine is daily becoming more perfect. It was recommended formerly to plant vines eight feet apart, or 680 vines in an acre; but now after experiments made by planting close, say four feet apart, or 2,722 vines to the acre, it has been found that the latter do the best; to plant them close is very easily done, and involves no great expense. A vine costs no more than one cent to plant will certainly grow and will bear four pounds of grapes the same year. It may be done in the following manner: take a long branch of the old vine, dig a ditch eighteen inches deep and lay the vine in, bend the end to project from the ground two buds, fill the hole full, and your vine will bear from three to four pounds of grapes the same year, next fall you cut the branch from the old stem, and your vineyard of 680 vines is multiplied to 2,722 vines. The reason given by some experienced growers for close planting is that if vines eight feet apart are made to bear twenty to twenty-five pounds to the vine the grapes will not ripen well, have too little saccharine matter, remain pale, and have not the dark blue color necessary to make a good claret, and if vines are pruned to bear six or eight pounds they produce so little to the acre that labor is wasted, but if the vines are planted four feet apart and pruned only to four pounds, the acre will bear double the quantity, and the very best kind of grapes for wine, and it may be as easily cultivated with a plow as is corn at that distance.

We give the above words from the Mercantile Gazette, on this all important subject. We publish the paragraph to show how a *Mercantile* Gazette—good for statistical tables of *Imports* and *Exports*—may be very wide of *sound judgment* or advice in viniculture. We know of no statement that could be made so utterly unsound as the above and we cannot think any person who knows *anything of vine-growing* would give credence to so ridiculous a statement, the very details of which contradicts itself by the figures. We are truly sorry to see so good a journal put forth so poor an article, as it may do great harm. We had intended to have pointed out the fallacy of the article in all its bearings, but we send it out as it is, hoping some of our *experienced (?)* vine-growers will favor us with the minutia of this system, for we never yet heard that the grape-vine would bear a higher colored grape or secure to itself more substance when planted close and with confined air than when it had space for thorough cultivation and free play of the sun and air. Will our vine-growers please reply?

The Central Pacific Railroad.

"The Central Pacific Railroad Company is having a series of photographic views of the more interesting points on the line of the road."—[Ex.

"We would like to be the recipient of a photograph of each member of the Nevada Legislature who refuses to vote aid to the above named road, and *in favor* of that doubtful enterprise, the Latrobe Railroad. We want a correct picture to keep in an album for the purpose."—[Washoe Times.

We copy the above from our exchanges, and we also hope to receive a set of such pictures and we hope they will also add the picture of the *Dutch Flat folks* down this way. Such pictures would be worth preserving. One other should be added, however, the *Loaded Dray*, Christmas Day, bearing the Gold from the *State Treasury*, for the prompt payment of the State *Bonds* for the completion of this great work. This would be especially pleasing to some of our Journals here.

Old Relics.—The frequent discovery of buried treasures, old deposits of "shells," "bones of monster animals," and even the "Silver Man," etc., all teach us of the former years of this coast when it was much more peopled than now—by whom we know not—but Giant men, if half we read is true. We had a pleasant call from Dr. Perry, of Collinsville, who mentioned to us the fact that in diking the land in his vicinity, large, heavy logs, hewn and finished on two sides, were found buried several feet deep—they were long, many feet in length, extending some distance—they did not ascertain the length. These logs indicate that in years gone by, such logs were used for building purposes, and yet this work was not done by Indians only, but probably by citizens, who were erecting large buildings, not at Collingsville, but far up the river, perhaps hundreds of miles, and the floods have brought them down and buried them several feet deep. We ask, When were these logs hewn? By whom? When and for what purpose. Will Dr. A. S. Taylor, the able historian of the Pacific, tell us?

PREMIUMS FOR THE FARMER!

Splendid Inducements to Clubs!

Desirous to offer inducements to all who will form Clubs for this journal, we offer the following liberal Premiums:

For every Club of Five, and $25, we give Atlantic Monthly, $4, Godey's Lady's Book, $3, and an extra copy of the Farmer, $5, for one year.

For every Club of Ten, and $50, we give Atlantic Monthly, $4, Godey, $3, Harper's Monthly, $4, Arthur's Magazine, $2, and an extra copy of the Farmer, $5.

For Clubs of Twenty, and $100, we give Atlantic Monthly, $4, Harper's Magazine, $4, Godey, $3, Arthur, $4, Gazley's New Pacific Monthly, $5, the Eclectic Magazine, $5, any of the Quarterlies, $5, and an extra copy of the Farmer, $5.

For Clubs of Fifty, and $250, we will give as a Prize one of *Wheeler & Wilson's* best plain *Sewing Machines*, valued at Sixty Dollars, with the Atlantic Monthly, Harper's and Godey.

For Clubs of Sixty, and $300, we will give as a Prize a Sewing Machine, valued at Seventy-Five Dollars, the Atlantic, Harper's and Godey,

For Clubs of Eighty, and $400, we will give a splendid Wheeler & Wilson Sewing Machine, valued at One Hundred Dollars, with two selected Magazines.

For a Club of One Hundred, and $500, we will give one of Wheeler & Wilson's best Machines, with all the Extras, worth One Hundred and Twenty-five Dollars, and two Magazines selected by the party.

The above offers we believe will richly pay persons for giving a portion of leisure time and influence, and we believe it can be easily done, for there are many places where we have never used exertions to circulate where success is certain, in these many new localities, and we offer these inducements as an encouragement to win the premiums.

This will furnish any family with a library for a little brief labor to extend our circulation.

☞ We will suit the wants of all who procure us Clubs, by substituting for any of the above the Scientific American, Country Gentleman, Rural New Yorker, Prairie Farmer, Genessee Farmer, Boston Cultivator, Massachusetts Ploughman, Maine Farmer, or Agriculturist, making, however, the total value of premiums the same.

California Gold—California Men—California Charities

In a recent number of this Journal we stated that the influence of California had been most materially exerted in carrying on the war by furnishing vast sums of money, sufficient to fill the vacuums caused by the annual drain of our specie to make up the balance against the United States by excessive imports.

We also stated the facts that at the present time the *leading successful Generals* were men that had been imbued with Californian energy, were, in fact, Californians.

We now ask if in all the Great Benevolent Enterprises, too, those for the sick and wounded, if California has not been "*In the Front*," also.

We find, in the Report of the Sanitary Commission, up to December 1, 1864, and published in Gazley's new Pacific Monthly, No. 1, of which we spoke last week, the following amount as the contributions from the Pacific slope:

California	$1,030,402 73
Oregon	64,731 02
Nevada Territory	95,761 01
Washington Territory	20,449 92
Idaho "	5,301 31
Colorado "	1,025 00
Vancouver's Island	2,196 61
Total	$1,219,896 00

GEO. T. STRONG,
Treasurer of the Sanitary Commission.

Nearly one and a quarter million dollars. What a noble proof has our State given of her devotion to the Union. Have we not spoken by our Men, our Gold, and our Benevolent Spirit?

Great Sheep Sale in Vermont.

We give below a list of recent sales of Sheep in Vermont. We presume them to be Spanish Merino, although it is not stated. These prices are very large, but it should be remembered they were for Greenbacks, therefore half those prices in gold. Still they are great prices, and pay the growers enormously. What are the sales here?

Wm. L. Archer, S. S. Campbell and S. M. Cowan, of Cross Creek Village, Washington county, Pennsylvania, bought of E. Hammond & Son their ram lamb "Fortune," for $5,000.

S. S. Campbell also bought two 2-year old ewes for $2,000.

Sold also to Samuel Archer, of Holliday's Cove, Western Virginia, ten ewes for $4,000.

Mr. Archer also bought of H. W. Hammond one ewe for $400.

H. W. Hammond sold to S. M. Cowan four ewes for $2,000.

Total—eighteen sheep for.....$13,400.

Mr. S. G. Holyoke, of St. Albans, sold to Samuel Archer the six first choice of his yearling ewes, and one 2-year old, for $2,100.

S. S. Rockwell recently sold to a sheep dealer thirty-seven one and two year old ewes, selected by himself from his flock, for $3,700.

Mr. Bingham recently purchased two rams and ten yearling ewes from Mr. Sprague, of Brandon, for $6,800.

Total—fifty-six sheep for.....$12,600.

A grand total of $26,000 for seventy-four sheep, being over $350 per head for all.

—The Courier says that work on the San Jose and Stockton Railroad has been commenced near Milpitas, Santa Clara county.

The Sewing Machine Muddle at the Oregon State Fair.

Portland (Oregon), February 4th, 1865.

Mr. Editor:—You have often, in your journal, severely censured the miserable manner in which many of the Fair Managers and Committees have imposed upon the public in order to carry a point for some favorite party. The fact is, nearly everybody has become disgusted with Fairs and Fair Committees, they are the most *un*-Fair set of people going—if reports are true, up here in Oregon. We have recently had a sample of how they do things, and I am glad our President has put his seal of condemnation upon all such trickery. Thinking over the matter, I put the facts of the case in my drawer, and when I went for them for the mailing, some spirit had worked them up into a "jingle," and I venture to send them to you. They are true, however, every word of them.

Bitter-Sweet.

As you *Sow*, so must you *Reap*,
This is a Proverb all should keep,
And never let it pass from mind,
If you sow to the wind you reap a *whirlwind*.
There's a story abroad, shall I tell you now
Of a Humbug in Oregon? Shall I tell you "*How*"
They managed to win the *Premiums* there,
"*How*" they *Minister'd* at this Oregon Fair!
Well, they managed to make a Committee's Report,
But the President says 'tis not the right sort.
And the "Alta" now tells of a terrible blow
The President strikes, and the "Alta" tells "How,"
And thus with the "Florence," and "Grover & Baker,"
The Committees consign them to the Undertaker,
And the "Premiums" vanish, False Oaths don't avail,
That "Oregon Fair" reveals a sad tale.
Both parties have sow'd, both parties must reap,
'T was a pity that terrible secret wouldn't keep;
But it sprouted, and like *bad seed* it grew,
And all about "Humbug" the President tells "*How*."

How much better it is to sow only "*Good Seed*,"
That brings a *Rich Harvest* in all time of need.
False oaths and *Humbuggery* will all pass away,
And the Genuine Good, stand as clear as the day.
So it always has proved, and the people have seen
That there is ONLY ONE GOOD SEWING MACHINE.
This quietly, steadily, wins the great prize,
When you buy, 'tis the one that all would advise;
'Tis the Wheeler & Wilson, the only machine
That in all our Great Workshops can always be seen;
In Families everywhere, every test it will stand,
'Tis crowned as the Best, all over the land.
The "Wheeler & Wilson" with public favor rich laden,
Are the best Machines sold, the agent, J. H. Hayden.

Farewell to the Fair of Oregon State,
We leave all such *Humbugs* to their merited fate.
We need but repeat
That the best machines sold,
Are the Wheeler & Wilson,
Worth their weight in *Pure Gold!*

The New Terms of Our Colleges.

As it will be our aim always to serve the cause of Education, we shall devote a space in our columns to the time of the new Terms of the various Colleges, Academies, and Seminaries of learning, and if the Principals of each will send us information of the same, the time of each will be placed in this column; and if they will send us their catalogues we shall be happy to distribute the same from our Reading-room, to which we invite all who are interested in the Cause of Progress in California.

We hope we shall have the earnest co-operation of all Principals and Teachers, and to receive communications for publication that will advance the cause of Education. Our journal having a wide circulation, we can thus give extended notice to our Colleges and Schools, and materially help the cause, we therefore hope a new interest in the work. We cannot keep the public advised of changes unless we are notified.

GRAPE VINES.

50,000 CUTTINGS OF THE STANdard Varieties of FOREIGN GRAPE VINES, for sale by S. W. SHAW, McCrary's Building, North-east corner of Montgomery and Pine streets, San Francisco, or to O. D. WEST, Sonoma.

Our Vines are Five and Six Years old, and of course are in bearing; therefore we are enabled to guarantee every Cutting true to name, thus avoiding those vexatious disappointments heretofore attending the planting of Foreign Vines.

4-tf S. W. SHAW.

DAGUERREAN GALLERY INTEREST.

The owner of one of the best Daguerrean Galleries in our State, with the best run of business, with fine work room, handsomely furnished, display rooms and everything to make it attractive and profitable, desires to find a partner, an active partner, a real working partner, for the business department, so that the business, which is constantly increasing, may be retained, and another and important branch added to it, which the present proprietor cannot do without a good practical, working, business man.

For particulars, and all appertaining to it, address Editor Farmer. All Letters confidential. 1

[For the California Farmer.]

Floral Ornaments.

Do not we always feel welcome when, on entering a room, we find a display of flowers on the table? Where there are flowers about, does not the hostess appear glad, the children pleased, the very parrot garrulous at our arrival, the whole scene and all the personages more hearty, homely and beautiful, because of these bewitching fuchias, roses, heliotrope and mignonette?

The most granite-hearted misanthrope cannot withstand those fragrant pouting lips of coral, those eyes of azure, those nodding leaflets that never shrink or blink at the hardest, sternest, most stony, gray-eyed hater of everything and everybody. It would be a difficult matter to sum up all the social qualities of Flowers. Assuredly, of all simple domestic ornaments, *flowers* must have the first place. "Better hang a wild rose over the toilet than nothing," says Leigh Hunt; "the eye that looks in the glass will see something besides itself, and acquire something of a religious right to respect itself, in thinking by how many objects in the creation the bloom of beauty is shared." The same prince of essayists says: "Set flowers on your table, a whole nosegay if you can get it, or but two or three single flowers, a rose, a pink or a daisy, preserve but a bunch of clover or a handful of flowering grass—one of the most elegant, as well as cheap, of nature's productions—and you have something on your table that reminds you of the beauty of God's creation, and gives you a link with the poets and sages that have done it most honor." Those who have gardens may multiply their enjoyments a hundred fold by keeping in mind the genial suggestions of Leigh Hunt, "Make the most of every ray of light that falls out of Heaven to bless you at the window; there you may woo beauty, and have it nod to you in a hundred forms. Cull a posy for the table. You may make the tables, and the mantel-pieces, and the quiet recesses of your rooms gay at all times, and the whole atmosphere of the house as odorous of flowers as it is already morally sweet with the interchange of love's language and the expressions of high emotions of the heart."

There are many ways in which cut flowers may be preserved. Take a glass dish, or any kind of vase, in it put some sand, wetting it thoroughly; then stick the flowers in it—with leaves a pretty arrangement can be made. If this is covered with a glass shade, many kinds will last for a month, retaining all their fragrance and beauty, as the moisture preserves them fresh.

Hanging Baskets are one of the most beautiful mode of growing plants. If only planted with bits of Ivy Saxifrage, Fern, or any of the ordinary, plants, they have such a grace as they hang in festoons. The variety of plants that may be used is very great, Verbenas, Petunias, Saxifrage, Vinca Major and Minor, Sedum Sieboldii and Acre, Sermantosa, Linaria Cymbalaria, Lophespernum, Maurandyi, Dry Leaf Geranium, and nothing is prettier than the Strawberry. The most of these will grow in a window or on a porch, and add greatly to the beauty of the place.

Window Plants.—Have the windows filled with plants, not standing in the pots exposed to the sun and wind, but have the boxes made to fit in the windows, properly secured, and the pots may be sunk in them, and filled in with sand or moss, so that they look as if planted. But the better way is to select a few choice plants, a vine for each side of the window, to train up and over on a stout wire; then place the other plants in the box, putting some Vinca or Lobelia, or Mignonette, to drop over the front, and then your favorite Roses, Fuchias, Geraniums, etc. Here you can see them the first thing in the morning, and watch the unfolding of each leaf with a new interest and love; you now make them your companions, and each change is watched with the most tender solicitude, so "they always must be with us or we die."

Specimen Plants.—How few plants are seen that are shapely, and show that they have had good training or care. Why do not the ladies, who all love plants, take a cutting of some choice plant, say a Rose, Fuchia or Heliotrope, and train it up in a symmetrical form, so that when not in bloom its shape will be graceful, and much more so when its flowers are evenly disposed over the entire plant. Let them take the end of some good strong shoot of any of the above plants, cut it to about four joints, take off the leaves from the two lower joints, and then strike it in sand; when rooted, put it in good soil, and then begin to train it, and see with what interest it will be watched. Each branch will be induced to take its proper position, and by rubbing off the bursting shoots and encouraging only those that are wanted, a plant can be grown in any shape and form. What more beautiful for a table decoration than a well-grown symmetrical plant, in its full vigor; its bright green foliage, even if not in flower, contrasting well with the other things on the table? What a theme for conversation Where did that plant originate? What is its history? Has it been improved by culture? How many may have a dormant love awakened by seeing such a specimen, and try their hand at plant-growing?

There is no pursuit or occupation that can be engaged in that will give the unceasing pleasure that the cultivation of plants does. They do not cramp the mind and make men selfish, as many other pursuits do, but when a favorite plant is grown they wish their friends to share in the same pleasure, and are willing to give of theirs.

Ornilla.

Highland Rice.—This valuable product should be planted extensively. It could be raised as easy as Wheat, and is worth four times as much for a crop. Plow deep and fine, harrow well and plant to drills. It is one of the handsomest crops, at harvest time, ever seen on earth; its long pendant tassels of grain gives it the appearance of waving plumes. Our subscribers can all have samples now, at our office, and we hope to hear a good account of it.

Advertising Directory.

We ask especial attention to the Advertising Directory in our columns this week. We believe we have one of the best lists of Business Houses ever placed in a public journal, and we can always call attention to such, and can confidently recommend them to our readers. We advertise none but the very best and most reliable Houses, and therefore confidence can be placed in them and the goods they offer, or the business they transact.

HARPER & BROTHERS,
Franklin Square, New York.

Critical Notices of the Press.
It is the foremost Magazine of the day. The fireside never had a more delightful companion, nor the million a more enterprising friend, than Harper's Magazine.—*Methodist Protestant* (Baltimore).
The most popular Monthly in the world.—*New York Observer.* 3-oam

HUBBARD SQUASH.
THIS VERY BEST OF ALL SQUASHES SHOULD BE planted by every person who wishes the best Squash that can be grown.
The HUBBARD SQUASH is different from all other Squashes; has a hard rind, but very rich meated, sweet and luscious as the finest Carolina Sweet Potato.
The Hubbard makes the finest Pies in culinary art, superior to a Custard Pie—the Squash, however, is to be baked only. Saw the Squash in halves, bake in the shell, and scoop it out when baked, or serve it on the table in the shell. For Pies, first baked, then scooped out, and used as other squash.
Fresh Seed just received from the East, pure from the growers, for sale at the FARMER OFFICE.
Packages $1 each; $3 per pound 3

TO NURSERYMEN.
A FEW THOUSAND VERY GOOD SEEDLING PEACH Trees can be had at reasonable rates, if applied for soon. Nurserymen are aware that soon Peach Trees will be scarce, and they should be planted now.
Apply at the Farmer Office. 3

NEW SEEDS.
FRENCH SUGAR BEET;
Yellow Onion;
Green Flesh Melon.
An Invoice just received. Apply at Farmer Office. 3

EXTRA SIZE EVERGREENS.
PERSONS DESIRING A FEW EXTRA SIZE EVERgreens and Ornamental Trees, can learn where they can find such, of unusual beauty, a few only, by applying at this office to Editor Farmer. 3

California Grass Seeds.
EVERY VARIETY OF NATIVE GRASSES, the seed of which can be saved, will find a ready purchaser for the seed, on application a the Farmer Office.

A CARD
TO OUR PATRONS.

'Tis said *competition* is the life of trade. Fair, honorable competition, we never fear; but when *our name*, or the *same name*, is used to deceive others or injure our business, it becomes our duty to notify our patrons and friends that such is the case.

We were recently called upon by a person in this city, to supply a large order for more than One Thousand pounds of Seed of various kind, and also for several housand Seed Bags—these were said to be for a store or stores in the country.

It soon came to our knowledge that these Seeds were to establish a Seed Store on Washington Street, in this city, under the same *Sir*-name as ourselves. The secret and unfair manner in which these Seeds and Bags were attempted to be procured of us, was so singular and so unfair, that we had just suspicion of wrong intent. We soon learned that *falsehood* was told us, and we refused to supply the order, knowing that no other establishment on the coast had laid in the stock of Seeds as ourselves, and having every reason to presume that our name will be used in the sale of Seeds elsewhere, we feel it a duty to remind our Customers and Purchasers of Seeds everywhere, that they should all be careful in sending their orders, and to be particular in their directions.

We have been established nearly ten years in the Seed Business, and we trust that by the extent and system with which our business has been conducted, we have justly earned the reputation of a regular Seedsman.

We import our Seeds direct from the best houses in Europe and the Eastern Growers, we have the most extensive stock in California by a large extent, and purchasers need only call at our establishment to satisfy themselves that our business is so conducted as to meet their approbation and business.

We return our thanks to our many Customers for their liberal support for these many years past, and trust a continuance for many years to come.

We would remind all our Friends and Customers the necessity of being particular and to address all letters and orders to

Small Homestead Wanted.
A SMALL, NEAT AND PRETTY HOMESTEAD is wanted, within ten miles of this city. The amount of land must not exceed ten acres, and it must be good land and now in cultivation. The advertiser has a good Farm in Humboldt County which he would like to exchange if possible, or make the next best terms possible. Any person having such a place can hear of a purchaser by leaving a note addressed "J. L. B.," Farmer Office. 14

Home Miscellany.

ANGEL MOTHER, I AM DREAMING.

Angel mother, I am dreaming,
And my heart is sad and lone:
Visions of the past come o'er me,
Happy hours that long have flown.
Fancy paints sweet scenes of beauty,
Pleasures that were shared by thee!
But I now am sad and weary,
None are here to comfort me.
Chorus.—Oh! my heart is filled with sorrow,
And no rest comes on the morrow;
All my hopes have sadly perished,
Gone are those I fondly cherished.

Oh! I long to see thee, mother,
Tell my griefs to thee to-night,
For, alas! they crowd upon me
Like a dark and withering blight.
Life—it seems so fraught with sorrow,
Vainly now I seek for rest;
Would that I could find it, mother,
Leaning on thy loving breast.

Angel mother, I am dreaming,
Sadly falls the bitter tear.
For I miss thy gentle counsels,
And thy kindly words of cheer
But, ah! there is something tells me,
Though the tie on earth be riven,
We shall be united, mother,
In that realm above—in Heaven.

GEO. C. SLATTER.

[For the California Farmer.]

THE FISHER GIRL.

Only a hovel, like a hulk ashore,
Breasting the wind and northers,
With the sea crashing in on gusty nights
Shaking the door and weathers.
And after the storms I look down the strand,
An eager-eyed well-wisher,
To note if the timbers have yet succumbed,
And watch for Hanz the Fisher.
O, a dingy hut, and crannied and cold,
A touch of Borea's finger
Would crush the shell, and sadden the voice
Of Madeline the singer.
Hanz with his nets lengthened out in the sun
Bends to his lusty mending,
And Madeline's hair an aureole shines,
Her cheeks with shell-tints blending.
And white girlish feet thro' nets in and out
Go pattering o'er the beaches
With a saucy song—'till the puzzled Hanz
Drops a stitch from the breeches.
But the Fisher Girl in another break
Her feet the while entangled,
Seems the prettiest fish he ever had caught
In all the years he's angled—
And only whispering a word—with a smile,
He bends again to netting,
Nor heeds the rose on the Fisher Girl's cheek
Within its pearly setting.
Madeline, sad, turns away to the deep
Where distant sails are dipping—
Till one might think she'd a ship coming in—
And eagerly scans the shipping.
With her white hands shading her dazzled eyes
The signal strains her vision,
A ship tacking in off the harbor lies,
Mocking, as with derision.
She thinks again of the magical name,
Unthinking Hanz had spoken,
And the slow tears drop like gems from her eyes,
The hope of Faith unbroken.
"That's not *his* ship," she murmurs to Hanz.
—Like a fly in a cobweb,
Hanz struggles up from his answering net,
"It looks not like 'The Gottlieb.'"
A boat stands ashore, but Madeline turns,
Bitterly disappointed,
To bury her heart in her dreary home,
Her lashes tear-annointed.
But the boat comes in, and the boatswain shouts,
Till Hanz lets fall his netting,
And a sailor's leap spans the breakers deep,
Unmindful of the wetting.
With his bonny blue eyes and high bronzed brow,
Which brown curls fail to cover,
He takes to his arms and kisses his bride,
O, the boldness of a lover!

* * * * * *

Last night the wolf-wind came down from the coast,
Thro' straits of far Frobisher,
And I see no more, like a hulk on the shore,
The house of Hanz the Fisher—
Where fishing smacks and fishermen's boats,
Like sea gulls skim the water,
For Hanz is dead, and the sailor boy wed
Unto the Fisher's daughter.

C. FRENCH RICHARDS.

Cheerful People.

God bless the cheerful person, man, woman, or child, old or young, illiterate or educated, handsome or homely. Over and above every other social trait stands cheerfulness. What the sun is to nature—what God is to the stricken heart which knows how to lean upon Him, are cheerful persons in the house and by the wayside. They go unobtrusively, unconsciously about their silent mission, brightening up cars, omnibuses, ferry-boats, with the happiness beaming from their faces. We love to sit near them; we love the glance of their eye, the tone of their voice; the little children find them out, oh! so quickly, amid the deosest crowd, and, passing by the knotted brow and compressed lip, glide near, and lay a confiding little hand on their knee, and lift their clear young eyes to their loving faces.

Many a man, when the cheerful person passes him, rubs his hand across his forehead, as if to clear away the tangled web the world has spun over his spiritual vision; and, as his step grows elastic, says to himself, "After, all, what matters it? A little good, more or less; let us all love and be happy, and take what God sends. This is not the end."

Nor are we to suppose this cheerful person has always been exempt from trials, or that this cheerfulness is the product of insensibility. We have seen feet step lightly which far back on life's journey have left heavy foot-prints. But there are smiles born of tears; rainbows brightest on the storm-cloud; morn loveliest when gliding serenely from out threatening skies; violets sweetest whose birth-place was a rockcleft. These are they whom God and man love; whose souls have on the wedding-garment, ready when the Master of the feast biddeth. Like Him, opening wide the door of their hearts, and saying to the weary and heavy laden, "Come."—[Waverly Magazine.

GOOD MANNERS.—Good manners are the blossoms of good sense, and, it may be added, of good feeling, too; for if the law of kindness be written in the heart, it will lead to that disinterestness in little as well as in great things—that desire to oblige, and attention to the gratification of others, which is the foundation of good manners and all the graces and elegancies of life.

Mind.

The mind hath many gems. Deep, deep within the earth are laying many hidden treasures, and all that is lacking to make them of great worth and beauty to mankind, is the letting in of a sufficient amount of light, which can only be done by digging, and by constant and unremitting labor. So, deep within the mind, there are many treasures which can only be brought out by constant study; by a strong determination to dig until the diamond is reached.

What brought to light those pure and sparkling gems that lay within the breast of Washington, and which now have their influence upon every true lover of his country? Was it not a strong will—a determination to conquer in whatever he felt was right? Was it not his constant aim, from early boyhood even until the close of life, to ever let the truth, pure and simple, shine out in every action? And, in so doing, ever brought up from the deep store-house of his mind those gems which in future years were to shape, to a great extent, the course of a great and powerful nation.

Truth, pure and simple, when acted out in the life cultivates the mind, brings out the good that may be in the heart, striving ever to choke down the evil, for they, being deadly enemies, cannot dwell together.

And thus, in cultivating the mind, we not only make life pleasanter for ourselves, as we journey along, but those that journey with us feel that life is not altogether dark and gloomy.

Thus mind will act upon mind. We cannot chain it, any more than we can chain the wind, for good or evil; it has its influence, and the amount of that influence depends wholly upon the culture of the mind. If an evil nature predominates, so goes our influence. If a good nature, why, then, the opposite effect.

And many others there are to whom we might refer, who have left behind them those pure and noble gems, products of a pure and cultivated mind, which now have their influence upon the hearts of men, leading them in new paths, and awakening within their breasts new thoughts, which, in their turn, must and will reach other hearts, influencing in proportion as they receive the light.

Then the cultivation of the mind is a duty which falls upon all. The poorest laborer should not be exempt from this, though his chances for improvement may be far less than many others around him. Yet he can improve, and indeed he should, for there are others that are looking to him for example in the great drama of life. He must act a part. He, too, must help in the busy onward rush towards eternity. As a laborer he may always remain, yet it is not impossible that he may rise to the highest position a nation can bestow upon man.

But, setting aside all this, all classes should strive to cultivate the mind, and work early and late to exterminate the weeds that spring up to choke the grain. Then why not labor equally as hard to drive out and kill entirely those weeds which destroy the mind and unfit it for that true and noble position which God designed it should occupy? Certainly we should labor so to do, for they will spring up in the heart constantly, if we are not on the watch, till they get the mastery of us.

Then how much better and nobler it is to strive each day in life to break through the darkness, grasping ever after the light, and letting those thoughts arise which our heart doth say is right! God's will, then, would be obeyed, and life's course truly be filled up with usefulness.—[Geo. S. Green, in the Waverly Magazine.

Beautify Homes.

"Who doubts that?" said I. "Give me a large tub of gold coin to dip into, and the furnishing and beautifying of a house is a simple affair. The same taste that could make beauty out of cents and dimes could make it more abundantly out of dollars and eagles. But I have been speaking for those who have not, and can not get, riches, and who wish to have agreeable houses; and I begin in the outset by saying that beauty is a thing to be respected, reverenced, and devoutly cared for—and then I say that *beauty is cheap*, nay, to put it so the shrewdest Yankee will understand it, *beauty is the cheapest thing you can have*, because in many ways it is a substitute for expense. A few vases of flowers in a room, a few blooming, well-kept plants, a few prints framed in fanciful frames of cheap domestic fabric, a statuette, a bracket, an engraving, a pencil-sketch, above all, a few choice books, all these arranged by a woman who has the gift in her finger-ends, often produce such an illusion on the mind's eye that one goes away without once having noticed that the cushion of the arm-chair was worn out, and that some veneering had fallen off the center-table.

"I have a friend, a school-mistress, who lives in a poor little cottage enough, which, let alone of the Graces, might seem mean and sordid, but a few flower-seeds and a little weeding in the spring make it, all summer, an object which everybody stops to look at. Her æsthetic soul was at first greatly tried with the water-barrel which stood under the eaves-spout—a most necessary evil, since only thus could her scanty supply of soft water for domestic purposes be secured. One of the Graces, however, suggested to her a happy thought. She planted a row of morning glories round the bottom of her barrel, and drove a row of tacks around the top, and strung her water-butt with twine, like a great harpsichord. A few weeks covered the twine with blossoming plants, which every morning were a mass of many-colored airy blooms, waving in graceful sprays, and looking at themselves in the water. The water-barrel, in fact, became a celebrated stroke of ornamental gardening, which the neighbors came to look at."—[Mrs. Stowe's House and Home Papers.

USES AND SIZE OF THE STARS.—For what purpose are we to suppose such magnificent bodies scattered through the immensity of space? Surely not to illumine our nights with, an additional moon of the thousandeth part the size of our own would do much better; nor to sparkle as a pageant void of meaning and expression, and bewilder us among vain conjectures. Useful, it is true, they are to man as points of exact and permanent reference; but he must have studied astronomy to little purpose who can suppose man to be the only object of the creator's care, or who does not see in the vast and wonderful apparatus around us provision for other races of animated beings. The planets derive their light from the sun, but that cannot be the case with the stars. These, doubtless, are themselves suns, and each in its sphere, the presiding center around which other planets—of which we can form no conception from any analogy offered by our own system—may be circulating! Reliable experiments and calculations have been made which prove that the sun, at half what is considered the distance from us of the nearest fixed stars, would give only the same amount of light as these stars; how much less, therefore, if as distant as they! Hence the sun must be very small in comparison with vast numbers of the fixed stars. Yet the diameter of the sun is nearly 112 times that of our globe, and its volume about, 1,400,000 the volume of the earth.

☞ The Arab's prayer—"O God, be kind to the wicked; to the good Thou hast already been sufficiently kind in making good."

Read the Papers.

Young ladies, if you wish to be able to converse with intelligence, and in a manner that shall render you pleasing in society, you need something more that to be able to conjugate French verbs, to sketch with taste, and to play respectably on the piano. All these are good things in their way, but they will not make you particularly attractive in conversation, and this is the great method by which we judge of all with whom we mingle—you never can be fluent and interesting unless you have something to talk about. You must have an acquaintance with this actual world in which we live, and with events that are every day transpiring around us. To do this, you must read the papers. A young lady who does not, must appear very limited in her range of knowledge, whatever her school attainments have been. By this cheap system of self-education, many a young lady has won for herself the high praise of "a sensible woman," in quarters where such praise is of high value to her. It is always an advantage to have a reputation of being "sensible," homely as the term may sound. It is by no means applicable to every lady whose advantages may have been very superior.

It is a system of education that can go on in odd minutes of leisure which would very likely be spent in idleness. It does not require great outlay of time or money. Two or three dollars will bring to your house fifty-two times a year, the very best of this class of literature.

You will learn enough of practical importance from any respectable paper, to pay for itself ten times over. What mother who has taken the Home Magazine for a year, but has saved the cost of subscription over and over in the valuable suggestions it has given for one department or another of household economy? If a mother will only turn over the leaves of a volume, and note down the different hints she has adopted, and make a fair estimate of the advantage it has been, I do not doubt but she will be surprised at the result. We get information which gains us time, money, labor and health, from thousands of sources, and accept them all, as a matter of course, seldom returning any gratitude to the source from which we receive it.

We have said nothing of the satisfaction, the real joy, which knowledge gives to its possessor. This cannot be estimated in money, though it is a far higher consideration. Then the ability to be useful in the world will be many fold increased, and who would care to live along in this world a mere drone in the hive—[Country Gentleman.

Be Contented.

Could people only know, or would people only know when they are well off, how much more serene to themselves, and how pleasanter to others would their lives be. Little mindful of the present blessings we enjoy, we go on with an insatiable desire for wealth, and if we are fortunate, our ideas so change, and our expenses increasing in proportion to our ideas, we truly find ourselves no better off than when we commenced. If I only had so much more (is the frequent remark we hear), how comfortably I would be off. If ever we reach what ten years ago we considered our maximum, it still is, if I only had so much more. So we go on from year to year, till we grow old, and, losing some of our pride, begin to think there is something else to live for than the accumulation of riches. Then, and not till then, do we look back and see the errors of a life too late to erase, too true to ourselves, always making us poor when really rich, and destroying that most charming trait of character that brings more with it than wealth can give—*contentment*.—["Leisure Hour," in Country Gentleman.

A Complete Treatise on the Breeding, Management and Diseases of Sheep,

BY HON. HENRY S. RANDALL, LL. D.,

Author of "Sheep Husbandry in the South," "Fine-Wool Sheep Husbandry," Etc., Etc.

PUBLISHED BY

D. D. T. MOORE, ROCHESTER, N. Y.

THOUGH FIRST PUBLISHED ABOUT A YEAR ago, this work has already reached its TWENTY-FIRST EDITION, and the demand thus far has been extraordinary. A new and revised edition is now ready, and others will follow in such rapid succession that all orders can hereafter be filled promptly. No volume on any branch of Agriculture ever had so rapid a sale or gave such universal satisfaction. The work is a timely one, and unquestionably THE BEST AND MOST COMPLETE TREATISE ON SHEEP HUSBANDRY ever published in America. It is cordially welcomed and highly approved by both Press and People. Witness the following extracts from a few of the numerous Reviews and Letters the work has elicited:

OPINIONS OF PRESS AND PEOPLE.

From the New England Farmer, Boston.

"The Practical Shepherd" is a work that has long been needed by our people. It should be in the hand and head of every person owning sheep.

From the Country Gentleman and Cultivator.

As a whole, this book is unquestionably in advance of anything of the kind now before the public.

From the Maine Farmer.

The name of the author, Hon. H. S. Randall, is a guarrantee of its completeness and reliability.

From C. L. B. P. Johnson, Sec'y N. Y. State Ag'l Society.

It is the best practical Sheep Book, I think, ever published, and does great credit to Dr. Randall.

From the New York Tribune.

In this volume the author has exhausted the subject, and given all that is necessary for any farmer to know about selecting, breeding, and a general management of sheep, in health or sickness. We heartily commend this work to all who wish for a sound and thorough treatise on sheep husbandry.

From the Michigan Farmer.

Mr. Randall has made the very best book extant on American Sheep Husbandry.

From the Ohio Farmer.

The reputation of the author—who ranks as THE authority in this country upon all that pertains to the breeding and management of sheep—will induce a large and continued demand for "The Practical Shepherd."

From the Prairie Farmer.

The illustrations of sheep are by the best artists of New York, and well done. The letter press and paper are all that could be desired in a work of this description. It will undoubtedly meet with the large sale its merit demands.

From the Scientific American, New York.

It is vastly important that those who raise sheep should obtain all the information possible how best to manage their flocks, and we unhesitatingly recommend the "Practical Shepherd" as the most interesting and reliable work on the subject extant.

☞ THE PRACTICAL SHEPHERD is sold only by Agents and the Publisher. The demand for the work was, for months, greater than the supply, and hence it has not been offered or advertised in the Pacific States. It comprises 454 large duodecimo pages, and is printed, illustrated and bound in superior style. Price $2. Sample copies mailed, post-paid, on receipt of price.

Address

D. D. T. MOORE,

Editor Rural New-Yorker, Rochester, N. Y.

SPICED OYSTERS
BENT & CO'S WATER, MILK, BUTTER, WINE, AND GRAHAM CRACKERS

TEAS of every Variety, of the FINEST QUALITY, Imported expressly for our Family Trade.

HERKIMER COUNTY CHEESE, superior to any Cheese in the country.

SELECT WINES AND LIQUORS, the very purest, taken from Bond, as we keep none but the best; those that desire choice Table Wines, etc, or for Medicinal purposes, can rely upon what we offer them.

Messrs. Bowen Brothers commenced their business at an early day in Stockton, which they conducted successfully to themselves up to about the year 1860. Flattered with the success that had attended their efforts thereby and ambitious for a more extended field of operations, they accordingly, about the period above mentioned, established themselves in the City of San Francisco. Since then each returning year has continued to mark the expansion of their trade, until now their annual sales, in the aggregate, are exceeded by no other House in the State.

They have superior facilities for procuring their goods from the East, which gives them great advantages; besides, they pride themselves in keeping articles of goods found in no similar establishment in the city.

These with every other article needed in the Culinary department of the Household, and the usual Family necessaries, furnished by the Grocer. It will be our aim and our pride to give satisfaction to all who may favor us with their patronage. In order to make the business of our Patrons light and pleasant, all orders left with us will be filled with care and dispatch, and Goods sent to any part of the city promptly, without cost of carriage.

Our friends from the Country that favor us with Orders, will have their goods sent to the wharves without expense of cartage. Every Order sent us will be attended to with the same care as if purchases were present.

Tobacco Raising and Grape Growing.

A MAN OF EXPERIENCE IN TOBACCO RAISing would like to enter into contract with some good man who has proper land and good location, and will have suitable buildings erected for that business. The advertiser has a thorough knowledge of the business in all its branches and can make it profitable to both. He is also familiar with Grape Growing, and can plant a Vineyard and take care of it. He feels confident he can give satisfaction. A letter addressed to "Tobacco Grower," and left at the Farmer Office will be attended to. 17

Cashmere Goat.

A SPLENDID HALF-BLOOD CASHMERE GOAT can be had at a fair price, or will be leased on fair terms on application to the Editor of Farmer. 4

PATENT RIGHTS FOR SALE.

THE FOLLOWING PATENT RIGHTS OF NEW AND valuable inventions (of which we have models to show their value) are now offered for the States of California and Oregon, and Utah and Washington Territories.

NO. 1. THE MECHANIC'S SPIRIT LEVEL.

Patented September 13, 1859.

This Implement will be of great value to Contractors and Builders, being one of the most valuable inventions yet out. Builders will do well to examine the model.

NO. 2. IMPROVED CLOTHES REEL AND BAR.

Patented January, 3, 1860.

This valuable domestic piece of furniture can be used in the Laundry, the Kitchen, the Nursery, or Chamber, and can be made plain or ornamental; standing in the same relation as a piece of important furniture as does Wheeler & Wilson's Sewing Machines, neat when used and ornamental when not in use.

NO. 3. A CORN CULTIVATOR.

With this implement the soil is first thoroughly plowed and deeply pulverized, and on the return it smoothly and perfectly hills up and harrows the ground between the rows. A very new and valuable implement.

NO. 4. A MUSKETO BAR.

This will be much wanted in California. It is simple in its contrivance, perfect in its working, and can be affixed very cheap to all styles of bedsteads. Hotels, public houses and private families will find it a useful invention.

NO. 5. HYDE'S PATENT POST-DRIVER.

A most excellent labor and money-saving machine, for which we offer rights.

NO. 6. SEED-SOWER.

This is a new inventions, and one of great importance to all who sow grain, or any garden seeds. The working model can be seen at the Farmer's Reading-room.

Holding the rights to all these new inventions, we invite the public to call and see the models. All persons who may be desirous to purchase either County, City, Town, or Individual Rights, can do so on application to

COL. WARREN, Editor Farmer.

Valuable Agricultural and Horticultural Books always for Sale at the California Farmer Reading-Rooms.

American Florist's Guide.
American Poulterer's Companion.
Allen on the Culture of the Grape.
Barry's Fruit Garden.
Bridgman's Gardener's Assistant.
Copeland's Country Life.
Cultivation of the Cranberry.
Downing's Fruit Book—new edition.
Downing's Cottage Residences.
Emerson's Florist and Flower Companion.
Fessenden's Complete Farmer.
Field on Pear Culture.
Flint on Grasses.
Flint's Milch Cows and Dairy Farming.
Flower Garden—by Breck.
Fruit, Flowers, and Farming—by Henry Ward Beecher.
Farrier and Stud-Book.
Grasses and Forage Plants—by Flint.
Holly's Country Seats.
Harris's Insects injurious to vegetation—splendidly illustrated.
Harbison's new Bee-Book.
How shall I choose a Cow?
Leibeg's Complete Chemistry.
Langstroth on Bees.
Lindsay on Morgan Horses.
Modern Horse Doctor—by Dr. Dadd.
Munn's Practical Land Drainer.
Sheep Husbandry—by Randall.
The Wheat Plant, its Culture and Diseases—by Flint.
Youatt on the Horse.
Youatt on the Dog.

And many other valuable Books at lowest price.

SEA ISLAND COTTON.

A SMALL INVOICE OF VERY SUPERIOR SEA Island Cotton can be had by application at the office of the CALIFORNIA FARMER. 23tf

ELECTRICITY

THE

GREAT REMEDIAL AGENT.

Electricity as a Remedial Agent has, until recently, been but little known. An Electric Battery has been a terror from childhood up because a little Battery gave a "start," and the thunder storm killed by lightning. Now it is better understood, and is and will be the sovereign remedy for many diseases heretofore considered incurable. The following series of articles and statistics, with facts and proof of the virtue of Electricity are worthy of attention. When it was promulgated that disease could be entirely eradicated from the system without the use of poisonous drugs, the unthinking, or those who do not look deeply into cause and effect, scouted the assertion as chimerical, and adduced strong evidence of its utter impossibility. Long articles, replete with arguments, seemingly unanswerable, of the position that only through the digestive system could the blood be purged of the accumulations of the poisons which constitute disease. A great cry went up from the interested in the continued supremacy of the old system of one poison to cure another, that Electricity, as a Curative Agent, had been tried and had proved to be of but little if any value—thinking, poor souls, the world of science stood at the same point it occupied one hundred years ago. They were wrong, while those old fogies were content if they cured one in every five patients there were those who were diving into the science of Electricity, and finally it was discovered that the trouble was in the instruments used. From that time to the present, improvements have rapidly advanced, until every disease in the catalogue of human ills has been either cured altogether, or checked so as to enable the sufferer to seek those changes of climate which ultimately perform a perfect cure. Diseases hitherto considered incurable, have been cured, and those diseases which took months, and even years, to cure by medical process, are now cured in a few weeks; and all by the *Improved Instruments* of Dr. J. H. Josselyn, Resident Physician at the Electropathic Institute, 645 Washington street, San Francisco. It is astonishing to see the number of patients and diversity of diseases that have been relieved by the Electropathic System. From early morn till late at night, his instrument is engaged, imparting health and strength to all who have the good fortune to obtain his services.

The charges, too, are not as heavy as by the old system, besides there is no medicine to pay for, let alone the unpleasantness of swallowing the nauseous stuff. During the time the Institute has been in operation, there has been more benefit to the human family derived from the system than from all other systems combined during the same period. Among the most troublesome diseases to which Californians have been exposed is Rheumatism; none has given the honorable practitioner more trouble to relieve, and no one has pretended to cure (if we except known empirics) permanently. But this subtle disease gives way before the Electropathic System in a very short time, enabling the sufferer to go about his business without pain or the fear and dread of a relapse. And so with most other diseases, considered incurable. We mention Rheumatism because of its abundance, but we could enumerate many other diseases full as troublesome, and some far more fatal in their results.

We allude to that kind of disease paraded by quacks in the journals of the day, a trouble which was never cured by medicine, only a little strength imparted by the use of tonics. The poor victim is kept taking medicines and paying for them until his last dollar is gone and then, as soon as he undertakes to work to obtain more funds, the trouble comes back in all its loathsomeness. To this disease Electropathy is peculiarly applicable, its action being upon the spermatic nerve, strengthens the secretory organs, and at the same time, creating an equilibrium in the system, thereby preventing an elapse.

We dwell upon this disease because it is the bane of the youth of California; and one about which there has been more deception used than all others put together. It is not necessary to enumerate all the diseases in the catalogue, for that would be occupying space to no purpose. Every disease has been under treatment by this system, and there are none but have received benefit either in this State or at the East.

There are at present very few Instruments in the world that can be depended upon. A good Instrument costs very heavy, and cannot be purchased unless ordered, and there are very few who are able to manufacture them, for want of knowledge of the healing principle. The only Instrument to be depended upon in this State is at the Electropathic Institute.

Connected with this system are the renowned Electro-Magnetic Baths. Here let us caution the public against the numerous imposters in the bathing line. The pure Magnetic Bath is one of the most effective aids in the removal of disease from the system, but if given at the wrong time is likely to aggravate trouble, and cases have been known where the patient has been injured so badly as to require months to remove the injury. Persons in quest of this Bath should be careful and not apply to a place where there is no physician to judge of the necessity of the remedy. In fact the only place where they can be obtained in all their purity is at the Institute, where the Resident Physician will always be happy to examine and see that they are not unreasonably administered, and if not necessary, advise the requisite remedy.

To Females,

the Directors would say, Electropathy is particularly applicable to your delicate and fragile systems, and to the numerous troublesome and painful diseases to which you are liable. Should you be irregular, a few treatments will restore the functions to the proper state without pain or inconvenience. Should you be weak and enfeebled, either general or local, this system imparts strength and vitality, making the recipient feel buoyant and youthful, where before they were languid and unable to enjoy the pleasures of life. One great blessing connected with Electropathy is, it purifies the system so thoroughly that it beautifies the complexion, making the coarse and freckled skin as pure and fair as possible, giving the patient a fresh and healthful look.

To the nervous, the Directors would say, that you can be entirely relieved from those dreadful feelings of evil foreboding and your system strengthened so that nothing can disturb the current of your life. Several cases of insanity, arising from a disarrangement of the nervous system, have been permanently cured by this system. The Directors, in issuing this pamphlet, do it in the hope that it may be the means of awakening the public, who have not studied into such things, to a sense of their duties, and if possible prevent those who have the care of a rising generation from poisoning their young charges with vile drugs, thereby entailing upon them troubles which in after life may cause them to curse the origin. Also, that those in need of remedial agents may know where they can find them without resorting to taking the thousand and one poisonous nostrums that are continually palmed off as sovereign panaceas for all the ills of humanity. Avoid them all, they are snares set to rob you, and to your bodily injury at the same time. The following is a list of the cases which have been successfully treated by the *Electropathic System*, at the Institute, during the first four years of its establishment. The record is good, and challenges admiration of the world:

Name of Disease.	No.
Rheumatism	1580
Neuralgia	1492
Dyspepsia	1467
General Debility	1410
Fever and Ague	1262
Dumb Ague	1210
Bronchial Affections	1106
Asthma	1049
Female Irregularities	1022
Mercurial	938
Scrofula—long standing	922
Paralysis	890
Disease of the Eye	832
Catarrh in the head	705
Catarrh in the lungs	608
Liver complaints	600
Incipient Consumption	532
Panama Fever	563
Deafness—total and partial	480
Mental Derangement	471
All other—and among which is almost every nameable disease	2,186
Total	21,373

The above shows what can be accomplished by combined energy when it has truth and science upon its side. The Electropathic Institute was started amid the cry of interested charlatans, who used all the power their riches and the prejudices of the public gave them to prevent its success. It has risen to a position that is beyond their baffled malice, and will be honored in the scientific world when they are forgotten, or only remembered for their crimes and impositions. A thinking public are fast consigning them to that oblivion their works merit. Let them go, they will not be missed.

Persons seeking remedial assistance, may wish to know something of the system by which diseases are so rapidly removed from the body. Electricity is a fluid of so subtle a nature that it can only be studied by its results. We know by its action it forces everything of a foreign nature in the body from the center to the surface, by its energy, while the vitality which it imparts fills up the vacuum, preventing thereby the subtle poisons from returning to the hitherto diseased parts; and here let it be understood that the Bath should never be administered until the disease has been forced to the surface, except, perhaps, in cases of cold where fever has not set in. Its action upon mercurial diseases is peculiar. The best authorities are of the opinion that it liquifies the mercury, which, when in a liquid state, by its own specific gravity forces itself out of the body. This result has been arrived at by testing the water after an Electro Magnetic Bath. After such tests have been found in the water the patients not troubled any more with those pains peculiar to the diseases. In all other cases it forces to the surface and is washed off by the bath. The whole system in its application is a *luxury*, there being no pain or inconvenience attending upon it, but the reverse is the case, being one continued pleasure all the time. Try it, you that are suffering either from disease or the injudicious use of poisonous drugs, and you will be made to rejoice that you have had the courage to strike out from the beaten path.

Below are a few certificates from patients that have been cured at the Institute:

CERTIFICATES OF CURES.

The undersigned takes this method of acknowledging publicly the benefit he received from the treatment applied to him at the Electropathic Institute, while suffering under a terrible infliction:

This is to certify that I have been under Electropathic treatment at the Electropathic Institute, 645 Washington street. When I applied to Dr. Josselyn I was cramped up with rheumatism, and also had the coast ague. So bad was I that, without relief, I don't think I could have lived more than one week. The Doctor, with his instrument, relieved me the first treatment from all pain, and perfectly cured me of all lessed in twenty treatments, without the use medicines I cordially recommend all afflicted to patronize this Institute for it is truly a blessing to the afflicted, and the operation is very pleasant. I wish to thus publicly thank Dr. Josselyn for his care and sympathy.

JOSEPH SEGER, of Bolinas Bay.

September 19, 1860.
State of California, City and County of San Francisco—ss.
Subscribed and sworn to before me, this 19th day of Sept., A. D. 1860. P. BARRY, Notary Public.

SACRAMENTO, Oct. 10, 1860.

DR. JOSSELYN—Dear and Honored Sir: You requested me to let you know how I feel after being at home three weeks. Well, sir, I have been here a little over two weeks and there is no return of that very unpleasant trouble. My sleep is sound, and there is no disturbance of the regular laws of nature. I feel as strong as I ever did before bad habits had weakened my system. Not only is the general debility entirely disappeared, but the local trouble has gone. I feel so strong that there is no fear of its return. Considering that you only took one month to cure a disorder of seven years standing, I think your system almost miraculous. Accept my sincere thanks, and publish this if you please. I have sworn to it, as you will see. C. BOWMAN.
State of California, County of Sacramento—ss.
Subscribed and sworn to before me, this tenth day of Oct., A. D., 1860. CHAS. HART, Notary Public.

HORNITAS, Nov. 1st, 1860.

Well, Doctor, I am at home, and have been to work in the water for several days, and there is no return of the Rheumatism, as I call it; and Mercurial pains as you state them to be. I feel as gay as a lark, no pain or bad feelings, no stiffness, but perfectly well, and all done by you in three weeks, without one drop of medicine. You had hard work to make me believe before you commenced that you would cure me, but now I find it very easy to believe. Although my friends look rather incredulous, but they cannot doubt my sober earnestness. Doctor, you have my thanks, and I will benefit you all I can, by spreading your fame up in these parts.

Respectfully yours, GEO. PERKINSON, Jr.
To J. H. Josselyn, M. D., Resident Physician, at the Electropathic Institute

NEVADA, Nov. 8, 1860.

DEAR DOCTOR: Pursuant to agreement, upon my arrival, I sit down to pen you a few lines in acknowledgement of the great service you have rendered me, in relieving me of that painful case of neuralgia and rheumatism. When I look back and see the gallons of medicines I have swallowed to no purpose, and then to think how soon you cured me, I am astonished. You were only twelve days performing a cure of the trouble, for which I had taken medicine over six months. Dear Doctor, if you could see the wonder exhibited by my friends, who can hardly believe that a cure was performed without medicines, but here I have been cured, and I have not taken a drop of medicine from you, nor from any one else, while being treated by your splendid Instrument I shall try to show my gratitude by sending every sick man I come across to you. Yours, till death,

FRANCIS GARLAND.
To J. H. Josselyn, M. D., Resident Physician, Electropathic Institute.
State of California, County of Nevada—ss.
Subscribed and sworn to before me, this eighth day of Nov., A. D., 1860.

F. SPAULDING, Notary Public.

YREKA, Nov. 10th, 1860.

DR. JOSSELYN—Dear Sir: Your letter, dated October 10th, is before me. You wish to know how my bronchial troubles are. Now, Doctor, that looks a great deal like a joke. I once had such an affection of several years' standing, but thanks to your natural mode of treating disease, it has gone to be numbered with the things of the past. Since my return I have not felt the slightest trouble from it. When you pronounced me well I did not expect to ever hear from it again. Any one who sits under treatment of that *Improved Instrument* of yours will have the same feelings. It imparts vitality to the system so rapidly that confidence is at once established. I have to thank you that you did not refuse to treat me because I could not pay you the whole of your reasonable charge; inclosed is the balance due you, and God bless you for the kind treatment I received at your hands.

Yours, ever grateful, WM. GARDNER.
State of California, County of Siskiyou—ss.
Subscribed and sworn to before me, this tenth day of Nov., A. D., 1860.

B. F. WELLITS, Notary Public.

This is to certify that I, the undersigned, was troubled with dumb ague accompanied with rheumatism, very badly. My disease was taken in Washoe. After having exhausted medicines without benefit, I applied to Dr. Josselyn, at the Electropathic Institute, on the first day of November. After taking twenty treatments with his Improved Electropathic Instrument I am perfectly cured, having been entirely relieved of all pain or inconvenience. I feel as strong as I ever did when in the best of health. I cheerfully recommend all afflicted to his care, as being the best physician I ever became acquainted with. One great advantage, he uses no medicines, but cures by a process which is perfectly natural. The time occupied in my case was thirteen days.

D. O. HARRA.

November 14th, 1860.
State of California, City and County of San Francisco—ss.
Personally appeared before me, D. O. Harra, and subscribed and sworn to the above certificate, on this fourteenth day of November, A. D., 1860.

P. BARRY, Notary Public.

SAN FRANCISCO, Aug. 3d, 1861.

To the Directors and Resident Physician of the Electropathic Institute.

SIRS: You requested of me a certificate of the cure you performed in my case. Below I append it:

This is to certify that I was troubled with a swelling which commenced in my ankles, and gradually extended upward until it effected my whole body. I sought the best medical aid in New York and Boston, and they all pronounced it dropsy. Hoping to retrieve my health, I visited California in February last. I consulted the Resident Physician at the Electropathic Institute; and now, after five months of treatment, and waiting to see its effects, I am pronounced well by competent judges. It did not take but three months of treatment to cure me, but I waited to see that it did not return. I feel perfectly assured from what I saw while under treatment that Electricity as applied at the Institute will cure any disease to which the human family is liable.

Now, gentlemen, you can make what use you please of this certificate. With my thanks to the Resident Physician for his kind attention, I subscribe myself,

Your thankful patient,
MRS. C. A. CARLTON.

Opinions of the Press.

The advantages of electricity as a remedial agent, are universally admitted by the medical and scientific world. It requires, however, experienced skill to apply this remedy efficiently, and this skill of application is possessed in an eminent degree by Dr. J. H. Josselyn, of the San Francisco Electropathic Institute. Particulars of his method of practice can be obtained by reference to his advertisement in another column. The Doctor is well known to us as a scientific gentleman, and an ardent devotee to his profession. He is no pretender, but has conferred incalculable benefit on those who were so fortunate as to seek relief at his hands. For those who desire speedy and permanent relief from the rheumatic pains, so prevalent in this region, we can recommend no surer remedy, than a visit to Dr. Josselyn at his rooms in San Francisco, No. 615 Washington street.—[Placerville Republican.

ARE YOU SICK?—We wish to say a word to those that are sick. We have in this city an Institution known as the Electropathic Institute, situated at 645 Washington street. The establishment is under the charge of Dr. J. H. Josselyn, a physician who has no superior in the city. He has been in charge of the Electropathic Institute for several years, and has been uniformly successful in his treatment of the numerous patients that have placed themselves under his charge. The Electric treatment will cure many diseases that cannot be reached by any other mode. Dr. Josselyn gives his personal attention to all of his patients, and is always ready to give advice to those that may call upon him. His charges are very moderate, and we cannot do the sick a greater favor than to recommend them to call on him before placing themselves in charge of another.—[San Francisco Daily Journal.

We call the attention of our readers to the advertisement of Dr. Josselyn's Electropathic Institute. Voluntary and unsolicited we make the following statement, proving its beneficent effects, particularly in rheumatic cases. Some months since we were on an editorial trip, visiting the mountains. The stage-coach upset, and landed all the passengers, including the writer, below in the valley, where the Deer Creek overflowed by receiving the additional material, estrenious to its usual contents. For some hours exposed in our wet clothes, to night wind and weather, we soon felt the effects of the accident in the mountains—pains in the back, hip, and legs; so much so, that for weeks we hardly could walk Treatments of all kinds were applied but without avail until our attention was called to the Electro-galvanic Baths and appliances of the above Institute. Thank God, after two weeks we have been fully restored, and enjoy now the free use of our limbs and body, as fully as previous to the involuntary bath in Deer Creek.—[Dr. H. Bibn.—Ed True Pacific Messenger.

ELECTROPATHY.—Electricity has long been classed among the most effective medical agents. It possesses great advantages over the systems of therapeutics heretofore relied upon as it reaches more certainly the seat of disease, especially in nervous or rheumatic complaints. The Electropathic Institute, No. 645 Washington street, under the charge of its able Resident Physician, Dr. J. H. Josselyn, has attained a well merited celebrity for the many cases which have resulted favorably from the skillful application of this invaluable remedy.—[Daily Morning Star.

A GOOD INSTITUTION FOR THE SICK.—One of the very best places in the city for the care of the sick is at the Electropathic Institute, 645 Washington street. The establishment is under the charge of Dr. J. H. Josselyn, a physician of great experience, and no one can do the sick no greater favor than to recommend them to give the Electropathic Institute a trial.—[Weekly Journal. 13

All Letters answered with promptness and pleasure. Office open from 9 a. m. to 9 p. m. Advice gratis.

J. H. JOSSELYN, M. D.,
13 Resident Physician.

Literary Shrubbery.

[For the California Farmer.]

PASSING AWAY.

We are passing, one by one, away,
We cannot here much longer stay.
Though earthly scenes invite us strong,
Still we are passing, one by one.

We are passing on to a happier land,
We are passing on to a joyful band,
Who will greet us as we meet them there,
In their angel homes, without a care.

We are leaving our early home on earth,
Our mortal home, where our first birth
Dawned upon our infant eyes,
To awaken our souls to new destinies.

We are daily and hourly passing on,
Where many dear ones have early gone,
Trusting to our Father's love
To guide us to our Home above. M. J. U.

SMOKERS, LOOK OUT!—It is said a Scotch lady wrote to a gentleman, who used *tobacco*, the following lines:

May never lady press his lips, the proffered love returning,
Who makes a furnace of his mouth, and keeps his chimney burning.
May each true woman shun his sight, for fear his fumes would choke her;
And none but those who smoke themselves have kisses for a smoker.

What say you, ladies? Was not the bonnie lass correct? And will you follow suit?

—The collecting of petroleum is generally regarded as a modern discovery made by Drake. But Herodotus, who lived two thousand three hundred years ago—about the period of Malachi—speaks of the collection of petroleum in the Island of Zante, on the western coast of Greece, Dr. Chanler, in the early part of the present century, visited Zante, and found an oil well in full operation. The patriarch, Job, had undoubtedly visited that well, or some other one—a flowing one, at that—otherwise he would not have thought of the "rock pouring out rivers of oil."

☞ "Mother, where's Bill?" "My son, do not let me hear you say Bill again. You should say William." "Well, mother, where's William?" "In the yard, feeding the ducks." "Oh, yes, I see him now. "But, mother, what makes the ducks have such broad williams?" "Go out to your brother directly, you little scamp, or I'll box your ears."

A CARD.

YEARS HAVE ELAPSED SINCE THE Subscribers first invited public attention to the peculiar properties of their Patent Axle-grease. At first their invention made but slow progress, but thanks to the liberal and appreciative spirit of a large portion of the teamsters and coach proprietors of California, the demand for their manufacture has gradually increased, and notwithstanding the many spurious imitations which from time to time have been introduced from the Eastern States to compete with their article, the H & L AXLE-GREASE has now acquired an unrivaled reputation, extending throughout the length and breadth of California, Oregon, and the neighboring Territories.

The subscribers return their grateful acknowledgments to a discerning public, who have so largely patronized them in all their enterprises which they are now happy to say, are beginning to be justly appreciated as belonging to our California industry.

The supply of material from the East having, in consequence of the war, been cut off, the subscribers turned their attention to the substitution of COAL-OIL as a basis o their manufacture, but after applying every means suggested by the modern application of the science of chemistry, they were reluctantly compelled to the conclusion that however fit COAL-OIL might be for illuminating purposes, and for which it stands unequaled, it was not at all adapted to make a permanently satisfactory Axle grease. In this dilemma the subscribers turned their views to the native produce of California, believing that large quantities of natural resin might be collected from the noble pine trees of her boundless forests.

Having invited attention to this subject, th with steady progressive steps, advanced this until, at the present time, they have established a manufactory of Rosin and Turpentine at Forbestown, from which considerable quantities of both articles are daily manufactured, of such a quality as to find a ready market at fair prices.

It is hoped that increased efforts may continue to be put forth, and new discoveries made, so that California may soon be independent of all foreign supply, for we believe our lofty mountains and our mighty pine forests will yet give us that supply. The subscribers are now receiving native resin in sufficient quantities to be able to sell their celebrated AXLE-GREASE at a LOWER PRICE than any of the spurious COAL-OIL varieties which may hereafter be imported.

OLD NEWSPAPERS FOR SALE.

50,000 OLD NEWSPAPERS FOR SALE, AT the FARMER Office. 23tf

FROM OUR EXCHANGES.

—The Napa Reporter of the 4th inst, says much apprehension is entertained among farmers in Napa Valley, that the late severe rains have drowned out all the grain planted on low lands which had not germinated at the time of their commencement. Every exertion had been made, dring the continuance of the three or four weeks of fine weather, to plow the land, and get in wheat before the expected Spring rains, and a large arena of soil has been planted, much of which likely will have to be resown. There are thousands of acres of land in Napa Valley which are so saturated with water as to prevent the possibility of plowing them for one or two months, and some land that will be too wet for any but a grass crop. All the rolling lands and hill-sides will turn out splendid crops of grain, this season, but much of the wheat on low, level lands, it is feared, will turn to cheat.

—The total amount of State tax levied, in California, for 1865, is $1 15 on each $100 of taxable property, viz: General purposes, 48¾ cents; Interest and sinking fund of 1857, 30 cents; Interest and sinking fund of 1860, 11 cents; State Capitol, 5 cents; Soldier's relief fund, 4 cents; Aid to Central Pacific Railroad, 8 cents; Benefit of Line officers California Volunteers, 1 cent; Soldiers bounty fund, 12 cents; School purposes, 5; Total amount $1 15.

—The real and personal property of the State amounts to $180,484,949 85, against $174,104,-955 07 in 1863. San Francisco returns $82,403,-488 98, which is but little under half of the property valuation of the State. Sacramento county stands next, with $11,340,808. Santa Clara is third, having $6,883,682. San Joaquin is fourth, Alameda fifth, Yuba sixth, and Nevada seventh. Mono county is the poorest, its taxable property being $135,874 50.

—The Owyhee river—upon which mines have been discovered—rises and runs for upwards of one hundred miles in Lander county, Nevada. It rises in the northern corner of Nevada, near the Humboldt, running northwestward about one hundred miles, then west and northwest, continuing its circular course to the northeast and running a distance of about four hundred miles, it empties into the Snake river or Lewis Fork of the Columbia, a short distance above Fort Boise.

—The Los Angeles News says that times are becoming brisk in that vicinity, and "dust" getting plenty in the mines of San Gabriel Canon. Prior to the heavy rains of the past week, the miners had just commenced to work claims in the bed of the river, and were making fair daily wages. For some time past the canon has been filling up rapidly with experienced placer miners. The coming season promises a rich harvest.

—The Sacramento Bee says the number of men engaged in placer mining is probably much less than ever before known in the history of the State, during seasons when water was as plenty as it has been since the first Winter rain of this season. For this reason the aggregate yield of the mines is not so great as formerly, yet the average yield to the individuals engaged is undoubtedly much greater.

—The Legislature of Nevada has granted a franchise to Mr. Sutro and associates, to run a tunnel into the Comstock and other ledges in the vicinity of Virginia City, for the purpose of draining. It is to be commenced at a point near the Carson river, will be four miles long, and will cost not less than $2,000,000.

—Of the 40,000 Chinese in this State, about 30,000 are engaged as miners, each paying, or supposed to pay, a monthly tax of $4 each—$120,000 per month to the State and county revenue. About 2,500 work on ranches; about 1,000 as cooks and private servants, and nearly 5,000 are merchants, traders and beggars.

—The Petroleum Oil excitement is on the increase in Los Angeles county. The city of Los Angeles has conferred on D. B. Wilson, P. Banning, J. G. Downey and others the right to bore for oil within a tract of four hundred acres of land, the property of the corporation.

—The Red Bluff Independent says that during the month of January, Tehama county has sent to the San Francisco market over 1,000 head of hogs, 100 head of cattle, and about 6,000 pounds of poultry. One stock raiser sent twelve carcasses to San Francisco and received in return $900.

—Petroleum springs have been discovered in the Coast Range, about 75 miles from Firebaugh's Ferry, on the San Joaquin river. The discoverers have laid off a district and framed laws for the government of the petroleum "miners."

—Judge Garter, of the Ninth Judicial District Court has decided that all proceedings in Justices' Courts, for the collection of any debt amounting to $100, are entirely void unless the summons has a fifty cent U. S. Revenue stamp attached thereto.

—There has been no telegraphic communication for a week past between California and the Eastern States, the Indians having destroyed the line between Julesburg and Denver. At last accounts, troops had been sent out to drive them off.

—There is considerable excitement in Sonoma and Napa counties concerning quicksilver discoveries, near the Geysers. Fine specimens of cinnabar are exhibited.

—The strike of the employés at the New Almaden Quicksilver mine is at an end, by the Superintendent yielding to the desires of the workmen.

—The streets of Virginia City were lighted by gas, for the first time, on the night of January 31st last.

—The telegraph line connecting San Francisco with Puget Sound, is nearly completed.

—Thirty thousand cords of wood were cut and sold in Lyon county, Nevada, during 1864.

—The Columbia Courier opposes the sale of the mineral lands.

—The Legislative Assembly of Utah Territory adjourned on the 21st of January last.

LONGEVITY OF A TURTLE.—Henry Mix, Esq., an elderly gentleman, residing in West Hartford, gives the following interesting facts connected with the above topic. In the year 1824, while out in his field, he discovered an ordinary-sized land turtle, which after cutting his name and date of the year *upon its shell*, set at liberty. A short time since a neighbor found the same hard-shelled specimen of his species, still carrying his mark, and brought it to Mr. M. for inspection, who immediately recognized his old acquaintance of 1824—*forty years* having elapsed since he last saw him. As the size of the shell was about the same as when first lettered, this turtle may be twice the age indicated by this mark, as they have been known to live nearly a century, and this one may have been forty years old when first found. Quite a venerable old settler.—[Hartford (Ct.) Courant.

PENSIONS.—From the report of the Secretary of the Interior we learn that only five Revolutionary pensioners now survive, and 1,418 widows of Revolutionary soldiers, who are receiving pensions. The whole number of pensioners, on the 30th of June last, was 51,135, requiring for their annual compensation $4,595,376 33. More than $7,000,000 will be required to satisfy the claims accruing under the pension laws during the current fiscal year.

The Markets.

Wholesale Produce Report.

This represents the prices paid by the dealer to the producer.

Corrected weekly, by A. H. Todd & Co., corner of Clay and Drumm Streets.] February 10th.

The Produce Markets have undergone but slight change since our last Report. Wheat and Flour are nominally the same, with but a limited demand, and light trade. Oats and Barley are both easier for the buyer. Corn, in consequence of light receipts and the small stock of Eastern kiln-dried on the market, has advanced. Beans are neglected; Potatoes are in good supply, and but a slight change to note in price. Hay has arrived freely, and the market is dull, with a downward tendency. The heavy consumption by milkmen and others of Bran and Middlings take all that offers, and of these prices continue high. As a general thing, business of all kinds is dull, and but little doing among Jobbers and Commission Merchants, complaints of dull times, etc.

Our receipts from all sources, for the past week, are as follows: Wheat, 4,778 sks; Barley, 5,854 sacks; Oats, 3,132 sks; Potatoes, 4,446 sks; Beans, 548 sks; Salt, 450 sks; Flour, 46,243 qr-sacks; Bran, 900 sks; Hay, 4,629 bales; Straw, 221 bales; Beans, 548 sks.

Walter Brown's Monthly Wool Circular.

NEW YORK, January 1st, 1865.

During December there was a steady demand for Wool from manufacturers, which continued quite up to the close of the month; the purchases generally being of moderate amounts, and nothing doing for speculation.

Many of the outside lots have been cleaned up, and dealers are expecting some improvements in prices as spring approaches, but buyers are very cautious, thinking the chances are as good for a decline as for an advance.

California Wools have been in fair demand, but Fall clip parcels have not been sustained in price.

Pulled Wools are taken, as offered, at current rates.

Foreign Wools have been in more request, and some considerable sales have been made of both low and finer grades; our advices from abroad state that, with an easier money market, prices were very firm.

We have reported the following sales during the past month: Fleeces, 1,450,000 lbs, 85@115c., Tub Washed Wools, 50,000lbs. 116@125 cents; Pulled, 390,000lbs, 80@100c.; 350,000lbs. California, 40@75c.; 40 bales Mexican, 48c.; 120 bales Montevideo; 20 bales Valparaiso; 50 bales Chilian; 160 bales Entre Rios, 35c.; 827 bales Mestizo, 32@60c.; 2,753 bales Cape, 50@63c.; 234 bales Cordova; 510 bales East India, 60@85c.; 1,060 bales Syrian; 1,107 bales Donskoi; 60 bales Crimea, 600 bales Greek; 560 bales German.

At Auction—224 bales Chile, 29@42½c.; 69 bales Mestizo, 35@41c.; 154 bales East India, 50@70c.; 191 bales Cape, part damaged, 52@54½c.

In Boston—Fleeces and Pulled, 1,475,000lbs., 90@112c.; 91,000lbs. Canada, 90@125c.; 675 bales Cape, 62@65c.

In Philadelphia—Fleeces, 568,000lbs., 89@115c.; 134,500lbs. Pulled, 90@95cents; 82,000lbs. Tub, 114@125c.; 60,000lbs. California; 20 bales East India.

The imports of the past month, as published, are—from London, 12 bales; Liverpool, 147; Algoa Bay, 1,291; St. Croz, 4; Buenos Ayres, 421; Matamoras, 25; Aspinwall, 793 bales. Total, 2,693 bales.

PRICES CURRENT OF CALIFORNIA WOOL.

California Unwashed Fleeces, in grades, 45@65c.
California Washed Pulled, 65@85c.
California Common Washed Pulled, 30@50c.
California Washed Fall Clip, in grades, 45@60c.

FOR SALE, TO LEASE, ETC.

A Magnificent Stock Farm For Sale.

WE HAVE ONE OF THE VERY FINEST STOCK FARMS for sale to be found in the State. The location is a Valley in the Coast Range, and in a situation unequaled for excellence. A place secluded from loss of Stock by mixing, etc.

There are 1200 acres all inclosed with a fine staked oak fence with strong riders, to this can be added as many thousands of Uncle Sam's acres as may be wanted. The fenced land is the best of bottom land. During the late dry weather a large amount of Stock has been driven to these hills for feed and have been profitably kept.

This Ranch produces a big yield of Wheat, Barley, Oats, Corn, Root Crops, etc. Tobacco, Hemp, Flax, etc., can also be raised most profitably. Floods never wash it, and it is never affected by drought.

On this Ranch are good, ordinary Buildings, Houses, Barns, Sheds, Corrals, Smoke Houses, etc., to this Plows, Harrows, Teams, working Oxen, etc., to do the work on the place.

On this Ranch there is now the following Stock:
One Jack of the very best character
100 Mules from 1 to 3 years old.
1 Stallion, No. 1.
20 American Mares, No. 1.
80 Mares one-half and three-quarter breed. These Mares are all in foal, mostly by the Jack, as Mules are a ready sale at high prices.
100 Horses, mixed Stock.
500 Head Horned Cattle, American Stock and half breed.
400 to 500 Swine, good Stock.

The Stock now on the place can be sold with the Ranch and thus put the purchaser into a business profitable at once. This Ranch is so situated that a river surrounds the range on one side and mountains on the other to which the Stock have a fine run without any interference from any source, thus giving the Stock a complete swing. Without reducing the original Stock there can be sold annually from this Ranch 50 Mules, 30 Horses, 100 Beef Cattle, 300 fatted Hogs, worth in the aggregate $10,000, three-fourths of which is clear profit

The timber is abundant Pine, Oak, and other hard woods. Tar, Pitch, and Turpentine can be made in abundance.

This is one of the Rare Chances, such an one as is seldom offered.

Easy terms as to payments: A portion of the money can remain on time if secured.

For all particulars call on the Editor of the Farmer. 22

Pleasant Homesteads For Sale.

THE FOLLOWING PLEASANTLY located Properties, situated on the opposite side of the Bay, can be purchased at very reasonable prices and easy terms if applied for soon.

No. ONE.—A Handsome Two-story Cottage, with seven rooms and seven closets, hard-finished, and every convenience inside, Small Buildings, Chicken House, Good Water, Gardens, and a very fine view of the Bay. Price about $3,000. Buildings perfectly new.

No. TWO.—Very similar Cottage, with eight rooms, and same good finish and conveniences inside and outside, and same views—price the same. Both the above have excellent soil in the garden, and some fruit trees ready for bearing. The fences are fine around the grounds, each about one acre.

No. THREE.—A large House, built some three years, large Garden and about 150 Fruit Trees in bearing yielding a handsome income yearly. All these three Dwellings are within three minutes of the cars. Price, similar These are really worthy special attentions. For all particulars inquire of the Editor of Farmer.

....ALSO....

A neat Cottage with eleven acres of land all covered with Fruit Trees, and small vines in abundance such as Blackberries, Raspberries, Strawberries, Gooseberries, etc. The income from the ground has been about $2,000 a year. The owner wishing to leave will sell at $6,000. A fine location and everything desirable—it will be sold at a bargain.

—LAND—

A Fine Building Lot all planted with Trees, about 500 of the best quality and in bearing. The Fruit alone will pay for the place in three years.

OTHER LOTS OF LAND.

We have several Fine Lots of Land, open; also some stocked with Fruit Trees, that can be offered on the most favorably terms to those who wish to secure desirable Homesteads.

Inquire for all the above of the Edito of Farmer. 19

A Beautiful Eden for Sale.

ONE OF THE MOST DESIRABLE Estates on the Pacific Coast is now offered for sale by reason of a desire of the owner to travel abroad and to regain his lost health—no other inducement could tempt the owner to part with it.

The Estate now offered is beautifully located in a retired valley away from any immediate neighborhood, free from noise, dust, etc., and shielded on all sides by lofty and picturesque hills giving a varied scenery, truly delightful, no season of the year without real beauty.

The whole Estate comprises a little less than ONE HUNDRED ACRES, the greater portion of it is covered with Orchard, Vineyard and Garden Grounds, comprising all that is desirable, and unsurpassed by any grounds in this State

The Orchard covers many acres, and the Vineyards are very extensive, and everything rare and desirable in these departments are here found.

Pleasantly built and located is the Cottage residence. This with Barns, Fruit Houses, Wine Cellars, and other appurtenances make the whole complete, a highly prosperous Garden Ground around the residence with large Orange, Lemon, Fig and Olive Trees in bearing gives the whole the true "Eden" appearance.

The productiveness of the place can be estimated when we say more than Ten Thousand Dollars is annually produced from the Orchard and Vineyard, and these can be easily and greatly enlarged.

This whole Estate can be had at a bargain if soon applied for.

The approximate value is about a THREE-YEAR INCOME, and any person having ready cash of some amount, who wishes to secure one of the finest Estates on this coast, can find the present a rare chance. No person need apply who has not ready money to a reasonable amount, and none but a real purchaser To such, one of the best chances for a Fortune is now offered, as in good hands the Estate can be paid for with the income from the product in three or four years, sure.

For particulars apply to Editor of Farmer. 20

Fine Farms for Sale.

YOU WHO WANT GOOD FARMS CAN SECURE them by applying to the Editor of the Farmer. The following can now be had:

FOUR VERY FINE FARMS in the splendid San Joaquin District, within a few miles of Stockton, all very productive.

Several STOCK RANCHES in various parts of the State, from $1,500 to $25,000; in all these, good and permanent settlers can find bargains. Address by letter, or in person, for particulars to Col. Warren, Editor of the Farmer. 23

Two Splendid Farms for Sale.

TWO SPLENDID FARMS FOR SALE, IMMEDIately, in one of the best localities in our State—one of the best chances ever offered for an immediate purchaser, parties wishing to close business contracts.

One Farm of 30 acres, and Orchard, worth $6,000, will be sold for about half that sum.

A large Farm, 5,000 acres, worth $15,000, will be sold for $10,000 or less. Inquire of Editor Farmer.

Loan Wanted---$5,000.

WANTED, FOR TWO YEARS, $5,000 ON VALUable improved property in a neighboring County The property is worth treble the amount, Insurance on the buildings of $5,000 goes with the collateral. The money is wanted at a fair interest, which will be paid promptly. Inquire of Editor Farmer 7-t

ORNAMEFTAL TREES, PLANTS, ETC.

W. R. STRONG'S American Seed Store

NO. 206 J STREET, SACRAMENTO,

IMPORTERS

—AND—

WHOLESALE AND RETAIL DEALERS IN

Garden Seeds, Tree Seeds, Grasses, E

The Largest and Best Collection of Seeds, the Garden, Field and Orchard that can be found in all the upper section of the State.

THE UNDERSIGNED BY AN EXPERIENCE many years has made himself familiar with character of the seeds especially wanted for the Sacramento Valley, or any portion of our State, has taken pains to import, from the very best source Europe and the States, only those of the most re character and quality, such as are adapted to our mate, all guarranteed PURE and FRESH, and su he can most cheerfully offer to his customers.

The Collection of Seeds will embrace every desi variety of

GARDEN,
FLOWER,
—AND—
FRUIT SEED

Together with

AGRICULTURAL SEED

For every Department including all the New GRA GRAINS, etc.

Ornamental Tree

....AND....

SHRUB SEED.

Choice Flower Seeds,

Over Two Hundred Varieties, and these of the CHOICEST KINDS.

GRASSES.

A large Collection of all the Valuable Clover other Grasses suitable for high or low lands.

A large Invoice of Alfalfa, or Chile Clover, of last crop, best quality, imported to order, will be o this year also.

California-raised Alfalfa, of a very superior qu and of extraordinary purity.

Cotton Seed, Seed Rice, and Tobacco S

All these of the most approved sorts.

Bulbous Roots

In great variety. In this collection will be found cynths, Tulips, Naracissus, Crocus, Lillies, Gla and all choice Bulbous Roots that flourish well in clime.

It has been the object and aim of the undersign import and prepare for his patrons a collection of superior to any yet offered in this section and he i opening over fifty large packages, of many tho pounds of new and choice Seeds, all of this growth, just received by the last steamer, to whi would call their especial attention.

He can assure those that desire pure and rel Seeds, that they can send their orders with full dence that they will be attended to, and filled the as if they were present themselves.

Catalogues of the Seed of this warehouse will be to all applicants.

A fine collection of Fruit Trees, Grape-vines, mental Trees, Flowering Plants and Shrubs will be found in the yards connected with this Store, the season of transplanting.

Agricultural Books, Pruning Knives, etc., alw hand.

W. R. STRONG,
20 206 J street, Sacram

ORNAMENTAL TREES

Fruit Trees,

GARDEN PLANT

—AND—

FLOWERING PLANTS.

THE UNDERSIGNED WOULD RESPECTFULLY the attention of the Public to the

Great Collection

—OF—

Ornamental Trees,
Fruit Trees,
Garden Plants,

—AND—

Flowering Shrub

This collection consists of all the very best

EVERGREEN TREES,
ORNAMENTAL TREES,
FLOWERING SHRUBS,
GARDEN PLANTS,

With an extensive NURSERY AND GARDEN enabled to offer a MOST SUPERB COLLECTION, is rarely found.

Purchasers of TREES, PLANTS, FLOWERS, etc. vited to call at our office,

605 Sansome Street,

Also at the Post Office Yard, where Evergreens and Trees can be seen.

Orders solicited and promptly filled.

Native Plants and Flowers—A Grand Suggestion.

We hail with much pleasure the suggestions of "A Stranger," and will do all in our power to carry out his grand plan, and will give our columns cheerfully to make known fully all Plants and Flowers wherever grown, when in bloom, etc., etc., and if our many Florists would advise us of the blooming of choice plants they would do a public service and benefit themselves by calling into action one of the highest tastes, "the love of Nature."

We would always be glad to join all expeditions in search of the "Beautiful in Nature," for which our taste is justly celebrated.

We sincerely hope the teachers of our Colleges and Schools will not only approve the plan but carry it into successful operation, and report to us the result of their explorations, for great good must result both to Teacher and Pupil from such pleasant and invigorating rambles. Earnestly would we say:

"Go abroad
Upon the path of Nature, and when all
Its voices whisper, and its silent things
Are breathing the deep beauty of the world,
Kneel at its simple altar."

SAN FRANCISCO, February 14th, 1865.

EDITOR CALIFORNIA FARMER:

Dear Sir—Permit a "Stranger" to make some suggestions, and ask a favor, that *you* or some of your correspondents, will from week to week, give a short list of California Plants and Flowers, that are in bloom, and when convenient, in what locality in the vicinity of the city they could be seen.

There are many like myself, who are comparative strangers here, but who have an *intense* (not a make-believe) love, for "Nature's most beautiful handiwork," and are willing to take long walks, if necessary, to see them growing in all their native luxuriance, but we do not know where, and what to look for. How many a pleasant Saturday, might be spent by Teachers and Scholars, of both male and female Schools, roaming over the hills and valleys and by the shore, collecting Plants, Flowers, Grasses, Mosses, etc.

What a life-long source of pleasure they would afford, after the week's study, and if they could persuade the Editor of the FARMER to accompany them, and point out the "beauties everywhere around them," what different feelings and thoughts would soon take possession of the young of our city, instead of wasting their time on frivolities and their owns elves, the world would have a new aspect and a new object in life, and their studies would have a charm thrown around them to tempt them onward and upward. Perhaps a word from you may accomplish the object and oblige a—

STRANGER.

WET LAND FOR GRAIN.—There is much complaint now, in many places, that the land is so wet it cannot be plowed so as to plant with *Grain*. Such land is not fit for grain, let such land remain for root-crops, especially the Sugar Beet, for sugar, or planted for the dairy or to fatten stock. When will our farmers awake to the importance of cultivating the *Sugar Beet*. The people of France are largely engaged in raising Sugar Beets and making sugar. It has been established that the value of the Sugar Beet crop there used, is equal to nine hundred millions of francs, or nearly *two* hundred millions of dollars, annually.

OUR MINING INTERESTS.—Our mining interests are now creating much excitement. From the Washoe, Reese River and Humboldt regions we hear good accounts; and we do not think that the prospects for the Farmer, Miner, Manufacturer, Mechanic and Merchant, have ever looked so well as the present year.

Tule Lands for Keeping Stock.

There has been considerable written for and against the propriety and safety of using our tule lands in winter for the grazing of stock. The Monterey Gazette has recently charged heavy losses of stock, by reason of placing them on tule lands. This has drawn out considerable discussion in the Alta and Bulletin by several writers, which we hope will have the effect of calling out others, and we shall thus arrive at the truth.

We have conversed with parties who have stock on tule lands, frequently, and have always been satisfied, from facts that we have gathered, that where the stock was not *too numerous* for the extent of the land, the stock would always do well; we do know, however, that in many places where the stock perished last year, the stock was poor and sickly when put on, and the ranches were crowded, and the stock not cared for or seen to; and we have it from good authority, that on some ranches the cattle were as thick all over the land as they could comfortably stand; in many places they looked more like *cattle pens* than pasture grounds.

We published a letter last week, having reference to the loss of cattle and the causes. We now give a letter which we find in the Bulletin of the 14th, containing several good suggestions about raising mounds for the preservation of stock, in case of a flood. We can remind the writer, "A. G. K.," that his plan of mounds was suggested in this journal years ago, for all places that overflow. We suggested, however, raised stagings, or floors, with a railing outside, and a cover overhead, then hay, grain, etc., could be stowed there, in case of a long flood.

We hope some of our many readers who are on "tule lands" will reply to all these points, and we shall be glad to hear from any or all, upon the subject, for it is an admitted fact that some of our best and most productive land, is tule land, and our heaviest crops have been gathered from the reclaimed tule lands:

TULE LANDS, SAN JOAQUIN COUNTY,
February 9th, 1865.

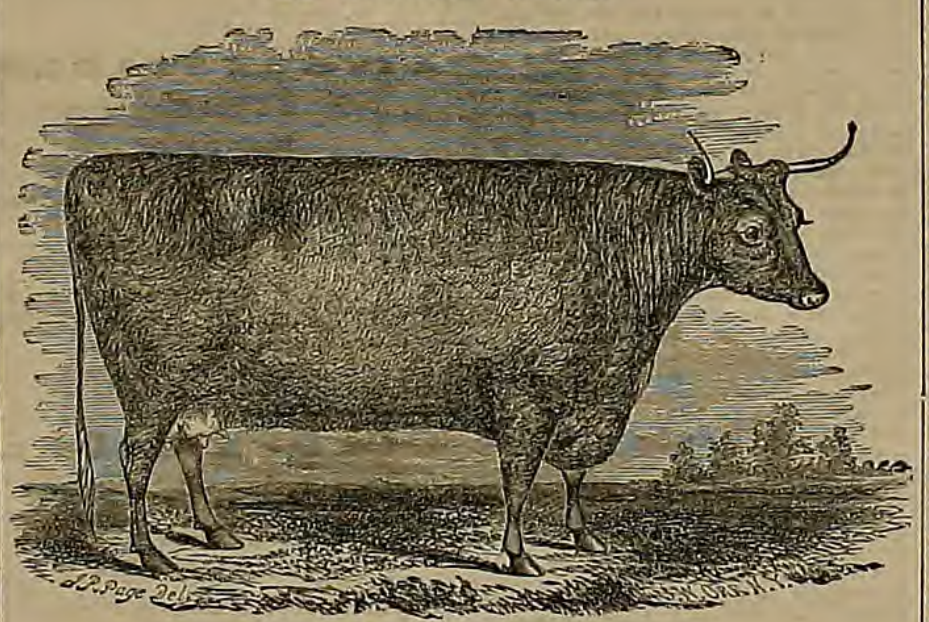
Mr. Editor:—The Monterey Gazette, of the 27th January, prints an article about Tule lands that has attracted some attention, because the Bulletin copied the same in its edition of the 3d instant, for which you have at least the thanks of the undersigned, for it gives him an opportunity to refute the statements of the Gazette.

In speaking of stock-raisers the Gazette says: "The unprecedented losses of the past year are not attributed solely to the drought and consequent scarcity of vegetation throughout the country, but are owing mainly to a grievous error which our farmers and graziers committed in sending their most valuable animals to what are commonly known as Tule Lands." Again: "Any person who would for a moment consider the nature and situation of these lands, would at once see the utter impracticability and madness in trying successfully to winter stock there. Stock not only will not recuperate on tule grass, but it is questionable if it is nourishing enough to sustain animal life. But the great evil of that country is the annual inundation to which it is subject from the high water of the San Joaquin river, with heavy rains, such as we have had during the early part of the present winter," etc. These extracts from the Gazette are absolutely refreshing to those of us on the "tide lands," who think we have the most luxuriant natural pastures for cows in California *at all seasons of the year*. Now for the facts:

A vast number of cattle in a starving condition (and so poor that many of them died on the route) were driven to the tules from the adjacent counties to prevent them from starving; and they came in such numbers, that they overstocked the land and failed to fatten them before the winter set in. The losses were heavy during the months of December and January, owing almost entirely to the fact that poor cattle remained on lands where the feed was exhausted, on account of their great numbers, before the winter rains commenced. On some of the ranches in this vicinity, where the cattle were driven to the tules in the spring and got fat before the winter, and where the land was not overstocked, the losses were small, notwithstanding we have had a very hard winter for stock. I do not like the lands (unreclaimed) for horses or sheep for many reasons; but if properly reclaimed, I believe it a good locality for breeding horses or mules.

This "annual inundation" that the Gazette speaks of, is only imaginary: for on the ranch that I occupy there have been a few cattle since 1861, which have not been "swept off," and there have not been any of them lost even this hard winter. It is true the tides occasionally cover the land a few inches, and, in order to succeed and make money by raising cattle, and in the dairy business here, a portion of the land should be reclaimed by means of ditches and levees to keep your stock in good condition in the winter season; for, during the very bad winter, or in fact every rainy season, the ground being marshy and wet and the water cold, your animals will fall off even if the grass is plenty; and if the stock-raisers would cultivate blue grass, mesquit, or some other good winter grass they would find it to their interest, and greatly enhance the value of their lands and stock. We find, however—those of us who are not able at present to cultivate the above grass—that our stock not only eat the "tule grass" and fatten on the same during the growing season, but when cut and properly cured they keep fat on the tule hay during the winter; and as this worthless land (as the Gazette would have people believe) yields from two to three tons, when cured, per acre, of grass and clover, it is very little expense to use that during the winter in the absence of blue grass pastures.

A Devon Bull.



A Devon Cow.

We give above the cuts of two beautiful DEVON CATTLE, that our readers may see them in contrast to other stock, which we shall now weekly show our readers in the pages of this journal.

It is very important that attention be given specially to the best kind of stock, and it has been proved that the Devon breed will live and do well on less feed than any other stock, and as Dairy stock their milk is richer and the Butter finer than that of any other breed. We shall soon give some very important statistics of Devon cattle.

Some of your readers will doubtless think the present writer is only puffing the tules, because he has been "stuck" himself, and wants to get "even." Not so. He has not succeeded on the tules; but the fault is not chargeable to the lands of which he speaks (the fresh water tide-lands of the San Joaquin and Sacramento rivers), but for the want of necessary means to reclaim, in a proper manner, and to cultivate the best of winter grasses for grazing and hay, and to engage in the dairy business, raising beef, pork and the like. Although the best crops of wheat and barley ever raised in California were produced on reclaimed lands on Sherman Island, yet I am inclined to think that the raising of meat (beef and pork), the dairy product, and cultivation of grass will be more profitable than the grain business.

Some of my neighbors (who are better able than myself), intended to secure their stock in the event of another flood such as that of 1862. This can be done at a trifling expense by making mounds of earth on the banks of the rivers, and placing some hay on the same to feed them in case of an overflow. A machine which is employed for cutting the sods for making levees, can be used to advantage in building mounds to protect stock. The land would certainly be sought after in this vicinity at $10 to $15 per acre, if every 1,000 acres had a mound eight or ten feet high to protect one's property in event of a flood. A mound of earth can be made of the above hight, which will protect 1,000 head of cattle for $2,000.

There is a vast extent of the very best land in this vicinity for the purposes I have named, with an expenditure of from $3 to $6 per acre can be made to pay a good and certain interest on the investment for all time to come (for it is the most productive land in the State), and lies on the best navigable waters in California. As I am interested with my neighbors in the development of the resources of the State generally, and particularly in the settlement and improvement of the tules, I thought I would ask the favor (if not too lengthy) to have the foregoing inserted in the Bulletin; and if it should meet the eye of the writer in the Monterey Gazette, I should like to see him here next summer, where he could employ the mosquitos to suck some of the bad blood out of his veins. By the way, we are going to build mosquito-proof houses to protect us from that pest (for they never disturb us except in our houses). The expense is trifling, and no one should fail to shut them out of their houses where they live on or near the tules.

For the information of your readers and particularly the Gazette, I will say that from a careful estimate, between 20,000 and 30,000 tons of hay were made last year from the tules of the Sacramento and San Joaquin, and shipped mostly to Stockton and Sacramento, which prevented many animals from starving on the plains. A. G. K.

In alluding to the way to preserve stock, by raising mounds of earth, we re-publish what we said in 1862:

(From the California Farmer, January 14th, 1862.)

Homesteads and Cultivation on River Banks.

As a faithful chronicler of events, and ever watching for opportunities to advance the interest of the cause we serve, and to admonish, where we believe *good* will result from it: we are again reviewing the calamity that has fallen upon the Agricultural interest all over the country, wherever there is a river, or stream, or water-course; but more on river banks.

Some four or five years ago, and several times since, we have urged upon those who dwell upon the river banks, the importance of making a due preparation for the rise of waters during the winter season.

We have repeatedly urged upon those who had Stock in places exposed to a sudden rise of waters, the importance of having buildings or platforms properly elevated above the possibility of loss by flood, into which, or upon which, Stock could be taken, or to which they would go and thus be safe. Such safeguards could have been effected at very little cost, all along the Sacramento river, and many other rivers and places, and a large amount of Stock could have been saved, as timber is easily to be procured; and, besides, such a plan would have saved a large amount of HAY, Grain, Tools, which have now been lost.

We know that some will say that even the Buildings have been swept away. However true this may have been these Buildings could all have been saved, had proper precautions been taken, by having all buildings built on strong piles, and elevated above the reach of the flood; this can easily be done—all that is required is a little foresight.

To us, there seems no excuse, in cases where the parties have been exposed many times in former years.

Now, by the recent extended flood over so vast an extent of territory, and the prospect of its occurrence often in future years, it becomes the duty of all who are now located on the river banks, to ask themselves very seriously the question, whether that is the place for a Homestead, for a good permanent residence for a Home—for an Orchard—for a Vineyard—for the growth of anything that will be injuriously affected by these floods.

This is a serious question now; and it should be put now, and answered now; for years of prosperity or adversity will come to all as they shall now decide this question, each for himself.

That our River banks are rich and fertile and worthy of cultivation is true; and valuable gardens for Summer-Vegetable crops can be made to grow thereon, there is no doubt; and this can be done every year. These lands can also be converted into extensive Grass fields and Pasture grounds when high land feed fails, and large portions of them be used as Cranberry meadows, with great profit; but to expect to make them a good location for a permanent, a good, healthy and pleasant Home—it is impossible; for, whatever others may say, California *has not yet seen its highest water!*

We believe, from a large amount of evidence, gathered from early Settlers, and the Indians, that the time has been when the congregated force of all the rivers have poured their torrents upon Sacramento (or where she now is), until that immense body of water came almost covering her up. We feel satisfied we shall see "higher water" than we old '49ers have yet seen.

Believing this, we hope the dwellers upon the flooded districts will look well to the future, and thus be saved from further calamity.

[For the California Farmer.]

The Beautiful in Nature—"Knowledge is Power."

Gladly we give "Orrilla" to our readers again, and we feel assured all lovers of "Order and Beauty" will take the hints, and look to their "Home Gardens," and see that the Pet Plants are properly cared for. "Orrilla" utters plain truth; we, too, are often pained at the neglect which is manifest in the majority of our otherwise pretty flower gardens.

Why will not those who could have "a Little Paradise below," with proper care, take heed, and what they do, do right and well?

The suggestions of "Orrilla" relative to the care of Trees and Plants, and giving the botanical and common names, we trust will be heeded, and so also the other hints. We shall be glad always to respond to any and all inquiries upon the subject.—[EDITOR FARMER.

In my wanderings about the city and suburbs, in search of the "beautiful in Nature," I find much that gives me pain, and have often given hint to the occupant or owner of some neat place, but for the want of knowledge or common sense, some part of it spoiled all the rest; for instance, how vexatious it is to see some choice tree or plant for the want of a proper stake or tieing being destroyed. And how often are plants and trees so staked and tied as to be really *worse* than if not tied at all. With the strong winds prevailing all the summer, where trees and plants are exposed, how necessary that they should be properly secured. Almost every place the stakes are put on the side of the tree or plant from which the prevailing winds blow, and are then tied with a cord or rope, which by the swaying of the tree soon cuts into and through the bark, injuring them so that they frequently die. How much better if the stake or support were put on the side *from* the wind, so that when the tree is pressed over against the wind it finds *a support against the stake*, and not on the cords, as usual. With Evergreens or other kinds of trees and shrubs, the stake is soon hidden by the branches, and the body of the tree is kept straight and symmetrical.

How many fine trees are spoiled for the want of this simple precaution. Why will not Gardeners and amateurs *think* when they are doing a thing if it *is right?* I have not seen a nursery, even, where anything was staked, that it was done in a proper manner. If the lower portion of the stakes were charred or dipped in coal-tar, they would last much longer than if only painted. The color of them should be as near the shade of the tree or plant as possible, so as not to be observed. Strips of leather are good for fastening, and do not cut the bark. India-rubber rings are much used for the same purpose, and are very convenient and elastic; by stretching the ring and doubling it the ends can be fastened by a cord.

In visiting a nursery or private grounds, how much more interest the visitor takes in seeing the trees and plants all marked, both botanical and common names, where from, etc. How many would be pleased to visit such places if, when there, they were not compelled to ask what such a tree is, where from, and what its peculiarities. If this were done in the nurseries, parks, private grounds, and even in our cemeteries, what a new interest these places would have. Every one would become familiar with the appearance of them, their names and native locality.

How many persons, of the thousands who daily pass through the Custom House grounds know, whether the trees and plants there are native or foreign, or "which is which?" If they were properly labeled, how soon every one would become familiar with their forms, shapes and names, and in this way create a taste for choice varieties. What is the best shrub or tree for a yard, garden, or cemetery plot? If named, persons could see and compare, and they would know what to ask for at the nurseries. ORRILLA.

"THE KEANS."—Never before have the people of California been favored with so grand a series of the *True* Drama. We may have had occasional *Pieces*, but not till the Kean engagement here, have our people enjoyed the "Legitimate Drama," and Mr. Maguire deserves, as we hope he has received, a substantial evidence that "good actors" will draw and "good playing" will pay. The Keans have gone from us, but they have been welcomed with gladness, their labors have been truly appreciated, and they bore away honors and the warm wishes of a host of friends. May their voyage be a pleasant and prosperous one.

To Mr. Coppin much is due for a successful and happily completed engagement. To him and all we wish only good.

Agricultural Department.

Farmer's Club of the American Institute.

We clip the following items from among the many subjects debated before this Association, whose meetings are full of interest and valuable to the cultivator. Their meetings are published in full in the New York Tribune:

Lima Beans.—*How to raise them and how far North.*—J. Stebbins, Highland, Clayton county, Iowa, says that a Mr. Whitney of that county, raises Lima beans abundantly every year, and from him he has learned how to do it, with no extra culture except soon after the first blossoms appear to cut off the vines and not allow them to run more than four or five feet long. Seva beans are next to the Lima and similar in shape and color, but smaller; these have answered very well, coming earlier and bearing profusely, which, with the stringless bean for late use, with pod or without, have been my reliance for years for Summer and Fall eating. The large, long, round white bean I have found the best for Winter. But I think of dispensing with all but the Lima, now that I know how to raise it so readily and so early.

A Brooklyn suburban resident recommends trellises instead of poles for all climbing beans. He thinks it absurd to grow pole beans in hills, as the roots are crowded and the vines twisted up together in their attempts to twine around the pole. If planted by a trellis with a wire for each vine they are spread out to the sunshine and will produce twice as much as in hills. The best plan is to have a permanent frame for Lima or other running beans. Set strong posts twelve feet apart, with a slat or wire on top. The post, according to the Iowa recommendation, should not be over five feet high. A slat or wire is also fastened upon the posts about a foot above the ground. The beans are planted in a drill under this wire, and when ready to run are led along twine to the upper wire. Such a trellis may be used for a blind in Summer, or as an ornamental screen of any part of the garden. Another good form of trellis is made portable in lengths of eight or ten feet. It is formed by nailing strips of lath together, or it may be made of wire or in any form to suit the taste. These frames are set two or three feet apart at the bottom, leaning together at the top and fastened. The vines are planted upon the outside of each frame. Beans may be thus grown to be both ornamental and useful. A garden, or a part of it filled in the ordinary way with beans on poles, is anything but ornamental. The great secret, however, of growing Lima beans, is to keep them pruned.

Hardiness of the Clinton Grape.—J. A. Donaldson, St. Joseph, Berrian county, Michigan, says that "the Clinton grape in that vicinity is very hardy, perhaps the most so of any one cultivated there. It also endures the winters of Wisconsin and Iowa without protection. It has not proved productive here with close pruning; but I saw last Summer a young vine here in the garden of a lady who is innocent of the science of pruning, and it was a picture of productiveness. It has been said of this grape, too, that it never rots or mildews, and that it keeps remarkably well through the Winter. If it is as hardy as generally reported it would perhaps be well to recommend it, where better kinds would not stand the winters, to that class of persons who cannot be induced to cover their vines."

Will Sorgo Kill Cattle?—Robert Means, near Buffalo, Scott county, Iowa, says: "I saw about two years ago about four acres of sorgo that had been cut the previous Autumn, stripped and put in close shooks for shelter, ready for manufacturing, but was left in that condition in the field, where a number of cattle on the farm had access to it all through the winter, and none of them appeared to be injured by the use of it in any way. It is stated by a man from Summit county, who fed a cow liberally one evening on suckers which he pulled from his sugar cane, that the next morning she was dead. I am well acquainted with a practical farmer who states to me that he has fed sorgo suckers to his cows giving milk from three to four weeks, and that the quantity and quality of milk was very materially increased. The butter made from the milk was very rich. It was entered at the County Fair, where it took the first premium, and the only objection that was made by the committee was that it was almost too sweet. The butter had a very rich color. It is believed by many that sorgo bagasse is injurious to cattle and hogs. I have seen, this season, a large quantity of sorgo bagasse ground and thrown on the side of the public road, where cattle had at all times access to it, and I have not seen one instance in which the slightest injury has been done, and they have been around it for weeks together."

Laying Hens.—It is a mooted question whether a hen ever lays more than one egg a day. John Wyman, Lockport, N. Y., says he obtained twelve eggs in one day from six black Spanish hens. They were fed upon soft sugar corn. Does any one else know of a single instance?

Culture of Sugar Beets.—The Chairman, in answer to the question asked by a correspondent, stated that several works had been published in France upon the beet culture, and the manufacture of sugar, and he believed a work had been published in this country upon the subject. Mr. Carpenter of Kelly's Island, Ohio, said that the last volume of the Ohio Agricultural Reports contained an article upon this subject and a detail of experiments made by a Frenchman near Columbus, in the growth of beets and manufacture of sugar, which determined the fact that the business could be made profitable in this country. Solon Robinson stated that extensive experiments had been made in Illinois, and a considerable sum of money expended in the erection of a factory, which, according to a report in the Prairie Farmer proved that beet culture in this country may be made very profitable. Mr. Williams contended that it never would be profitable; that beets may be profitably grown for stock, particularly milch cows, but never for sugar-making. When grown upon some soils, they possess such a small amount of saccharum as to render them unfit for the purpose of sugar-making. He thought farmers should all confine themselves to the production of some sweeter substance, or else give up the attempt to make their own sugar. Dr. Trimble thought it was of no use to war against climate. This portion of the earth was not adapted to sugar-making. All northern farmers will fail who attempt to make sugar. They cannot compete with tropical climates. They are prosperous now with ordinary crops. Let them sell them and buy sugar for domestic use.

Some circumstantial evidence is very strong, as when you find a trout in the milk.

Committees at Fairs.

Too little care is taken in selecting persons for the examination of objects and the awarding of premiums at our shows. They should be men of sound judgment and practical experience. The neglect of this indispensable qualification often renders their awards the merest farce imaginable. The duty is one of high responsibility, and no honest man, void of the requisite qualifications, will undertake to discharge it. These remarks are made for the instruction of those *who appoint*; and at our coming exhibition, says a writer in the Colonial (Canada West) Farmer, I hope they will appoint Committees who shall be the right men in the right place. I think that all Committees on stock ought to be required to specify in their reports, the points in which the preferred animal excels. The Committees are very often deficient in this respect. It is pretty evident that our Fairs have fallen into disrepute by reason of the manner in which Committees have been appointed. People have become so disgusted with Fairs that they all prove failures. The present "*muddle*" about the Oregon Fair and Sewing Machines, shows *how* the business is done.

The above views we cordially indorse, and have urged the same not unfrequently. Let every Committee-man be expected so to decide that he can give good and decided reasons for his action; then it will not be reported, as has been done, that the same cow exhibited at a Country Fair took the prize as an Ayrshire one year, and as a short-horn the next. Butter of the same churning, divided, took 1st an 3d premiums. To a pen of calves was awarded prizes for bulls, when a part thereof were heifers. Such statements, and they are too common to be rare, are highly discreditable to Committees thus exposed. It is sometimes said, the name of the exhibitor has quite as much to do in deciding awards as the things exhibited. This should not be so.—[Boston Cultivator.

The Culture of Coffee.

The coffee tree lives to a great age, provided the land is kept well drained. The tree begins to bear when three years old, and is at its full bearing when seven years old. The tree is allowed to grow in hight from six to seven feet; the top branches are pruned off when the tree is five years old, so that by the time it is seven it resembles a spread umbrella. Each droops downwards, and thus gives the pickers a good chance to pick the berry. The coffee tree in Brazil bears two crops each year, the large crop is in the Spring and the small one in the Fall. The first crop is picked when the berry is red, resembling the cherry. The second crop is in general small, and allowed to remain on the tree until fully ripe and dry. The crop cured in the husk is far superior in quality, and is called "pearl coffee;" the blossom is beautiful, small and tender. It remains on the tree from three to four days. If the weather is warm, with showers during those days, the crop is sure; if cool at nights, it often fails. When the berry is taken home from the field, it is carried to the mill-house. The mill consists of three small rollers. The berry is put into the hopper, and a constant stream of water falls on the roller during the time the mill is at work. By this process the outside hull is taken off, and the berry separated from it, and the coffee falls into a brick tank, where it is washed perfectly clean, and put on a place covered with tile or brick, raised in the center, that the water may drain. It is then taken to the curing loft, where it is turned four times a day until the hull is crisp and dry. Then by putting it through large fanners the inside hull comes off, and leaves the berry ready for hand-picking for market.

To Prevent the Ravages of Weevil.—The leaves of the elder, if strewed among corn or other grain, when it is put in the bin, will effectually preserve it from the ravages of the weevil. The juice will also kill bedbugs and maggots. Insects never touch elder bushes. The leaves of elder, when scattered over cabbages, cucumbers, squashes and other plants subject to the ravages of insects, effectually shield them. The plum and other fruits may be saved by placing on the branches, and among them, bunches of the leaves.

Use of Horse Flesh.—We learn from the foreign journals, that the attempts to popularize the use of horseflesh, have been very successful in Vienna. Several butchers' shops have been opened in that city for the sale of this meat, under the authority of the government, and with a regulated superintendence. The permission was first obtained a few years since, but of late the business has considerably increased.—[North British Agriculturist.

The Proprietor has spared neither expense or care to make his Hotel one that shall always be acceptable and pleasant to all that may favor him with a call.

With ample accommodations by means of spacious Suites of Rooms for Families, and by recent enlarged accommodations, he is confident that visitors will always be satisfied and feel at Home.

Particular attention will always be paid to the comfortableness of the apartments, by well ventilated Rooms, clean Beds and Bedding, and strict attention to the wants of Boarders; while the TABLES will be provided with the very best the season affords.

Carriages, to and from the Hotel to the Railroad Cars and Steamers, at all times, Free of Charge to the Patrons of the Hotel. Hotel open all night.

☞ Connected with the Hotel is a Fire-proof STABLE expressly for the care of Horses and Carriages of the Patrons of the House.

D. E. CALLAHAN,
PROPRIETOR.

A CARD.

YEARS HAVE ELAPSED SINCE THE Subscribers first invited public attention to the peculiar properties of their Patent Axle-grease. At first their invention made but slow progress, but thanks to the liberal and appreciative spirit of a large portion of the teamsters and coach proprietors of California, the demand for their manufacture has gradually increased, and notwithstanding the many spurious imitations which from time to time have been introduced from the Eastern States to compete with their article, the H & L AXLE-GREASE has now acquired an unrivaled reputation, extending throughout the length and breadth of California, Oregon, and the neighboring Territories.

The subscribers return their grateful acknowledgments to a discerning public, who have so largely patronized them in all their enterprises which they are now happy to say, are beginning to be justly appreciated as belonging to our California industry.

The supply of material from the East having, in consequence of the war, been cut off, the subscribers turned their attention to the substitution of Coal-oil as a basis o their manufacture, but after applying every means suggested by the modern application of the science of chemistry, they were reluctantly compelled to the conclusion that however fit Coal-oil might be for illuminating purposes, and for which it stands unequaled, it was not at all adapted to make a permanently satisfactory Axle grease. In this dilemma the subscribers turned their views to the native produce of California, believing that large quantities of natural resin might be collected from the noble pine trees of her boundless forests.

Having invited attention to this subject, th with steady progressive steps, advanced this until, at the present time, they have established a manufactory of Rosin and Turpentine at Forbestown, from which considerable quantities of both articles are daily manufactured, of such a quality as to find a ready market at fair prices.

It is hoped that increased efforts may continue to be put forth, and new discoveries made, so that California may soon be independent of all foreign supply, for we believe our lofty mountains and our mighty pine forests will yet give us that supply. The subscribers are now receiving native resin in sufficient quantities to be le to sell their celebrated AXLE-GREASE at a lower price than any of the spurious Coal-oil varieties which may hereafter be imported.

HORACE WATERS, Ag't,
No. 481 Broadway, N. Y

THE DAY SCHOOL BELL.

40,000 copies issued. A new Singing Book for Schools and Seminaries, called the Day-School Bell, is now ready. It contains about 200 choice songs, rounds, duets, trios, quartetts, and choruses, many of them written expressly for this work, besides 32 pages of the Elements of Music, which are easy and progressive.

Among the large number of beautiful pieces may be found, "Uncle Sam's School," "Don't you hear the children coming," "Always look on the sunny side," "The little lass," and "Little Lad," "Oh, if I were a little bird," "Bird of beauty," "Pretty pair tree," "Anvil Chorus," "Meet me by the running brook," etc. It is compiled by Horace Waters, author of "Sabbath School Bell," Nos. 1 and 2, which have had the enormous sales of 825,000 copies. Prices—paper covers, 25 cents, $20 per 100; bound 30 cents, $25 per 100; cloth bound, embossed gilt, 40 cents, $35 per 100. 25 copies furnished at the 100 price. Mailed at the retail price.

SABBATH SCHOOL BELL, NO. 1,

contains 144 pages, and nearly 200 tunes and hymns, and is the most popular S. S. Book ever issued. Among the most popular pieces are "Kind Words," "Eden Above," "Christian Hero," "Beautiful Zion," "I ought to love my Mother," "The Angels told me so," "In the Light," "Rest for the Weary," etc. Prices—paper covers, 20 cents each, $15 per 100; bound 25 cents, $20 per 100: clothbound, embossed gilt, 30 cents, $25 per 100.

SABBATH SCHOOL BELL, NO. 2,

is an entire new work of 192 pages, and nearly two hundred and twenty-five tunes and hymns. One million of these Bells have been issued and are now ringing through this and other countries. Among the many choice pieces may be found, "Shall we meet beyond the River?" "There is a Beautiful World," "Sorrow shall come again no more," "Don't you hear the Angels coming?" "Thou, God, seest me," "Sabbath Bells chime on," etc. Prices of Bell No. 2, are same as Bell No. 1. Both numbers can be obtained in one volume, price, bound copy, 40 cents, $35 per 100; cloth bound, embossed gilt, 50 cents, $45 per 100. 25 copies furnished at the 100 prices. Mailed at the retail price.

WATER'S CHORAL HARP.

A new Sunday School Book of 160 pages of beautiful hymns and tunes. It contains many gems, such as "Shall we know each other there?" "Suffer little children to come unto me," "The Beautiful Shore," "Oh, 'tis glorious," "Leave me with my mother," "He leadeth me beside still waters," etc. Price, papers covers, 20 cents; $15 per 100. Bound, 25 cents, $20 per 100. Cloth bound, embossed gilt 35 cents, $30 per 100. Mailed at the retail price. It is edited by HORACE WATERS, author of "Sunday School Bells," Nos 1 and 2, which have had the enormous sale of over 600,000 copies.

Just published by HORACE WATERS,
No. 481 Broadway, New York.

THE NEW PATRIOTIC SONG BOOK

contains 96 pages of songs, duets, and choruses, both sacred and secular, including 14 pages of prayers for sick and dying soldiers, and soldiers' Scripture Manual. It is well suited for social singing, as well as Sabbath worship. Among the many beautiful pieces may be found, "Where liberty dwells is my country," "The Christian Hero," "Three cheers for our Banner," "Come sing to me of Heaven," Columbia, the Gem of the Ocean," "Freeman's Gathering," "Columbia's King forever," "Marching Along," etc. Prices—paper covers, cents, $10 per 100. Mailed at retail prices.

THE HARP OF FREEDOM

contains 32 pages of songs, duets, and choruses for Freedom. Among the choice pieces we would name, "Fair Freedom's morn," "O let my people go," "Over the mountain," "They worked me all the day," etc. Price 5 cents single, 50 cents per dozen, $3 per 100; postage 1 cent each

RUTH: A SACRED CANTATA

contains 126 pages. Words by Rev. Sidney Dyer, music by Prof. Cull. This is an excellent book for concerts for the young. Prices—paper covers, 20 cents, $15 per 100; bound 25 cents, $20 per 100.

THE REVIVAL MUSIC BOOK

contains 73 pages of tunes and hymns, designed for revival prayer, and conference meetings. Price in paper covers single copies 10 cents, $8 per 100. Mailed at the retail price

THE ATHENÆUM COLLECTION

contains 512 pages of tunes and hymns, new and old of the choicest kinds, for church, Sunday school, revival, missionary, temperance, prayer, and conference, and all kinds of sacred and social meetings. The music in this book has life and animation in it, like "Shining Shore," "Rest for the Weary," "Shall we know each other there?" "Shall we meet beyond the River?" "There is a Beautiful World," "Kind Words," "Sweet Hour of Prayer," "There is a Land of Love," "Suffer little children to come unto me," "God save the Nation," etc. Prices—single copies, bound, 65 cents, $55 per 100; cloth bound, embossed gilt, 75 cents, $65 per 100 Mailed at the retail price.

HORACE WATERS, Ag't
481 Broadway, New York,
Publisher of the above Books.

NEW INSTRUMENTAL MUSIC,

"Idlewild," "Polka Caprice," by M. Keller: "Morning Prayer," by W. F. Meller; "Summer House of Roses," gallop, by Mrs. Parkhurst; "Le Piri Polka;" "West Poin March," 25c each, "Ometepe Waltz;" "L'Armetee Waltz, "Frederica Waltz," J. G. Bernard, 40c each. "We are coming Father Abraham," "Always look on the Sunny Side," "Brilliant Variations," by Charles Grobe, 50c each. "Shall we know Each Other There," for Guitar, by Bloomer, 25c. "Sunny Side," set of 20 easy arrangements for the piano, 10 by James Bellak, and 10 by Mrs. Parkhurst, 15c each. Mailed free.

HORACE WATERS,
Publisher, No. 481 Broadway.

NEW VOCAL MUSIC.

"Land of the Brave and Free," Rev. G. S. Plumley; "Your Fortune is too Small for Me," Comic Song, Maurice; "I will Wait at the Gate for Thee," E. Holden; "We parted with a Cheerful Smile," M. Keller; "One by one the Stars of Evening," "The Flowers Bloom in Linden Vale," S. Lawrence; "The Morning is Dawning," H. S. Leland; "There is a Beautiful world," "Shall we Meet Beyond the River?" "The Angel's are Hovering Near," "The Year of Love," "How Softly on the Bruised Heart," Mrs. Parkhurst: "Kindly Words and Smiling Faces," J. R. Thomas; "For the Dear Old Flag I Die," "Oh, Why am I so Happy?" S. C. Foster; "Sabbath Bells, Chime On," Lowry, 25 cents each, mailed free.

Horticulture.

Grapes in 1864.

A retrospective view of the many delicious grapes we have enjoyed during the past year, naturally brings to mind many instances where long anticipated pleasure has ended only in disappointment. Seedlings that have received the care and attention of years have been closely watched as the blossoms set and ripened, and when tested, have proved worthless, and thus in an instant bursting the bubble of hopes and expectations that have "grown with their growth, and strengthened with their strength."

But the horticulturist should remember only enough of the shady side to keep his expectations in due limits, and to teach him that however it may be in some other things, with originators of new varieties of grape, there is such a word as fail.

He will have cause to remember how he labored in planting that little *thready* vine and watched its first budding, tenderly tied that slender shoot, anxiously watching it for months lest some *thrip* or other vine lover should mar a leaf—and each year repeating the same care, until at last the vine produces the long looked-for cluster of fruit. Then at last, when ripe, if he finds it so hard or so acid that it is not eatable, he will be ready to exclaim, better than none are the pleasures of anticipation.

This is the dark side of Grape Culture, which I would forget if it were possible, but it is deeply engraved with many lines on the tablet of my memory.

As I look from my window I see a hundred vines which bring to mind precious time, labor and money, all of which are gone, with no other result than to aid in filling the pages of experience. Yet here and there are vines to which no such unpleasant recollections are attached, for the fruit they bear are among the good things of earth, that we love to eat as well as praise. Towards these we cherish feelings akin to mortal love, and never pass them without wishing to aid them by proper pruning, training and feeding to increase the richness and abundance of their luscious productions. Though we may regret that each has some fault, for none of those we call the best are perfect, still they possess so many good qualities we are inclined to pass lightly over their imperfections. In what shall follow, we purpose to speak briefly of some of the best and newest varieties, and to note their various peculiarities, as they have appeared to us the past season.

DELAWARE.

The Delaware still stands at the head of the list for quality, as we certainly have no other variety which possesses such a purely rich, vinous flavor, and is so perfectly devoid of all offensive qualities. Its only defects, if they be defects, are the smallness of its berries and slow growth of the vines. But these are both partially overcome by high cultivation.

IONA.

This I shall have to place second only to the Delaware in the list of good varieties, although it has not been generally disseminated, and its real character as to hardiness, and its exemption from disease has not been fully ascertained. But from a four years' trial I am inclined to place it thus high on the list. It reminds me of a fine Catawba, perfectly ripened in its native latitude, where its muskiness, which is its greatest defect, under northern cultivation, is imperceptible. It is similar to the Catawba in color and size, but ripens earlier. The vine is a strong, vigorous grower, and so far has been free from disease.

ISABELLA.

The merits of this variety, so far as we are at present able to judge, do not entitle it to rank third on the list of good grapes, but as it has been sent out by its originator, in connection with, and as a kind of companion to the Iona, I have placed it in the same position here.

It seems to possess some of that fickleness of character which belongs to its parent, the Isabella, sometimes very good, and in other seasons or localities far from satisfying to one who is familiar with the best varieties.

ADIRONDAC.

Fruit from the original vine still holds its own in its good qualities, but few if any of the vines that have been sent out, have produced sufficient fruit to enable us to judge how good it will prove in other locations.

My own vines have not shown as much vigor as I could wish. They have also shown considerable mildew, but it may be owing to the season or to other causes that may be eventually overcome.

CONCORD.

It is said that the Concord is the Grape for the million, and without doubt the assertion is true, for the million or masses do not taste a fruit analytically, and should there be a slight foxiness about a grape they would not object to it, but many seem to consider it a merit. The Concord certainly possesses many good qualities and few bad ones. Its rapid growth, great productiveness and hardiness, large bunches and beautiful appearance, will always make it a favorite with those who are not very particular as to flavor, and prefer quantity to quality.

ROGER'S HYBRIDS.

Those known as Nos. 4, 15 and 19, have seemed to take the lead, but I have not been able to see anything remarkable about them, they are only passably good. No. 19 is too decidedly foxy to rank even with the Hartford or Concord. No. 4 is the best of the three, being quite sweet and early. But No. 3, in my judgment, is decidedly the best of all. It ripens the first of September, color light red, bunches quite large and uniform, flavor vinous and good.

RENSSELAER.

A new and beautiful variety, of medium size, dark colored, from Rensselaer county, N. Y., that gives promise of being a first-rate table grape, as it is very tender, with a rich and agreeable flavor.

FANCHER.

From the specimens received in 1863, from the original vine, I concluded it was the Catawba or very like it, but the past season, specimens sent me were far superior to those received in former years, and really distinct therefrom, being considerably smaller, much earlier and better flavored than any Catawbas I have ever seen that were ripened so far north. The Fancher promises to be a valuable Grape.

ALLEN'S HYBRID.

This is probably the best of the light colored varieties, but it possesses so much of the Chasselas character, that it requires a very warm, protected location to ensure its ripening. In most locations the vine should be covered in winter.

ANNA.

We have never yet seen a specimen of this variety that was sufficiently ripened to be soft. It is possible it would do well in a country where September lasted till January.

CUYAHOGA.

A green variety, too late and too poor to be of value here, not equal to Allen's Hybrid or Rebecca. Even a passable variety of green or what is usually called white grape is a great desideratum, and he who will produce it will confer a great favor upon the country, as well as insure himself a fortune.

DIANA.

Excellent in some localities, miserable in others, and of uncertain ripening everywhere.

CREVELING.

Early, medium quality; bunches loose, and not attractive in appearance.

We have spoken of these varieties only as they have shown themselves to us. In other localities and with different treatment they may have appeared to others as better or worse than we have judged them.

There is certainly nothing now under cultivation so near perfection as to deter any one from making further attempts to improve the grape, whether it be seedling, hybridization, or crossing the varieties.

Every one, whether gardener or amateur, should not fail to give this matter attention, not only for their own gratification and prospective profit, but for the public benefit.—[A. S. Francis, in the Horticulturist.

Tokay Wine.

The village of Tokay, which gave its name to the wine, is situated in Hungary, on the top of a hill near the meeting of the Rodrog with the Theiss. The vineyards are to the west of the Rodrog, and they occupy a space of ten square miles. The earth is of yellow chalk, mixed with large pebbles. The wine is white, and the vintage is commenced as late in the year as possible, but generally at the end of October. There are four different kinds of Tokay. The first is made by placing the Grapes when cleaned of all rotten fruit, in a wooden vat, with a double bottom, of which the one on which the Grapes rest is pierced with small holes. The vat is filled with Grapes and covered with boards. After a few hours the Grapes become heated to 80° Fahrenheit, and fermentation sets in. The fermentation destroys the tartaric acid, and the weight of the grapes forces the juice through the holes in the bottom. The Grapes are then trodden under foot, and the wine is poured into small casks, where it remains exposed to the air for a month after having fermented for two days. This is the wine which is generally exported. When of good quality it has a silvery, oily color, the taste sweet and mellow, with a peculiar earthy flavor, slightly astringent and aromatic, with good body. This wine may be preserved for an almost indefinite period, but it is not drinkable until it is three years old. Some vine-growers in the Arriege cultivate vineyards on the tops of the highest mountains in calcarous earth, covered with stones similar to those found in the vineyards near Tokay, but they have not as yet succeeded in producing anything as good as the Hungarian wine.—[Monit. Vinecole.

NATIONAL HONORS TO HORTICULTURISTS.—For their distinguished services to Horticulture, Napoleon has conferred the honor of Commander of the Order of the Legion of Honor on Mons. Brongniart; and Chevaliers of the same Order on A. D'Oumet, President of a local Horticultural Society, and on Mons. R. R. Gauthier, the eminent Paris Florist.

THE Yeddo Grape, by some English horticulturists, is characterized as a distinct species, under the name *Vitis glaucescens*.

EDUCATIONAL,

Miss Lammond,

LATE PRINCIPAL OF

BENICIA SEMINARY,

HAS THE PLEASURE TO ANNOUNCE THAT she has purchased the Seminary for Young Ladies known as the

CALIFORNIA COLLEGIATE INSTITUTE,

For Young Ladies,

No, 64 Silver Street,

SAN FRANCISCO, CAL.,

formerly under the control of Mrs M. B. SWEDENSTIERNA, and has removed there with her entire corps of

Superior Teachers and Professors.

The New Term Commenced

January 4th, 1865.

The location of this Institution (on the suburbs of the city) commands at once for its boarding pupils, the retirement of a country life, with the advantages of the finest professional talent from the city.

As Miss Lammond desires to make this a permanent Institution, no efforts will be spared to make it worthy of the patronage which has been so liberally extended to her during the past four years.

As the class of Boarding pupils is nearly filled, those desiring admission will find it necessary to apply early.

For further particulars, Catalogues may be obtained by calling upon or addressing

MISS M. LAMMOND,

10 Principal.

Oakland Seminary for Young Ladies.

Mr. G. M. Blake.....Principal.

Mrs. I. G. Huggins.....Associate Principal.

THE SEVENTH YEAR OF THIS INSTITUTION COMmenced on

MONDAY, JANUARY 9th, 1865.

For Catalogues and other particulars apply to the Principal, corner of Eleventh and Washington streets, Oakland.
Catalogues can also be obtained at the Book Stores on Montgomery street, San Francisco. 23tf

EDUCATIONAL.

PACIFIC

National Business College,

SAN FRANCISCO, CAL.

Practical, useful Education for Young Men, Boys, and Men of Middle Age.

A BUSINESS EDUCATION FOR A BUSINESS MAN—THE RIGHT KIND OF AN EDUCATION FOR YOUNG MEN.—THIS IS THE BEST PLACE FOR MERCANTILE BUSINESS IN THE WORLD.

IMPORTANT TO THOSE WHO CAN DEVOTE A FEW WEEKS OR MONTHS TO STUDY, AND TO PARENTS WHO HAVE SONS TO EDUCATE.

THE BEST COURSE OF STUDY AND THE GREATEST AMOUNT OF PRACTICAL AND USEFUL INFORMATION ACQUIRED IN THE SHORTEST POSSIBLE TIME AND AT THE LEAST EXPENSE, TO INSURE SUCCESS IN LIFE.

"Acquire a Good Commercial Education, and you will as surely succeed in Life as that cause produces effect."—Abbott Lawrence.

A MODEL COMMERCIAL COLLEGE.

THIS NOTICE IS INTENDED TO GIVE FULL INFORmation of the course of Study and operation of the Pacific National Business School, San Francisco,

We respectfully solicit from Young Men and Men of Middle Age, who would succeed in business, and Parents and Guardians who have Boys to educate, an examination of our system of Practical, Useful Education, the superiority it possesses over every other institution of learning on this coast.

This School claims superiority and great merit over other institutions professing to teach the Commercial branches, by its system of combining THEORY AND PRACTICE, on the London Corn Exchange principle, it being done in no other School on this coast.

COURSE OF STUDY.

The plan adopted in teaching combines PRACTICE with THEORY; instead of being confined to Text Books, the pupils are exercised in making original entries of every-day business transactions; journalizing, posting, balancing accounts, opening and closing a great variety of different sets of Books, both for individual and partnership business, where the business has been prosperous or adverse, thus qualifying the student for entering into the practical duties of the accountant in any kind of business.

THE COURSE OF INSTRUCTION

Consists of Double-Entry Book-keeping, embracing Wholesale, Retail, Commission, Manufacturing, Banking, Steamboating, Railroading, Individual, Partnership, Joint Stock, Compound, Company, Mining, Ranching, Farming, etc. In the routine of practical instruction the pupil becomes familiarized with changing books from single to double entry, changing stock books to partnership, and every form and principle known in well regulated establishments.

PENMANSHIP.

The beautiful and easy system of specimen Penmanship is taught in this College, and the only place where it is taught on this coast.

CORRESPONDENCE

Is carefully explained, and rules and principles are laid down, the observance of which will lead to the highest attainment in this art.

It is known to all that there is a great deficiency existing in this commercial branch.

BUSINESS ARITHMETIC.

This is a branch of the greatest importance, and you can be assured will not be neglected.

LECTURES

Are given to the students on Commercial Law, Nature and Causes of Wealth, Political Economy, Advertising, and general topics relating to success in business.

DIPLOMAS.

Those completing the course and passing a satisfactory examination before the Examining Committee, will receive Diplomas of the Institution.

THERE WILL BE NO VACATIONS.

Each pupil receives individual instruction, and persons can therefore enter at any time.

TERMS.

Scholarships are issued which give the scholar the privilege of reviewing the course at any future time, free of charge, for SIXTY DOLLARS, with a deduction of FIVE DOLLARS when two enter from the same family or the same place at the same time. When four enter at the same time from the same place, TEN DOLLARS will be deducted from each scholarship.

THE TIME REQUIRED

To complete the course depends somewhat upon the previous education and ability of the student, usually from ten to sixteen weeks, scholarships granting the holders the privilege of completing the course regardless of time.

A common school education is all that is necessary to enter the course of this College advantageously.

For further particulars, call at the College, 747 Market street, or address

M. K. LAUDENSLAGER,
President Pacific National Business College.

Santa Clara College.

THE FOURTEENTH ANNUAL SESSION OF THIS INstitution will commence on MONDAY, August 29th. The plan of instruction embraces two regular courses—the Classical and the Commercial, besides a preparatory Department

Sacramento Seminary,

Boarding School for Young Ladies.

Tenth street, between F and G, SACRAMENTO.

The next Session commenced

January 2d, 1865.

For Circulars containing particulars, address

23 MR. or MRS. HARMON PERRY.

FRENCH COLLEGE,

Corner Mason and Jackson Streets,

Principal.....Prof. J. MIBIELLE.

THE CLASSES OF THIS ESTABLISHMENT ARE opened since the 3d inst, and the select and attending scholars receive a solid instruction proportionate to their age and mental facilities.

The programme includes all the branches of tuition fitted for children from 6 to 12 years of age, as the first step for a higher teaching.

The English, French and Spanish Languages are taught practically and theoretically, by competent and special teachers.

Boarders can be accommodated in the establishment, where they will find the comforts and care of a home.

An evening class of French and Spanish is also open for young men every other day, at 7 o'clock, P. M. Call on the Principal from 9 A. M. to 12 M. 1

EDUCATIONAL.

NAPA

COLLEGIATE INSTITUTE,

For Young Ladies and Gentlemen.

NAPA CITY, CALIFORNIA.

NAPA CITY, IN POINT OF LOCATION AND Climate, is unsurpassed in the State. It is about four hours' ride by steamboat from San Francisco, and three by stage from Benicia. There will soon be a daily boat from the former place, and there are now two daily stages from the latter. There are extensive accommodations for Boarders in the College Building, with large and well-ventilated sleeping apartments. Teachers reside in the Building, and will have a constant oversight of the Students who are Boarders.

GOVERNMENT.

Young Ladies will receive no calls from any except Parents and Guardians. Ladies and Misses will not leave the College grounds, except in company with their Instructors. Young Men and Lads are not allowed to lounge about the Stores, Hotels, and Saloons of the village. All pupils are required to attend Church on the Sabbath. Parents will choose the place of worship for their children.

MILITARY DEPARTMENT.

This Department has been opened with a view to the permanent establishment of a Military Academy on this Coast. From three to four years will be requisite to complete the course in this Department. The State has furnished us the necessary equipments for such a school. The Drills will be attended to daily.

TUITION.

Spelling and Reading, per month.....$2 50
Common English, with the above, per month..... 4 00
Higher English, with the above, per month..... 6 00
Latin and Greek, with the above, per month..... 8 00
Janitor's Fees, per month..... 25

EXTRAS.

Modern Languages, each, per month.....$2 00
Music, with Piano, per month..... 8 00
Embroidery, per month..... 3 00
Painting in Oil and Water Colors, per month..... 4 00
Board with Furnished Rooms, per week..... 5 00
Board with Furnished Rooms, Light, Fuel, and Washing, per week..... 6 50
Military Branches, per month..... 3 00
Sword Exercises, twelve lessons..... 8 00

CALENDER.

The Collegiate year is divided into two Sessions of 21 weeks each. The first Session will begin July 25 and end December 16. The second Session will begin January 2 and end May 28. The Winter vacation will be two, and the Summer vacation eight weeks long.

☞All articles of clothing should be plainly marked. Pupils will furnish their own Sheets, Pillow-cases, Towels, Napkins, and Lamps.

☞Payments, half-yearly in advance. Pupils can enter at any time, and be charged from the time of entering. No deduction will be made for absence, except in cases of protracted illness. The month consists of four weeks each.

For further particulars address

W. S. Turner, A. M.,

21-11 Principal.

St. Ignatius College.

(INCORPORATED APRIL 30th, 1859.)

The Fifth Annual Session of this Institution will Commence on August 22d.

THE DESIGN of the Institution is to give a thorough English, Classical, Mathematical, and Philosophical Education.

The Course of Studies Embraces

THE GREEK, LATIN, AND ENGLISH LANGUAGES,

POETRY, RHETORIC,
ELOCUTION, HISTORY,
GEOGRAPHY, ARITHMETIC,
BOOK-KEEPING, MATHEMATICS.

Mental, Moral, and Natural Philosophy.

The study of MODERN LANGUAGES is optional. Besides the Classical there is a preparatory Department for the Younger Students.

TERMS PER MONTH.

Tuition in the Grammar Dep't. . . $5 00
" " Higher Dep't. . . 8 00
" Preparatory Dept't. . . 3 00
No1.

Academy of Notre Dame,

SAN JOSE, CAL.

THE FOURTEENTH ANNUAL SESSION of this Institution will commence on TUESDAY, AUGUST 23d. The course of instruction embraces all the branches of a polite and useful education. Its aim is to form young ladies to virtue, accustom them to early habits of order and economy, and to cultivate in them those qualities which render virtue both amiable and attractive.

TERMS:

Entrance, to be paid but once, - - - - - - - $15
Board and Tuition, per session, - - - - - - - $250
Washing, per session, - - - - - - - - - $50
Physician's Fees (unless it be preferred to pay the bill in case of sickness) per session, - - - - $10

Piano, Vocal Music, Drawing, and Painting,

Form extra Charges, but there is no extra charge for the

French, Spanish, or German Languages; nor for Plain Sewing and Fancy Needle-Work.

PAYMENTS are required to be made half a Session in advance. Pupils will find it much to their advantage to be present at the opening of the Session. 2

Saint Catherine's Academy,

BENICIA, CALIFORNIA.

THE SCHOLASTIC YEAR OF THE SAINT CATHERINE'S ACADEMY, Benicia, commences the

Last Monday in August.

Terms, per annum, $220—payable, semi-annually in advance.

Music, Painting, and Drawing form Extra Charges; also, Books, Stationery, and Physician's Fees.

No deduction will be made to any pupil leaving the Academy before the expiration of the term—cases of sickness excepted.

Foreign Languages, Plain and Fancy Needle-work, form no Extra Charge.

For further particulars, refer to the Superioress of the Academy. 4

S. D. & H. W. SMITH'S

American Organs.

SIBERIA OTT, Wholesale Agent,

748 Broadway, New York City.

THE

MOST PERFECT

AND

BEAUTIFUL

Musical Instrument

IN THE WORLD

FOR THE

American Home Circle.

WITH THE MOST PERFECT CONFIDENCE, we call the attention of the public to the AMERICAN ORGAN, as an instrument long desired in the Family Circle, and with our patent improvements is adapted to all kinds of Music, more especially to Sacred Music, with its sustained tones and harmonies, so much desired and sought for in American homes.

The AMERICAN ORGANS are superior to all other instruments of the kind, in many important particulars.

They are superior in their greater fullness and completeness of tone, volume and power. They are superior in expression, quickness of action, and elasticity of touch, rendering them perfect in rapid movements.

They are superior in quality and beauty of tone, and when controlled by the DOUBLE BELLOWS and BLOW PEDALS, Knee Swell, etc, the most charming effects can be produced, from the softest whisper of the Æolian harp to the full volume and power of the church Organ, thus enabling the performer to give expressions not to be found in any other instruments.

The TREMOLO stop has a pleasing and beautiful variety sympathetic in quality, appealing to the tender emotions of the soul, producing effects the most charming and soothing. It is universally admired and appreciated. The KNEE SWELL gives the performer full control of the tone, enabling him to graduate from the *Pianissimo* to the *Fortissimo* at pleasure, and combines the effect of the Expression Stop of the French Organ in the AMERICAN ORGAN, more perfectly and easily managed.

With all these combinations and improvements of Double Bellows, Pedals and Swell, the AMERICAN ORGAN excels in Expression, Variety, and Power, and has all the quality and capacity of a full Orchestra, and in the hands of a master is capable of the most complete orchestral effects.

The AMERICAN ORGANS are superior in Mechanical finish of the action and interior portions of the Musical parts. The valves are of material expressly prepared to avoid all sticking, cracking, or decomposition, are thus durable and will be always in order.

The Keys, Reeds, etc, are perfect in their finish, and this gives the quickness and sprightliness of tone, brilliancy, etc, equal in every respect to the "percussion stop" of the French Organs, but not like them in danger of getting out of order.

The AMERICAN ORGANS are by far the most beautiful in exterior finish, forming a handsome piece of furniture for the Parlor, Boudoir, or Sitting Room, occupying but little space, and perfect and complete in every particular.

THE

AMERICAN ORGAN

Makes Home Attractive; and Refines and Elevates the Minds of All.

Beautiful in its Appearance and Effects.

The AMERICAN ORGANS are finished in Rich Rosewood Cases, varnished and polished, forming an elegant piece of Furniture. Also, in Black Walnut Cases, and in Oak, finished in oil, and especially adapted for Churches, Lecture and Lodge Rooms.

They take but little room, are only 35 inches high, and from 34 to 47 inches wide. *They cost but a trifle more than Melodeons*, and yet possess many times their advantages in musical capabilities.

WHOLESALE and RETAIL at very Lowest Prices, with full arrangements to give Dealers Exclusive Territory. Send for Illustrated Price Circular.

S. D. & H. W. Smith's

MELODEONS,

All Styles and Sizes, at Regular Prices. Address all Orders

The California Farmer

SAN FRANCISCO:

FRIDAY .....FEBRUARY 17, 1865

THE CALIFORNIA FARMER READING-ROOM AND MUSEUM OF NATURAL HISTORY.
20 Clay street—Marble Building—Up Stairs.

The Farmer's Headquarters.

The Editorial Rooms and Museum of the FARMER OFFICE are always open, and an attendant ready to make a visit instructive to those who take an interest in the productions of our State. Samples of all productions: grains, grasses, fruits, models, inventions, minerals, and specimens in Natural History innumerable, are constantly being added.

Farmer's Reading-room.

Farmers and Mechanics, from the country, who visit San Francisco, should visit the Free Reading-room and Museum, at the FARMER OFFICE. Members of the Press, and Strangers, are particularly invited to avail themselves of these rooms. Newspapers from every State to which we have access by mails, as well as Foreign Newspapers, Periodicals, and Magazines, are upon file and on the tables for use; a Good Library of hundreds of volumes, with works illustrative of Agriculture, Horticulture, and Floriculture, works for reference upon all Sciences, with a Cabinet of Minerals, Coins, and Curiosities of interest to the Naturalist, to which we invite all.

Immigration Office.

ew comers to California can always obtain all needed information about Lands, Farms, etc, at the Farmer's Reading room, 320 Clay street. Most cheerfully we bid all welcome to our Sanctum.

TO AGRICULTURAL SOCIETIES ABROAD
Exchange of Seeds, Books, Etc.

HAVING established large and spacious Reading Rooms, in this city, which contain Libraries, Cabinets, and hundreds of Newspapers, all free to those who wish to enjoy the benefits thereof, we now ask coöperation from all Agricultural Associations in the Old States and Europe, for the *Exchange of Seeds, Specimens, Books, Etc.* We shall be happy to reciprocate any and all favors, and comply with any direction made to us connected with such an enterprise.

Purchasing Agency.

Having had the experience of over thirty years in dealing in Trees, Plants, Seeds, and Agricultural Implements, we feel that we are fully competent by our experience in purchasing such articles to make a saving of from five to fifteen per cent for the great mass of purchasers. We will therefore offer to make purchases for all who wish our services, of any of those articles named, or for any articles of merchandise for our Farmers or Ranchmen, and ship the same as they shall direct.

In order that we may do their business in the most satisfactory way for them and ourselves, we shall wish that all who send orders should be as explicit as possible as to their wants—describing as minutely as they can; and, where they desire our judgment, we will do our best to suit them.

Our charge will be Five per cent, together with the cost of packing, freight, drayage, etc. Orders should inclose satisfactory references or the Cash; or bills could be sent by Express, to be collected on delivery.

We shall be happy to attend to the purchase and shipment of Trees, Seeds, Plants, etc., as this is our especial "hobby," and we know we can satisfy all that send us their business attend to.

☞ THOSE who receive a number of the FARMER with this paragraph marked, may understand that it is sent to them or their examination, hoping it will meet their approval and duce them to subscribe, and ask their neighbors to do so.

Postmasters and others, who may receive the paper, will oblige us by soliciting subscriptions, or putting it n the hands of those that will. Subscriptions may commence at any time.

Send for Sample Papers and get up a club. Address

PUBLISHER CALIFORNIA FARMER, San Francisco.

TERMS OF ADVERTISING.

THE charge for Advertising in the CALIFORNIA FARMER (payable in advance), is **One Dollar** for five lines, or less of space, in nonpareil type, for one insertion and ten cents a line for any larger space. Each subsequent insertion half these rates. This it is believed affords the cheapest and best medium of reaching the Agricultural community on this coast. As heretofore, the right is reserved to reject any advertisements deemed objectionable.

TO READERS AND CORRESPONDENTS.

We call the attention of the reader to "Equality of Man," and the "True Aim of Life," in our Home Department, from our esteemed correspondents, "H. H. C.," and "M. J. U.;" also, several original poetic contributions.

We have received by this mail several delayed letters from our valued N. Y. contributor, "M. A. S.," of January 1st and 13th, which will appear in our next issues.

We have received a valuable essay, "Poor, but Honest," from our esteemed correspondent, "M. J. U.," which will soon appear.

Our new correspondent "Iota," is welcomed to our columns.

Just as we go to press, we receive our steamer mail. Letters from our correspondents in New York, Ohio, Illinois, Pennsylvania, Iowa, and Boston were received, and shall be duly attended to.

"Remember the Poor," by "I," received.

We acknowledge notice of valuable donations of Books from the American Institute and Agricultural Department, but too late to particularize. All shall be duly reported in our next.

Miss Lester and the Pacific Monthly—Miss Lester and the California Farmer.

While we very much regret to record the fact that the misfortunes of the past year has compelled Miss Lester to suspend the Pacific Monthly, which was ever a welcome visitor to the home and fireside—while we regret such misfortunes to a fellow worker in the cause of education and human progress—we cannot but feel that every misfortune is not without some "cloud with a silver lining." We were about to write a valedictory for one who had labored earnestly for the best interests of the "Home Circle," and to regret the fact that her powers of mind were not to be given to the same sphere of action as before, when by a happy incident, it has been our good fortune to secure the services of this lady, to aid in the Literary and Home Department of this journal, and we are pleased to announce to the friends of Miss Lester, that they can always find her at the Reading Room of the FARMER, 320 Clay street, where she will be happy to see them.

Miss Lester's former list of patrons will receive copies of the FARMER immediately, with the hope of their becoming the patrons of this journal. Miss Lester's tour through Oregon will be immediately published in the FARMER. This tour will be a most interesting one, and we know will gratify our friends in Oregon. No. 1 of the series will appear next week. Ever desirous to make the FARMER interesting to our readers, we can promise them a series of descriptive pieces from Miss Lester, that shall not be excelled by any journal on this coast.

We feel confident that the many readers of the FARMER will be happy to learn that the talent heretofore given to the Pacific Monthly, will now be added to the CALIFORNIA FARMER, and thus present a HOME journal that cannot be equaled on this coast.

The Agricultural Press of California.

At the opening of this Volume we announced the fact that we stood alone on the Pacific Coast as the herald of Agriculture, and the only journal to plead its cause.

We then promised to give a brief sketch of the rise and progress of the various publications that had from time to time appeared, and, like mushrooms showed themselves for a while and then passed away to the "Tomb of the Capulets"—no; not to any monumental pile or to "storied urn," but to—to—we know not where.

The first journal we note was the Oregon Farmer, published in that State. It was conducted with fidelity to the cause, and a neat and handsome periodical. With that journal we often exchanged courtesies, and our intercourse was pleasant, during its two years' existence. We truly regretted that it could not be sustained, for it was an advantage to the cause and to us.

The second sheet that claimed attention, was a small semi-monthly publication from the State Agricultural Society, under the special charge of the then Secretary, Rev. O. C. Wheeler. That publication was sustained, if we remember correctly, by such advertisements as could be obtained to pay its cost. The Society did not recognize it. Its life was brief—its tone anything but friendly to this journal—and, as we felt, anything but beneficial to the Society or Agriculture; its personal spleen was manifest, and it soon—died.

The third was the Culturist. That journal continued to be edited and published under several parties and ownerships. Its main features were the "Tap Root," "Artesian Wells and Irrigation," and "Planting Fruit seed for an Orchard, where it was intended the trees should grow." This was the grea: "Triune" of its existence, and at the end of two years it ceased to be. How much *profit* to the publishers or the cause, has not yet been estimated, as the "Tap Root" dried up—the "Artesians" ceased to flow, and men preferred to plant good trees for orchards, instead of the *seed*.

The fourth was the Agriculturist. It began at Stockton, was issued some two or four weeks, then rested—to take breath—then commenced "de novo" in this city, and spasmodically lived to issue, in all *twenty-six* weekly numbers—and—fainted away.

The Wine and Wool Journal next appeared. This work was for two years a good monthly publication, and was advantageous to the cause it served, but various causes underlying its foundation, and the dearth of business and unprosperous state of all things the past year, that journal ceased—and thus five periodicals that we have seen begin and scatter abroad their teachings—won their friends and coöperators—to-day are not.

It is not our purpose to speak at length of each now, but we intend to do so soon, and show their origin and the causes that set them to work.

Of No. 1, The Oregon Farmer, we ever remember with kindness, and regret its loss.

Of No. 2, the Wheeler magazine, we only remember with disgust, for a vile attack upon the Ladies' Department of this journal. We were silent after one reply, because the object was not worth the labor.

Of No. 3, The Culturist, we know enough of its purposes and plans, the antagonism it used, to know that it cared but little for the "Cause of Agriculture," and that it *must die*.

Of No. 4, The Agriculturist, we could see *blindfolded* that there was no *foundation* for an enduring superstructure, and the summer heat melted that away.

Of No. 5, we wished and hoped better things than its death; but our wishes and hopes were not to be—this, too, died. Of all these four last named publications, we can go back and show that we ever gave them the *right hand of fellowship*, and often noticed their publication, always speaking kindly of them and repeatedly giving voice to the faith which we believed, that our State demanded several journals of this kind. But we had no reciprocity, no kind word, no coöperation; never did either of these journals in any case, that we could learn, ever notice the old Pioneer FARMER, but with a selfish, envious and jealous feeling, they ran a tilt against us—and like Sancho Panza against the *Mill*, while steadily the wheels of the FARMER kept rolling on, and poor Sancho only received the hard knocks.

The "Oregon Farmer" we exempt from this spirit—and of the others we should not now speak, save in redeeming a pledge we gave, and which we intend soon to speak more in detail.

An Agricultural Journal, to be enduring and to win enduring favor, must have something to build on:

1st—It must *love the cause* it has espoused and must have a thorough knowledge of it, and be willing to do and suffer for it, this is a prerequisite. Without this, *it cannot succeed*

An Agricultural Journal must have for its foundation not only a "love for the cause," but a willingness to recognize everything and everybody that is friendly to that cause, and it must not only be willing to recognize them *but do it and them justice.* "On any other foundation no man can build."

We speak plainly, as the herald of the Agricultural interests, and say that those journals, of which we have spoken, were never willing to believe that *others* served the cause, and they labored to *pull down* rather than build up, and the means they used could not be blessed of Heaven, and so they were not successful.

One thing is certain, any journal that attempts to build itself up by any covert means, any journal that commences in error, obtains information by stealth, cannot long endure. The history of the past, of which we hold proof, verifies this fact. We have ever gladly bid welcome to our cause any and every honorable worker and aid—for the field is wide and fair—but not for poachers; to all such the Sword of Justice suspended by a single hair, hangs high, and they who think they are preparing the gallows for Mordecai will swing upon it themselves.

Loss of Stock.

The year 1864–65 will make a record of loss of cattle and sheep to a greater extent than has ever occurred in California before, and our newspapers have had hundreds of paragraphs recounting the loss; this journal has spoken of some of the heaviest losses that have occurred down on our southern borders.

The loss of stock the past year and other years will eventually be seen as a blessing, *a good rather than an evil.* We have noticed the various causes assigned which has resulted in this loss, but we have never yet seen the true one pointed out, save in this journal.

The loss of stock over our State, in the great majority of cases, was caused by the owners failing to use proper care, or make suitable provision for their animals.

Have our *stock-raisers* in the last few years increased their number of acres of feed, their stock of hay, their tuns of root crops, as fast as their flocks and herds increased?

Have our stock-raisers, taking a lesson from the cold and wet winter of 1861–62, made provision to shelter their stock from the storms of winter? Have our dairymen and stock-raisers made any provision for sheltering stock from the heat of summer, or keeping them in good flesh, to enable them to enter the cold and wet season, so as to go through it safely?

Is it not a sad and solemn fact that tens of thousands, nay, hundreds of thousands of cattle and sheep that had nearly starved during Summer were permitted to meet the cold and chilling blasts and rains of this Winter, unsheltered and uncared for, and when they were driven from the warm hill-sides that were barren of feed, down to the cold and wet tule lands—oh, it was the tule lands that killed them off!

Was it the tule feed, or the change of feed and temperature combined? Would these cattle and sheep have perished had they been cared for during Summer? What would be thought of an overseer of a large manufactory who made no more provision of food for five hundred workmen than he had formerly done for fifty? Would he not be charged with starving his workmen? Have not our daily papers been filled with notices of short rations or miserable food for our soldiers? and can it be expected among our stock-raisers that any other result should be than loss of stock, upon a ranch where, from a few head originally, they have increased to thousands, and these have been allowed to accumulate, without any extra provision being made for them?

What right has a farmer or stock-raiser to complain if his stock perishes, who annually burns up fifty or a hundred tons of straw upon his fields, and who never raises a tun of hay or an acre of root crops to winter his stock with? When such things are reviewed by the light of reason, can anything but the loss of stock be the result? Is not such loss a just punishment for neglected means and opportunities for success?

There is still another greater evil. The stock that escapes death, be it breeding stock of any kind, becomes degenerated, and their progeny forever after grow more and more deteriorated and worthless, and thus our valleys and plains present, year after year, herds of stock that are lank and lean and a disgrace to any grower, and a thousand head are not one-half the value of fifty head of sleek, fat stock, such as should be on our hill-sides and in our valleys when the proper system shall prevail.

We had paragraphs in all our exchanges the past season of cattle killed for their "hides and tallow," down south, and in our upper valleys poor stock was sold for $10, $5, $3 per head, and what is the result? Go to market, and where is the fat beef or mutton? If by chance you find such, the price is twenty-five or thirty cents per pound—and this in California.

Which is best—for a stock man to raise and take proper care of fifty cattle, that shall bring him $80 or $100 each at the market, or have a herd of eight hundred or one thousand that he can barely force off by sale at $8 or $10 per head? With the former he has less care, his hay and grain fields and root crops bring him a golden harvest in his stock. The latter may give him the *name of a large stock owner of a thousand head of cattle*, but his barren fields, his empty barns (if he has any), his poor, miserable herds, will give him anything but the name of a good stock-raiser.

There is no cause for this immense loss of stock; they never should be allowed to increase beyond the capacity of the land and provision of the ranch to sustain.

Good fat cattle are now commanding exorbitant prices. We have been informed that fat cattle have sold as high as from $80 to $300 per head. The latter were a splendid yoke of Oregon fat cattle, sold for $600, as reported to us.

We hope some of our ranchers who do take good care of stock will give us some items of *profit* upon "good care." We have heralded the "losses" from *neglected stock*, and all we can say to conclude is—the loss of this poor sickly stock will prove a blessing, and those who have suffered loss, in most cases, deserve it, for they have brought the loss on themselves.

We ask attention to the articles on stock matters in the last issue and present number, copied from the Alta and Bulletin.

Essays on the Vine and Wine Making.

We are happy to announce that we shall soon be able to lay before our readers a series of valuable Essays on the above subjects, from the pen of our old Paris correspondent, Arpad Haraszthy, Esq., now residing at Sonoma. We are happy to be assured that we shall have a most valuable series prepared expressly for the CALIFORNIA FARMER. The Essays and Letters of this gentleman were highly prized and widely copied in former years, and we know will be warmly welcomed again.

New Opening of Seeds.—A large opening of Seeds per last steamer, at Moore's Seed Store. Also, a fine invoice of rich German Cutlery. Go by all means and look at them.

Value of Good Stock in the Future.

The raising *Good Stock*, whether of Horses, Cattle, Sheep or Swine, or of our Domestic Fowls, will always pay to the careful and skillful raiser, and in a short time all we have said on the subject for the past *ten years* will be verified.

The great trouble in all beginners in California, has been, that the moment any enterprise begins to succeed and pay, everybody rushes into it, and it is *overdone*, and the thing explodes, lots of people are ruined and the enterprise itself, however good and worthy, is condemned or given up. The history of the past, if recorded, would be more curious and interesting than any of the Fairy Tales ever printed, and although we can look back over our past volumes and find many curious records, now they seem fabulous and if brought before the public mind would almost be scouted at.

Many of our reader, can recall the early years of *Agriculture* and the madness displayed by men of all classes to rush into the arena of Agriculture, and plant crops that would build them palaces of marble and gold: In early days a whole cargo of Barley was sold, to a Sacramento firm for something like eighteen cents per pound—the retail price, in the mountains, was $1 per quart, for feed. Then everybody began to plow and plant, and *Barley* soon became *cheap.* Next, *Onions* brought from the Islands, was sold as high as $1—even $1 50—per pound, large ones sold in the mountains at $5 each, and *Onion Seed* $1 per ounce—$16 per pound. Everybody went into the Onion raising, and soon they were cheap. Next Potatoes, they sold in '51, '52, in the mountains, at $1 and $1 50 per pound, and everybody planted Potatoes, and in '53 and '54 built monuments of Potatoes all along the valley of San Jose and Santa Clara, which the severe frosts of that winter soon crumbled down, together with the Potato speculation. That year—1853—over *thirty millions of pounds* of Potatoes were raised in San Jose valley, by two of our earliest and best farmers—that was the end of the Potato furore. The Wheat growing was almost the same. Then the *Nursery Business*—everybody must go into raising trees. Then the *Honey Bee* fever—$100 and $200 per hive—who does not remember that? Probably some speculators remember, even now, the *stings* they felt. How all the *sweets* of that speculation melted away.

The next was *Stock*, and the most exorbitant prices were paid by those who *knew nothing* of the business, and the result was everybody was in the Stock speculation (we dont now mean *mining* stocks), and the same result—it was *overdone.* There were many other schemes of less moment, but with all the same results, and although horses were imported that cost $5,000 and bulls sold for $5,000, and sheep for $1,500, yet all these speculations, for a while, have vanished. But there remains a *value* to our State that will yet be felt. And to those who have a true interest and love for any enterprise, such will and must succeed, and result well both to the profit of those engaged in it and for the general good of our State.

There must, however, always be an inherent love or desire for a business to secure success—permanet success—for it. This will induce those engaged to study into the nature and character of their pursuit and secure to it everything that tends to its success. The great cause of the non-success of our Farmers and others is they do not give sufficient time to the study of their own legitimate business.

If our Farmers, Stock-raisers, Grain-growers, Orchardists and Vine-growers would give as much time to their business as do the Doctors, Lawyers, Bankers, Ministers, etc., we should have more rich Farmers, etc. For it can easily be seen that our Bankers, Lawyers and Doctors and other professionals, become millionaires, and why should not those engaged in Agricultural pursuits also become rich?

But of Stock-raising, in particular, there are men who have become rich—very rich—in the business, and it is because they have given their whole time and mind to it. Some of these instances we shall point out: Some two years ago we stated that within a few years we should export to Europe fine Stock from the Pacific shores. Such will be the fact if Stock-men do their duty, for already, by reason of the war, the destruction of horses in the old States and the vast consumption of cattle for beef, the amount of stock has decreased materially, and we shall be well paid if *we are wise and grow good stock*, and shall soon see herds of sleek Stock traveling back again over the Plains to the old States, or the choicest going by our steamers to the East and to Europe. The time for us will come—remember this.

The Rain.

It is to be hoped the present rains will be duly appreciated, for nothing could be more opportune. These "latter rains," upon our *grain fields*, are worth *millions of dollars* to our State. They are equally valuable to our *Orchards* and Gardens. These late, cool rains swell the buds, strengthen the fruit-spurs and ensure a good crop of fruit. These late rains are beneficial, alike, to all who cultivate the earth, yet all should remember *not to cultivate the earth when it is wet.* No more serious evil could befall the ground than cultivating it when it is wet; wait till it *breaks* when it is turned, before using, then the full benefit of the rain is felt upon the soil.

These rains will fill the springs, to their full, and thus provide a store for our grass lands for Summer use. We learn that the rains have reached all parts of the State.

Sportsman's Materials.—The Farmers of our State, who visit our city, or all who wish the best materials for a Sportsman, can always be sure of finding them at the Store of Wm. Rudolph, Pacific street, whose card is in our columns. Mr. Rudolph thoroughly understands his profession, and has some of the finest Rifles, Shot Guns and Sportsman's Goods, to be found in our city.

PREMIUMS FOR THE FARMER!

Splendid Inducements to Clubs!

Desirous to offer inducements to all who will form Clubs for this journal, we offer the following liberal Premiums:

For every Club of FIVE, and $25, we give Atlantic Monthly, $4, Godey's Lady's Book, $3, and an extra copy of the Farmer, $5, for one year.

For every Club of TEN, and $50, we give Atlantic Monthly, $4, Godey, $3, Harper's Monthly, $4, Arthur's Magazine, $2, and an extra copy of the Farmer, $5.

For Clubs of TWENTY, and $100, we give Atlantic Monthly, $4, Harper's Magazine, $4, Godey, $3, Arthur, $4, Gazley's New Pacific Monthly, $5, the Eclectic Magazine, $5, any of the Quarterlies, $5, and an extra copy of the FARMER, $5.

For Clubs of FIFTY, and $250, we will give as a Prize one of *Wheeler & Wilson's* best plain *Sewing Machines*, valued at Sixty Dollars, with the Atlantic Monthly, Harper's and Godey.

For Clubs of SIXTY, and $300, we will give as a Prize a Sewing Machine, valued at Seventy-Five Dollars, the Atlantic, Harper's and Godey,

For Clubs of EIGHTY, and $400, we will give a splendid Wheeler & Wilson Sewing Machine, valued at One Hundred Dollars, with two selected Magazines.

For a Club of ONE HUNDRED, and $500, we will give one of Wheeler & Wilson's best Machines, with all the Extras, worth One Hundred and Twenty-five Dollars, and two Magazines selected by the party.

The above offers we believe will richly pay persons for giving a portion of leisure time and influence, and we believe it can be easily done, for there are many places where we have never used exertions to circulate where success is certain, in these many new localities, and we offer these inducements as an encouragement to win the premiums.

This will furnish any family with a library for a little brief labor to extend our circulation.

☞ We will suit the wants of all who procure us Clubs, by substituting for any of the above the Scientific American, Country Gentleman, Rural New Yorker, Prairie Farmer, Genessee Farmer, Boston Cultivator, Massachusetts Ploughman, Maine Farmer, or Agriculturist, making, however, the total value of premiums the same.

Our Border Troubles.

"Take time by the forelock."

"An *ounce* of prevention is better than a *pound* of cure."

Our Government is beginning to make her power and strength known. Recently we have had Canadian border troubles, and they are not over yet. Now we are to have them on our Southern border, on the Mexican side, and we are glad that General McDowell is moving; his Order looks like action. We give it below, so all can see how to act:

HEADQUARTERS, DEPARTMENT OF PACIFIC,
SAN FRANCISCO, February 11th, 1865.

[General Order, No. 5.]

With a view to impede the increase of bands of persons inimical to the United States, reported to be now assembling in the Mexican State of Sonora, with hostile intentions towards the frontier population and frontier military posts of the United States, and at the same time to interfere the least possible with the intercourse now maintained between this country and Mexico, the following precautions will be taken:

I. No person will be received on board of any vessel at this port for any port in Mexico without his having previously registered his name at the office of the Provost Marshal, and received a permit to embark.

II. No citizen of the United States will receive a permit to embark until he has given satisfactory assurances that the object of his journey is legitimate and peaceful, and in every case of doubt, until, in addition to such other measures as it may be thought necessary to take, he has taken the oath of allegiance to the United States.

III. Citizens or subjects of foreign powers will receive permits on producing satisfactory evidence of their nationality.

IV. Similar precautions to those prescribed for the Port of San Francisco will be taken at all other ports in this department.

By command of Major General McDowell.

F. HAYES,
Acting Assistant Adjutant General.

Importation of Breadstuffs.

Let our grain-growers bear in mind that we are now *importing breadstuffs* into San Francisco by lots of ten thousand barrels at a time. The total of recent importations must exceed sixty thousand barrels of Flour, or its equivalent. This exceeds the importation of 1857—and all remember well that the result of that year was ruin to the most of those who were engaged in the speculation, and a consequent low price for some time afterward. Thus our farmers suffered by that speculation.

It is a notorious fact that all efforts at speculation in our grain at beyond its legitimate value based on the stock on hand, always has been followed by importations from abroad, and the low price that followed for a long time, made it much worse for the grower.

It is clearly proved, and at our Flouring Mills the truth can easily be established, that a steady price for Wheat and Flour, based on the stock grown and the amount actually wanted, will always make the best and most profitable price for the farmer.

The California Farmer.

...es of this Journal by the Press and Friends at Home and Abroad.

...have received many very kind and gratify-...tices, both public and private, complimen-...o this journal, and we feel it a matter of ...e to ourselves, as well as to those friends, ...we should present from time to time a portion ...n notices, at least; and in doing so we can ...express our grateful sense of the kind intent ...r friends, and we shall endeavor to make the ...FORNIA FARMER worthy all they may say in ...vor.

...e New York Horticulturist, one of the oldest ...best journals of the country, in its January ...ber thus speaks:

...ALIFORNIA FARMER.—From the shores of the ...ific, and from a State that is golden in more ...es than one, we receive, weekly, one of the ...t enterprising sheets that is published. If ...e is anything calculated to make a Horticul-...st uneasy it is to read the glowing accounts of ...culture in California. It seems to be the ...adise of fruit-growers and agriculturists. ...pes that we grow here with great care under ...s, thrive better in the open air of California. ...tle and horses are pastured the year round, ...the earth brings forth its increase with the ...st astonishing results. Let us build the Pacific ...road without delay; give us the broad gauge ...ace parlor cars and a six days' trip across the ...tinent, and we can visit California between ...publication of our monthly numbers.

...he CALIFORNIA FARMER is published at San ...ncisco, at Five Dollars a year, and those who ...h to keep up with the progress on the Pacific ...ast should take it.

...We hope the advice of the Horticulturist will ...heeded, for we are confident that the people of ...East will receive many times the cost of the ...ER by the knowledge of California and its ...ources, they can obtain from its columns.

...he American Flag, of our own city, thus ...aks of this journal:

...HE CALIFORNIA FARMER.—From Friday's issue ...this hebdomadal, we ascertain that it has en-...ed upon its twenty-third volume. Col. Warren ...s truly remarks: "Eleven years is a long while, ...a State like California, for any one man to ...adily adhere to any one purpose, one position, ...single cause." Within that time many a paper ...been started, flourished for a brief period, and ...ne to its grave. Eleven years of California life ...necessarily full of interesting history. The ...ER, we are pleased to say, has been an able ...per in the departments to which it has been ...cially devoted, to wit: Agriculture, horticul-...re, floriculture, and the beautiful and useful in ...and nature. It must have been meritorious, ...it could never have survived for that length of ...e.

...Such a paper is needed in California; and per-...ps there is no gentleman in the country, from ...talents, industry and enlarged experience, bet-...qualified to preside over its columns than its ...esent editor. "That some estimate of the cost ...establishing and sustaining an agricultural ...rnal of this character may be known," Colonel ...arren remarks, "we can say briefly, from the ...mmencement, with the capital given to it then, ...*two hundred and fifty thousand dollars* has been de-...ated to this cause. Every dollar of the income ...s been given to it."

...We wish the FARMER unbounded success; and ...ope at least one-half the next one hundred and ...fty thousand dollars taken in by the editor may ...rove clear profit!

...We thank the Flag most sincerely for its kind ...otice and for its *personal* compliment. We will ...to merit it, by an entire devotion to our cause.

...The Red Bluff Independent, of January 30th, ...indly and generously speaks a good word for us, ...nd we will do our best to verify the fact that *we ...are among the permanent institutions* of the State, ...nd intend to be, probably fifty or an hundred ...ears hence, and hope then to greet our kind and ...Independent" neighbor:

...THE CALIFORNIA FARMER.—On last Friday, this ...ld and welcome favorite entered upon its twenty-...ird volume. Col. Warren says he has stuck to ...for eleven years, and has seen many papers ...tart into life, flourish for a while, and then droop ...nd die. The FARMER is among the permanent ...nstitutions of this State, and if we are to judge ...from appearances, is likely to remain so.

...From a business letter of one of the sterling ...farmers of rich San Joaquin county, we clip the ...following encouraging words, with a remittance. ...The gold is good, but such words are better:

..."I desire my name written in "Red Ink," with ...the balance of your paying subscribers. I could ...not do without the FARMER—*I have received many ...times the value of my money*, and you may set me ...down as a LIFE SUBSCRIBER."

...Yes, kind friend, we will do so, and in capital ...letters, too; and hope to add many more to our ...Life List with our NEW VOLUME—Ten Thousand ...or more.

Mrs. Blake's Seminary, Oakland.

We received much pleasure in a visit to this very excellent Seminary the past week. It is a very handsome college building, located in a beautiful grove of oaks, commanding a fine view of the bay, thus securing many pleasant and healthful surroundings.

Mrs. Blake has a very fine School, from forty to sixty scholars, a good proportion boarding pupils. The day we were present, Mr. Knowlton, Professor of Elocution and Gymnastics, a graduate of the College of Dr. Dio Lewis, of Boston, was there to instruct his pupils. It afforded us interest to witness the exercises of the class of the smallest pupils, and to see how ready they caught, as if by inspiration, the lessons of Mr. Knowlton.

After the instruction of the young class, the class of young ladies was then examined in Calisthenic exercises. Some of the real benefits to the pupils was apparent in the rich color which was soon brought to their countenances. If Mr. Knowlton is not careful, he will find he is thus destroying the sale of cosmetics, for his lessons cause a richer bloom than all the compounds ever invented—for it is "Nature's Own."

The young ladies in the lessons in Callisthenics and Elocution were prompt, and evinced the traits of good scholarship.

Mr. Knowlton is a most excellent teacher, and we are pleased to know he is well received everywhere in our Colleges.

Mrs. Blake has a very excellent corps of teachers, and we are glad to record the success of her excellent College—most heartily can we commend this institution to public patronage.

Washington's Birth-Day—Merry and Happy Days.

That heart will be the merriest
That widely scatters joys,
And that heart will be the happiest
That makes the most hearts happy.

Birth-days are, and should be, observed either by gifts and mementoes or public demonstrations.

There can be no circumstance of life, hardly, that should prevent any one from conferring personal favors and benefits to those near and dear to them. These gifts are measured, however, always by the circumstances that surround us.

It is not so much the intrinsic *value* of the gift in dollars and cents, as it is the manner and motive that prompts the gift. No gift was ever bestowed, however simple or humble, in the right spirit, but what had its appreciation, and carried the blessing with it, giving the recipient pleasure, and making the giver doubly blessed.

We speak thus of Birth-days, for the memory of the great, the good, the Immortal Washington, whose birth-day it is we are about to celebrate, and we rejoice to know that Californians are about to keep it with becoming honor.

George Washington was a patriot, a God-like man, and while all remember and keep his memory alive, such is the fragrance of his memory that we should be happy in celebrating his birth-day, and never before have our military men had so much reason or opportunity for imitating George Washington as at the present time, for our country demands of the people *true patriotism*, and no example so good as that of the "Father of his Country."

The birth-day of Washington will be regarded this year with more than the usual observances. In various parts of the State there will be military parades and military balls. The soldier's heart will recall the soldier patriot in the Father of his Country, and his memory will be honored and kept fresh and green.

We observe that not only in our city but at Sacramento, Stockton, Marysville, Napa, Petaluma, and many other places, the noble, generous, and patriotic soldiers and citizens recall the day, and are ready to honor it. So may it ever be. For when the memory of the Father of his Country shall be forgotten, or when his birth-day shall fail to be appropriately observed, Liberty will have lost its value, and human happiness not worth the seeking.

Let, then, this eventful day be faithfully and religiously observed forever, and let the memory of the Immortal Washington be the stimulus to patriotism and love of country to the youth of our land, forever and forever.

Ladies' Rich Dress Goods for Evening.

It is an old but a true saying, "Where there is a *demand*, there will be a *supply*," and California always proves this in everything.

The Ladies—God bless them—must, nay, *will* have rich dresses; and as *they will have them*, it is certainly better they should always wear colors that become their complexion, than otherwise, and as it requires a most refined taste to select an "evening dress" by daylight, therefore, to meet a very important want in this respect, and to aid those who desire to dress appropriately and look as beautiful as possible, and look naturally, too, Messrs. Kerby, Byrne & Co., have arranged a show room for Evening Goods, and fitted it up superbly, where ladies can go and be seated, and by gas lights have the richest Satins, Silks, etc., suspended in their rich and glossy folds before them, giving the perfect appearance of the evening display of colors. This is one of the most unique and *recherché* ideas that has yet been conceived, and to Mr. Byrne, of Kerby, Byrne & Co., belongs the credit of the design; and it is but just to say that the most superb stock of rich Goods for Evening Dresses can be found at their store that has ever been shown, and at lower prices than they are sold for in New York for gold. It is always a pleasure for us to speak of this House, as we know those who patronize it, will always be pleased and satisfied.

BOWEN AND BROTHERS.—It will be seen, by the Card of this House, that they have opened a New Wholesale Establishment at 425 and 427 Battery street. We are gratified to know of the success of this excellent House—they richly deserve it, for the liberal course they pursue to all their patrons.

VALUABLE TRACT OF LAND

ON THE SACRAMENTO RIVER, CONTAINING 80 Acres, the soil the very best, will be offered at an excellent bargain, if applied for soon. Enquire of EDITOR FARMER. 5

DAGUERREAN GALLERY INTEREST.

The owner of one of the best Daguerrean Galleries in our State, with the best run of business, with fine work room, handsomely furnished, display rooms and everything to make it attractive and profitable, desires to find a partner, an active partner, a real working partner, for the business department, so that the business, which is constantly increasing, may be retained, and another and important branch added to it, which the present proprietor cannot do without a good practical, working, business man.

For particulars, and all appertaining to it, address EDITOR FARMER. All Letters confidential. 1

The New Terms of Our Colleges.

As it will be our aim always to serve the cause of Education, we shall devote a space in our columns to the time of the new Terms of the various Colleges, Academies, and Seminaries of learning, and if the Principals of each will send us information of the same, the time of each will be placed in this column; and if they will send us their catalogues we shall be happy to distribute the same from our Reading-room, to which we invite all who are interested in the Cause of Progress in California.

We hope we shall have the earnest co-operation of all Principals and Teachers, and to receive communications for publication that will advance the cause of Education. Our journal having a wide circulation, we can thus give extended notice to our Colleges and Schools, and materially help the cause, we therefore hope a new interest in the work. We cannot keep the public advised of changes unless we are notified.

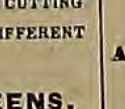
GRAPE VINES.



50,000 CUTTINGS OF THE STANdard Varieties of FOREIGN GRAPE VINES, for sale by S. W. SHAW, McCrary's Building, North-east corner of Montgomery and Pine streets, San Francisco, or to O. B. WEST, Sonoma.

Our Vines are Five and Six Years old, and of course are in bearing; therefore we are enabled to guarantee every Cutting true to name, thus avoiding those vexatious disappointments heretofore attending the planting of Foreign Vines.
4-tf S. W. SHAW.

HUBBARD SQUASH.

THIS VERY BEST OF ALL SQUASHES SHOULD BE planted by every person who wishes the best Squash that can be grown.

The HUBBARD SQUASH is different from all other Squashes; has a hard rind, but very rich meated, sweet and luscious as the finest Carolina Sweet Potato.

The Hubbard makes the finest Pies in culinary art, superior to a Custard Pie—the Squash, however, is to be baked only. Saw the Squash in halves, bake in the shell, and scoop it out when baked, or serve it on the table in the shell. For Pies, first baked, then scooped out, and used as other squash.

Fresh Seed just received from the East, pure from the growers, for sale at the FARMER OFFICE.

Packages $1 each; $3 per pound 3

☞ No Night Trade. Store Closes at 7 p. m.

KERBY, BYRNE & CO.,
20 No. 7, Montgomery street.

A CARD TO OUR PATRONS.

'Tis said *competition* is the life of trade. Fair, honorable competition, we never fear; but when our *name*, or the *same name*, is used to deceive others or injure our business, it becomes our duty to notify our patrons and friends that such is the case.

We were recently called upon by a person in this city, to supply a large order for more than One Thousand pounds of Seed of various kind, and also for several thousand Seed Bags—these were said to be for a store or stores in the country.

It soon came to our knowledge that these Seeds were to establish a Seed Store on Washington Street, in this city, under the same *Sir*-name as ourselves. The secret and unfair manner in which these Seeds and Bags were attempted to be procured of us, was so singular and so unfair, that we had just suspicion of wrong intent. We soon learned that *falsehood* was told us, and we refused to supply the order, knowing that no other establishment on the coast had laid in the stock of Seeds as ourselves, and having every reason to presume that our name will be used in the sale of Seeds elsewhere, we feel it a duty to remind our Customers and Purchasers of Seeds everywhere, that they should all be careful in sending their orders, and to be particular in their directions.

We have been established nearly ten years in the Seed Business, and we trust that by the extent and system with which our business has been conducted, we have justly earned the reputation of a regular Seedsman.

We import our Seeds direct from the best houses in Europe and the Eastern Growers, we have the most extensive stock in California by a large extent, and purchasers need only call at our establishment to satisfy themselves that our business is so conducted as to meet their approbation and business.

We return our thanks to our many Customers for their liberal support for these many years past, and trust a continuance for many years to come.

We would remind all our Friends and Customers the necessity of being particular and to address all letters and orders to

Home Miscellany.

[For the California Farmer.]

MORNING AND EVENING.

Before the rugged ways of life,
Their deepened wisdom gave,
Smiling I went to the wedding,
And weeping to the grave.

Then loudly rang the Sabbath bell,
Beneath the shining spire,
Where all the village, hurrying, came
In Holiday attire!

How blessed in brother-love and truth,
They seemed when gathered in,
Where only I might smite my heart,
For unrepented sin.

Oh youth against the coming night,
How many lights it hath,
And none can see but envies thee,
The blessing of thy faith.

But not of this do I complain,
That thou hast passed me by;
With fickle love, and fitful dream,
'Twas natural they should die.

My heart became thy sepulchre,
No rude thing goeth near,
And none can see to envy me,
The flowers upon thy bier.

Not that I learned in sorrow,
To watch and wait alone,
That life put on another light,
And took another tone.

Not that I feel an inward pang,
Going to meet the bride,
Clothed in her wifely dignity,
And strange new crown of pride.

And meet with solemn pity,
The funeral on the way,
Knowing that all not following now,
Will come some other day.

That fate that is revealed to some,
Must be revealed to all;
And who can read the cipher,
Of the hand uPon the wall?

If these were all the shades of change
That came across my breast,
The stillness of a Sabbath day,
Had lulled my soul to rest.

Cold is the sky when sadly clad,
In livery of gray;
I murmur not, the tinge of rose
Is faded all away.

For it was not this that stole away
My peace of heart and mind,
And froze the sympathetic throb
Of trust in human kind.

My lips are mute when called to frame
The record of a wrong;
Had I a thorn within my heart
It should not pierce my song.

But treacherous lips of treacherous vows,
To you a sting is given,
To poison all that's sweet in life,
And turn us out of Heaven.

You bring the evening time of life,
Before the morning's fled;
And when you draw night's curtain down,
No stars are over head.

You in one troublous day of life,
Can bring us heavier care,
Than all the heavy waves of time,
That gray the golden hair.

Not lover lost nor lover dead,
Or lover turned away,
Can blight the heart as ye who steal
The sunlight of our day.

As you who bring untimely shades,
Of evening o'er the mind,
Standing between us and the faith
We cherished for our kind.

FEBRUARY 7th, 1865. BERTHA BAY.

[For the California Farmer.]

LOST MOMENTS.

The day is past, and evening's shades are come,
While shadows dark are wand'ring round the room,
Each silent nook these ghostly forms pervade,
And fill our presence with their hateful shade.

We know them well, have mark'd each spectral face;
Familiar each fiend of that infernal race;
Ceaseless the torture which their presence bring,
While woe succeeds their sharp envenomed sting.

These are the spirit-forms of moments spent,
In idleness and vice which herald discontent;
Of wasted moments but too plainly seen,
Of what we are not now, but might have been.

They urge us onward to our work too late,
We now must bow beneath the will of fate,
Fate has ordained a nobler end to life,
For those who early join the manly strife.

The sluggard's soul feels only dark dispair,
Haunted by vain regrets—of moments fair
Wasted in folly, idleness and crime,
Is but the knell of hope, and slaughtered time.

VISALIA, February 4th, 1865. IOTA.

TO CLEAN CANARY BIRDS.—These pretty little things are, like meaner objects, often covered with vermin, and may be effectually relieved of them by placing a clean white cloth over their cage at night. In the morning it will be covered with small red spots, so small as hardly to be seen, except by the aid of a glass; these are the vermin, a source of great annoyance to the birds.

DRINK LESS WITH YOUR MEALS.—Many men have relieved themselves of dyspepsia by not drinking, even water, during meals. No animal, except man, ever drinks in connection with his food. Man ought not to. Try this, dyspeptics; and you will not wash down mechanically what ought to be masticated, and ensalivated, before it is swallowed.

SAYS Artemus Ward: "You may differ as much as you please about the style of a young lady's figger, but I tell you konfidentially, if she has forty thousand pounds, the figger is about as near right as you will get it.

[For the California Farmer.]

Equality of Man.

Equality of Man, or the right of each one being a law unto themselves, is the subject for discussion.

The first proposition, and one comprising the great superstructure on which the validity of our arguments rest, is the right of this individual law, so long as we infringe not upon this same right in another. But to make the subject comprehensive, we will illustrate it by the most potent argument available, which at this time is in a political point of view: Whether the North have a God-given right to compel, by the arm of force, the South to yield her individual right of choosing her own rulers, irrespective of the co-operation of the other party under whose united strength and wisdom the freedom of the whole nation was obtained. To more fully elucidate this momentous subject, we will traverse back in history's page for centuries, bringing from the tomb of oblivion the first incentive in the hearts of Man, compelling the subjugation of the colored race to the dominion of the white or Caucasian. For long centuries prior to the framing of our Constitution was this custom of enslavement so strongly welded upon our Nation as a whole, or those parts who owned enough to purchase slaves, or deemed it politic in a pecuniary point of view, that our framers of law considered it expedient to sanction what they felt to be a great wrong; deeming that the people would soon see the enormities of such traffic, and themselves annul it. But mark the result! Instead of listening to the voice of conscience in this matter, whispering in nearly every heart, of the great curse of slavery, seconded by the agonized supplications of those in bondage, they turned a deaf ear; but were ever ready to sanction the policy administration, wherein their pockets would be lined, and their bodies be relieved from the servitude necessary to the accumulation of worldly means; this compulsion, this enslavement of the African race, rendered lawful by those in authority. So long as their power in our national councils ruled, so long were they willing to be protected by the insignia of Liberty and Union, the American flag. But mark the result. When their long reign was over, when they could no longer control the voice of the Nation, although that voice was bound to respect the established rights of each and every child of her adoption: yet that was not sufficient to satisfy the demands of ambition when, by a long concerted plan on the part of the South, the first agression was made, pretending that this right was theirs of choosing a separate form of government. Here comes the point of the argument, whether any such right was theirs, either human or divine. True, the right to hold slaves was sanctioned by human laws, which was not interfered with, but instead, protected by our present ruler until the solemn compact of unity was dissolved by our misguided brethren, who were not content with their present area of territory, but were determined to extend it, even against the wishes of the majority. Was this even constitutionally right? But to illustrate—suppose two parties were bound by the most solemn compact, to help support each other in holding and mutually improving a certain desirable tract of land; but the first party, to effect his own ease and self-aggrandisement, claimed as his right the monopoly of some power wrong in itself, and antagonistic to the feelings of the other, but agreed to because a greater gain would accrue by the compact than could be effected otherwise, thinking that time would show that the best good of the domicil, which alone shielded them from outside foes, would induce a release from bondage of this cause of dissension. But when, instead, further aggressions were threatened, even to take from the foundation their share of the support, leaving the remainder to fall to the ground, involving general ruin, just from an insane desire to monopolize the control, I ask, where is the right? Judge for yourselves, my friends; if you were in the place of the aggrieved one, would you not consider that to you belonged the right, both human and divine, to compel a return to their former agreement, also annuling this cause of contention, thereby insuring a greater unity, if in your power to do so? The case of our present rebellion is a parallel one, in my judgment, although I do not suppose my reasonings will be admitted by the opposing party, until such a return will be effected by willing consent, which may God in His own good time grant.

H. H. C.

BRIER COTTAGE, Feb. 12, 1865.

[For the California Farmer.]

The True Aim of Life.

We should, as reasoning and reflective beings, seek to learn the Laws of Life; to ascertain the true value of time, and our adaptation to Natural Laws, with our Social and Moral obligations. When we reflect for a moment, on the past, what does it teach us relative to Humanity? Does it speak of health and length of life, and happiness and prosperity of our present generation in proportion to the blessings which have been given? Or are we looking in vain? Why are we beset on every side with unhealthy, deformed and unhappy beings, who are merely lingering out a miserable existence? Is it Nature, or is it forced upon them, by being kept in ignorance of Nature's Laws? I answer, it is for want of knowledge of themselves that has wrought this unhappy condition of our present generation. Nature is all bountiful in her provision for her children, and were not her laws perverted we should find healthy, elastic forms, buoyant hopes and radient countenances, beaming with hope and happiness. Have we the true secret of human life? Have we been studying the Laws of Life, to render them harmonious with Nature? Are we living naturally, or are we trying to outdo Nature by becoming artificial, independent of her laws? Let each and all study for themselves the world of knowledge that lies within their own system. Let me ask how it is, that man, made after God's own image, should be so marred and distorted? Have we taken proper care of that beautiful spirit which God gave us? I fear not. We have not sought out its true beauties, or taken proper care of the casket, but have used it to receive everything that would mar and deface the beautiful jewel it contains by covering it from the good and the beautiful in Nature. We are deeply interested in the Arts and Sciences, and cultivation of Plants, Vegetables and Animals, to bring to perfection, by studying the laws which govern them, to expand and develop in health and beauty, also those we wish to be hardy and vigorous. We surround them with such minerals as will protect and sustain them through the inclement season; also Fruits—how much care and study has been given to their culture, to ascertain the manner of giving the best flavor, and the perfecting its size and beauty. Everything that can promote their health and purity have been observed with the greatest care. The animal creation—what thoughts have been bestowed upon them? and how beautifully they have been repaid, by producing such noble and almost intellectual beasts, showing that Nature can be assisted by a proper adaptation to her laws.

Can we not, then, be true to ourselves, and study to promote the growth and beauty which is lasting and pure; learn to know more of self, and our wants, to become more self-taught, and be co-workers with Nature and with God, by developing our natures in the true channel of harmonious law, drawing beauty and goodness from the great source of existence? It has been a mistaken delicacy to hide the true Laws of Life from our children; they should be early instructed in regard to their Physical Nature, the beautiful mechanism of their organs, the adaptation and uses of their limbs, fibers, arteries, bones, muscles, etc. Treat the subject of Physiology to your children, at home, while young; make them your friends, and they will not be so easily imposed upon by stangers, and can more readily appreciate the knowledge given by parents. Too long have we been strangers to ourselves while we are devoting our time to the beautiful in Nature as it regards others. We remain in stupid ignorance of our own most beautiful work, the formation of ourselves. A world of itself, yet connected to the great Universe by spirit and matter. We are like strangers living in our own house, much interested outside, while the house goes to decay. Let us instil such knowledge in the youthful mind as will be interesting and useful to them in future life, promoting happiness and knowledge, to be their own Physician and know how to benefit themselves and the world. Parents must not depend too much upon teachers, but become teachers at home.

M. J. U.

Womanology.

Next to no wife, a good wife is best.
No woman is ugly when she is dressed.
She that is born a beauty is half married.
She that has an ill husband shows it in her dress.

As the good man saith, so say we; but as the good woman saith, so it must be.

A woman and a greyhound must be small in the waist.

All are good lasses; but where comes the ill wives frae?

A woman conceals what she knows not.

Beauty will buy no beef.

Choose a wife rather by your ear than your eye.

Ladies would sooner pardon want of sense than want of manners.

A lass that has many wooers oft fares the worst.

When the good man's from home, the good wife's table is soon spread.

The greatest glory is not in never falling, but in rising every time we fall.

Many blame the wife for their own thriftless life.

—A barrister is only invited to sit on the bench when he has had some considerable amount of standing at the bar.

—Why does the new moon remind me of a giddy girl? Because she's too young to show much reflection.

—Long words, like long dresses, frequently hide something wrong about the understanding.

HERKIMER COUNTY CHEESE, superior to any Cheese in the country.

SELECT WINES AND LIQUORS, the very purest, taken from Bond, as we use none but the best; those that desire choice Table Wines, etc, or for Medicinal purposes, can rely upon what we offer them.

Messrs. Bowen Brothers commenced their business at an early day in Stockton, which they conducted successfully to themselves up to about the year 1860. Flattered with the success that had attended their efforts thus far, and ambitious for a more extended field of operations, they accordingly, about the period above mentioned, established themselves in the City of San Francisco. Since then each returning year has continued to mark an expansion of their trade, until now their annual sales, in the aggregate, are exceeded by no other House in the State.

They have superior facilities for procuring their goods from the East, which gives them great advantages besides, they pride themselves in keeping articles of goods found in no similar establishment in the city.

These with every other article needed in the Culinary department of the Household, and the usual Family necessaries, furnished by the Grocer. It will be our aim and our pride to give satisfaction to all who may favor us with their patronage. In order to make the business of our Patrons light and pleasant, all orders left with us will be filled with care and dispatch, and Goods sent to any part of the city promptly, without cost of cartage.

Our friends from the Country that favor us with Orders, will have their goods sent to the wharves without expense of cartage. Every Order sent us will be attended to with the same care as if purchases were present.

Tobacco Raising and Grape Growing.

A MAN OF EXPERIENCE IN TOBACCO RAISing would like to enter into contract with some good man who has proper land and good location, and will have suitable buildings erected for that business. The advertiser has a thorough knowledge of the business in all its branches and can make it profitable to both. He is also familiar with Grape Growing, and can lay out a Vineyard and take care of it. He feels confident he can give satisfaction. A letter addressed to "Tobacco Grower," and left at the Farmer Office will be attended to. 17

Cashmere Goat.

A SPLENDID HALF-BLOOD CASHMERE GOAT can be had at a fair price, or will be leased on fair terms on application to the Editor of Farmer. 4

PATENT RIGHTS FOR SALE.

THE FOLLOWING PATENT RIGHTS OF NEW AND valuable inventions (of which we have models to show their value) are now offered for the States of California and Oregon, and Utah and Washington Territories.

NO. 1. THE MECHANIC'S SPIRIT LEVEL.

Patented September 13, 1859.

This Implement will be of great value to Contractors and Builders, being one of the most valuable inventions yet out. Builders will do well to examine the model.

NO. 2. IMPROVED CLOTHES REEL AND BAR.

Patented January, 3, 1860.

This valuable domestic piece of furniture can be used in the Laundry, the Kitchen, the Nursery, or Chamber, and can be made plain or ornamental; standing in the same relation as a piece of important furniture as does Wheeler & Wilson's Sewing Machines, neat when used and ornamental when not in use.

NO. 3. A CORN CULTIVATOR.

With this implement the soil is first thoroughly plowed and deeply pulverized, and on the return it smoothly and perfectly hills up and harrows the ground between the rows. A very new and valuable implement.

NO. 4. A MUSKETO BAR.

This will be much wanted in California. It is simple in its contrivance, perfect in its working, and can be affixed very cheap to all styles of bedsteads. Hotels, public houses and private families will find it a useful invention.

NO. 5. HYDE'S PATENT POST-DRIVER.

A most excellent labor and money-saving machine, for which we offer rights.

NO. 6. SEED-SOWER.

This is a new inventions, and one of great importance to all who sow grain, or any garden seeds. The working model can be seen at the Farmer's Reading-room.

Holding the rights to all these new inventions, we invite the public to call and see the models. All persons who may be desirous to purchase either County, City, Town, or Individual Rights, can do so on application to

ELECTRICITY

THE

GREAT REMEDIAL AGENT.

Electricity as a Remedial Agent has, until recently, been but little known. An Electric Battery has been a terror from childhood up because a little Battery gave a "start," and the thunder storm killed by lightning. Now it is better understood, and is and will be the sovereign remedy for many diseases heretofore considered incurable. The following series of articles and statistics, with facts and proof of the virtue of Electricity are worthy of attention. When it was promulgated that disease could be entirely eradicated from the system without the use of poisonous drugs, the unthinking, or those who do not look deeply into cause and effect, scouted the assertion as chimerical, and adduced strong evidence of its utter impossibility. Long articles, replete with arguments, seemingly unanswerable, of the position that only through the digestive system could the blood be purged of the accumulations of the poisons which constitute disease. A great cry went up from the interested in the continued supremacy of the old system of one poison to cure another, that Electricity, as a Curative Agent, had been tried and had proved to be of but little if any value—thinking, poor souls, the world of science stood at the same point it occupied one hundred years ago. They were wrong, while those old fogies were content if they cured one in every five patients there were those who were diving into the science of Electricity, and finally it was discovered that the trouble was in the instruments used. From that time to the present, improvements have rapidly advanced, until every disease in the catalogue of human ills has been either cured altogether, or checked so as to enable the sufferer to seek those changes of climate which ultimately perform a perfect cure. Diseases hitherto considered incurable, have been cured, and those diseases which took months, and even years, to cure by medical process, are now cured in a few weeks; and all by the *Improved Instruments* of Dr. J. H. Josselyn, Resident Physician at the Electropathic Institute, 615 Washington street, San Francisco. It is astonishing to see the number of patients and diversity of diseases that have been relieved by the Electropathic System. From early morn till late at night, his instrument is engaged, imparting health and strength to all who have the good fortune to obtain his services.

The charges, too, are not as heavy as by the old system, besides there is no medicine to pay for, let alone the unpleasantness of swallowing the nauseous stuff. During the time the Institute has been in operation, there has been more benefit to the human family derived from the system than from all other systems combined during the same period. Among the most troublesome diseases to which Californians have been exposed is Rheumatism; none has given the honorable practitioner more trouble to relieve, and no one has pretended to cure (if we except known empirics) permanently. But this subtle disease gives way before the Electropathic System in a very short time, enabling the sufferer to go about his business without pain or the fear and dread of a relapse. And so with most other diseases, considered incurable. We mention Rheumatism because of its abundance, but we could enumerate many other diseases full as troublesome, and some far more fatal in their results.

We allude to that kind of disease paraded by quacks in the journals of the day, a trouble which was never cured by medicine, only a little strength imparted by the use of tonics. The poor victim is kept taking medicines and paying for them until his last dollar is gone and then, as soon as he undertakes to work to obtain more funds, the trouble comes back in all its loathsomeness. To this disease Electropathy is peculiarly applicable, its action being upon the spermatic nerve, strengthens the secretory organs, and at the same time, creating an equilibrium in the system, thereby preventing an elapse.

We dwell upon this disease because it is the bane of the youth of California; and one about which there has been more deception used than all others put together. It is not necessary to enumerate all the diseases in the catalogue, for that would be occupying space to no purpose. Every disease has been under treatment by this system, and there are none but have received benefit either in this State or at the East.

There are at present very few Instruments in the world that can be depended upon. A good Instrument costs very heavy, and cannot be purchased unless ordered, and there are very few who are able to manufacture them, for want of knowledge of the healing principle. The only Instrument to be depended upon in this State is at the Electropathic Institute.

Connected with this system are the renowned Electro-Magnetic Baths. Here let us caution the public against the numerous imposters in the bathing line. The pure Magnetic Bath is one of the most effective aids in the removal of disease from the system, but if given at the wrong time is likely to aggravate trouble, and cases have been known where the patient has been injured so badly as to require months to remove the injury. Persons in quest of this Bath should be careful and not apply to a place where there is no physician to judge of the necessity of the remedy. In fact the only place where they can be obtained in all their purity is at the Institute, where the Resident Physician will always be happy to examine and see that they are not unreasonably administered, and if not necessary, advise the requisite remedy.

To Females,

the Directors would say, Electropathy is particularly applicable to your delicate and fragile systems, and to the numerous troublesome and painful diseases to which you are liable. Should you be irregular, a few treatments will restore the functions to the proper state without pain or inconvenience. Should you be weak and enfeebled, either general or local, this system imparts strength and vitality, making the recipient feel buoyant and youthful, where before they were languid and unable to enjoy the pleasures of life. One great blessing connected with Electropathy is, it purifies the system so thoroughly that it beautifies the complexion, making the coarse and freckled skin as pure and fair as possible, giving the patient a fresh and healthful look.

To the nervous, the Directors would say, that you can be entirely relieved from those dreadful feelings of evil foreboding and your system strengthened so that nothing can disturb the current of your life. Several cases of insanity, arising from a disarrangement of the nervous system, have been permanently cured by this system. The Directors, in issuing this pamphlet, do it in the hope that it may be the means of awakening the public, who have not studied into such things, to a sense of their duties, and if possible prevent those who have the care of a rising generation from poisoning their young charges with vile drugs, thereby entailing upon them troubles which in after life may cause them to curse the origin. Also, that those in need of remedial agents may know where they can find them without resorting to taking the thousand and one poisonous nostrums that are continually palmed off as sovereign panaceas for all the ills of humanity. Avoid them all, they are snares set to rob you, and to your bodily injury at the same time. The following is a list of the cases which have been successfully treated by the *Electropathic System*, at the Institute, during the first four years of its establishment. The record is good, and challenges admiration of the world:

Name of Disease.	No.
Rheumatism	1580
Neuralgia	1492
Dyspepsia	1467
General Debility	1410
Fever and Ague	1262
Dumb Ague	1210
Bronchial Affections	1106
Asthma	1049
Female Irregularities	1022
Mercurial	938
Scrofula—long standing	922
Paralysis	890
Disease of the Eye	832
Catarrh in the head	705
Catarrh in the lungs	608
Liver complaints	600
Incipient Consumption	582
Panama Fever	563
Deafness—total and partial	480
Mental Derangement	471
All other—and among which is almost every nameable disease	2,186
Total	21,373

The above shows what can be accomplished by combined energy when it has truth and science upon its side. The Electropathic Institute was started amid the cry of interested charlatans, who used all the power their riches and the prejudices of the public gave them to prevent its success. It has risen to a position that is beyond their baffled malice, and will be honored in the scientific world when they are forgotten, or only remembered for their crimes and impositions. A thinking public are fast consigning them to that oblivion their works merit. Let them go, they will not be missed.

Persons seeking remedial assistance, may wish to know something of the system by which diseases are so rapidly removed from the body. Electricity is a fluid of so subtle a nature that it can only be studied by its results. We know by its action it forces everything of a foreign nature in the body from the center to the surface, by its energy, while the vitality which it imparts fills up the vacuum, preventing thereby the subtle poisons from returning to the hitherto diseased parts; and here let it be understood that the Bath should never be administered until the disease has been forced to the surface, except, perhaps, in cases of cold where fever has not set in. Its action upon mercurial diseases is peculiar. The best authorities are of the opinion that it liquifies the mercury, which, warm in a liquid state, by its own specific gravity forces itself out of the body. This result has been arrived at by testing the water after an Electro Magnetic Bath. After such tests have been found in the water the patient is not troubled any more with those pains peculiar to the diseases. In all other cases it forces to the surface and is washed off by the bath. The whole system in its application is a *luxury*, there being no pain or inconvenience attending upon it, but the reverse is the case, being one continued pleasure all the time. Try it, you that are suffering either from disease or the injudicious use of poisonous drugs, and you will be made to rejoice that you have had the courage to strike out from the beaten path.

Below are a few certificates from patients that have been cured at the Institute:

CERTIFICATES OF CURES.

The undersigned takes this method of acknowledging publicly the benefits he received from the treatment applied to him at the Electropathic Institute, while suffering under a terrible infliction:

This is to certify that I have been under Electropathic treatment at the Electropathic Institute, 615 Washington street. When I applied to Dr. Josselyn I was cramped up with rheumatism, and also had the coast ague. So bad was I that, without relief, I don't think I could have lived more than one week. The Doctor, with his instrument, relieved me the first treatment from all pain, and perfectly cured me of all incased in twenty treatments, without the use medicines I cordially recommend all afflicted to patronize this Institute for it is truly a blessing to the afflicted, and the operation is very pleasant. I wish to thus publicly thank Dr. Josselyn for his care and sympathy.

JOSEPH SEGER, of Bolinas Bay.

September 19, 1860.
State of California, City and County of San Francisco—ss.
Subscribed and sworn to before me, this 19th day of Sept., A. D. 1860. P. BARRY, Notary Public.

SACRAMENTO, Oct. 10, 1860.

DR. JOSSELYN—Dear and Honored Sir: You requested me to let you know how I feel after being at home three weeks. Well, sir, I have been here a little over two weeks and there is no return of that very unpleasant trouble. My sleep is sound, and there is no disturbance of the regular laws of nature. I feel as strong as I ever did before bad habits had weakened my system. Not only is the general debility entirely disappeared, but the local trouble has gone. I feel so strong that there is no fear of its return. Considering that you only took one month to cure a disorder of seven years standing, I think your system almost miraculous. Accept my sincere thanks, and publish this if you please. I have sworn to it, as you will see. C. BOWMAN.

State of California, County of Sacramento—ss.
Subscribed and sworn to before me, this tenth day of Oct., A. D., 1860. CHAS. HART, Notary Public.

HORNITAS, Nov. 1st, 1860.

Well, Doctor, I am at home, and have been to work in the water for several days, and there is no return of the Rheumatism, as I call it; and Mercurial pains as you state them to be. I feel as gay as a lark, no pain or bad feelings, no stiffness, but perfectly well, and all done by you in three weeks, without one drop of medicine. You had hard work to make me believe before you commenced that you would cure me, but now I find it very easy to believe. Although my friends look rather incredulous, but they cannot doubt my sober earnestness. Doctor, you have my thanks, and I will benefit you all I can, by spreading your fame up in these parts.

Respectfully yours, GEO. PERKINSON Jr.

To J. H. Josselyn, M. D., Resident Physician, at the Electropathic Institute

NEVADA, Nov. 8, 1860.

DEAR DOCTOR: Pursuant to agreement, upon my arrival, I sit down to pen you a few lines in acknowledgment of the great service you have rendered me, in relieving me of that painful case of neuralgia and rheumatism. When I look back and see the gallons of medicines I have swallowed to no purpose, and then to think how soon you cured me, I am astonished. You were only twelve days performing a cure of the trouble, for which I had taken medicine over six months. Dear Doctor, if you could see the wonder exhibited by my friends, who can hardly believe that a cure was performed without medicines, but here I have been cured, and I have not taken a drop of medicine from you, nor from any one else, while being treated by your splendid Instrument I shall try to show my gratitude by sending every sick man I come across to you. Yours, till death,

FRANCIS GARLAND.

To J. H. Josselyn, M. D., Resident Physician, Electropathic Institute.
State of California, County of Nevada—ss.
Subscribed and sworn to before me, this eighth day of Nov., A. D., 1860.

F. SPAULDING, Notary Public.

YREKA, Nov. 10th, 1860.

DR. JOSSELYN—Dear Sir: Your letter, dated October 16th, is before me. You wish to know how my bronchial troubles are. Now, Doctor, that looks a great deal like a joke. I once had such an affection of several years' standing, but thanks to your natural mode of treating disease, it has gone to be numbered with the things of the past. Since my return I have not felt the slightest trouble from it. When you pronounced me well I did not expect to ever hear from it again. Any one who sits under treatment of that *Improved Instrument* of yours will have the same feelings. It imparts vitality to the system so rapidly that confidence is at once established. I have to thank you that you did not refuse to treat me because I could not pay you the whole of your reasonable charge; inclosed is the balance due you, and God bless you for the kind treatment I received at your hands.

Yours, ever grateful, WM. GARDNER.

State of California, County of Siskiyou—ss.
Subscribed and sworn to before me, this tenth day of Nov., A. D., 1860.

B. F. WELLITS, Notary Public.

This is to certify that I, the undersigned, was troubled with dumb ague accompanied with rheumatism, very badly. My disease was taken in Washoe. After having exhausted medicines without benefit, I applied to Dr. Josselyn, at the Electropathic Institute, on the first day of November. After taking twenty treatments with his Improved Electropathic Instrument I am perfectly cured, having been entirely relieved of all pain or inconvenience. I feel as strong as I ever did when in the best of health. I cheerfully recommend all afflicted to his care, as being the best physician I ever became acquainted with. One great advantage, he uses no medicines, but cures by a process which is perfectly natural. The time occupied in my case was thirteen days.

D. O. HARRA.

November 14th, 1860.
State of California, City and County of San Francisco—ss.
Personally appeared before me, D. O. Harra, and subscribed and sworn to the above certificate, on this fourteenth day o November, A. D., 1860.

P. BARRY, Notary Public.

SAN FRANCISCO, Aug. 3d, 1861.

To the Directors and Resident Physician of the Electropathic Institute.

SIRS: You requested of me a certificate of the cure you performed in my case. Below I append it:

This is to certify that I was troubled with a swelling which commenced in my ankles, and gradually extended upward until it effected my whole body. I sought the best medical aid in New York and Boston, and they all pronounced it dropsy. Hoping to retrieve my health, I visited California in February last. I consulted the Resident Physician at the Electropathic Institute; and now, after five months of treatment, and waiting to see its effects, I am pronounced well by competent judges. It did not take but three months of treatment to cure me, but I waited to see that it did not return. I feel perfectly assured from what I saw while under treatment that Electricity as applied at the Institute will cure any disease to which the human family is liable.

Now, gentlemen, you can make what use you please of this certificate. With my thanks to the Resident Physician for his kind attention, I subscribe myself,

Your thankful patient,

MRS. C. A. CA TON.

Opinions of the Press.

The advantages of electricity as a remedial agent, are universally admitted by the medical and scientific world. It requires, however, experienced skill to apply this remedy efficiently, and this skill of application is possessed in an eminent degree by Dr. J. H. Josselyn, of the San Francisco Electropathic Institute. Particulars of his method of practice can be obtained by reference to his advertisement in another column. The Doctor is well known to us as a scientific gentleman, and an ardent devotee to his profession. He is no pretender, but has conferred incalculable benefit on those who were so fortunate as to seek relief at his hands. For those who desire speedy and permanent relief from the rheumatic pains, so prevalent in this region, we can recommend no surer remedy, than a visit to Dr. Josselyn at his rooms in San Francisco, No. 645 Washington street.—[Placerville Republican.

ARE YOU SICK?—We wish to say a word to those that are sick. We have in this city an institution known as the Electropathic Institute, situated at 645 Washington street. The establishment is under the charge of Dr. J. H. Josselyn, a physician who has no superior in the city. He has been in charge of the Electropathic Institute for several years, and has been uniformly successful in his treatment of the numerous patients that have placed themselves under his charge. The Electric treatment will cure many diseases that cannot be reached by any other mode. Dr. Josselyn gives his personal attention to all of his patients, and is always ready to give advice to those that may call upon him. His charges are very moderate, and we cannot do the sick a greater favor than to recommend them to call on him before placing themselves in charge of another.—[San Francisco Daily Journal.

We call the attention of our readers to the advertisement of Dr. Josselyn's Electropathic Institute. Voluntary and unsolicited we make the following statement, proving its beneficent effects, particularly in rheumatic cases. Some months since we were on an editorial trip, visiting the mountains. The stage-coach upset, and landed all the passengers, including the writer, below in the valley, where the Deer Creek overflowed by receiving the additional material, extraneous to its usual contents. For some hours exposed in our wet clothes, to night wind and weather, we soon felt the effects of the accident in the mountains—pains in the back, hip, and legs; so much so, that for weeks we hardly could walk. Treatments of all kinds were applied but without avail u ntil our attention was called to the Electro-galvanic Baths and appliances of the above Institute. Thank God, after two weeks we have been fully restored, and enjoy now the free use of our limbs and body, as fully as previous to the involuntary bath in Deer Creek.—[Dr. H. Sien.—Ed True Pacific Messenger.

ELECTROPATHY.—Electricity has long been classed among the most effective medical agents. It possesses great advantages over the systems of therapeutics heretofore relied upon as it reaches more certainly the seat of disease, especially in nervous or rheumatic complaints. The Electropathic Institute, No. 645 Washington street, under the charge of its able Resident Physician, Dr. J. H. Josselyn, has attained a well merited celebrity for the many cases which have resulted favorably from the skillful application of this invaluable remedy.—[Daily Morning Star.

A GOOD INSTITUTION FOR THE SICK.—One of the very best places in the city for the care of the sick is at the Electropathic Institute, 645 Washington street. The establishment is under the charge of Dr. J. H. Josselyn, a physician of great experience, and no one can do the sick no greater favor than to recommend them to give the Electropathic Institute a trial.—[Weekly Journal. 13

All Letters answered with promptness and pleasure. Office open from 9 a. m. to 9 p. m. Advice gratis.

J. H. JOSSELYN, M. D.,
13 Resident Physician.

Miscellaneous.

TIME.

I CAME in the morning—it was Spring,
And I smiled;
I walked out at noon—it was Summer,
And I was glad;
I sat down at even—it was Autumn,
And I was sad;
I lay down at night—it was Winter,
And I slept.

THE TOMB OF WASHINGTON IN THE HANDS OF GUERILLAS.—In one respect three years of war has made no difference in this vicinity, so far as guerillas are concerned. In 1861 it was deemed unsafe to go from Alexandria to Mount Vernon, and there is the same danger now. The guerillas are very bold around here, frequently coming to within five miles of the city limits; and if a courier is met by them on any of the high roads, he is unceremoniously robbed, though seldom receiving bodily harm, unless resistance is made. The farmers in the vicinity have lost heavily in their stock, these rebel robbers having a great predilection for seizing all the horses they can lay their hands upon. From the suburbs of Alexandria you can see a range of hills, on which can be discerned the tower of Fairfax Seminary; and beyond that tower it is very unsafe to travel, for the region in the vicinity is infested with guerillas, some of whom may, as you look toward those very hills, be gazing therefrom with a covetous eye upon the city, and only kept from entering it by the Union troops stationed there. And as to Mount Vernon, it is now very rarely visited. There are no longer tourists from all parts of the country gathering to do homage to the shrine of Washington. The negro hack-drives in the streets of Alexandria prudently decline to drive anybody out there, no matter how large is the proffered pay. It is fortunate that the Prince of Wales visited Washington's tomb before the war, for it would have been rather humiliating to have been obliged to send with him a large military escort to Mount Vernon, to save him from the rebels prowling around in sight of the National Capital. —[Letter from Alexandria, Virginia.

AN AMERICAN CHINESE TELEGRAPH LINE.—Among other telegraph novelties which have been proposed, is a plan for a line through China from Canton to Pekin. This enterprise has been projected by Americans, and will be worked under a charter granted by the State of New York. It will be extended from Canton to Macao and Hongkong, and it will pass through Amoy, Foochow, Ningpo, Shanhae and Nankin. At Pekin it is expected to connect with the Russian-American line of Collins, which will bring down its wires from the Russian Asiatic possessions. The latter will extend its branches eastwardly to St. Petersburg, and thence to all European countries, and westwardly to the Amoor river, crossing Behring's Straits, and coming down through Russia, and British North America, and Washington, Oregon and California, to San Francisco. From Canton a British Company is about to extend a telegraph line to Calcutta, so that when this magnificent work is completed, almost every part of the civilized and semi-civilized continents of Europe, Asia and America will be within speaking distance of each other. The China line will go through a thickly settled country, and connect some of the largest cities on the globe. It will open to an apt commercial and industrial people such advantages in business as they have never dreamed of. They will be quick to avail themselves of them, and an immense profit will be the reward of the bold enterprising projectors.

AGGREGATE LABOR OF MANKIND.—Along with the compassion that is excited by listening to a tale of want, there is apt to arise, at the same time, a feeling of astonishment that such a thing should be in a land like this. Perhaps, however, the wonder is that want is not universal. One-half of those who survive the period of childhood are women who do not, as a general thing, contribute directly to the production of wealth. Of the men, many are sick, many are old, many are idle, many are wasteful, many are parasites. Those who do work, and live to the age of three-score years and ten, spend one-third of their lives in bed, one-twentieth at the table, one-sixth in recreation. Much of their time is wasted in mistakes, much of what they succeed in producing is swept away by fire and flood. During half of the year nature sleeps. One harvest in five proves a failure. Only a fraction of the earth's surface is capable of cultivation. A large part of the general labor is absorbed in the production of luxuries, in repairing the damages of war, in preparing for future conflicts, in the transportation of produce, and in journeys. Probably not more than one-tenth of the whole amount of human force is expended in earning the world's daily bread. The standing marvel, therefore, of society is, not that any should suffer want, but that there should be any who do not.

THIRST AND HUNGER.—Every one is familiar with the fact that the animal system can bear up much longer under the influence of hunger than that of thirst. The reason is that during abstinence from food the organism lives upon its own substance. The accumulation of fat feeds the system, which does not suffer materially until that source of sustenance is exhausted. During abstinence from liquid, the organism has no self-sustaining supply. Except, when a person is placed in a very moist atmosphere, three days of deprivation of drink is usually the limit of endurance, while persons have been known to exist without food from fifteen to twenty days. Raging thirst is the most terrible indiction which can be visited upon man—it is far more terrible than starvation. The subjection to thirst is much more effectual in taming animals than their deprivation of food.

NEW TRANSLATION OF THE BOOK OF JOB.—An attempt has just been made to do justice to the splendid poetry of the Book of Job, in a new translation, by the Rev. J. M. Rodwell. Mr. Rodwell is an eminent Oriental scholar, who has lately published the first readable English version of the Koran, in which the chapters are chronologically arranged, and the poetical portions rendered metrically. All who have toiled in vain to make sense of Sale's translation, will appreciate this service, and the same has been done for Job, the most sublime of the Hebrew Scriptures. The translator abolishes entirely the division into chapters and verses, but divides the book according to the stages of the narrative, arranging the text in couplets of measured prose, that represent the simple energy of the original.

8 SAN FRANCISCO.

OLD NEWSPAPERS FOR SALE.

50,000 OLD NEWSPAPERS FOR SALE, AT the FARMER Office. 23tf

FROM OUR EXCHANGES.

—The Federal Tax, collected in the State of Nevada, now amounts to $30,000 per month.

—The steamer Constitution, which sailed from this port on the 13th inst., carried away $1,336,432 80 in treasure, and six hundred passengers.

—Three miners at El Dorado, Calaveras county, have taken $15,000 from a claim in six days; one piece weighed three pounds.

—A destructive fire occurred at Quincy, Plumas county, on the 4th inst., destroying property to the value of $15,000.

—The ranchmen of Nevada county are sowing large quantities of wheat, barley and oats the present season—more than ever before.

—Los Angeles has supplied 200,000 oranges to the San Francisco market from the crop of last year.

—Over five hundred tuns of cobble stones are shipped from Folsom to San Francisco, weekly; at Folsom they are worth one dollar per tun, and at San Francisco five dollars.

—The Visalia Delta says, referring to the agricultural prospects of Tulare: "A brighter sun of promise never arose upon any community or people than the one which shines on Tulare to-day."

—The almond and apricot trees in the Oroville orchards, and in the enclosures of the numerous private residences, are in full bloom, says the Record.

—The Austin Reveille says that the petroleum found south of there, on Tar Creek, is quite dark and considerably different in many respects. Perhaps the first mentioned is some new product unknown to science.

—Wells, Fargo & Co., have one hundred and fifty agencies on this coast, in addition to the Central Agency, in San Francisco. The business of this House now extends to nearly all parts of the civilized globe.

—A young man named H. P. Eaton, a clerk in the Marysville Postoffice, has been detected in robbing the mails of greenbacks. From confessions made by the prisoner it is ascertained that he has obtained about $2,000 since October last, when his depredations first commenced.

—The State Treasurer gives notice that there is now in the Treasury the sum of $225,000 to redeem civil bonds of the State, issued under the Act of April 28th, 1857. Proposals for redemption will be received, at the State Treasurer's office, until April 29th.

—The editor of the Marysville Express has recently conversed with farmers residing in Colusa, Sutter, Yuba and Butte counties, all of whom entertain but one opinion concerning the agricultural prospects for the coming season, and they are of the most flattering character.

—Telegraphic communication between California and the East is still broken, although a few dispatches, of a private nature, have been expressed across the gap in the line, a distance of sixty miles. Hopes are expressed that the damage done by the Indians will be repaired and the line in working order in a few days.

—The Merced Banner learns that the stores of the Mariposa Company, in Mariposa, Princeton, and Bear Valley still remain closed, and that the affairs of the company are apparently no nearer adjustment than they were two weeks ago. A great portions of the miner have quit work, and are selling their scrip for 50 and 75 per cent.

—The total number of men employed in and about the Gould & Curry mine, Viginia City, is 315—viz: Extracting ore, 79; prospecting, 11; accessory work, 59; on improvements, 20; carpenters, 25; blacksmiths, 7; outside laborers, 14. The ore taken out daily amounts to about 130 tuns, and average from $90 to $500.

—A correspondent of the Trinity Journal gives the following as the prices current in Idaho city, Idaho Territory: Beef 12½ cents per pound; flour, $24 per hundred; bacon, 65 cents per pound; coffee, 65c; sugar, 55c; potatoes, 18c; onions, 30c; hay, 15c; barley, 28c; oats, 30c;—and a "smile" of the best quality can be had for 25 cents.

—The amount of native Wine returned, to the Federal Tax Collector, as having been sold in the 3rd District, including San Joaquin, Contra Costa, Calaveras, Tuolumne, Stanislaus, Merced, Mariposa, Fresno and Tulare counties, is 18,784 gallons. No returns have been made from San Joaquin worthy of mention, showing that the large amount of Wine made in that county in 1864 is still in the hands of the manufacturers.

—An immense cave occurred in the Gould & Curry mine, on the night of the 8th inst. No injury was done to miners or damage to the mine, as the cave was in a worked out portion, and had been expected for some time. The length of the cave is about 100 feet, its width some sixty feet, and the depth to which it extended 375 feet. The concussion occasioned by the falling of such a vast body of earth was immense, and houses in the vicinity were shaken as if by an earthquake.

—The Postmaster General has ordered a contract to be made with S. J. Poston, for a weekly mail service between Albuquerque, New Mexico, to San Bernardino, California, via Atrisco, Fort Wingate, Covero, Agua Fria, Zuni, Jacob's Well, Leroux Springs, Woolsey's Ranch, and Prescott. At Albuquerque the new route will connect with the great Santa Fe route from Kansas City, Missouri; and at San Bernardino with the mail service in Southern California. The mail service is to begin on the first of March next, and will inaugurate regular postal facilities through the rich mineral region of Arizona.

—The San Jose Mercury says that Wm. Boots, of Santa Clara county, planted last season, twenty acres of land to potatoes, finishing his planting on the Fourth day of July. He had conveniences for irrigating and the land was not effected by the drought. From this ground he dug 1,600 sacks of potatoes, averaging 120 pounds to the sack. The heavy rains of December came on and flooded his land, when but two-thirds of his crop was secured. He estimates his loss at not less than 800 sacks. He sold his potatoes at $3 50 per sack, amounting to $5,600. Had he secured the entire yield, he would have realized from this one field the sum of $8,400. Why do men starve in the densely crowded cities, when we have thousands of acres in our valleys, uncultivated, that will yield thus prolifically?

—Recently some persons engaged in making turpentine, in Plumas county, tapped some pine trees of a species new to them. The fluid flowed abundantly, but it had a peculiar odor, and when taken to the turpentine stills in the neighborhood, nothing could be done with it. At last it fell into the hands of a man who managed to distill a liquid, which proved to be a new discovery. Instead of the disagreeable odor of turpentine, it has a fragrance like citron, and is free from all resinous matter. Ten gallons of it weighs as much as six and three quarter gallons of pure water. It dissolves all the animal and vegetable oils and leaves no stain of its own, nor does it affect any of the colors used in dyeing, and thus it is an excellent substitute for benzine, without the odor which makes the latter substance so offensive. It is also much cheaper than benzine. The new liquid is called "erasine," because of its value for cleansing. It evaporates rapidly, and burns well, but is more expensive than coal oil. This novel product of California is now in market.

The Markets.

Wholesale Produce Report.

This represents the prices paid by the dealer to the producer.

Corrected weekly, by A. H. Todd & Co., corner of Clay and Drumm Streets.] February 17th.

The Grain and Produce Markets are much as last reported, and with the exception of Wheat and Flour, which are held firmly and in which there is an advance, we have no changes to make. Another cargo of Chile Barley has arrived and was sold in one parcel, we are advised, to a party on speculation. The late inclement weather has acted as a barrier on trade, and temporarily suspended all out-door operations.

Our receipts from all sources, for the past week, are as follows: Wheat, 5,455 sks; Barley, 10,995 sacks; Oats, 3,489 sks; Corn, 797 sks: Potatoes, 9,771 sks; Flour, 52,085 qr-sacks; Bran, 2,838 sks; Hay, 3,474 bales; Straw, 277 bales; Middlings, 226 sks; Beans, 798 sks; Wool 19 bales.

FOR SALE, TO LEASE, ETC.

A Magnificent Stock Farm For Sale.

WE HAVE ONE OF THE VERY FINEST STOCK FARMS for sale to be found in the State. The location is a Valley in the Coast Range, and in a situation unequaled for excellence. A place secluded from loss of Stock by mixing, etc.

There are 1200 acres all inclosed with a fine staked oak fence with strong riders, to this can be added as many thousands of Uncle Sam's acres as may be wanted. The fenced land is the best of bottom land. During the late dry weather a large amount of Stock has been driven to these hills for feed and have been profitably kept.

This Ranch produces a big yield of Wheat, Barley, Oats Corn, Root Crops, etc. Tobacco, Hemp, Flax, etc., can also be raised most profitably Floods never wash it, and it is never affected by drought.

On this Ranch are good, ordinary Buildings, Houses, Barns, Sheds, Corrals, Smoke Houses, etc., to this Plows, Harrows, Teams, working Oxen, etc., to do the work on the place.

On this Ranch there is now the following Stock:
One Jack of the very best character
100 Mules from 1 to 3 years old.
1 Stallion, No. 1.
20 American Mares, No. 1.
80 Mares one-half and three-quarter breed. These Mares are all in foal, mostly by the Jack, as Mules are a ready sale at high prices.
100 Horses, mixed Stock.
500 Head Horned Cattle, American Stock and half breed.
400 to 500 Swine, good Stock.

The Stock now on the place can be sold with the Ranch and thus put the purchaser into a business profitable at once This Ranch is so situated that a river surrounds the range on one side and mountains on the other to which the Stock have a fine run without any interference from any source, thus giving the Stock a complete swing. Without reducing the original Stock there can be sold annually from this Ranch 50 Mules, 30 Horses, 100 Beef Cattle, 300 fatted Hogs, worth in the aggregate $10 000, three fourths of which is clear profit

The timber is abundant Pine Oak, and other hard woods. Tar, Pitch, and Turpentine can be made in abundance.

This is one of the Rare Chances, such an one as is seldom offered.

Easy terms as to payments: A portion of the money can remain on time if secured.

For all particulars call on the Editor of the Farmer. 22

Pleasant Homesteads For Sale.

THE FOLLOWING PLEASANTLY located Properties, situated on the opposite side of the Bay, can be purchased at very reasonable prices and easy terms if applied for soon.

No. ONE—A Handsome Two-story Cottage, with seven rooms and seven closets, hard-finished, and every convenience inside, Small Buildings, Chicken House, Good Water, Gardens, and a very fine view of the Bay. Price about $3,000. Buildings perfectly new.

No TWO—Very similar Cottage, with eight rooms, and same good finish and conveniences inside and outside, and same views—price the same Both the above have excellent soil in the garden, and some fruit trees ready for bearing. The fences are fine around the grounds, each about one acre.

No. THREE—A large House, built some three years, large Garden and about 150 Fruit Trees in bearing yielding a handsome income yearly. All these three Dwellings are within three minutes of the cars. Price, similar These are really worthy special attentions. For all particulars inquire of the Editor of Farmer.

....ALSO....

A neat Cottage with eleven acres of land all covered with Fruit Trees, and small vines in abundance such as Blackberries, Raspberries, Strawberries, Gooseberries, etc. The income from the ground has been about $2,000 a year. The owner wishing to leave will sell at $6,000. A fine location and everything desirable—it will be sold at a bargain.

—LAND.—

A Fine Building Lot all planted with Trees, about 500 of the best quality and in bearing. The Fruit alone will pay for the place in three years.

OTHER LOTS OF LAND,

We have several Fine Lots of Land, open; also some stocked with Fruit Trees, that can be offered on the most favorably terms to those who wish to secure desirable Homesteads.

Inquire for all the above of the Edito of Farmer. 19

A Beautiful Eden for Sale.

ONE OF THE MOST DESIRABLE Estates on the Pacific Coast is now offered for sale by reason of a desire of the owner to travel abroad and to regain his lost health—no other inducement could tempt the owner to part with it.

The Estate now offered is beautifully located in a retired valley away from any immediate neighborhood, free from noise, dust, etc., and shielded on all sides by lofty and picturesque hills giving a varied scenery, truly delightful, no season of the year without real beauty.

The whole Estate comprises a little less than ONE HUNDRED ACRES, the greater portion of it is covered with Orchard, Vineyard and Garden Grounds, comprising all that is desirable, and unsurpassed by any grounds in this State

The Orchard covers many acres, and the Vineyards are very extensive, and everything rare and desirable in these departments are here found

Pleasantly built and located is the Cottage residence. This with Barns, Fruit Houses, Wine Cellars, and other appurtenances make the whole complete, a highly prosperous Garden Ground around the residence with large Orange, Lemon, Fig and Olive Trees in bearing gives the whole the true "Eden" appearance.

The productiveness of the place can be estimated when we say more than Ten Thousand Dollars is annually produced from the Orchard and Vineyard, and these can be easily and greatly enlarged.

This whole Estate can be had at a bargain if soon applied for.

The approximate value is about A THREE-YEAR INCOME, and any person having ready cash of some amount, who wishes to secure one of the finest Estates on this coast, can find the present a rare chance. No person need apply who has not ready money to a reasonable amount, and none but a real purchaser To such, one of the best chances for a Fortune is now offered, as in good hands the Estate can be paid for with the income from the product in three or four years, sure.

For particulars apply to Editor of Farmer. 20

Fine Farms for Sale.

YOU WHO WANT GOOD FARMS CAN SECURE them by applying to the Editor of the Farmer. The following can now be had:

FOUR VERY FINE FARMS in the splendid San Joaquin District, within a few miles of Stockton, all very productive.

Several STOCK RANCHES in various parts of the State, from $1,500 to $25,000; in all these, good and permanent settlers can find bargains. Address by letter, or in person, for particulars to Col. Warren, Editor of the Farmer. 23

Two Splendid Farms for Sale.

TWO SPLENDID FARMS FOR SALE, IMMEDIately, in one of the best localities in our State—one of the best chances ever offered for an immediate purchaser, parties wishing to close business contracts.

One Farm of 30 acres, and Orchard, worth $6,000, will be sold for about half that sum.

A large Farm, 5,000 acres, worth $15,000, will be sold for $10,000 or less. Inquire of Editor Farmer.

Loan Wanted---$5,000.

WANTED, FOR TWO YEARS, $5,000 ON VALUable improved property in a neighboring County The property is worth treble the amount. Insurance on the buildings of $6,000 goes with the collateral. The money is wanted at a fair interest, which will be paid promptly. Inquire of Editor Farmer 7-1

Letter from Pennsylvania.

Nazareth, Penna., January 10, 1865.

Editor California Farmer:

Dear Sir,—By reading your valuable paper, I find that Agriculture and Grape culture in your State meet with considerable difficulties from insects and drought, and am of opinion that Oregon has the advantage in producing the Cereals, Apples, Pears, Cherries, Plums, etc., and also the early varieties of Grapes, of which I will mention:

Fruits for Oregon—For the Table and for Wine.—Blue Portugal Grape; Italian Malvasier; Chasselas Musque; Vander Lahn; White Lombard; Silk Grapes, green and yellow. *Apples*—The Borsdorfer and Grafenstein.

I have sent these varieties to Mr. Edward J. Jarvis, at Vine Springs Hacienda, Columbia, Tuolumne county, California; and also to Capt. W. S. Smart, near Jacksonville, Tuolumne county.

The Borsdorfer Apple is undoubtedly the best apple in the whole world, but it is so only when grown in a cool, mild climate; but it maintains its peculiar appearance anywhere, while the Grafenstein is *white* in its native country and becomes striped in Pennsylvania, where it is not near so good as it is in Northern Germany.

The white Lombard Grape is extraordinarily delicious, very early, and makes an excellent wine. The blue Portugal Grape is also very early in ripening, has no acid at all, and makes a very fine red wine.

I give this information for whom it may concern.

Very Respectfully, Yours,
G. H. Bute, M. D.

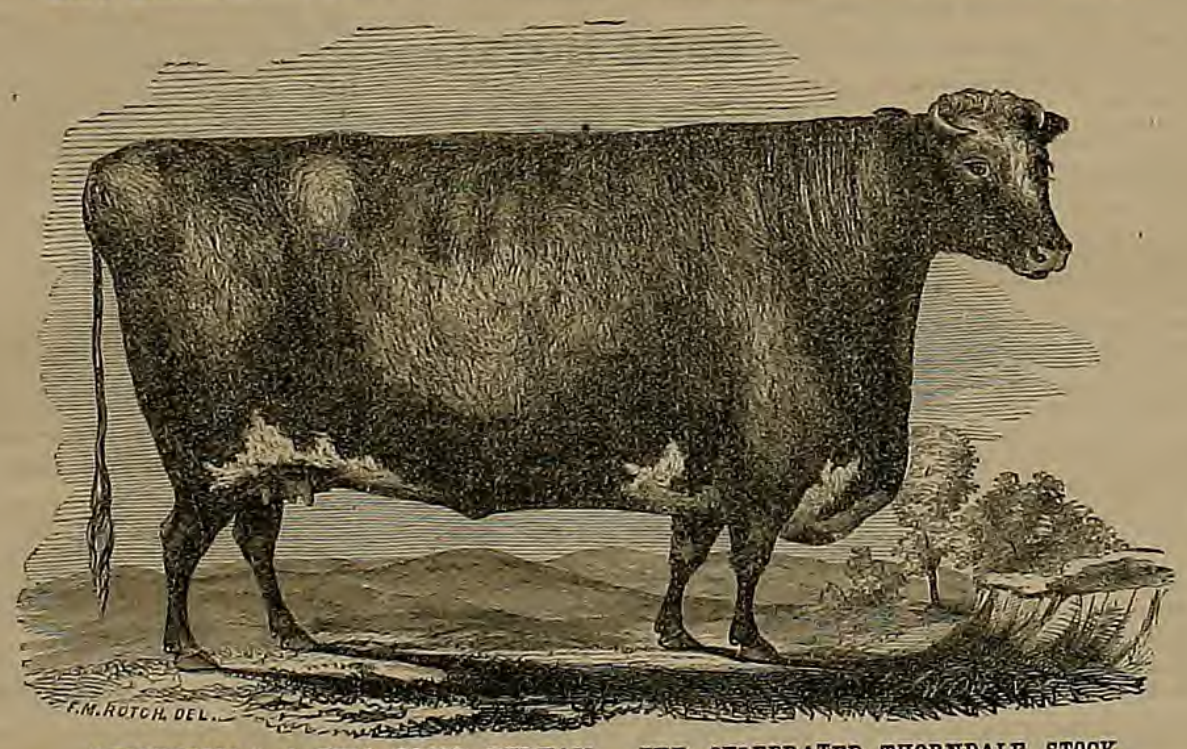
Irrigation in the Mountains.—The drought in the mountains was severely felt last year in some places. From a subscriber in El Dorado county, we received the following item on the cost of water for the purposes of irrrigation. He says: "Heretofore we had been paying fifty cents per square inch for water, but last year they raised to *one dollar!* This is more than eight times what the Placerville Ditch company charge. Now, the fruit-growers around here are making arrangements to bring water into this ridge from the Placerville ditch, so we put down an eight inch iron pipe, 2,600 feet long, across Webber creek, and then dug a ditch of more than three miles in length. We had to do this, or abandon our places. Our pipe will have from sixty to one hundred feet head, and something over one hundred feet pressure." Thus we see that when exorbitant prices are exacted, those who exact them become losers, as they always should.

The new clip of wool is beginning to arrive in Buenos Ayres, and it appears to be in excellent condition, finer staple on an average than last year; also longer, clean, and altogether it is said to be 30 per cent. better. Such a favorable year has not been known for ten years in every department of productive industry in the Confederation.

One of the largest cattle-killing firms of Buenos Ayres is about to initiate measures for making guano out of the refuse. The result, if at all successful, will be important, for the killing of one house amounts often to 50,000 cattle in one season. This would give at least 2,500 tuns of guano from one establishment.

Sacramento in Blossom.—The Sacramento Bee tells us the Apricot, Peach and other trees are in blossom. Well, let them blossom, we are glad of it. We only hope they will produce a glorious harvest of fruit.

"LADY MILLICENT," A FULL BLOOD DURHAM. THE CELEBRATED THORNDALE STOCK.



"FREDERICA," A FULL BLOOD DURHAM. THE CELEBRATED THORNDALE STOCK.

Durham Stock..—We gave illustrations of two Devon Cattle last week, and we give this week two of the best Durham Cows known—we call attention to them. These illustrations are for the eye. The history of each animal, their origin, their capacity and properties for the Dairy, as well as for Beef, are so well known as not to need illustration by sketch now. Our object is to show the form and general appearance of the animals by contrast.

These two noble animals have a history. They are of the celebrated stock of Hon. Samuel Thorn, of Thorndale, New York, whose Prize Stock was sold to go to England, a short time since, at Five Thousand Dollars each.

Grape Culture—Discussion.

Discussion is what we most earnestly desire, and it was for this reason we extracted the article of the Mercantile Gazette of the 12th inst., to create discussion, feeling confident that good would result therefrom.

Grape Culture.—The California Farmer of the 10th inst., after quoting a portion of an article on Vine Culture in our Annual Review of 12th January, recommending close planting, or four foot space instead of eight foot, remarks as follows:

"We give the above words from the Mercantile Gazette, on this all-important subject. We publish the paragraph to show how a *Mercantile* Gazette—good for statistical tables of *Imports and Exports*—may be very wide of *sound judgment* or advice in viniculture. We know of no statement that could be made so utterly unsound as the above and we cannot think any person who knows *anything of vine-growing* would give credence to so ridiculous a statement, the very details of which contradicts itself by figures. We are truly sorry to see so good a journal put forth so poor an article, as it may do great harm. We had intended to have pointed out the fallacy of the article in all its bearings, but we send it out as it is, hoping some of our *experienced* (?) vine-growers will favor us with the minutia of this system, for we never yet heard that the grape-vine would bear a higher colored grape or secure to itself more substance when planted close and with confined air than when it had space for thorough cultivation and free play of the sun and air. Will our vine-growers please reply?"

Our reply to the above is, that the article alluded to in such choice terms was furnished to us by one of the most experienced and extensive vine-growers in the State; who came from a vine-growing country in the old world and has made the business a study and a speciality for many years. Without intending any disrespect to the editor of the Farmer, we would simply remark that the person to whom we allude is commonly supposed to have as much practical knowledge on the subject in question as himself. We shall be glad to see it discussed by practical men, who have had experience in this country. Theorising about deficient sunshine and "confined air" in an open vineyard under the sunny skies and active summer breezes of California, may suit the curious, but matter-of-fact men will be better pleased to see the record of results from actual experiments fairly and properly made.

Our neighbor of the Gazette says he wants *discussion* from practical men; so do we, and thus we agree—we do not rely on mere theoretical ideas and opinions. We have cultivated the Grape under glass and in the open air for many years, at the East, and have had sufficient experience of the nature and wants of the vine to speak and write upon it. We have grown the Grape years enough to know what it needs, and we trust practical vine-growers will discuss the subject freely. There are many very intelligent growers, and we will publish any and all communications, whether they agree with us or conflict with our own opinions, it is not merely a desire to establish our own views, it is to establish Truth and present a knowledge of the best system of culture of the vine we wish.

In this connection, we give some well authenticated views on the culture, soil and exposure of the vine. As this is the season of planting, we think they will be useful:

The plan pursued by American horticulturists in vineyard and garden culture, in some instances in their own language, is described, as it appears settled from these accounts that our native grapes (different varieties succeeding in various sections of the country), answer every purpose of vineyard culture, there does not appear to be any occasion to try any others, excepting on a small scale for the dessert.

Mr. Hoare says, "In the choice of a good aspect, therefore, shelter from high winds, and those aspects that are least exposed to their effects, and that receive a full portion of the solar rays, may be deemed the best. The best aspects in the southern part of England are those that range from the eastern to the southeastern, the last of which may be considered the very best. The next best are those which follow in succession from southeast to south. An aspect due south is undoubtedly a very good one, but its exposure to these strong winds which frequently blow from the southwest forms a great drawback. The remaining aspects are those which range successively from due south to due west. These are all good ones provided they are sheltered, or partially so, from the destructive effects of the high winds above mentioned. North of the western point, the maturation of the wood and fruit of the vine becomes uncertain. East by north is a very good one. North of this point, the solar rays are not sufficiently powerful to mature either the wood or fruit."—[Treatise on the Grape, by Clement Hoare. 1837.

Chaptal says, "That the middle of a hill side produces the best wine, the upper part the second best, and the bottom of the hill the most inferior;" showing, apparently, that the middle location contains the essential nourishment required, that, in the upper part, there is a lack of this, and at the foot of the hill there is either too much of it, or too much moisture.

Monsieur de la Quintinye says of the Muscat grapes, that they "require a temperate country and the expositions of the south and east, and always a light ground; we seldom see any good in pure earth, and if it be in hot climates, in gravelly and sandy grounds."

The Penny Cyclopedia says of the aspect: "On the steep slopes of hills towards the south, and sheltered from the northeast, the grapes attain the greatest maturity, and the vintage is most certain. So great an influence has a favorable exposure, that in the same vineyard the greatest difference exists between the wine made from one part and that made from another, merely because there is a turn round the hill, and the aspect varies a very few degrees. A change of soil produces a similar effect. The famous Rhine wine, called Johannisbergh, was made from the grapes which grow near the castle, is worth twice as much as that made a few hundred yards farther off. Here both soil and aspect change. The *Clos de Vougeau*, which produces the finest Burgundy, is confined to a few acres; beyond a certain wall, the wine is a common Burgundy, good, but without extraordinary merit."

At Bourdeaux, a southeast exposure is preferred, and in Germany, generally, a southwest; in some places, a northern exposure is thought best, as the danger from late frosts is less.

Chaptal is considered as the best French authority on the vine. His object, in his Treatise on the Grape was to promote the improvement of the quality of the wine, and to discourage the use of manures, as one of the main causes of this inferiority. The practical ideas of this treatise are mostly attributed to the Abbe Rosier, of whom it is said, "that, retiring to the home of his fathers, he, for a long time, practised agriculture, not only studying all previous systems of vine culture, but comparing the old with his experience, the local practices with the laws of natural philosophy, to bring the culture of the vine to its highest state of perfection was his particular object." In the introduction, he asks, "Why is it, that so large a number of the wines of France, formerly celebrated, are now fallen into discredit? Why, these wines should be of so ordinary a quality, whilst those of another district have acquired and preserved a merited reputation? On reflection, we cannot attribute the difference entirely to the situation, the climate, or the soil. It is not, then, to the little care of the cultivators, to the following of a blind routine, or to the ignorance of the laws of nature, or to the preference that is given to vines that abound in juice of a gross nature, above those which produce wines of a better quality?

"The laws of vegetation, regarding the vine, will show you that a rich soil will produce the most vigorous shoots, but that the sap thus communicated from the vine to the grape would not be sufficiently elaborated; the wine would be insipid and weak. It is necessary to diminish the vigor of the vine to obtain a wine of good quality; to do this, the soil best suited for the purpose must be selected, the best plants, the perfect maturity of the fruit must be attended to, and the most favorable time for the vintage. From chemistry, he must learn the elements of wine, and the manner to direct the fermentation, etc. He must follow *nature*; in all his operations, she should be his study; he should be tractable to her lessons; she alone never deceives."

"In France, it is only necessary to cultivate the sheltered hill-sides, and soils granitic and calcareous, or sandy, and generally the poorest, such as are not suitable for pasture or grain."

"The earth, the most suitable for vegetation in general, is that composed of a mixture of flint, of clay (alumine), and of lime, in such proportions as readily to imbibe moisture, and so to retain it that it may be constantly and insensibly evaporated by the warmth, giving enough nourishment to the plants until a renewed rain has again filled the reservoirs. When there is too much aridity, the plants become weakened and soon die. To constitute a good vegetative soil, it is not sufficient that barely the top layer of earth shall be thus composed; it must be of good depth."

"In time the good soil will wear out, become exhausted, and one cannot hope to reap a continued advantage, unless by depositing, from time to time, new principles of nourishment,—of oxygen, of hydrogen, and of carbon. These can be found in proper quantities in the manures of animals, and decomposed vegetable matter. One may also usefully employ certain minerals, not as manure, but as a rectifier: for instance, fossils and marl, which, from the effect of moisture and heat, ferment and cause the small lumps of earth to separate, and render the whole mass more permeable to the substances which form the sap."

"The nutritive principles required from the soil, for the cultivation of the grape, are the same as those named as requisite for general cultivation; but when there is not a sufficient supply of moisture, the vine will not prosper."

"The kind of earth regarded as the most suitable for the cultivation of the vine varies with the climate in which the culture of this plant is introduced. We do not speak here of the superior layers of soil, which would make such an assertion hazardous. Experience has demonstrated, that, in the southerly (meridionaux) departments, the vine flourishes in volcanic earth, in the (freestone) grit, and in the granitic gravel, mixed with vegetable earth and with some clay (alumine). Towards the center of France, they succeed in the schistes (slaty) and above all in the calcareous rock, which crumbles on exposure to the air. At the north, they prefer the coarse gravel combined with calcareous earth. But everywhere you make use of collections of earths and stones (almost monstrous), of all kinds, provided that the mass be permeable to water, and retain but little moisture. All agree that an essential quality of a good earth for the vine, is, that it should possess a mixture of quartz, of flint, and coarse gravel. The rays of the sun penetrate these stones and furnish warmth during the day, and distribute it to the plants by night. This is not all: in earths exceedingly porous, they yet serve, by the effect of their solidity and quantity, to diminish the too rapid evaporation of the moisture. Besides (finally), it is by the vegetables that the soil produces that we can best judge of its quality, and of the temperature of the climate. Wherever the cultivator shall see the peach tree prosper naturally, he may conclude the situation is favorable for the culture of the vine."

"If the earth where you propose to plant a vineyard is cultivated already, the best preparation for so doing is to plant, for two or three years, the soil with vegetables, giving the preference to such as require the most working of the land in the cultivation. The labor necessary in this operation, and the manures by which they are made to thrive, prepares, lightens, and enriches it. The dung, in general so adverse to the vine, so prejudicial to the quality of the fruit, incorporated into the soil in advance, can have only good effects; it has become freed of the carbonic acid in excess, and the vegetable substances become united with the under surface of the earth; the soil, thus prepared, is suitable for the vine in every age, but more particularly in its infancy."

Early Blossoming.—From various parts of the State we hear of the early blossoming of Fruit trees. Stockton, Sacramento and Napa speak of the blossoms of the Peach, Apricot, and the early fruits. Beyond question we shall have the best season and the largest crop of fruits produced for many years, unless some unforseen calamity should come.

Agricultural Department.

Agricultural College.

This subject is now the theme of importance among the friends of agriculture and horticulture over our whole land. In despite of our calamitous war, the cause of agriculture is progressive. We give some extracts of the "University Plan," as presented by Lewis Bollman, Esq., in the pamphlet of which we spoke in our last issue as having been received on the subject of the Industrial College:

I. *The University Plan.*—The recent excellent and most timely publication of Mr. Flint, of the Massachusetts State Board of Agriculture, makes us better acquainted with European agricultural schools than we have been heretofore. "These," he says, "are of two kinds: those which are connected directly or indirectly with universities, and those which are independent of other institutions." Prominent among the first kind is the Agricultural Institute at Jena, in Saxe-Weimer. It is a part of the university at Jena; but whilst it has a course of instruction of its own, the special purpose of which is to prepare the student for agricultural pursuits, he may avail himself of all the advantages which a more thorough instruction in the principles of any science in the university course can give him. The influence of this arrangement, both on the course of studies of the institute and on the emulation of the student of agriculture, is thus referred to by Mr. Flint: "In consequence of the use of these means of instruction, the institute stands in an independent relation with the university, which secures it great advantages; yet far more important is the more intimate connection with it; that is, the necessity that its instruction of the same principles should be more general and comprehensive, and fundamentally scientific, like that of the university." And this necessity is made practically greater by infusing a loftier ambition among the students of the institute to emulate the thorough instruction imparted in the university.

As so little has yet been laid before the American farmer of the studies in these schools, it may be useful to give here the character of the instruction at this institute. Mr. Flint says: "The sciences useful to the farmer which the institute teaches are as follows:

1. "*Sciences relating to the branches of agriculture.*—Sciences bearing on the cultivation of agricultural plants, in its whole range, as climate, soils, cultivation, tillage, manuring, seed, after-culture, harvesting, culture of grains, mercantile and fodder plants, fruits, etc. The breeding of animals, in its whole range, the principles of breeding, nourishment and care, raising, keeping and use of particular sorts and races of domestic animals; farm management, with all its branches, book-keeping, valuation, etc.; agricultural excursions, demonstrations and conversations.

2. "*Fundamental and auxiliary sciences of agriculture.*—National economy, agricultural history and statistics, agricultural law, physics, meteorology, general chemistry, agricultural chemistry, practice in the laboratory, qualitative analysis, quantitative demonstration of agricultural materials, grains, oil fruits, guano, other kinds of manures, soils, plant ashes, mineralogy and geognosy, including knowledge and classification of soils. Botany, with special reference to the physiology of plants; including botanical excursions, instructions in forestry, care and use of woodland. Gardening. Zoology, with special reference to knowledge of insects, veterinary science, anatomy and physiology of domestic animals on the farm; pathology and therapeutics, chirurgery, shoeing, etc. Mechanics and machinery, agricultural machinery and implements, their construction and use. Agricultural technology, including technological excursions, bread-making, manufacture of vinegar, distilling, brewing, sugar-making. Geodesy, use of the surveyor's chain and theodolite, field measuring, levelling, agricultural mechanics."

As aids to imparting the instruction embraced in the above subjects, the institute has:

1. "A farm of about 1,400 acres, with a numerous herd of cattle, a distillery, brewery, and silk-raising establishment, which serve as a means of illustration.

2. "An agricultural botanic garden, attached to the botanic garden of the university.

3. "A well-appointed chemical laboratory with a sufficient number of convenient working desks.

4. "Collections of minerals and earths, dried plants and seeds, models of fruits, collections of insects, technical apparatus, so far as requisite for reference in the lectures.

5. "A valuable agricultural library for the use of the students.

6. "A reading-room where all the agricultural papers are taken.

7. "An infirmary for sick animals, with a room for operations and necessary tools.

8. "A rich collection of pathological preparations and objects.

"For the ancient and modern languages, and the fine arts, the university," says Mr. Flint, "offers extraordinary opportunities to those who desire them."

This institute has *eleven* professors, *and but one hundred and ten students*, being but ten students to each professor. This fact appears singular to us, and might be attributed to some special cause, was it not characteristic of all European agricultural schools. At the still more celebrated school of Hohenheim, near Stuttgardt, in Wurtemberg, there are but 161 students. At the not less celebrated one of Grigaon, near Paris, in France, but 75; and the English agricultural school of Cirencester, at Gloucester, has proved a failure. These attendances, so meagre, admonish us that the successful establishment of agricultural colleges is a difficult work, and that we must clearly understand the adverse influences they have to encounter before we endeavor to establish our own. We shall recur to this matter presently.

II. *Agricultural institutions, separate from universities, but giving linguistic and mathematical instruction.*—An institution of this kind is brought to our notice in the excellent report of the late Dr. E. Pugh, president of the Agricultural College of Pennsylvania. He passed six years in Europe, studying its agricultural schools, and the opinions of one thus qualified to advise will have their weight with all. The number of professors recommended by him for an industrial college of the highest character is *sixteen*, including the president. The professorships relating to the sciences are as follows: 1, of pure chemistry; 2, of agricultural chemistry and geology; 3, of metallurgy, mining and mineralogy, and chemical technology; 4, of anatomy, physiology, and veterinary; 5, of natural history, more particularly of zoology, comparative anatomy, and entomology; 6, of botany, horticulture, and entomology.

To these he adds the following, relating to languages, mathematics, and the practical arts of agriculture and military affairs:

7. Of pure mathematics and the higher mechanics and astronomy; 8, of civil engineering and applied mathematics; 9, of natural philosophy and astronomy, mechanics and physics; 10, of English language and literature; 11, of modern languages, particularly German and French; 12, of practical agriculture; 13, of military art and science, and teacher of military tactics.

To the foregoing, he says, should be added the following, though not indispensable to a system of industrial education:

14, Of Latin and Greek languages and literature.

Numerous as these professorships may appear to be, yet they are all essential to an industrial college, and no one of the enumerated studies can properly be dispensed with. On the contrary, there should be added to them meteorology and physical geography, both of the land and sea, for these studies embrace the all-important subjects to the farmer of the distribution of heat and moisture.

On the nineteenth, twentieth and twenty-first pages of his report, Mr. Pugh speaks of the apparatus and natural history collections and museums essential to the proper instruction in each study. But we omit referring specially to what he regards as necessary, for Mr. Owen fully sets it forth in his communication.

III. *Agricultural schools, without instruction in languages and mathematics.*—Whilst these do not teach either modern or ancient languages, and pure mathematics, they yet adopt a scientific course, greater or less in different institutions, but their chief object is a practical instruction, having reference to such preparation of the student as will qualify him for the superintendence of a farm.

Among the first of such schools in Europe is that of Hohenheim, and to it Mr. Flint appears to have given much attention. In the *theory* of agriculture it requires but two hours each day of instruction, and the sciences do not appear to be taught to any great extent. Stock-raising is one of the highest importance connected with it, and to its general practical course of instruction it has added several special ones, among which are gardening, fruit, silk, and bee culture, distilling, natural economy, and manufacture of agricultural implements.

It has an experimental field, and as this feature of its instruction is admirably adapted to the improvement of American agriculture, we quote what Mr. Flint says of it:

The *experimental field* was designed, not only as a means of instruction for the students, but also as a means of investigation on the part of the professors. For this purpose the plots appropriated to each experiment consist of nearly a quarter of an acre each—a size sufficient to give to each a fair and full trial in management, manuring, cost of culture, results, etc. The fact that there are ninety-six of these plots indicates that this part of the enterprise receives its due share of attention. *It also offers the means of raising a great variety of seeds which supply the wants of the farm, and form an important item in the receipts of the institute, while it secures to the farmers of the country a certain source from which they can obtain pure seed.* But the experiments on the farm are not wholly confined to this field. Among those that have been tried the following may be mentioned:

1. Upon the transmission of caries in grain, and the influence of washing, soaking, fermentation of the seed on the stock, as well as on the age and change of seed.

2. Observations on the sensitiveness of growing plants to frost.

3. On the effect of large, middle-sized and small seed potatoes.

4. On plucking off the blossoms of potatoes.

5. On the exhaustion of land by rape culture. [Here it should be by tobacco and corn culture.]

6. On the exhaustion of wheat, in comparison with green plants, and fallow.

7. On the culture, year after year, of beets on the same land by constantly fresh manuring. [Here it should be of all our crops, especially of cotton, sugar-cane, corn, tobacco, potatoes, etc., requiring summer cultivation, in comparison with crops sown in the fall, as wheat, barley and rye, both with and without manuring.]

8. On the continued culture of artichokes on the same land, with manuring every three years.

9. On the effect of mowing, or not mowing, the late clover stubble in autumn. [The second crop we suppose is here meant.]

10. On depasturing of winter barley.

11. On the manuring of meadows.

12. On manuring with Peruvian, Baker's Island and fish guanos, rape-meal, bone-meal, superphosphate, Chile saltpetre, salt, gypsum, gas lime, soda, peat, ashes, Leibig's patent manure, artificial manures.

13. On the effect of fresh and rotted manure, the mixture of various crops, and many others.

This field, says Mr. Flint, was very instructive and interesting.

Speaking of the *botanic gardens* of this institute, he says:

"I spent a good deal of time in the various parts of this garden. It is laid out on a generous scale, with an agreeable park-like aspect; groups of trees, ornamental and useful shrubs, parterres of flowers, and lawns well kept. A part of it is devoted to annuals, where an immense number of varieties of wheat and other grains are cultivated; each plot labeled, so that the visitor may know, without a guide, what each contains. In another part are the perennials, especially those of economical value. The grass garden forms a part by itself, where the different species of grass are cultivated in little clumps, each labeled with its scientific and common name, while an arboretum of considerable extent is at all times accessible for students and others."

Cotton Growing in Peru.

Her Majesty's Charge d'Affaires and Consul-General at Lima, in forwarding reports from official and private parties, states that there is no doubt that Peru offers great natural facilities for the cultivation of most excellent cotton, which would become a most important article of export if the cotton growers had access to capital to enable them to procure the necessary labor. The climate is benignant for the tropical country, and the absence of rain and heavy showers in many parts is also a special recommendation. Irrigation is practicable, and during the winter months there are fine mists that promote and freshen vegetable growth.

In the province of Ica there were 4,800 acres planted in 1863, and 24,000 acres in 1864, and the produce, which in the former year was 18,000 quintals of 100 pounds Spanish each, is expected this year to amount to 90,000 quintals, and everything indicates a larger increase next year. There is an immense field in this province for cotton cultivation, and the Peruvian Government would do well to encourage emigration, and give grants of new lands at a reasonable and advantageous rate. In the department of Piura, every one owning land has been induced to grow cotton in preference to anything else, and there will doubtless be a considerable increase.

The Georgia seed, introduced a couple of years ago by an English gentleman owning a cotton estate, irrigated by steam pumps, has proved much less subject to blights than the native plants. It yields a crop in less time, and will, no doubt, be generally adopted throughout the province. The cotton has been sown at all seasons throughout the year, and the yield and quality are found to be invariably the same. The Vice-Consul at Arica reports that an increased area has been planted with cotton in the valleys in the Department of Moquagua, Peru, and that the produce, which in 1863 was 120,000 pounds, will, it is estimated, this year be 240,000 pounds. The crops are healthy, and promise an abundant yield. The want of capital is a great drawback; land is to be had at a low rate, and it is thought that a company purchasing land and cultivating cotton in the valley of Sama, would obtain ample returns. On the estate of San Jacinto, valley of Santa, three hundred and twenty acres have been planted, and the produce is expected to be 70,000 pounds of cotton. The proprietor, who has two large sugar estates in the valley of Canete, institutes a comparison between sugar and cotton, showing that at considerable less than prices, the result would be 50 per cent. in favor of cotton. On an estate in Canete cotton planting has been established, and 600 quintals have been produced this year of excellent quality. Others are commencing, and he is quite confident that great progress will be made. Very fine samples of cotton have been forwarded.—[Panama Star.

How to put Posts in a Fence.—It is a universal practice of the Maories—natives of New South Wales—in putting posts in the ground for a post and rail fence, to put the post upside down—that is, with the end that stood highest in nature in the ground; and they assert that posts so fixed will last a much longer time than posts put in in the usual manner. As the aboriginal races of most countries are usually right in all matters which spring from a minute observation of nature, those who are not too proud to learn from Maories, may imitate this custom with advantage.

HOTELS.

REVERE HOUSE.

Second Street, Opposite the Court House,
Napa City,
GOODRICH & DEMMITT, Proprietors.

THE UNDERSIGNED, having taken the above named well-known Hotel, and fitted the same up in superior style, would respectfully announce to the public that they are prepared to furnish excellent accommodations to permanent and transient guests.

The house is built in modern style, and the rooms are large, airy and pleasant. Families can be accommodated with elegant suits of rooms at reasonable rates.

The Table and Bar will be provided with all the substantials and luxuries to be procured in this market.

The location of the house is central and convenient. A fine Livery Stable adjoins the premises, and the Telegraph Office is next door. The offices of all the stages running out of town are in this Hotel.

☞No effort will be spared to make the Revere House one of the best Hotels in the State. Public patronage solicited. GOODRICH & DEMMITT.

Napa, Oct. 1st, 1864. 13

NAPA HOTEL,

On the Corner of First and Main streets,

NAPA CITY, CAL.,

J. S. HOGAN - - PROPRIETOR.
13

SOLANO HOTEL

...AND...

LIVERY STABLE

Corner of E and First streets,

BENICIA.

The only Hotel in Benicia, and Stage House for four lines of Stages. This Hotel is now—since the decease of E. P. Weinmann—continued by

Mrs. J. WEINMANN,

Who will use every effort to give satisfaction to the many patrons of this Hotel for the last nine years. Mrs. Weinmann hopes to receive the remembrance of all who have heretofore patronized this Hotel.
19

GOLDEN EAGLE HOTEL

Corner Seventh and K streets,
SACRAMENTO.

THIS HOTEL IS OFFERED TO THE PUBLIC AS a "Home for Families," and for the Traveler.

The Proprietor has spared neither expense or care to make his Hotel one that shall always be acceptable and pleasant to all that may favor him with a call.

With ample accommodations by means of spacious Suites of Rooms for Families, and by recent enlarged accommodations, he is confident that visitors will always be satisfied and feel at Home.

Particular attention will always be paid to the comfortableness of the apartments, by well ventilated Rooms, clean Beds and Bedding, and strict attention to the wants of Boarders; while the TABLES will be provided with the very best the season affords.

Carriages, to and from the Hotel to the Railroad Cars and Steamers, at all times, Free of Charge to the Patrons of the Hotel. Hotel open all night.

☞ Connected with the Hotel is a Fire-proof STABLE expressly for the care of Horses and Carriages of the Patrons of the House.

D. E. CALLAHAN,
PROPRIETOR.

A. H TODD.....N. W. COOK.

A. H. TODD & CO.,
Brokers & Commission Merchants,
AND
JOBBERS

OF FLOUR, WHEAT, BARLEY, OATS, CORN, CORN Meal, Bran, Shorts, Middlings, Ground Feed, Potatoes, Onions and Seed Grain of all kinds. A good assortment at the lowest market rates always on hand.

Office—No. 45 Clay street, Corner of Drum, SAN FRANCISCO.

N. B.—Ours is one of the oldest Commission Houses in the city. Consignments of Produce solicited.

Terms for buying or Selling Grain, Flour or Wool: Amounts under $5000, 2½ per cent; $5000 and over, 2 per cent. And on Stock, Hay, Fruit, Potatoes, Butter, Cheese, Poultry, Eggs, etc, amounts under $3000, 5 per cent; over $3000, 3 per cent. Liberal Cash Advances on Consignments. Prompt returns and the highest market prices guaranteed.

OLD NEWSPAPERS FOR SALE.

50,000 OLD NEWSPAPERS FOR SALE, AT the FARMER Office. 23t

HORACE WATERS' COLUMN.

THE

HORACE WATERS MODERN

IMPROVED OVERSTRUNG BASS

Full Iron Frame Pianos

are built of the best and most thoroughly seasoned materials and will stand any climate. The tone is very deep, round, full, and mellow; the touch elastic. Each Piano warranted for five years. Prices from $225 to $700.

TESTIMONIALS:

"The Horace Waters Pianos are known as among the very best."—*Evangelist.*

"We can speak of their merits from personal knowledge."—*Christian Intelligencer.*

"Waters' Pianos and Melodeons challenge comparison with the finest made anywhere."—*Home Journal.*

$225,--NEW 7 OCTAVE PIANOS

Of different makers, for $225 do., with carved legs, $240, Second-hand Pianos and Melodeons at $40, $50, $60, $75, $100, $115, $125, $150, and $160.

THE HORACE WATERS MELODEONS AND HARMONIUMS.

THE DAY SCHOOL BELL.

40,000 copies issued. A new Singing Book for Schools and Seminaries, called the Day-School Bell, is now ready. It contains about 200 choice songs, rounds, duets, trios, quartetts, and choruses, many of them written expressly for this work, besides 32 pages of the Elements of Music, which are easy and progressive.

Among the large number of beautiful pieces may be found, "Uncle Sam's School," "Don't you hear the children coming," "Always look on the sunny side," "The little lass," and "Little Lad," "Oh, if I were a little bird," "Bird of beauty," "Pretty pair tree," "Anvil Chorus," "Meet me by the running brook," etc. It is compiled by Horace Waters, author of "Sabbath School Bell," Nos. 1 and 2, which have had the enormous sales of 825,000 copies. Prices—paper covers, 25 cents, $20 per 100; bound 30 cents, $25 per 100; cloth bound, embossed gilt, 40 cents, $35 per 100. 25 copies furnished at the 100 price. Mailed at the retail price.

SABBATH SCHOOL BELL, NO. 1,

contains 144 pages, and nearly 200 tunes and hymns, and is the most popular S. S. Book ever issued. Among the most popular pieces are "Kind Words," "Eden Above," "Christian Hero," "Beautiful Zion," "I ought to love my Mother," "The Angels told me so," "In the Light," "Rest for the Weary," etc. Prices—paper covers, 20 cents each, $15 per 100; bound 25 cents, $20 per 100; clothbound, embossed gilt, 30 cents, $25 per 100.

SABBATH SCHOOL BELL, NO. 2,

is an entire new work of 192 pages, and nearly two hundred and twenty-five tunes and hymns. One million of these Bells have been issued and are now ringing through this and other countries. Among the many choice pieces may be found, "Shall we meet beyond the River?" "There is a Beautiful World," "Sorrow shall come again no more," "Don't you hear the Angels coming?" "Thou, God, seest me," "Sabbath Bells chime on," etc. Prices of Bell No. 2. are same as Bell No. 1. Both numbers can be obtained in one volume, price, bound copy, 40 cents, $35 per 100; cloth bound, embossed gilt, 50 cents, $45 per 100. 25 copies furnished at the 100 prices. Mailed at the retail price.

WATER'S CHORAL HARP.

A new Sunday School Book of 160 pages of beautiful hymns and tunes. It contains many gems, such as "Shall we know each other there?" "Suffer little children to come unto me," "The Beautiful Shore," "Oh, 'tis glorious." "Leave me with my mother," "He leadeth me beside still waters," etc. Price, papers covers, 20 cents; $15 per 100. Bound, 25 cents, $20 per 100. Cloth bound, embossed gilt 35 cents, $30 per 100. Mailed at the retail price. It is edited by HORACE WATERS, author of "Sunday School Bells," Nos 1 and 2, which have had the enormous sale of over 800,000 copies.

Just published by HORACE WATERS,
No. 481 Broadway, New York.

THE NEW PATRIOTIC SONG BOOK

contains 96 pages of songs, duets, and choruses, both sacred and secular, including 14 pages of prayers for sick and dying soldiers, and soldiers' Scripture Manual. It is well suited for social singing, as well as Sabbath worship. Among the many beautiful pieces may be found, "Where liberty dwells is my country," "The Christian Hero," "Three cheers for our Banner," "Come sing to me of Heaven," Columbia, the Gem of the Ocean," "Freeman's Gathering," "Columbia's King forever," "Marching Along," etc Prices—paper covers, cents, $10 per 100. Mailed at retail prices.

THE HARP OF FREEDOM

contains 32 pages of songs, duets, and choruses for Freedom. Among the choice pieces we would name, "Fair Freedom's morn," "O let my people go," "Over the mountain," "They worked me all the day," etc. Price 5 cents single, 50 cents per dozen, $3 per 100; postage 1 cent each

RUTH: A SACRED CANTATA

contains 126 pages. Words by Rev. Sidney Dyer, music by Prof. Cull. This is an excellent book for concerts for the young. Prices—paper covers, 20 cents, $15 per 100; bound 25 cents, $20 per 100.

THE REVIVAL MUSIC BOOK

contains 72 pages of tunes and hymns, designed for revival prayer, and conference meetings. Price in paper covers single copies 10 cents, $8 per 100. Mailed at the retail price

THE ATHENÆUM COLLECTION

contains 512 pages of tunes and hymns, new and old of the choicest kinds, for church, Sunday school, revival, missionary, temperance, prayer, and conference, and all kinds of sacred and social meetings. The music in this book has life and animation in it, like "Shining Shore," "Rest for the Weary," "Shall we know each other there?" "Shall we meet beyond the River?" "There is a Beautiful World," "Kind Words," "Sweet Hour of Prayer," "There is a Land of Love," "Suffer little children to come unto me," "God save the Nation," etc. Prices—single copies, bound, 65 cents, $55 per 100; cloth bound, embossed gilt, 75 cents, $65 per 100 Mailed at the retail price.

HORACE WATERS, Ag't
481 Broadway, New York,

THE UNDERSIGNED HAS ESTABLISHED SUCH a correspondence and business in Europe as to enable him to secure from the very best source—the most skilful growers—their choicest seeds grown, of which he will always be in receipt, and in endless variety, imported directly from France and England, from well known responsible houses; some of the most prominent of which named in our catalogues.

It has been the experience of our best gardeners and growers, and all others who plant seed, that seeds raised in California are not fully reliable and cannot be for a series of year, until more capital, experience and scientific knowledge shall be given to the business.

FARMERS

HAS FOR SALE

Alfalfa or Chile Clover; Hungarian Grass;
Kentucky Blue-grass; Orchard Grass;
Red-top Grass; Sainfoin Grass;
English Rye-grass, Timothy Grass;
Red Clover; White Dutch Clover
Crimson Clover, Lucerne, &c. &c. &c.

With many entire new varieties of Grass Seeds and prepared Lawn Grasses never before offered.

EVERY VARIETY OF

BEET, CABBAGE, CARROT, RADISH, TURNIP, CUCUMBER, MELONS, LETTUCE, ONIONS, TOMATO, EARLY AND LATE PEAS, BEANS, &c., &c., &c.

Eastern Correspondence.

Letters from an Old Californian at the East

New York, Jan. 3d, 1864.

NUMBER THIRTY-EIGHT.

Cheerful Prospects and Holiday Festivities.

EDITOR CALIFORNIA FARMER:

Does not this new year commence auspiciously? Sunday—the Day of Peace—begins it. At the North the Holidays have been cheerfully celebrated, and God has blessed us with prosperity even in the darkness of civil war. At the South—what wretchedness darkens the bright days of Christmas. To judge, as an Englishman would, by the premium on gold, more than 4,000 per cent. in Richmond, the end seems to be indeed at last approaching, and it is taken as an omen that the year 1865 commences with the Lord's Day. May He grant that this may be a Year of Jubilee.

New Year's day was celebrated by the New Yorkers in the usual way. Could the Knickerbockers return to life, how much surprised they would be at the magnificent style in which their descendants keep up the custom they so scrupulously observed. How they would stare at the Palaces that occupy the place of their quaint old Houses? How they would wonder at the splendor of the equipages that roll from street to street with the diamond-adorned men who only resemble them in name, and whose formal calls they could not enjoy. The Rip Van Winkles would gladly go back to their gable-end warehouses, and would not exchange their pipes and kroby kooks for all the magnificent "tables" that New York matrons now spend fortunes in spreading.

I am glad to say that New York appeared to advantage this New Year's day. The drunkenness and rowdyism, which I commented on so severely last year, did not spoil my pleasure this time, and strange to say I did not use the nickels I had filled my pockets with, because I did not meet a single child of poverty.

I was about to describe the great Sleighing Carnival when I happened, accidentally, to see the following letter, in the Herald of this city, which is so happily descriptive that I give it entire, knowing that it will please your Napa readers, in particular:

An Afternoon Among the Trotters.

"Hurra for the road," said my friend Lew, an old "road man," as he entered my office about two, one fine afternoon last week. "The sleighing is excellent and we shall have a chance to see the sports and trotters." "Hurry up," he continued, "for its going to be one of those rare afternoons for sleighing that us New Yorkers don't have too many of." "All right," said I, donning my overcoat; and a few moments more found me in the streets on my way up town. Entering the horse-car, a ride of half an hour brought us to the upper part of the city and my friend's stable, where his cheery cry of "Hitch up" was quickly responded to by the "boys," and his fine and well-known pair of clipped roadsters were brought from their stalls already harnessed, in anticipation of his coming, and quickly attached to a Portland.

Ensconcing ourselves cosily among the robes, the horses were put in motion, and we were soon in the avenue on our way to the Park. Looking around, we found we were not the only ones who intended having a sleigh ride. The avenue was alive with single sleighs, double sleighs, and every description of sleigh, from the graceful "new styled" Portland" to the clumsy old "Albany."

Now is the time to look out for style. Here is Jerome, with his dashing four-in-hand; Hoffman, with his grays and bays; Belmont, with his large coach team; Platt, with his rangy, well-bred bays; and a host of tandems, spikes and single teams, with their liveried coachmen and John Thomases. They shine—horses, harnesses, coachmen and all—within an inch of their lives. How many hours of careful rubbing and scrubbing it has taken to bring forth such polished patent leather, trappings and gilt ornaments!

Only see the happy faces of the ladies, young and old, who peep forth from the snowy robes. They enjoy a sleigh ride, I'll warrant you.

Here we are at the Park, and the sleigh glides smoothly over the snowy path, while the air resounds with the hundreds of tinkling bells, with their lively sound adding greatly to the exhiliarating scene. The horses quicken their gait, feeling the bit, and we recognize tens and twenties of teams jogging on their way to the road that we have so often speeded with. Everything looks lively. The Park, clothed in its winter garment, lays spread out before us, and we gaze upon it with feelings of pleasure and pride, and bless the man or men who invented it. It is, in reality, "a big thing." As we pass the skating pond what a crowd of skaters blacken the frozen bosom. Hither and thither they gracefully glide along. The refreshment saloons are doing a good business, we should judge, from the crowds who are constantly passing in and out of their doors. This, too, is a lively winter scene, and one well worthy of being transferred to canvas. The gray clad police give the military salute as they recognize my friend's well-known face, and we proceed at a quiet trot past the reservoir, down the hill, and by the soldier's hospital, whose occupants gaze out to see the crowd as they drive past.

And now Luff's is reached, and Ned himself, looming up like a sun-flower in full bloom, comes out to greet us and inquire after the health of biped and quadruped. A moment's stop and a hot apple toddy, and away we go again, jogging by the Deacon's Point House, but not for long. Do you hear that quick tingle of the bells? We look round and find it is Lucknow and mate coming for us with a rush. Our team prick up their ears, and Lew quietly lets them out. We are soon brushing on the lane a "fifty" gait; but, although the sleighing is excellent, neither team are yet used to snow work, and need more of it to make them steady. Occasionally one or the other of the teams are up, and it needs a steady hand to bring them again to their work. The air is rushing past us; we knock down our caps to prevent their being blown off; all four are putting their feet down to some purpose as we pass the Club House. We are nearly neck and neck—both drivers packing on a little "braid," which the well-trained animals understand. It is a fine "brush," both teams so equally matched, that, with scarcely a change of position, we find ourselves at the "Dam" and drive under the shed. It is filled with trotters, warmly wrapped up in their thick road blankets from ears to heels to prevent the precious ones from taking cold. Let a New York roadman alone for taking care of his horses—the Arabs are nowhere.

Let us take a look at the sleighs. What a variety; all colors, styles and shapes. Here is one that, after a careful examination of all, we like the best. It is Portland style, sets up well, is wide and long on the runners; has a good dashboard, and then the shafts are so that you can hitch a horse up as close to it as you could to a wagon, making it easier to handle, and looking more neat and horsemanlike than those whose shafts are attached to the sleigh about a foot above the ground, and to which one has to let out the last hole in the traces, putting the horse a long distance from the sleigh to prevent his striking the cross bar with his heels if he should break.

A little talk with a host of friends, a quiet drink of something hot, and the team is brought out, and we drive down towards the Club House.

As we rise Breakneck hill we see Bonner with his gray mare, Peerless. She is putting in some "30" strokes, which she does as easily as some horses walk. Her owner's good natured face shows the pleasure he takes in driving a piece of horseflesh whose equal is not to be found, and whose name indicates very truthfully her merits, which are indeed peerless.

We reach the Club House, drive into a warm nook under the shed, blankets are again produced and horses well covered. Now let us take a look. The road is well filled with any quantity of style and speed, the style looking at the speed a good deal more than the speed looks at the style, for this part of the road is where the trotting is done. All try to show well going past the Club House. The steps of the hotel are crowded with gentlemen, who are looking out upon the lively scene from a good stand-point, as the road can be seen for a long distance, both up and down from the front of the house. The trotting one sees here is better than any track race, as it is all honest, and the best horse generally wins. What teams are these just hearing in sight? Now they cut loose. First in position comes Shirley, with his roan and Winthrop Maid. Making for him is Patterson, with his sweet-gaited brown mares. Dennison with his sorrels, is closing on them at a lively rate. Up the road they go with nostrils dilated, eyes flashing and tails up. Here comes another crowd, all trotting well and steady. Commodore Vanderbilt, with his ponies; Petty, with Frank Temple; Dubois and bays; Butter Smith, with Breeze and mate; Cashman and sorrels; Richards, with his brown team, and big Steve, with his chestnuts. Which is going to beat? Onward they come, each driver handling the reins in that natty style so peculiar to the New York roadman, each horse straining every nerve to distance his competitors. It is a pretty sight! Here's "poetry of motion" for you! Such square, even strides and swinging gait. They go by in a crowd, and their railroad pace soon takes them far up the road. Here is Briggs, with Gray Harry and running mate; they are making good time. How they do cut loose! We turn sharply around upon hearing a familiar "Take care!" and see Dan Mace, with Vanderbilt, who is having a set-to with Dan Sanford's bay, Columbus. Both horses are showing a forty gate. Here also is De Forest, with the Blanchard colt; Lew Martin, with Boston Boy; L. F., with Sky Rocket; Hovey, with sorrel Ned; Crary, with his new team; Ben Mace, with the Countryman (brother to Vanderbilt); Ferris, with his sorrels; John P. Son, with the roan mare; Miner, with his big roan pacer, and a host of others. Shades of George M. Patchen, how they can speed!

Now let us take a look into Vandwater's barroom. We find it filled with roadmen, who are warming up for their drives home and regaling themselves with a few drops of something hot. Everything is quiet and orderly all seeming to be people who meet frequently. Ask a question about any noted trotter, who has lived any time within forty years, and some one in that room can answer it, I'll warrant you. It is a pleasure to hear some of the "old hands" spin yarns about animals whose names will live in horse history forevermore.

We go out on the piazza again, just in time to see Frank Baker, with that world-renowned Ethan Allen coming up the road at a lightning pace, closely pursued by a large gray horse, who is a new comer, and is making it rather hot for little Ethan, who, after brushing sharply, leaves his feet; but he loses nothing by his break, and the gray has to foot it merrily to keep with him. The gray carries two men, Ethan one; so the stallion has the highest hitch; and, after passing us, up goes the gray, and the stallion has the best of it. It might have been otherwise had they been weighed alike.

It's getting late, so our team is brought out, and in company with Turnbull and sorrel; Gillies, with his bay colt and mate; Farren and sorrels; Dr. Baker and Alley colt, and Leadbetter and Billy Carr, with their sorrels, we proceed down the road at a staving gait. Just before us we see Cloudman, Kitty Wick and Baby well. Duan Walton, who is driving Kitty, must play it fine to catch Cloudman napping.

Our rate of speed soon carries us to the Park, where a seven mile an hour jog gives the horses breathing time, and their owners a chance to discuss the incidents that have transpired on the road during the afternoon. Darkness is closing round us; the stable is soon reached; horses unhitched, warmly clothed, and a boy set to work upon each leg. Lighting a cigar, we stroll homeward, musing contentedly upon the exciting scenes we have witnessed during our afternoon among the trotters.—"*One who knows a horse from a handsaw.*"

Death of Edward Everett.

The death of Edward Everett created a profound sensation here. I was in Dr. Chapin's church when the eloquent Pastor announced the sad event, at the same time paying a most eloquent tribute to the departed patriot, statesman and orator.

Musical and Art Journal.

A new Musical and Art Journal has recently appeared, which I heartily recommend to your readers. It is edited by two of the most talented Musical and Art critics in New York. It is called "The New York Weekly Review," and is published at No. 7, Mercer street. Terms—$4 per year. I am thus particular, because I am often asked to name the best musical paper.

Miscellaneous Items.

The building of the New York Academy of Design, which is nearly finished, is generally regarded as a lamentable failure. It is one of the costliest edifices in New York, but instead of being an ornament is simply a curiosity.

Hayes' picture of our Army of the Potomac is attracting much attention. I shall refer to it hereafter.

There is quite a lively opposition between the Panama and Nicaragua routes, which I hope will benefit California. From my own experience I can recommend the Nicaragua route. The old line of steamers via Panama is well established and we ought by all means to encourage the new line, for it is certain that opposition will greatly benefit the traveling public. You need, and I am astonished that California has not, o're this, appointed an energetic well informed and competent Emigrant Agent. M. A. S.

Wanted a Farm Manager.

A PRACTICAL MAN, THOROUGHLY INFORMED in farming in a dry climate on a light loam on a porous subsoil. A Scotchman with a Californian or Australian experience preferred. Experience in a dry climate is absolutely necessary. Address, "Farmer," Lock Box 943, San Francisco P. O., giving particulars of past experience. 12

EDUCATIONAL.

PACIFIC
National Business College,
SAN FRANCISCO, CAL.

Practical, useful Education for Young Men, Boys, and Men of Middle Age.

A BUSINESS EDUCATION FOR A BUSINESS MAN—THE RIGHT KIND OF AN EDUCATION FOR YOUNG MEN.—THIS IS THE BEST PLACE FOR MERCANTILE BUSINESS IN THE WORLD.

IMPORTANT TO THOSE WHO CAN DEVOTE A FEW WEEKS OR MONTHS TO STUDY, AND TO PARENTS WHO HAVE SONS TO EDUCATE.

THE BEST COURSE OF STUDY AND THE GREATEST AMOUNT OF PRACTICAL AND USEFUL INFORMATION ACQUIRED IN THE SHORTEST POSSIBLE TIME AND AT THE LEAST EXPENSE, TO INSURE SUCCESS IN LIFE.

"*Acquire a Good Commercial Education, and you will as surely succeed in Life as that cause produces effect.*"—Abbott Lawrence.

A MODEL COMMERCIAL COLLEGE.

THIS NOTICE IS INTENDED TO GIVE FULL INFORmation of the course of Study and operation of the Pacific National Business School, San Francisco,

We respectfully solicit from Young Men and Men of Middle Age, who would succeed in business, and Parents and Guardians who have Boys to educate, an examination of our system of Practical, Useful Education, the superiority it possesses over every other institution of learning on this coast.

This School claims superiority and great merit over other institutions professing to teach the Commercial branches, by its system of combining THEORY AND PRACTICE, on the London Corn Exchange principle, it being done in no other School on this coast.

COURSE OF STUDY.

The plan adopted in teaching combines PRACTICE with THEORY; instead of being confined to Text Books, the pupils are exercised in making original entries of every-day business transactions; journalizing, posting, balancing accounts, opening and closing a great variety of different sets of Books, both for individual and partnership business, where the business has been prosperous or adverse, thus qualifying the student for entering into the practical duties of the accountant in any kind of business.

THE COURSE OF INSTRUCTION

Consists of Double-Entry Book-keeping, embracing Wholesale, Retail, Commission, Manufacturing, Banking, Steamboating, Railroading, Individual, Partnership, Joint Stock, Compound, Company, Mining, Ranching, Farming, etc. In the routine of practical instruction the pupil becomes familiarized with changing books from single to double entry, changing stock books to partnership, and every form and principle known in well regulated establishments.

PENMANSHIP.

The beautiful and easy system of specimen Penmanship is taught in this College, and the only place where it is taught on this coast.

CORRESPONDENCE

Is carefully explained, and rules and principles are laid down, the observance of which will lead to the highest attainment in this art.

It is known to all that there is a great deficiency existing in this commercial branch.

BUSINESS ARITHMETIC.

This is a branch of the greatest importance, and you can be assured will not be neglected.

LECTURES

Are given to the students on Commercial Law, Nature and Causes of Wealth, Political Economy, Advertising, and general topics relating to success in business.

DIPLOMAS.

Those completing the course and passing a satisfactory examination before the Examining Committee, will receive Diplomas of the Institution.

THERE WILL BE NO VACATIONS.

Each pupil receives individual instruction, and persons can therefore enter at any time.

TERMS.

Scholarships are issued which give the scholar the privilege of reviewing the course at any future time, free of charge, for SIXTY DOLLARS, with a deduction of FIVE DOLLARS when two enter from the same family or the same place at the same time. When four enter at the same time from the same place, TEN DOLLARS will be deducted from each scholarship.

THE TIME REQUIRED

To complete the course depends somewhat upon the previous education and ability of the student, usually from ten to sixteen weeks, scholarships granting the holders the privilege of completing the course regardless of time.

A common school education is all that is necessary to enter the course of this College advantageously.

For further particulars, call at the College, 747 Market street, or address

M. K. LAUDENSLAGER,
President Pacific National Business College.

Santa Clara College.

THE FOURTEENTH ANNUAL SESSION OF THIS INstitution will commence on MONDAY, August 29th. The plan of instruction embraces two regular courses—the Classical and the Commercial, besides a preparatory Department

Sacramento Seminary,
Boarding School for Young Ladies.

Tenth street, between F and G, SACRAMENTO.

The next Session commenced

January 2d, 1865.

For Circulars containing particulars, address

23 MR. or MRS. HARMON PERRY.

FRENCH COLLEGE,

Corner Mason and Jackson Streets,

Principal.....Prof. J. MIHIELLE.

THE CLASSES OF THIS ESTABLISHMENT ARE opened since the 21 inst., and the select and attending scholars receive a solid instruction proportionate to their age and mental facilities.

The programme includes all the branches of tuition fitted for children from 6 to 12 years of age, as the first step for a higher teaching.

The English, French and Spanish Languages are taught practically and theoretically, by competent and special teachers.

Boarders can be accommodated in the establishment, where they will find the comforts and care of a home.

An evening class of French and Spanish is also open for young men every other day, at 7 o'clock, P. M. Call on the Principal from 9 A. M. to 12 M. 1

EDUCATIONAL.

NAPA
COLLEGIATE INSTITUTE.

For Young Ladies and Gentlemen.

NAPA CITY, CALIFORNIA.

NAPA CITY, IN POINT OF LOCATION AND Climate, is unsurpassed in the State. It is about four hours' ride by steamboat from San Francisco, and three by stage from Benicia. There will soon be a daily boat from the former place, and there are now two daily stages from the latter. There are extensive accommodations for Boarders in the College Building, with large and well-ventilated sleeping apartments. Teachers reside in the Building, and will have a constant oversight of the Students who are Boaders.

GOVERNMENT.

Young Ladies will receive no calls from any except Parents and Guardians. Ladies and Misses will not leave the College grounds, except in company with their Instructors. Young Men and Lads are not allowed to lounge about the Stores, Hotels, and Saloons of the village. All pupils are required to attend Church on the Sabbath. Parents will choose the place of worship for their children.

MILITARY DEPARTMENT.

This Department has been opened with a view to the permanent establishment of a Military Academy on this Coast. From three to four years will be requisite to complete the course in this Department. The State has furnished us the necessary equipments for such a school. The Drills will be attended to daily.

TUITION.

Spelling and Reading, per month	$2 50
Common English, with the above, per month	4 00
Higher English, with the above, per month	6 00
Latin and Greek, with the above, per month	8 00
Janitor's Fees, per month	25

EXTRAS.

Modern Languages, each, per month	$2 00
Music, with Piano, per month	8 00
Embroidery, per month	3 00
Painting in Oil and Water Colors, per month	4 00
Board with Furnished Rooms, per week	5 00
Board with Furnished Rooms, Light, Fuel, and Washing, per week	6 50
Military Branches, per month	3 00
Sword Exercises, twelve lessons	8 00

CALENDER.

The Collegiate year is divided into two Sessions of 21 weeks each. The first Session will begin July 25 and end December 16. The second Session will begin January 2 and end May 23. The Winter vacation will be two, and the Summer vacation eight weeks long.

☞ All articles of clothing should be plainly marked. Pupils will furnish their own Sheets, Pillow-cases, Towels, Napkins, and Lamps.

☞ Payments, half-yearly in advance. Pupils can enter at any time, and be charged from the time of entering. No deduction will be made for absence, except in cases of protracted illness. The month consists of four weeks each.

For further particulars address

W. S. Turner, A. M.,
Principal.

21-11

St. Ignatius College.

(INCORPORATED APRIL 30th, 1859.)

The Fifth Annual Session of this Institution will Commence on August 22d.

THE DESIGN of the Institution is to give a thorough English, Classical, Mathematical, and Philosophical Education.

The Course of Studies Embraces

THE GREEK, LATIN, AND ENGLISH LANGUAGES,

POETRY, RHETORIC,
ELOCUTION, HISTORY,
GEOGRAPHY, ARITHMETIC,
BOOK-KEEPING, MATHEMATICS.

Mental, Moral, and Natural Philosophy.

The study of MODERN LANGUAGES is optional. Besides the Classical there is a preparatory Department for the Younger Students.

TERMS PER MONTH.

Tuition in the Grammar Dep't. . .	$5 00
" " Higher Dep't. . .	8 00
" Preparatory Dep't. . .	3 00

No1.

Academy of Notre Dame,
SAN JOSE, CAL.

THE FOURTEENTH ANNUAL SESSION of this Institution will commence on TUESDAY, AUGUST 24th. The course of instruction embraces all the branches of a polite and useful education. Its aim is to form young ladies to virtue, accustom them to early habits of order and economy, and to cultivate in them those qualities which render virtue both amiable and attractive.

TERMS:

Entrance, to be paid but once,	$15
Board and Tuition, per session,	$250
Washing, per session,	$50
Physician's Fees (unless it be preferred to pay the bill in case of sickness) per session,	$10

Piano, Vocal Music, Drawing, and Painting,

Form extra Charges, but there is no extra charge for the

French, Spanish, or German Language;

nor for Plain Sewing and Fancy Needle-Work.

PAYMENTS are required to be made half a Session in advance. Pupils will find it much to their advantage to be present at the opening of the Session. 2

Saint Catherine's Academy,

BENICIA, CALIFORNIA.

THE SCHOLASTIC YEAR OF THE SAINT CATHERINE'S ACADEMY, Benicia, commences the

Last Monday in August.

Terms, per annum, $230—payable, semi-annually in advance.

Music, Painting, and Drawing form Extra Charges; also, Books, Stationery, and Physician's Fees.

No deduction will be made to any pupil leaving the Academy before the expiration of the term—cases of sickness excepted.

Foreign Languages, Plain and Fancy Needle-work, form no Extra Charge.

For further particulars refer to the Superioress of the Academy. 4

S. D. & H. W. SMITH'S
American Organs.

SIBERIA OTT, Wholesale Agent,

748 Broadway, New York City.

THE

MOST PERFECT AND BEAUTIFUL

Musical Instrument

IN THE WORLD

FOR THE

American Home Circle.

WITH THE MOST PERFECT CONFIDENCE, we call the attention of the public to the AMERICAN ORGAN, as an instrument long desired in the Family Circle, and with our patent improvements is adapted to all kinds of Music, more especially to Sacred Music, with its sustained tones and harmonies, so much desired and sought for in American homes.

The AMERICAN ORGANS are superior to all other instruments of the kind, in many important particulars.

They are superior in their greater fullness and completeness of tone, volume and power. They are superior in expression, quickness of action, and elasticity of touch, rendering them perfect in rapid movements.

They are superior in quality and beauty of tone, and when controlled by the DOUBLE BELLOWS and BLOW PEDALS, Knee Swell, etc, the most charming effects can be produced, from the softest whisper of the Æolian harp to the full volume and power of the church Organ, thus enabling the performer to give expressions not to be found in any other instruments.

The TREMOLO stop has a pleasing and beautiful variety sympathetic in quality, appealing to the tender emotions of the soul, producing effects the most charming and soothing. It is universally admired and appreciated. The KNEE SWELL gives the performer full control of the tone, enabling him to graduate from the *Pianissimo* to the *Fortissimo* at pleasure, and combines the effect of the Expression Stop of the French Organ in the AMERICAN ORGAN, more perfectly and easily managed.

With all these combinations and improvements of Double Bellows, Pedals and Swell, the AMERICAN ORGAN excels in Expression, Variety, and Power, and has all the quality and capacity of a full Orchestra, and in the hands of a master is capable of the most complete orchestral effects.

The AMERICAN ORGANS are superior in Mechanical finish of the action and interior portions of the Musical parts. The valves are of material expressly prepared to avoid all sticking, cracking, or decomposition, are thus durable and will be always in order.

The Keys, Reeds, etc, are perfect in their finish, and this gives the quickness and sprightliness of tone, brilliancy, etc, equal in every respect to the "percussion stop" of the French Organs, but not like them in danger of getting out of order.

The AMERICAN ORGANS are by far the most beautiful in exterior finish, forming a handsome piece of furniture for the Parlor, Boudoir, or Sitting Room, occupying but little space, and perfect and complete in every particular.

THE

AMERICAN ORGAN

Makes Home Attractive; and Refines and Elevates the Minds of All.

Beautiful in its Appearance and Effects.

The AMERICAN ORGANS are finished in Rich Rosewood Cases, varnished and polished, forming an elegant piece of Furniture. Also, in Black Walnut Cases, and in Oak, finished in oil, and especially adapted for Churches, Lecture and Lodge Rooms.

They take but little room, are only 35 inches high, and from 34 to 47 inches wide. *They cost but a trifle more than Melodeons*, and yet possess many times their advantages in musical capabilities.

WHOLESALE and RETAIL at very Lowest Prices, with full arrangements to give Dealers Exclusive Territory. Send for illustrated Price Circular.

The California Farmer.

SAN FRANCISCO:

FRIDAY.....FEBRUARY 24, 1865

THE CALIFORNIA FARMER READING-ROOM AND MUSEUM OF NATURAL HISTORY.
20 Clay street—Marble Building—Up Stairs.

The Farmer's Headquarters.

The Editorial Rooms and Museum of the FARMER OFFICE are always open, and an attendant ready to make a visit instructive to those who take an interest in the productions of our State. Samples of all productions: grains, grasses, fruits, models, inventions, minerals, and specimens in Natural History innumerable, are constantly being added.

Farmer's Reading-room.

Farmers and Mechanics, from the country, who visit San Francisco, should visit the Free Reading-room and Museum, at the FARMER OFFICE. Members of the Press, and Strangers, are particularly invited to avail themselves of these rooms. Newspapers from every State to which we have access by mails, as well as Foreign Newspapers, Periodicals, and Magazines, are upon file and on the tables for use; a Good Library of hundreds of volumes, with works illustrative of Agriculture, Horticulture, and Floriculture, works for reference upon all Sciences, with a Cabinet of Minerals, Coins, and Curiosities of interest to the Naturalist, to which we invite all.

Immigration Office.

New comers to California can always obtain all needed information about Lands, Farms, etc, at the Farmer's Reading room, 320 Clay street. Most cheerfully we bid all welcome to our Sanctum.

TO AGRICULTURAL SOCIETIES ABROAD
Exchange of Seeds, Books, Etc.

HAVING established large and spacious Reading Rooms, in this city, which contain Libraries, Cabinets, and hundreds of Newspapers, all free to those who wish to enjoy the benefits thereof, we now ask cooperation from all Agricultural Associations in the Old States and Europe, for the *Exchange of Seeds, Specimens, Books, Etc.* We shall be happy to reciprocate any and all favors, and comply with any direction made to us connected with such an enterprise.

Purchasing Agency.

Having had the experience of over thirty years in dealing in Trees, Plants, Seeds, and Agricultural Implements, we feel that we are fully competent by our experience in purchasing such articles to make a saving of from five to fifteen per cent for the great mass of purchasers. We will therefore offer to make purchases for all who wish our services, of any of those articles named, or for any articles of merchandise for our Farmers or Ranchmen, and ship the same as they shall direct.

In order that we may do their business in the most satisfactory way for them and ourselves, we shall wish that all who send orders should be as explicit as possible as to their wants—describing as minutely as they can; and, where they desire our judgment, we will do our best to suit them.

Our charge will be Five per cent, together with the cost of packing, freight, drayage, etc. Orders should inclose satisfactory references or the Cash; or bills could be sent by Express, to be collected on delivery.

We shall be happy to attend to the purchase and shipment of Trees, Seeds, Plants, etc., as this is our especial "hobby," and we know we can satisfy all that send us their business attend to.

☞ THOSE who receive a number of the FARMER with this paragraph marked, may understand that it is sent to them for their examination, hoping it will meet their approval and induce them to subscribe, and ask their neighbors to do so.

Postmasters and others, who may receive the paper, will oblige us by soliciting subscriptions, or putting it in the hands of those that will. Subscriptions may commence at any time.

Send for Sample Papers and get up a club. Address

PUBLISHER CALIFORNIA FARMER, San Francisco.

TERMS OF ADVERTISING.

THE charge for Advertising in the CALIFORNIA FARMER (payable in advance), is **One Dollar** for five lines, or less of space, in nonpareil type, for one insertion, and ten cents a line for any larger space. Each subsequent insertion half these rates. This it is believed affords the cheapest and best medium of reaching the Agricultural community on this coast. As heretofore, the right is reserved to reject any advertisements deemed objectionable.

TO READERS AND CORRESPONDENTS.

Our readers will welcome again the letter of our ever welcome N. Y. correspondent, "M. A. S.," whose letters were delayed by the mails.

We have again to acknowledge from the Hon. Isaac Newton of the Department of Agriculture at Washington, the Report of that department, complete and bound, for the year 1863, and now on hand. This issue is truly a valuable one, and highly creditable to the Department of Agriculture.

We ask attention, specially, to the articles on Agricultural Colleges, in our Agricultural Department.

In the Home Department, we ask a careful reading of a most excellent and truthful Sketch from our esteemed correspondent, M. J. U. Its excellence consists in its truth, and it is alas! too true, and pity 'tis, 'tis true.

Our Poet's Corner has original matter of merit, that will be appreciated, from our valued correspondent, "Agnes," and a new contributor, "‡," from whom we hope often to hear.

ARTICLES RECEIVED AT THE CALIFORNIA FARMER EXHIBITION ROOMS, No. 320 Clay Street.

We acknowledge the receipt of a copy of the "System of American Slavery," as sanctioned by Scriptures, from an esteemed friend in Sonoma county. From this work we shall make extracts.

We are indebted to J. H. Swain, Esq., of Roxbury, Mass., for a number of copies of the old Boston Statesman, a newspaper bearing date of 1831.

Notes on Northern California and Oregon.

We present with this number a sketch of travel through Northern California and Oregon, by "Lisle Lester," editress of the Pacific Monthly. These sketches of places and things will be continued, and will be found full of deep interest to all who value the history of our State and its glorious scenery, and also the rich State of Oregon.

We know our readers will find these sketches attractive, and it is not necessary we should say more than to announce them and the author, to secure attention to them, for whoever shall commence the series, will want to continue them.

TO POSTMASTERS.—The United States Mail, the official paper of the Postoffice Department, says that "Postmasters are obliged to receive all Treasury notes for stamps and postages, if clearly genuine, no matter how torn or defaced they may be, provided one-twentieth part thereof be not missing—and fractional currency, if not one-tenth part be missing. Such notes and currency received as are unfit for re-issue should be kept separate and distinct, and returned as occasion requires to the Treasurer of the United States, Washington, in sums of not less than three dollars, to be exchanged for new.

Steamship Line for China—San Francisco Bay.

Progress is the order of the day. Congress has passed the bill establishing a Mail Steamship Line to China. This will at once awaken a new interest for the Eastern World, and cause the people of our State to see that they occupy a position on the map of the world not surpassed by any other people on the earth for great opportunities.

San Francisco Bay is destined to be as famous in the future for the number of national flags that shall be seen upon the shipping in her waters, as is the river Thames—for San Francisco will ere long become the great central harbor where shall ride the stately ships of every nation. They shall come to unload their rich cargoes, and to fill our warehouses with the rich and costly Silks, Satins, Shawls, Spices, etc., from all the countries East, and then after supplying the wants of our own people, shall be speedily sent over the double track Pacific Railroad to New York, and thence to London, for in coming years San Francisco Bay and the Pacific Railroad will form the safest and most speedy route to forward the wealth of the Indies and the equal wealth of our own rich State, and our harbor will in future years, not far distant, become the most celebrated bay of the world. We claim not to be a prophet, but we believe in a glorious future for our city and State.

Twenty-five years will not pass away before San Francisco will rival New York in wealth and business, and no city in the Union exceed her in her commercial enterprises.

When the calendar of 1875 shall be enrolled, San Francisco Bay will be the great entrepot of the Whale Fleet of the entire Pacific Coast, and our harbor will be studded with splendid Steamships, plying weekly and almost daily to China and Japan and to all the ports of Europe.

We have great faith in the great and prosperous destiny of our State, and the unbounded prosperity of this metropolitan city of the Pacific.

Ere the year 1875 shall have closed its history, the Pacific railroad shall send her splendid cars, night and day, over the snowy mountains and through our rich and fertile valleys, one day enveloped in her robe of winter, the garments a mantle of snow and a diadem of sparkling icicles, the next they shall be wreathed in a robe of fragrant flowers; Autumn, Winter, Spring and Summer shall mark the atmosphere and the toiling, laborer's track, as they course from the Empire State to our Golden shores; then to the verdant shore across the Bay of a then large city, we shall greet Oakland, through which the chariots will come with their flaming steeds, down to their water front where lie the ships and steamers from every port in the world.

"Goat Island," a land mark of yore, then will be known no more; its peak and its whole material will have been swept down to make the highway for these chariots of fire, and upon the rocky foundations of Goat Island will then be seen the Warehouses, Depots and Business Houses prepared for a World's commerce, this is the future, and the future will reveal it. To the reasoning and thinking mind, the position of Goat Island will appear providentially placed there for these years of progress—no other spot in our harbor contains water deep enough or space large enough for shipping that in 1875 will float in our waters.

What we have now pictured we believe will prove a reality; 1865 opens with the signs of this coming prosperity, and 1875 will realize it.

Telegraphic News.

The news that comes speeding over the wires now, must fill the heart of every true lover of his country with joy. Like the thrill of the electricity to the battery, so the blood comes to every heart, and with it an assurance that ere long the great bloody cloud that has hung over our fair land will pass away, and a cry of joy shall fly across the wires that shall be—

"Peace on earth, good will to man."

There has been a strange and yet a true Providential voice in all the past—the four years of blood and carnage is to be for the purifying the earth.

Lamartine truly says—"Revolutions are necessary." And so it seems they were for our country, in order to reveal her great strength and vast resources.

The late telegraphic news is most startling. Savannah was a Christmas gift to the President, and Charleston and Wilmington comes as the Celebration gift to the memory of the Father of his Country, and soon, over all the principal cities of the rebellious country, the Stars and Stripes shall again wave, and the long-expected day of Peace, will come.

Peace and prosperity can only come to our devoted country by the same terms that it was given to the "Prodigal son."

The rebel States have indeed sinned against Heaven, and they must feel it is so, and repent; and only by repentance and submission can they ever again come into the family of States.

Sacred History is full of great truths applicable to the present rebellion, and it is wonderful to read the prophesies of Isaiah and Jeremiah, and see how truly they are applicable to the present time. The Bible is full of texts most applicable.

"They cry Peace, Peace, and yet there is no Peace."

"I came not to bring Peace on earth, but a Sword."

Jeremiah 6: 14, and 8: 15 contains striking prophesies worth noting. The fall of the doomed city may be likened to the fall of Charleston. "There shall not be one stone left upon another that shall not be thrown down"—such seems to be the fate of that ill-starred city.

Who can read the future of the Sunny South? In our next we intend to give a record of those cities that have been the hot-bed of rebellion, and some sketch of their fall, for the end is near, and the hearts of the hopeful are cheered, for the tempest and ruin of the present is but the promise of bright days for the future.

Fort Sumter Redeemed.

Our Glorious Flag now waves on Fort Sumter, and to-morrow, at 12 o'clock, a National salute will be fired from all our Forts and National stand-points in our State. God be praised!

Let the thundering cannon roar,
The Stars and Stripes they float once more,
On Sumter's shattered walls.
T'was here, bright flag, thy wrong first came,
Thou art avenged, by war's red flame,
For here base treason falls.
This was foul treason's place of birth—
Now sweep the curse from off the Earth,
Come raise the Glorious Flag on high,
Let its bright folds salute the sky,
And let our loudest cannon roar,
With echoing peals from shore to shore.
Let every patriot's heart rejoice,
To hear the pealing cannon's voice;
'Tis a fit requiem to treason's knell,
On treason's birth-place, let it tell,
The deed is done, the battle's o'er,
Sumter's redeemed! Let cannon roar!

The Pacific Railroad.

This great work is of so much importance to the public interest that we feel it a duty to give as much information of its progress as possible. We therefore give some extracts from a pamphlet sent us, being a statement made to the Senate Committee of the Nevada Legislature, from whom it is expected aid will be given to the work to a liberal amount:

FUTURE PROSPECTS.

From this plain statement, it will be seen that this Company it now in a position to prosecute the work vigorously from this time onward until it is fully completed, for as the road is extended every 20 miles the national aid becomes available, both in bonds and land. The policy of the Directors has been, and probably will continue to be, not to proceed rashly, or to incur obligations that cannot be promptly met. A contrary course would soon lead to financial embarrassment, and endanger the completion of the work. Feeling confident in the future, hand-bills have been issued calling for a large force of laborers, a copy of which is sent with this. With this increased number of workmen, the work will be pushed forward vigorously during the season.

We feel confident that the road will be completed twelve miles further, to Clipper Gap, by May next, and to Illinoistown, fifty-four miles from Sacramento, by September next. We expect to reach Dutch Flat, which is sixty-eight miles, in time for the Spring business of 1866, and the Yuba bottoms, near Crystal Lake, by the Fall of 1866. We have no doubt of being able to complete the road to the State line within the time fixed by the Act of Congress. How much sooner than that, depends upon the price of gold and the condition of financial affairs in the Atlantic States, matters which cannot be foretold. Of one thing the people of Nevada may rest assured: that this Company will do all that can be done, by the judicious use of the means at their disposal, to complete the railroad to and through Nevada at the earliest possible moment. For this the *interest* of the Company is a sure guarantee.

We ask no financial aid from Nevada at this time; but our good faith and zeal in carrying forward the great work so important to her people, entitles us at least to words of encouragement from her Legislature. We trust her representatives will see that this Company, in the selection of the most direct and available route over the mountains, and in the industry with which national, State, county, and individual aid and capital has been concentrated upon the work, and the progress and preparation of material already made affords the only reliable hope for the speedy construction of any railroad over the mountains. It is idle to talk of constructing two railroads over the mountains at the present time. It cannot be done; and all agitation of the matter tends to hinder the work on the only road that has or can secure national aid. It is certain that Congress will never assist in building a road to rival or compete with one in which so large an amount of national funds will be invested.

WORK DONE.

We add the following statement of the amount of work done and railroad material purchased by the Company up to Jan. 1, 1865:

Earth and cement excavation, cubic yards	602,598
Excavation requiring blasting, cubic yards	195,578
Stone masonry, cubic yards	3,230
Cobble and granite around bridge piers, cubic yards	825
Number of brick in the work	280,582
Timber in structures, feet B. M.	1,233,800
Lumber in structures, feet B. M.	130,000
Number of redwood ties	116,000
Tuns of iron	8,000
Locomotives	8
Cars	146

ESTIMATES OF COST.

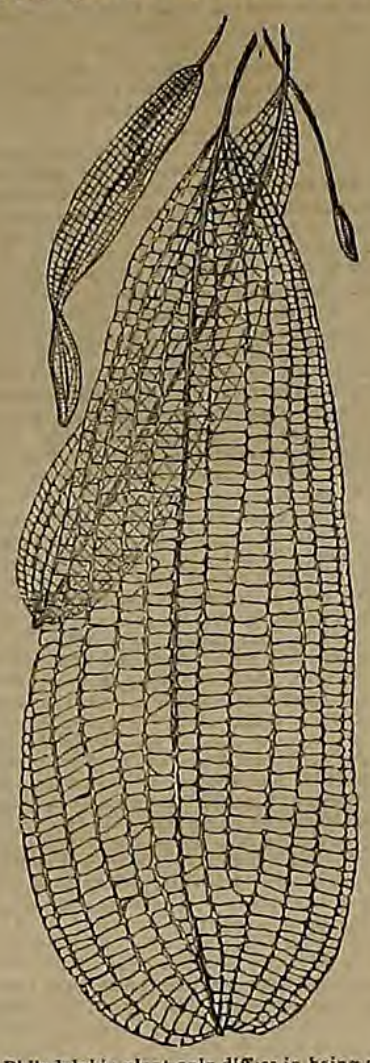
The estimated cost of grading, masonry, bridging, trestling, depot buildings, and water stations, from Newcastle to Clipper Gap, a distance of 12 miles, is $574,852. The estimated cost of the same work from Clipper Gap to the end of the first division of 50 miles, near Illinoistown, is $584,451. The estimated cost of the same work from the end of the 50 miles to Dutch Flat, a distance of 18 miles, is $2,169,277. The estimated cost of the Railroad from Dutch Flat to the State line is $6,065,000, and from the State line to the Big Bend of the Truckee, $2,500,000, as is shown by the report of Mr. Judah.

This Company has surveyed the line to a point five miles east of the Big Bend of the Truckee river, from which point to Salt Lake, it will probably be located on the cheapest and most direct route, passing through, or as near as practicable, the intermediate mining districts, the trade of which will constitute an important part of the business of the road. Where it is impracticable to carry the main line through the important mining towns, branch roads will be constructed.

The Pacific Railroad is a subject of peculiar solicitude on the part of the American people, especially those residing in Nevada, and we have endeavored in this communication to give them a full statement of the present condition and future prospects of that portion of the work committed to the care of this Company, and in which Nevada is more directly interested. We feel assured that your citizens will extend to this great National enterprise their cordial support, and that neither they or their representatives will extend the least aid to those, who, from interested motives are exerting their utmost to delay it.

The Lace-Leaf or Lattice Plant.
(*Ouvirandra Fenistralis.*)

A specimen of this wonderful plant is now growing in Philadelphia, and in the Gardiner's Monthly we find a cut made from a drawing of one of the leaves, accompanied with a description of the plant, which we copy, and insert a cut made from a plant growing in England. The cut of



the Philadelphia plant only differs in being a single leaf, of an oval and regular form, tapering uniformly and alike at both ends. The Monthly says:

In the tank of the magnificent Victoria House of James Dundas, Esq., of Philadelphia, is growing the only specimen, perhaps, of this wonderful plant on the Continent. Most of our friends who have had the opportunity of reading Ellis' recent work on Madagascar, have had their curiosity sharpened to see or to know more of this singular effort of vegetation.

☞By permission, we have made a drawing of one of the leaves, and also append below Ellis' account of it. In the drawing the white lines represent the leaf. Mr. Pollock deserves great credit for his success in growing it.

"The *Ouvirandra* is not only a rare and curious, but a singularly beautiful plant, both in structure and color. From the several crowns of the branching root, growing often a foot or more deep in the water, a number of graceful leaves, nine or ten inches long, and two and three inches wide, spread out horizontally just beneath the surface of the water. The flower-stalks rise from the center of the leaves, and the branching or forked flower is curious; but the structure of the leaf is peculiarly so, and seems like a living fibrous skeleton, rather than an entire leaf. The longitudinal fibers extend in curved lines along its entire length, and are united by thread-like fibers or veins crossing them at right angles from side to side, at a short distance from each other. The whole leaf looks as if composed of fine tendrils, wrought after a most regular pattern, so as to resemble a piece of bright green lace or open needlework. Each leaf rises from the crown on the root, like a short, delicate-looking pale green or yellow fiber, gradually unfolding its feather-looking sides, and increasing its size as it spreads beneath the water. The leaves in their several stages of growth pass through almost every gradation of color, from a pale yellow to a dark olive green, becoming brown or even black before they finally decay; air bubbles of considerable size frequently appearing under the full-formed and healthy leaves.

"It is scarcely possible to imagine any object of the kind more attractive and beautiful than a full-grown specimen of this plant, with its dark green leaves forming the limit of a circle two or three feet in diameter, and in the transparent water within that circle presenting leaves in every stage of development, both as to color and size. Nor is it the least curious to notice that these slender and fragile structures, apparently not more substantial than the gossamer, and flexible as a feather, still possesses a tenacity and wiriness which allow the delicate leaf to be raised by the hand to the surface of the water without injury."

This was a sketch made in 1860, and having been fortunate in securing a cluster of the leaves of this wonderful plant, we revert to it again. The leaves can be seen at our Reading Room.

PRINTERS AND DOCTORS.—An eastern paper very justly comments on newspaper and medical credits: It is a notorious fact that doctors' bills and newspaper bills are the last accounts in the sum of a man's indebtedness which he thinks of paying. Whatever may be his ability to pay, no difference if the chest is filled with old rusty dollars, he thinks some indefinite time will do to settle the aforesaid accounts. People sometimes have a traditionary notion that the practice of physic and publishing of newspapers are mere amateur professions, followed for amusement sake, and for the cost of which little or nothing is expected. Yet there is not in the whole round of business, as far as we know, a more expensive employment than that of publishing a newspaper.

FARMERS' CLUBS.—We are glad to know that the importance of "Farmers' Clubs" are about to be realized. Stockton, we believe, was the first to initiate it, although we have not seen any reports of their active meetings, or discussions at them. What have they done? We have just heard that a Farmers' Club has been formed at Knight's Ferry, Stanislaus county, and that a miller of that place has offered to grind the *best five acres* of wheat grown in that county, free. This is a good move, the prize is a good one, and we hope other counties will soon form Clubs, hold meetings, and send us the reports of their active discussions.

PREMIUMS FOR THE FARMER!

$500 in Premiums

Splendid Inducements to Clubs!

Desirous to offer inducements to all who will form Clubs for this journal, we offer the following liberal Premiums:

For every Club of FIVE, and $25, we give Atlantic Monthly, $4, Godey's Lady's Book, $3, and an extra copy of the Farmer, $5, for one year.

For every Club of TEN, and $50, we give Atlantic Monthly, $4, Godey, $3, Harper's Monthly, $4, Arthur's Magazine, $2, and an extra copy of the Farmer, $5.

For Clubs of TWENTY, and $100, we give Atlantic Monthly, $4, Harper's Magazine, $4, Godey, $3, Arthur, $4, Gazley's New Pacific Monthly, $5, the Eclectic Magazine, $5, any of the Quarterlies, $5, and an extra copy of the FARMER, $5.

For Clubs of FIFTY, and $250, we will give as Prize one of *Wheeler & Wilson's* best plain *Sewing Machines*, valued at Sixty Dollars, with the Atlantic Monthly, Harper's and Godey.

For Clubs of SIXTY, and $300, we will give as Prize a Sewing Machine, valued at Seventy-Five Dollars, the Atlantic, Harper's and Godey,

For Clubs of EIGHTY, and $400, we will give a splendid Wheeler & Wilson Sewing Machine, valued at One Hundred Dollars, with two selected Magazines.

For a Club of ONE HUNDRED, and $500, we will give one of Wheeler & Wilson's best Machines, with all the Extras, worth One Hundred and Twenty-five Dollars, and two Magazines selected by the party.

The above offers we believe will richly pay persons for giving a portion of leisure time and influence, and we believe it can be easily done, for there are many places where we have never used exertions to circulate, where success is certain, in these many new localities, and we offer these inducements as an encouragement to win the premiums.

This will furnish any family with a library for a little brief labor to extend our circulation.

☞We will suit the wants of all who procure us Clubs, by substituting for any of the above the Scientific American, Country Gentleman, Rural New Yorker, Prairie Farmer, Genessee Farmer, Boston Cultivator, Massachusetts Ploughman, Maine Farmer, or Agriculturist, making, however, the total value of premiums the same.

SPECIAL PRIZES FOR COLLEGES.

We desire to procure Views of all the Colleges and Seminaries of note, in our State, and we know of no better way than for us to offer Premiums to those Artists who shall be connected with the Drawing Department. We therefore offer the following:

For the best Pencil Sketch, of *three offered*, of the Buildings only—a richly chased Gold Thimble.

For a Drawing of the Buildings and Grounds—a Ladies' Rich Needle Case and Materials, worth double the First Prize

For a Crayon Sketch of Buildings and Grounds—a Prize the value of the Second offered.

For an Oil Painting—a Prize worth double the latter—an Opera Glass, or a Japan Writing Desk.

For the Second Crayon Sketch—an elaborate Photograph Album.

To New-Comers with Capital.

We call the attention of emigrants to our shores—(many of whom will read this notice on the steamers as our Journal will always be found on every in-coming steamer)—to our Reading Room, where they can always find a large list of Farms, Orchards, Vineyards and Lands of all kinds for sale, in which they can make investments to great advantage.

The Bulletin Board of the Farmer will always offer opportunities that cannot be found ordinarily as we advertise for sale no estates or lands that are not actually in the market, and for sale at reasonable moderate rates.

LOANS AND DEPOSITS OF MONEY.

Persons who bring money for use and desire to obtain a good interest for the same until they make purchases, we cheerfully commend to the Pacific Bank, on Montgomery street, where money can always be deposited with the most reliable safety, and where all moneys deposited for six months or more will secure to depositors nearly the same *dividends* received by *stockholders*, and draw the regular semi-annual dividends. The dividends for several months have been 1½ per cent. per month. We give this voluntary notice to *benefit strangers* coming to our shores, for all are aware that many persons who come here, realize their capital on hand at great risk or risk it at great loss, and the Pacific Bank and Loan Association is one of our solid and permanent institutions that will benefit all new-comers especially.

It should also be borne in mind that those who make deposits and receive the six months' certificates, in case they desire to use money before it is due, can always obtain loans upon it at a moment's notice, and it is one of the best kind of securities to keep on hand as capital.

Local items thankfully received from our friends—Births, Marriages and Deaths included—all published free.—[Clear Lake Times.

That's rather cool! the editor desires "local items" and will "thankfully receive" such as "deaths;" rather consoling to the *invalid*, and commiserate to the manners! Glad we don't live up there, if there is any prospect of our dying soon; such kind of sympathy would hardly suit

our through Northern California and Oregon

BY LISLE LESTER.

t. Shasta—Shasta City—Odd Names—Weaverville.

Mt. Shasta is the highest peak in California, rested with "eternal snows." It has been sung, etized, and described by every lover of the eautiful, and every note-gatherer, until it seems have grown nearly thread-bare; yet its magnificence and grandeur still stirs the soul of every ew comer, and few can pass it without pausing pay it homage. The Sacramento river steals ut of its base, and Mt. Shasta is properly its true ource; some have thought it fed by a subterranean river; others account for its rise and apply its existence to the numerous springs probably existing in the base of the mountain. Fremont gave it the name of Tishasta, an Indian word, which was retained for many years, and is found on the School Maps of earlier date. Mt. Shasta has been the object of visitation by geologists, travelers and romancers, for years. Poets have burdened print, with their too-highly colored verse, over its indescribable sublimity and its unapproachable magnificence; while they have labored to reach up to a description, they have failed to bring it down to their meagre utterances.

No one has more beautifully spoken of this grand old mountain, than the late Rev. T. Starr King, who never lifted his pen, but to give utterance to rare thoughts, lofty ideas, robed in the folds of a delicate conception, and a high lofty sense of worthy admiration of all Divine Creation. To the mind of Starr King, all poetic beauties, the sublime creations, seem to approach as a perfect mirror of all their beauty, their grace, and natural teachings. Mt. Shasta, seemed by his description to reflect itself in all its true magnitude of grandeur and build up in the delicate atmosphere of his thought—its lone greatness, covered with its lofty pride and glory, born alone of God's workmanship. Every glance of its snowy crest, seemed an open book, bringing to his mind a revelation of wondrous power, and sublime ideals, all poems of themselves. The very sheen of sunlight, as it changed the snowy crest to gold and pearl, seemed suggestive of a power and glory far beyond all utterance or description. To such a mind as Starr King's, Shasta finds an appreciation fully due its glorious beauty. Many a writer has looked over the glorious landscape common to California, from its snowy dome, and crawled up its craggy sides, and stood afar off as well, gazing upon its majestic form with hardly a thrill of reverence of admiration, or hardly a realization of its sublime grandeur. Cold souls! they worry through the world, pass down the hill-slope of life chilled to all the joyful moments of its many hours, that might have blessed the heart and rested the mind, while it reveled in the garden of the beautiful, and the genial sunshine of the wonderous sights scattered around our Earth-home. To the sensitive mind, blessed with ideas of beauty and truth, these wild mountain scenes, their joyous displays of Nature, and the wonderful exhibitions of her handiwork appear in all majesty and glowing fervor.

Mt. Shasta, standing so lonely, so far apart from any mountain range or arms of mountains, over 13,000 feet above its base, lifting its honored head with a pure white crown of snow, above all the hills and valleys beneath, claims all our admiration; and as we gaze from a distance, upon its lone pinnacle, its rough, snow-wreathed sides, and its spotless whiteness, it grows in magnificence, in greatness and dimensions, almost involuntarily the thoughts commence a musical measure—the mind rises and ebbs, like some sweet prelude of song, and the heart seems ready to take up the melody and swell the coming chorus. Every visitor to the Pacific slope, should visit this mountain; climb into its cold arms, and sleep one night, next to its chilled heart—then ascend to the summit and from its hoary peak "where the air is light and the breath grows short," look abroad over the golden land—hill, dale, valleys like lines of shadow, and hills like threads of silver; mountain ranges, snowy sierras and mirrors of water will crowd into the vision—regret will never whisper her bemoaned lament, but a satisfaction of having gathered into the vision, a rare sight, a wonderful picture, will take its place and reward the effort.

Shasta City is a little mountain retreat, well deserving the title of "Hamlet," or "Mountain Nook," or even "Idlewild," number two. Great towering, proud-bearing hills, encircle the little city in their huge arms and the warm sun nestles upon them, under a veil of blue, vapory sheen, so gentle and softly quiet, so Indian-summer-like, it has been called by a certain traveler, "a fatal place for lover's dreams and a courting spot the year round." It ought to be called the "city of stairs," for it is down stairs the entire length of Main street, and *up stairs* going back, of course; being built on the hill-side, the walks are level only the width of a building, and on the entire street, or "down town" as they properly call it; and never was the term "down town," better applied. The terraced hill-sides and taste displayed by the owners of different residences, gives this place a beautiful appearance, and a comfortable retreat to the traveller—it is one of the prettiest mountain towns in California. Leaving this spot, for Weaverville, the county seat of Trinity county, we commence to climb mountain after mountain in rapid succession; our route is northwest, nearly a distance of thirty miles. It embraces the ascent of Brown's mountain, the crossing of Trinity river, and a long evening ride through a dense forest of fir, pine and spruce. Brown's mountain is one of the highest in this vicinity, and in passing over it at sunrise, we caught another view of one of those rare pictures, God has hung upon the fair walls of California. The almost transparent fog rested over a little village below, and drooped over the deep valley like the soft folds of a gauze veil, with myriads of lines of pearl and gold, piercing its ambient delicacy; and the sky twined its beauty as if a mirror of its own loveliness, while looming up in every direction, the lesser snow-white peaks; from our lofty look-out, we felt half inclined to feel "King of the entire region." The summit is sharp and abrupt, being less than one quarter of a mile in extent.

Weaverville is noted for its placer mining; the finest gold of the State is found in the placer diggings near the town. A large proportion of Chinamen are working the gulches, and the shipments of treasure from this place yearly are very great. Gold dust, with large nuggets, are brought into the assay office every evening by the lucky miners, whose good fortune is superior to the fortunes of men working farther south.

There are two natural bridges in the vicinity of Weaverville, which are represented to be of wonderful character and great interest to the visitor. Little adventuring parties have occasionally visited one of them, and the journeys have been famous for novelty and enjoyment. In a country without railroads, or usual conveniences for excursion parties, pleasure-seekers are obliged to take their excursions "rough shod," and after the olden times of the Colonists. To me this mode seems more enjoyable than the fashionable hurry and useless parade of the *elite*, who spend half the season in getting started. To be obliged to pack up three or four trunks, dress after the season's most approved style, and start out upon a journey, or to a resort long noted, more for its 'style" than real enjoyment, is a tedious task. In Eastern States, as well as all over the United States, east of the Rocky Mountains, all resorts, excursions, pleasure trips and journeys have grown to be mere stereotypes of city gatherings, where there is very little of comfort or happiness. The pure happiness of *resting*, in a quiet retreat up among the mountains, or at "the springs," where one can stroll, fish, hunt, swing, or throw off all restraint, can enjoy country freedom, is "what we read of," and what very few can realize—the absolute reality is six weeks' preparation, stylish company, with their brains left out, or at home, set rules, method of form, action and movement, eating, dressing, riding, and sleeping to be strictly followed; music, dances, wine suppers, cards, nonsense and foolery, where everybody grows tired, make fools of themselves, and have plenty of company; spend money and time, to be regretted in after years. But a good old-fashioned excursion, such as people are obliged to take in a new country, or have none at all, is fraught with that which is pleasant and memorable. Imagine a party leave Weaverville for the Natural Bridge; good lumber wagons and steady horses, three or four immense baskets to each wagon, full of the home-made victuals, so good to the taste of *good people*; blankets, guns, shawls, pretty girls, and away they go, riding and walking by turns, all day through deep valleys, up mountain gorges, taking lunch by a mountain creek under the old pines, sitting on logs and stumps, and camping out at night in a heavy forest, with manufactured tents and a great blazing fire, of faggots and dry cones from the pine trees, while the party gather round and cook the evening meal; how the old woods ring, and echo back their musical glee, and the owl starts with silent fear in his lookout, as the new sounds usurp his space, for vocal shrieks and screams! How free they feel, untrammeled by all nonsensical forms of action! Oh, paradise of soul; freedom to enjoy God's world as best we can! The people of Weaverville are mostly of the good old New England origin; one almost feels it in the air; hospitable, whole-souled, generous citizens, who are remembered by all visitors, with a wish to shake hands again, and spend a few days at the pleasant village. Having reached so far North, we begin to catch a savor of olden California times, in the names of different localities, which are still retained. Nothing can be more illustrative of "life in the mines," or the rude days of "49" than the names they were accustomed to apply to towns, camps, rivers, and various localities. "Whisky Town," "Whisky Creek," "Yankee Flat," "Bagdad," "Bully Hill," "Dead Man's Bar," all seem odd enough, and many of them are most significant and appropriate, for instance, "Whiskytown." "Horsetown," "You Bet," and Fag-end," are likewise as ridiculous. One particularity is noticed in Northern California, namely, that where there is a mountain town, there is also a river of the same name; the valley also, and perhaps a mountain, bears the name of the town, and that perhaps gathering its name from an old settler—so much permanent honor is sometimes paid to a man's name when little deserving of solasting a monument. Shasta is given to town, creek, valley and mountain. Weaverville derived its name from an early resident by the name of *Weaver*, and now his name runs in the creek and blesses a pretty and prosperous town in the mountains.

(To be Continued).

ON THE SACRAMENTO RIVER, CONTAINING 80 Acres, the soil the very best, will be offered at an excellent bargain, if appl d for soon. Enquire of EDITOR FARMER. 5

The New Terms of Our Colleges.

As it will be our aim always to serve the cause of Education, we shall devote a space in our columns to the time of the new Terms of the various Colleges, Academies, and Seminaries of learning, and if the Principals of each will send us information of the same, the time of each will be placed in this column; and if they will send us their catalogues we shall be happy to distribute the same from our Reading-room, to which we invite all who are interested in the Cause of Progress in California.

We hope we shall have the earnest co-operation of all Principals and Teachers, and to receive communications for publication that will advance the cause of Education. Our journal having a wide circulation, we can thus give extended notice to our Colleges and Schools, and materially help the cause, we therefore hope a new interest in the work. We cannot keep the public advised of changes unless we are notified.

KERBY, BYRNE & CO.,
20 No. 7, Montgomery street.

A CARD TO OUR PATRONS.

'Tis said *competition* is the life of trade. Fair, honorable competition, we never fear; but when *our name*, or the *same name*, is used to deceive others or injure our business, it becomes our duty to notify our patrons and friends that such is the case.

We were recently called upon by a person in this city, to supply a large order for more than One Thousand pounds of Seed of various kind, and also for several thousand Seed Bags—these were said to be for a store or stores in the country.

It soon came to our knowledge that these Seeds were to establish a Seed Store on Washington Street, in this city, under the same *Sir*-name as ourselves. The secret and unfair manner in which these Seeds and Bags were attempted to be procured of us, was so singular and so unfair, that we had just suspicion of wrong intent. We soon learned that *falsehood* was told us, and we refused to supply the order, knowing that no other establishment on the coast had laid in the stock of Seeds as ourselves, and having every reason to presume that our name will be used in the sale of Seeds elsewhere, we feel it a duty to remind our Customers and Purchasers of Seeds everywhere, that they should all be careful in sending their orders, and to be particular in their directions.

We have been established nearly ten years in the Seed Business, and we trust that by the extent and system with which our business has been conducted, we have justly earned the reputation of a regular Seedsman.

We import our Seeds direct from the best houses in Europe and the Eastern Growers, we have the most extensive stock in California by a large extent, and purchasers need only call at our establishment to satisfy themselves that our business is so conducted as to meet their approbation and business.

We return our thanks to our many Customers for their liberal support for these many years past, and trust a continuance for many years to come.

We would remind all our Friends and Customers the necessity of being particular and to address all letters and orders to

DREAMING.

Alone by the fireside dreaming,
Of days that have long since fled;
Of loved ones who cheered life's pathway,
Now numbered with the dead.
Alas! 'tis a tearful dreaming,
Robbing life of all cheerful seeming,
And leaving gloom instead.

Hopes that in life's gay morning
Promised a gladsome morrow,
Tinting the future with rainbow hues,
Such as youth alone can borrow.
Hopes, which long have passed away,
Nor left behind one cheering ray,
To sooth the heart's dark sorrow.

A dream of the past is a sad, sad thing,
With its buried hopes and fears,
As thronging back from mem'ry's store
Each banish'd thought appears.
Thoughts of the purpose unfulfilled,
Of dear ones lost, of friendships chilled,
Or left with the passing years.

Yet the saddest dreams a lesson teach
Of the nature of earthly things;
To every life comes darksome hours,
Which time most surely brings.
But though the day be dark and chill,
We know the sun is shining still,
Still hope the syren sings.

And if her song be blent with faith,
'Tis well that song to hear;
'Twill tell us of that narrow path
A Saviour came to rear;
A way which leads to realms above,
To realms where everlasting love
Hath banished every fear.

Then dream no more, Oh, weary heart!
Of those who have passed away,
Feeling them lost to thy yearning love,
In the future's dark alway.
But know, they have only gone before,
And wait thee on a blissful shore,
In regions of endless day.

AGNES.

HORN VALLEY RANCH, Feb. 15, 1865.

[For the California Farmer.]

REMEMBER THE POOR.

Spring, with bright flowers comes tripping along,
The fields and the meadows look gay; [song,
While the birds, in their glee, fill the woodlands with
From morn till the closing of day.

All nature is radiant, then let us give praise
To the Giver of all that is good;
In thanks unto Him our voices we'll raise,
Who provides the young ravens with food.

The brown fields and dark furrows, with their emerald hue,
To the hearts of the Farmers bring cheer,
And the soft genial rains the promise renew,
Of garners well filled for the year.

Then, 'mid all the blessings that add to our hoard,
And gaunt poverty drives from our door,
May we have a kind thought, and lighten the load
Of God's people—the suffering poor.

Thus we shall garner in Heaven above,
The fruits of the harvest we sow,
If sown in the soil of brotherly love,
While we are sojourners below.

WOODBRIDGE, Feb. 16, 1865.

[For the California Farmer.]

Poor, but Honest.

What do we infer from that assertion? That to be poor implies dishonesty? How often do we hear such remarks, as though poverty were a disgrace, and to shield them from the contempt of the world, their virtue and honesty have to be set forth. What creatures are we to take to ourselves so much importance, as though we were always to remain here and revel in our prosperity: not living as though we might leave all at any moment! Not a day or hour passes but some one is called away to leave all earthly treasure, and go as they came. We bring nothing with us, and carry nothing away; and still the whole of life is devoted to amassing that which must be left here. You do not hear it said "rich, but honest," because to be rich is a sufficient guarantee for their reception into the first circles of society. Honesty is not alluded to as a passport there. The man of wealth is looked upon as having all the qualifications requisite to insure him a warm welcome to their homes and friendship. They ask not whether he is honest or dishonest. If he be a man of integrity, with a soul for truth, or the reverse; if he has money, and can make a show; if he barely knows enough to pass through the world; so long as a gilded exterior can please the eye, or the sound of wealth can tickle the ear of the lovers of Mammon, what a hero such a one is, when he speaks of incidents with which he is connected. All hang upon his words with great interest and attention. But let a poor man speak of the truly wonderful changes or scenes he has passed through, and all will become apathetic and listless, and look upon him as though he was intrusive, often leaving him alone, making him feel their chilly indifference, which sinks deeper into his heart than all the toils or privations which he endures. No one wishes to be disturbed by him, he is nothing but a poor man; he may be honest enough, but he has no right here. How little do we know of true worth. True honesty stamps its impress deep. It has been said that "an honest man is the noblest work of God," but it seems that we care but little for God's noble works; for many a man, and woman, too, have been neglected and despised, until honesty to them seemed like a curse, when compared to the reward and patronage bestowed upon dishonesty, because clothed with the power of wealth to uphold and sustain them, while crushing out the true and ennobling lives of those who were struggling in the toils of poverty. Who wonders, then, that so many run after riches, at the expense of every other virtue. For is it not upheld by society at large, as well as by those we look to as teachers of the word of God? Do they not flatter the rich and scorn the poor, unless they can assist in dollars and dimes? They may have patience to listen for a while, to some sad tale, but duty soon calls them to some more lucrative position. All feel this, and know it to be true, and yet how few have the moral courage to come out and extend the hand of welcome to worth and honesty, clothed in rags. A good man must hide his head, if he be lacking in earthly treasure to feed and clothe himself and family as well as his neighbors. The more he needs the less of friendship or sympathy he gets, until his family may famish, and he spurned for that very poverty he cannot help. But let fortune smile upon him, and those who were the first to turn from him are the first to inquire after his welfare, and to ascertain that he is endowed with the attributes requisite for a gentleman and a scholar. Oh, foolish, pharisaical world, you have eyes, but see not, ears, but hear not the truths that have been set before you by One who knew, and could see, the poor neglected, and who stood boldly forth their friend and adviser, amid the scoffs and threats of the rich of His day. He, too, came among us poor, and took upon Him the poor man's burden, not the burden of the rich—a plain illustration to show the world they are walking in open defiance of His love and wisdow. Is there no way to overcome the evil? The world is being revolutionized, and may we not hope that Man with an immortal soul will realize that what Christ preached was not theoretical, but practical truths. He meant what He said, and those who pretend to be His followers should take to themselves the full meaning of His wonderful sayings and works. Preaching is well, but practice will go a great way to illustrate the truth to the world. But so long as we continue to hear honest men and women scorned and slighted because wealth does not flow in upon them, so long must ignorance, dishonesty and vice be tolerated, because clothed in prosperity.

M. J. U.

MARRIAGE.—Nature and nature's God smile prosperously upon that union that is sweetened by love and sanctified by the law. The sphere of our affections is enlarged, and our pleasures take a wide range. We become more important and respected among men, and existence itself is doubly enjoyed with our softer self. Misfortune loses half its anguish under the soothing influence of her smiles, and triumphant when shared with her. Without her what is man? A roving, restless being, driven at pleasure by romantic speculation, and cheated into misery by futile hopes, the mad victim of untamed passion, and the disappointed pursuer of fruitless joys. But with her he awakes to new life. He follows a path wider and nobler than the narrow road to self-aggrandizement, that is scattered with more fragrant flowers and illuminated with a clearer light.

THE FIRST WOMAN FORMED FROM THE RIB OF MAN.—We take the following beautiful passage from Mathew Henry's "Commentary" on the second chapter of Genesis: "Woman was made of a rib taken out of the side of Adam; not made out of his head to top him, but out of his side, to be equal with him, under his arm to be protected, and near his heart to be beloved." Surely this eloquent little extract ought to be committed to memory by every man who is either married or ever intends to get married.

BREVITY THE SOUL OF WIT.—The commandant of Libby Prison issued a stringent order that all Union prisoners must limit their letters to six lines. The following is a specimen:

My Dear Wife:—Yours received—no hope of exchange—send the corn starch—want socks—no money—rheumatism in left shoulder—pickles very good—send sausages—God bless you—kiss the baby—Hail Columbia!

Your devoted husband.

—Burns should be immediately dressed with Urtica or weak tincture of Lobelia. The application of large quantities of cotton with sweet oil is not the best treatment. Blistered parts may be covered with a linen cloth and fresh cream. If there is no blister, apply cold water until the smarting and pain subsides, then cover the part with linen cloth and sweet oil. Never allow any covering to become dry.

The best application for a burn or scald, no matter how extensive, is lard and flour mixed together and applied thickly spread on linen rags, it eases instantly and must be renewed often.

—A married lady who was in the habit of spending most of her time in the society of her neighbors, happened one day to be taken suddenly ill, and sent her husband in great haste for a Physician. The husband ran a short distance, but soon returned, anxiously exclaiming: "My dear, where shall I find you when I return?"

—He who, by his conduct, makes good friends on the one hand and bitter haters on the other, gives evidence that there is something of the bold, independent, upright man in his composition; while the chicken-hearted imbecile character is capable of making neither friends nor foes.

—Sambo had been whipped for stealing his master's onions. One day he brought in a skunk in his arms—says he: "Massa, here's de chap dat steel de onions! Whew—smell him bref!"

—In families of girls, "the beauty" is the ruler of the house. Let those who have small eyes and red hands cast up accounts and prepare to do the household drudgeries.

—Though whiskers are very fashionable, the ladies are disposed to *set* their faces against them.

—A goose has many quills—but an author can make a goose of himself with only one quill.

Situation Wanted

As Superintendent of a Farm.

A GENTLEMAN, EVERY WAY QUALIFIED FOR the Superintendance of a Farm, who is from the Eastern States, wishes a permanent situation. He is a man of family and every way qualified. Any one wishing a No. 1 Superintendent, within a little time, can secure a valuable man for such a place by referring to th Editor of the Farmer, or a note to A. B., Farmer Office. 11

EDUCATIONAL,

Miss Lammond,

LATE PRINCIPAL OF

BENICIA SEMINARY,

HAS THE PLEASURE TO ANNOUNCE THAT she has purchased the Seminary for Young Ladies known as the

CALIFORNIA COLLEGIATE INSTITUTE,

For Young Ladies,

No, 64 Silver Street,

SAN FRANCISCO, CAL.,

formerly under the control of Mrs. M. B. SWEDEN STIERNA, and has removed there with her entire corps of

Superior Teachers and Professors.

The New Term Commenced

January 4th, 1865.

The location of this Institution (on the suburbs o the city) commands at once for its boarding pupils, the retirement of a country life, with the advantages of the finest professional talent from the city.

As Miss Lammond desires to make this a permanent Institution, no efforts will be spared to make it worthy of the patronage which has been so liberally extended to her during the past four years.

As the class of Boarding pupils is nearly filled, those desiring admission will find it necessary to apply early.

For further particulars, Catalogues may be obtained by calling upon or addressing

MISS M. LAMMOND,

10 Principal.

Oakland Seminary for Young Ladies.

Mr. G. M. Blake.....Principal.

Mrs. I. G. Huggins.....Associate Principal.

THE SEVENTH YEAR OF THIS INSTITUTION COMmenced on

MONDAY, JANUARY 9th, 1865.

For Catalogues and other particulars apply to the Principal, corner of Eleventh and Washington streets, Oakland.

Catalogues can also be obtained at the Book Stores on Montgomery street, San Francisco. 23tf

Tobacco Raising and Grape Growing.

A MAN OF EXPERIENCE IN TOBACCO RAISing would like to enter into contract with some good man who has proper land and good location, and will have suitable buildings erected for that business. The advertiser has a thorough knowledge of the business in all its branches and can make it profitable to both. He is also familiar with Grape Growing, and can lay out a Vineyard and take care of it. He feels confident he can give satisfaction. A letter addressed to "Tobacco Grower," and left at the Farmer Office will be attended to. 17

Cashmere Goat.

A SPLENDID HALF-BLOOD CASHMERE GOAT can be had at a fair price, or will be leased on fair terms on application to the Editor of Farmer. 4

PATENT RIGHTS FOR SALE.

THE FOLLOWING PATENT RIGHTS OF NEW AND valuable inventions (of which we have models to show their value) are now offered for the States of California and Oregon, and Utah and Washington Territories.

NO. 1. THE MECHANIC'S SPIRIT LEVEL.

Patented September 13, 1859.

This Implement will be of great value to Contractors and Builders, being one of the most valuable inventions yet out. Builders will do well to examine the model.

NO. 2. IMPROVED CLOTHES REEL AND BAR.

Patented January, 3, 1860.

This valuable domestic piece of furniture can be used in the Laundry, the Kitchen, the Nursery, or Chamber, and can be made plain or ornamental; standing in the same relation as a piece of important furniture as does Wheeler & Wilson's Sewing Machines, neat when used and ornamental when not in use.

NO. 3. A CORN CULTIVATOR.

With this implement the soil is first thoroughly plowed and deeply pulverized, and on the return it smoothly and perfectly hills up and harrows the ground between the rows. A very new and valuable implement.

NO. 4. A MUSKETO BAR.

This will be much wanted in California. It is simple in its contrivance, perfect in its working, and can be affixed very cheap to all styles of bedsteads. Hotels, public houses and private families will find it a useful invention.

NO. 5. HYDE'S PATENT POST-DRIVER.

A most excellent labor and money-saving machine, for which we offer rights.

NO. 6. SEED-SOWER.

This is a new invention, and one of great importance to all who sow grain, or any garden seeds. The working model can be seen at the Farmer's Reading-room.

Holding the rights to all these new inventions, we invite the public to call and see the models. All persons who may be desirous to purchase either County, City, Town, or Individual Rights, can do so on application to

ELECTRICITY

THE

GREAT REMEDIAL AGENT.

Electricity as a Remedial Agent has, until recently, been but little known. An Electric Battery has been a terror from childhood up because a little Battery gave a "start," and the thunder storm killed by lightning. Now it is better understood, and is and will be the sovereign remedy for many diseases heretofore considered incurable. The following series of articles and statistics, with facts and proof of the virtue of Electricity are worthy of attention. When it was promulgated that disease could be entirely eradicated from the system without the use of poisonous drugs, the unthinking, or those who do not look deeply into cause and effect, scouted the assertion as chimerical, and adduced strong evidence of its utter impossibility. Long articles, replete with arguments, seemingly unanswerable, of the position that only through the digestive system could the blood be purged of the accumulations of the poisons which constitute disease. A great city went up from the interest in the continued supremacy of the old system of one poison to cure another, that Electricity, as a Curative Agent, had been tried and had proved to be of but little if any value—thinking, poor souls, the world of science stood at the same point it occupied one hundred years ago. They were wrong, while those old fogies were content if they cured one in every five patients there were those who were diving into the science of Electricity, and finally it was discovered that the trouble was in the instruments used. From that time to the present, improvements have rapidly advanced, until every disease in the catalogue of human ills has been either cured altogether, or checked so as to enable the sufferer to seek those changes of climate which ultimately perform a perfect cure. Diseases hitherto considered incurable, have been cured, and those diseases which took months, and even years, to cure by medical process, are now cured in a few weeks; and all by the *Improved Instruments* of Dr. J. H. Josselyn, Resident Physician at the Electropathic Institute, 645 Washington street, San Francisco. It is astonishing to see the number of patients and diversity of diseases that have been relieved by the Electropathic System. From early morn till late at night, his instrument is engaged, imparting health and strength to all who have the good fortune to obtain his services.

The charges, too, are not as heavy as by the old system, besides there is no medicine to pay for, let alone the unpleasantness of swallowing the nauseous stuff. During the time the Institute has been in operation, there has been more benefit to the human family derived from the system than from all other systems combined during the same period. Among the most troublesome diseases to which Californians have been exposed is Rheumatism; none has given the honorable practitioner more trouble to relieve, and no one has pretended to cure (if we except known empirics) permanently. But this subtle disease gives way before the Electropathic System in a very short time, enabling the sufferer to go about his business without pain or the fear and dread of a relapse. And so with most other diseases, considered incurable. We mention Rheumatism because of its abundance, but we could enumerate many other diseases full as troublesome, and some far more fatal in their results.

We allude to that kind of disease paraded by quacks in the journals of the day, a trouble which was never cured by medicine, only a little strength imparted by the use of tonics. The poor victim is kept taking medicines and paying for them until his last dollar is gone and then, as soon as he undertakes to work to obtain more funds, the trouble comes back in all its loathsomeness. To this disease Electropathy is peculiarly applicable, its action being upon the spermatic nerve, strengthens the secretory organs, and at the same time, creating an equilibrium in the system, thereby preventing an elapse.

We dwell upon this disease because it is the bane of the youth of California; and one about which there has been more deception used than all others put together. It is not necessary to enumerate all the diseases in the catalogue, for that would be occupying space to no purpose. Every disease has been under treatment by this system, and there are none but have received benefit either in this State or at the East.

There are at present very few Instruments in the world that can be depended upon. A good Instrument costs very heavy, and cannot be purchased unless ordered, and there are very few who are able to manufacture them, for want of knowledge of the healing principle. The only Instrument to be depended upon in this State is at the Electropathic Institute.

Connected with this system are the renowned Electro-Magnetic Baths. Here let us caution the public against the numerous Imposters in the bathing line. The pure Magnetic Bath is one of the most effective aids in the removal of disease from the system, but if given at the wrong time is likely to aggravate trouble, and cases have been known where the patient has been injured so badly as to require months to remove the injury. Persons in quest of this Bath should be careful and not apply to a place where there is no physician to judge of the necessity of the remedy. In fact the only place where they can be obtained in all their purity is at the Institute, where the Resident Physician will always be happy to examine and see that they are not unreasonably administered, and if not necessary, advise the requisite remedy.

To Females,

the Directors would say, Electropathy is particularly applicable to your delicate and fragile systems, and to the numerous troublesome and painful diseases to which you are liable. Should you be irregular, a few treatments will restore the functions to the proper state without pain or inconvenience. Should you be weak and enfeebled, either general or local, this system imparts strength and vitality, making the recipient feel buoyant and youthful, where before they were languid and unable to enjoy the pleasures of life. One great blessing connected with Electropathy is, it purifies the system so thoroughly that it beautifies the complexion, making the coarse and freckled skin as pure and fair as possible, giving the patient a fresh and healthful look.

To the nervous, the Directors would say, that you can be entirely relieved from those dreadful feelings of evil foreboding and your system strengthened so that nothing can disturb the current of your life. Several cases of insanity, arising from a disarrangement of the nervous system, have been permanently cured by this system. The Directors, in issuing this pamphlet, do it in the hope that it may be the means of awakening the public, who have not studied into such things, to a sense of their duties, and if possible prevent those who have the care of a rising generation from poisoning their young charges with vile drugs, thereby entailing upon them troubles which in after life may cause them to curse the origin. Also, that those in need of remedial agents may know where they can find them without resorting to taking the thousand and one poisonous nostrums that are continually palmed off as sovereign panaceas for all the ills of humanity. Avoid them all, they are snares set to rob you, and to your bodily injury at the same time. The following is a list of the cases which have been successfully treated by the *Electropathic System*, at the Institute, during the first four years of its establishment. The record is good, and challenges admiration of the world:

Name of Disease.	No.
Rheumatism	1580
Neuralgia	1492
Dyspepsia	1467
General Debility	1410
Fever and Ague	1262
Dumb Ague	1210
Bronchial Affections	1106
Asthma	1049
Female Irregularities	1022
Mercurial	938
Scrofula—long standing	922
Paralysis	890
Disease of the Eye	832
Catarrh in the head	705
Catarrh in the lungs	698
Liver complaint	600
Incipient Consumption	582
Panama Fever	563
Deafness—total and partial	480
Mental Derangement	471
All other—and among which is almost every nameable disease	2,186
Total	21,373

The above shows what can be accomplished by combined energy when it has truth and science upon its side. The Electropathic Institute was started amid the cry of interested charlatans, who used all the power their riches and the prejudices of the public gave them to prevent its success. It has risen to a position that is beyond their baffled malice, and will be honored in the scientific world when they are forgotten, or only remembered for their crimes and impositions. A thinking public are fast consigning them to that oblivion their works merit. Let them go, they will not be missed.

Persons seeking remedial assistance, may, wish to know something of the system by which diseases are so rapidly removed from the body. Electricity is a fluid of an subtle a nature that it can only be studied by its results. We know by its action it forces everything of a foreign nature in the body from the center to the surface, by its energy, while the vitality which it imparts fills up the vacuum, preventing thereby the subtle poisons from returning to the hitherto diseased parts; and here let it be understood that the Bath should never be administered until the disease has been forced to the surface, except, perhaps, in cases of cold where fever has not set in. Its action upon mercurial diseases is peculiar. The best authorities are of the opinion that it liquifies the mercury, which, when in a liquid state, by its own specific gravity forces itself out of the body. This result has been arrived at by testing the water after an Electro Magnetic Bath. After such tests have been found in the water the patients not troubled any more with those pains peculiar to the disease. In all other cases it forces to the surface and is washed off by the bath. The whole system in its application is a *luxury*, there being no pain or inconvenience attending upon it, but the reverse is the case, being one continued pleasure all the time. Try it, you that are suffering either from disease or the injudicious use of poisonous drugs, and you will be made to rejoice that you have had the courage to strike out from the beaten path.

Below are a few certificates from patients that have been cured at the Institute:

CERTIFICATES OF CURES.

The undersigned takes this method of acknowledging publicly the benefits he received from the treatment applied to him at the Electropathic Institute, while suffering under a terrible infliction:

This is to certify that I have been under Electropathic treatment at the Electropathic Institute, 645 Washington street. When I applied to Dr. Josselyn I was cramped up with rheumatism, and also had the chill ague. So bad was I that, without relief, I don't think I could have lived more than one week. The Doctor, with his instrument, relieved me the first treatment from all pain, and perfectly cured me of all I desired in twenty treatments, without the use medicines I cordially recommend all afflicted to patronize this Institute for it is truly a blessing to the afflicted, and the operation is very pleasant. I wish to thus publicly thank Dr. Josselyn for his care and sympathy.

JOSEPH SEGER, of Bolinas Bay.

September 19, 1860.
State of California, City and County of San Francisco—ss.
Subscribed and sworn to before me, this 19th day of Sept., A. D. 1860. P. BARRY, Notary Public.

SACRAMENTO, Oct. 10, 1860.

DR. JOSSELYN—Dear and Honored Sir: You requested me to let you know how I feel after being at home three weeks. Well, sir, I have been here a little over two weeks and there is no return of that very unpleasant trouble. My sleep is sound, and there is no disturbance of the regular laws of nature. I feel as strong as I ever did before bad habits had weakened my system. Not only is the general debility entirely disappeared, but the local trouble has gone. I feel so strong that there is no fear of its return. Considering that you only took one month to cure a disorder of seven years standing, I think your system almost miraculous. Accept my sincere thanks, and publish this if you please. I have sworn to it, as you will see. C. BOWMAN.

State of California, County of Sacramento—ss.
Subscribed and sworn to before me, this tenth day of Oct., A. D., 1860. CHAS. HART, Notary Public.

HORNITAS, Nov. 1st, 1860.

Well, Doctor, I am at home, and have been to work in the water for several days, and there is no return of the Rheumatism, as I call it; and Mercurial pains as you state them to be. I feel as gay as a lark, no pain or bad feelings, no stiffness, but perfectly well, and all done by you in three weeks, without one drop of medicine. You had hard work to make me believe before you commenced that you would cure me, but now I find it very easy to believe. Although my friends look rather incredulous, but they cannot doubt my sober earnestness. Doctor, you have my thanks, and I will beneat you all I can, by spreading your fame up in these parts.

Respectfully yours, GEO. PERKINSON Jr.

To J. H. Josselyn, M. D., Resident Physician, at the Electropathic Institute

NEVADA, Nov. 8, 1860.

DEAR DOCTOR: Pursuant to agreement, upon my arrival, I sit down to pen you a few lines in acknowledgement of the great service you have rendered me, in relieving me of that painful case of neuralgia and rheumatism. When I look back and see the gallons of medicine I have swallowed to no purpose, and then to think how soon you cured me, I am astonished. You were only twelve days performing a cure of the trouble, for which I had taken medicine over six months. Dear Doctor, if you could see the wonder exhibited by my friends, who can hardly believe that a cure was performed without medicines, but here I have been cured, and I have not taken a drop of medicine from you, nor from any one else, while being treated by your splendid Instrument I shall try to show my gratitude by sending every sick man I come across to you. Yours, till death,

FRANCIS GARLAND.

To J. H. Josselyn, M. D., Resident Physician, Electropathic Institute.
State of California, County of Nevada—ss.
Subscribed and sworn to before me, this eighth day of Nov., A. D., 1860.

F. SPAULDING, Notary Public.

YREKA, Nov. 10th, 1860.

DR. JOSSELYN—Dear Sir: Your letter, dated October 16th, is before me. You wish to know how my bronchial troubles are. Now, Doctor, that looks a great deal like a joke. I once had such an affection of several years' standing, but thanks to your natural mode of treating disease, it has gone to be numbered with the things of the past. Since my return I have not felt the slightest trouble from it. When you pronounced me well I did not expect to ever hear from it again. Any one who sits under treatment of that *Improved Instrument* of yours will have the same feelings. It imparts vitality to the system so rapidly that confidence is at once established. I have to thank you that you did not refuse to treat me because I could not pay you the whole of your reasonable charge; inclosed is the balance due you, and God bless you for the kind treatment I received at your hands.

Yours, ever grateful, WM. GARDNER.

State of California, County of Siskiyou—ss.
Subscribed and sworn to before me, this tenth day of Nov., A. D., 1860.

D. F. WELLITS, Notary Public.

This is to certify that I, the undersigned, was troubled with dumb ague accompanied with rheumatism, very badly. My disease was taken in Washoe. After having exhausted medicines without benefit, I applied to Dr. Josselyn, at the Electropathic Institute, on the first day of November. After taking twenty treatments with his Improved Electropathic Instrument I am perfectly cured, having been entirely relieved of all pain or inconvenience. I feel as strong as I ever did when in the best of health. I cheerfully recommend all afflicted to his care, as being the best physician I ever became acquainted with. One great advantage, he uses no medicines, but cures by a process which is perfectly natural. The time occupied in my case was thirteen days.

D. O. HARRA.

November 14th, 1860.
State of California, City and County of San Francisco—ss.
Personally appeared before me, D. O. Harra, and subscribed and sworn to the above certificate, on this fourteenth day of November, A. D., 1860.

P. BARRY, Notary Public.

SAN FRANCISCO, Aug. 3d, 1861.

To the Directors and Resident Physician of the Electropathic Institute.

SIRS: You requested of me a certificate of the cure you performed in my case. Below I append it:

This is to certify that I was troubled with a swelling which commenced in my ankles, and gradually extended upward until it effected my whole body. I sought the best medical aid in New York and Boston, and they all pronounced it dropsy. Hoping to retrieve my health, I visited California in February last. I consulted the Resident Physician at the Electropathic Institute; and now, after five months of treatment, and waiting to see its effects, I am pronounced well by competent judges. It did not take but three months of treatment to cure me, but I waited to see that it did not return. I feel perfectly assured from what I saw while under treatment that Electricity as applied at the Institute will cure any disease to which the human family is liable.

Now, gentlemen, you can make what use you please of this certificate. With my thanks to the Resident Physician for his kind attention, I subscribe myself,

Your thankful patient,
MRS. C. A. CA TON

Opinions of the Press.

The advantages of electricity as a remedial agent, are universally admitted by the medical and scientific world. It requires, however, experienced skill to apply this remedy efficiently, and this skill of application is possessed in an eminent degree by Dr. J. H. Josselyn, of the San Francisco Electropathic Institute. Particulars of his method of practice can be obtained by reference to his advertisement in another column. The Doctor is well known to us as a scientific gentleman, and an ardent devotee to his profession. He is no pretender, but has conferred incalculable benefit on those who were so fortunate as to seek relief at his hands. For those who desire speedy and permanent relief from the rheumatic pains, so prevalent in this region, we can recommend no surer remedy, than a visit to Dr. Josselyn at his rooms in San Francisco, No. 645 Washington street.—[Placerville Republican.

ARE YOU SICK!—We wish to say a word to those that are sick. We have in this city an institution known as the Electropathic Institute, situated at 645 Washington street. The establishment is under the charge of Dr. J. H. Josselyn, a physician who has no superior in the city. He has been in charge of the Electropathic Institute for several years, and has been uniformly successful in his treatment of the numerous patients that have placed themselves under his charge. The Electric treatment will cure many diseases that cannot be reached by any other mode. Dr. Josselyn gives his personal attention to all of his patients, and is always ready to give advice to those that may call upon him. His charges are very moderate, and we cannot do the sick a greater favor than to recommend them to call on him before placing themselves in charge of another.—[San Francisco Daily Journal.

We call the attention of our readers to the advertisement of Dr. Josselyn's Electropathic Institute. Voluntary and unsolicited we make the following statement, proving its beneficent effects, particularly in rheumatic cases. Some months since we were on an editorial trip, visiting the mountains. The stage-coach upset, and landed all the passengers, including the writer, below in the valley, where the Deer Creek overflowed by receiving the additional material, extraneous to its usual contents. For some hours exposed in our wet clothes, to night wind and weather, we soon felt the effects of the accident in the mountains — pains in the back, hip, and legs; so much so, that for weeks we hardly could walk Treatments of all kinds were applied but without avail until our attention was called to the Electro-galvanic Baths and appliances of the above Institute. Thank God, after two weeks we have been fully restored and enjoy now the free use of our limbs and body, as fully as previous to the involuntary bath in Deer Creek.—[Dr. H. BIEN.—Ed True Pacific Messenger.

ELECTROPATHY.—Electricity has long been classed among the most effective medical agents. It possesses great advantages over the systems of therapeutics heretofore relied upon as it reaches more certainly the seat of disease, especially in nervous or rheumatic complaints. The Electropathic Institute, No. 645 Washington street, under the charge of its able Resident Physician, Dr. J. H. Josselyn, has attained a well merited celebrity for the many cases which have resulted favorably from the skillful application of this invaluable remedy.—[Daily Morning Star.

A GOOD INSTITUTION FOR THE SICK.—One of the very best places in the city for the care of the sick is at the Electropathic Institute, 645 Washington street. The establishment is under the charge of Dr. J. H. Josselyn, a physician of great experience, and no one can do the sick no greater favor than to recommend them to give the Electropathic Institute a trial.—[Weekly Journal. 13

J. H. JOSSELYN, M. D.,
13 Resident Physician.

A Complete Treatise on the Breeding, Management and Diseases of Sheep,

BY HON. HENRY S. RANDALL, LL. D.,

Author of "Sheep Husbandry in the South," "Fine-Wool Sheep Husbandry," Etc., Etc.

PUBLISHED BY

D. D. T. MOORE, ROCHESTER, N. Y.

THOUGH FIRST PUBLISHED ABOUT A YEAR ago, this work has already reached its TWENTY-FIRST EDITION, and the demand thus far has been extraordinary. A new and revised edition is now ready, and others will follow in such rapid succession that all orders can hereafter be filled promptly. No volume on any branch of Agriculture ever had so rapid a sale or gave such universal satisfaction. The work is a timely one, and unquestionably THE BEST AND MOST COMPLETE TREATISE ON SHEEP HUSBANDRY ever published in America. It is cordially welcomed and highly approved by both Press and People. Witness the following extracts from a few of the numerous Reviews and Letters the work has elicited:

OPINIONS OF PRESS AND PEOPLE.

From the New England Farmer, Boston.

"The Practical Shepherd" is a work that has long been needed by our people. It should be in the hand and head of every person owning sheep.

From the Country Gentleman and Cultivator.

As a whole, this book is unquestionably in advance of anything of the kind now before the public.

From the Maine Farmer.

The name of the author, Hon. H. S. Randall, is a guarrantee of its completeness and reliability.

From C. L. B. P. Johnson, Sec'y N. Y. State Ag'l Society.

It is the best practical Sheep Book, I think, ever published, and does great credit to Dr. Randall.

From the New York Tribune.

In this volume the author has exhausted the subject, and given all that is necessary for any farmer to know about selecting, breeding, and a general management of sheep, in health or sickness. We heartily commend this work to all who wish for a sound and thorough treatise on sheep husbandry.

From the Michigan Farmer.

Mr. Randall has made the very best book extant on American Sheep Husbandry.

From the Ohio Farmer.

The reputation of the author—who ranks as THE authority in this country upon all that pertains to the breeding and management of sheep—will induce a large and continued demand for "The Practical Shepherd."

From the Prairie Farmer.

The illustrations of sheep are by the best artists of New York, and well done. The letter press and paper are all that could be desired in a work of this description. It will undoubtedly meet with the large sale its merit demands.

From the Scientific American, New York.

It is vastly important that those who raise sheep should obtain all the information possible how best to manage their flocks, and we unhesitatingly recommend the "Practical Shepherd" as the most interesting and reliable work on the subject extant.

☞ THE PRACTICAL SHEPHERD is sold only by Agents and the Publisher. The demand for this work was, for months, greater than the supply, and hence it has not been offered or advertised in the Pacific States. It comprises 454 large duodecimo pages, and is printed, illustrated and bound in superior style. Price $2, Sample copies mailed, post-paid, on receipt of price.

Editor Rural New-Yorker, Rochester, N. Y.

This Book will always be for sale at the Farmer Office. 19

A CARD.

YEARS HAVE ELAPSED SINCE THE Subscribers first invited public attention to the peculiar properties of their Patent Axle-grease. At first their invention made but slow progress, but thanks to the liberal and appreciative spirit of a large portion of the teamsters and coach proprietors of California, the demand for their manufacture has gradually increased, and notwithstanding the many spurious imitations which from time to time have been introduced from the Eastern States to compete with their article, the H & L AXLE-GREASE has now acquired an unrivaled reputation, extending throughout the length and breadth of California, Oregon, and the neighboring Territories,

The subscribers return their grateful acknowledgments to a discerning public, who have so largely patronized them in all their enterprises which they are now happy to say, are beginning to be justly appreciated as belonging to our California industry.

The supply of material from the East having, in consequence of the war, been cut off, the subscribers turned their attention to the substitution of COAL-OIL as a basis to their manufacture, but after applying every means suggested by the modern application of the science of chemistry, they were reluctantly compelled to the conclusion that however fit COAL-OIL might be for illuminating purposes, and for which it stands unequaled, it was not at all adapted to make a permanently satisfactory Axle grease. In this dilemma the subscribers turned their views to the native produce of California, believing that large quantities of natural resin might be collected from the noble pine trees of her boundless forests.

Having invited attention to this subject, th with steady progressive steps, advanced this until, at the present time, they have established a manufactory of Rosin and Turpentine at Forbestown, from which considerable quantities of both articles are daily manufactured, of such a quality as to find a ready market at fair prices.

It is hoped that increased efforts may continue to be put forth, and new discoveries made, so that California may soon be independent of all foreign supply, for we believe our lofty mountains and our mighty pine forests will yet give us that supply. The subscribers are now receiving native resin in sufficient quantities to be to sell their celebrated AXLE-GREASE at a LOWER PRICE than any of the spurious COAL-OIL varieties which may hereafter be imported.

A REAL BUSINESS MAN, WITH CAPITAL OF $2,000 to $3,000, who desires to invest in a very safe and profitable business already established, may hear of an opportunity by addressing with real signature, S. S. F., care of Farmer Office. All communications strictly confidential 20 tf

FROM OUR EXCHANGES.

—The steamer Christina is now running regularly between Stockton and Fresno City.

—The Headquarters of the Military Department, of Arizona has been located at Camp Drum, near Los Angeles.

—The Visalia Delta says that the lands in the valley of Owens' river are now subject to location by preemption for homesteads.

—The Fast Freight Express Company is now carrying passengers from Virginia City to Sacramento for $5 each.

—Nearly all the quartz mills in the State of Nevada are now in operation, all having plenty of ore on hand.

—The Indians who are creating the disturbance along the line of the Overland Telegraph are armed with Mississippi and Enfield rifles and revolvers.

—A new Military Department has been created, Gen. Pope in Command at St. Louis, and Gen. Connor at Denver.

—The recent snow storms in Idaho Territory have been so severe, that the roofs of several dwelling houses in Placerville, Idaho City, and other places, fell in from the weight of the snow.

—An association has been formed in San Francisco for the cultivation of cotton on Lower Kern River, Tulare county. It is stated by the Delta that the labor will be performed by Chinese.

—The Indians have been driven from the line of the Overland Telegraph. Business was resumed on the 20th, and dispatches are now received regularly.

—The Board of Directors of the San Joaquin Agricultural Society have decided their Sixth Annual Fair shall commence on the Fifth Day of September next, and continue four days.

—The Virginia City Press are discussing the propriety of repudiating all the indebtedness incurred by the Common Council beyond the limit allowed by her charter—$100,000.

—Chinese in Nevada county stick polished copper rods into the amalgam in sluice boxes, to which it adheres. They thus rob sluices and flumes of gold, even when the water is passing through them.

—At the last meeting of the Stanislaus Farmers' Club, at Knight's Ferry, a miller of that place offered, as a prize, to grind, free of charge, the product of the best five acres of wheat grown in the county.

—A telegraphic cable has been successfully laid between Fort Point and Lime Point, thus completing telegraphic communication between San Francisco and Sacramento via San Rafael and Petaluma.

—According to the Marysville Appeal, one-half of the farming lands between Oroville and that place are not yet planted, and many of them have yet to be planted, and many of them have yet to be plowed.

—The Coast Range of Mountains, in view of San Francisco, were covered with snow on the morning of the 9th inst. Snow also fell in the city on that day. The first occurrence of *that kind* during a period of twelve years.

—In San Francisco the rain guage record, kept by Thomas Tennant, shows that for the season of 1864-5, we have already had 32-100 of an inch more than the regularly average, the fall having been as follows to date: Up to February 1st, 21-08; 13th, 0·30; 14th, 0·10; 15th, 0·08; 16th, 0·12; 18th, 0·40; 19th, 0·24—total, 22.32.

—Cotton raising in Mexico, says the Bee, does not promise to be as profitable as at first anticipated. Ginned cotton costs, when ready for shipment at Mazatlan, twenty-eight cents per pound in coin. Even at present prices of cotton in the East, this leaves no great margin for loss, damage, cost of shipment, etc. When peace comes the Mexican cotton growers will fall flat as a flounder.

—The Reese River Reveille says that R. C. Gridley, Esq., of that city, "has not only got into New York, but also got into the papers, bag and baggage. Harper's Weekly for January 21st has an engraving purporting to be a picture of Gridley and his famous sack of Sanitary flour. Looking at the engraving we are at a loss to tell which is Gridley and which is the sack of flour."

—Our neighbors of Vancouver Island complain of hard times, and seem to anticipate commercial failures as a consequence. Cariboo has measurably failed to answer expectations, and the Colonist thinks that the Kootenai and Sooke can be depended on to bring them speedy relief. It says: "For six years past we have been building upon the sand, and the storm of adversity is now tumbling our houses about our ears."

—On the night of the 7th inst., a "cave took place in the Burning Moscow mine, at Virginia City. The cave extended upward to the surface, where a cavity some eight feet in diameter is to be seen. We believe no damage was done below. The cavity above is under one corner of a frame building owned by G. W. Baxter. In front of the building is a heavy wall, some twelve or fourteen feet high, and it is feared that house, wall and all may yet go down.

THE CALIFORNIA ART UNION,

OVER THE STORE OF

Messrs. Jones, Wool & Sutherland,

HUBBARD SQUASH.

THIS VERY BEST OF ALL SQUASHES SHOULD BE planted by every person who wishes the best Squash that can be grown.

The HUBBARD SQUASH is different from all other Squashes; has a hard rind, but very rich mealed, sweet and luscious as the finest Carolina Sweet Potato.

The Hubbard makes the finest Pies in culinary art, superior to a Custard Pie—the Squash, however, is to be baked only. Saw the Squash in halves, bake in the shell, and scoop it out when baked, or serve it on the table in the shell. For Pies, first baked, then scooped out, and used as other squash.

Fresh Seed just received from the East, pure from the growers, for sale at the FARMER OFFICE.

Packages $1 each; $3 per pound 3

MAN WANTED TO GROW SUGAR BEET.

A WEALTHY MAN, DESIROUS OF TESTING THE capabilities of our climate and soil for the cultivation of the Sugar Beet, and the manufacture of Sugar, desires to find a man who has had experience in growing the Sugar Beet for this purpose. To such a person a liberal offer will be made, and no other person need apply than one who has knowledge and experience.

Address or call on the Editor o the California Farmer. 1

TO NURSERYMEN.

A FEW THOUSAND VERY GOOD SEEDLING PEACH Trees can be had at reasonable rates, if applied for soon. Nurserymen are aware that soon Peach Trees will be scarce, and they should be planted now.

Apply at the FARMER OFFICE. 3

California Grass Seeds.

EVERY VARIETY OF NATIVE GRASSES, the seed of which can be saved, will find a ready purchaser for the seed, on application a the Farmer Office.

The Markets.

Wholesale Produce Report.

This represents the prices paid by the dealer to the producer.

Corrected weekly, by A. H. Tonn & Co., corner of Clay and Drumm Streets.] February 24th.

Our Grain and Produce Markets are firm. Speculators have about the control of Wheat and Flour, and at their pleasure advance or depress the market. Sales of Wheat the past week have been effected at prices from 4¼ to 5¼c. ₱ pound. Flour has also advanced materially. The Wheat, Barley and Flour ex E. T. L. from Chile, has all been sold; Barley at from 2¾ to 3c; Wheat at $4 85, and resold at an advance. There are other cargoes of Wheat, Flour and Barley, en route from Chile that are due, and may be expected to arrive any day. These, and the news of what else may be or have been shipped, that will doubtless reach us by the incoming mail, will decide whether our market of Flour is to go higher or recede. Beans are in demand, effected doubtless by the advance in Flour; we note more willingness to buy at better prices. There is no change to note in the Potato market; our supplies from the Coast are and have been liberal. Hay has arrived in sparing quantities, and the market is well sustained.

Our receipts from all sources, for the past week, are as follows: Wheat, 5,360 sks; Barley, 5,740 sacks; Oats, 1,238 sks; Corn, 2,415 sks: Potatoes, 3,366 sks; Flour, 1,120 qr-sacks; Hay, 3,200 bales; Straw, 140 bales; Beans, 534 sks.

FOR SALE, TO LEASE, ETC.

A Magnificent Stock Farm For Sale.

WE HAVE ONE OF THE VERY FINEST STOCK FARMS for sale to be found in the State. The location is a Valley in the Coast Range, and in a situation unequaled for excellence. A place secluded from loss of Stock by mixing, etc.

There are 1200 acres all inclosed with a fine staked oak fence with strong riders, to this can be added as many thousands of Uncle Sam's acres as may be wanted. The fenced land is the best of bottom land. During the late dry weather a large amount of Stock has been driven to these hills for feed and have been profitably kept.

This Ranch produces a big yield of Wheat, Barley, Oats Corn, Root Crops, etc. Tobacco, Hemp, Flax, etc., can also be raised most profitably. Floods never wash it, and it is never affected by drought.

On this Ranch are good, ordinary Buildings, Houses, Barns, Sheds, Corrals, Smoke Houses, etc., to this Plows, Harrows, Teams, working Oxen, etc., to do the work on the place.

On this Ranch there is now the following Stock:
One Jack of the very best character
100 Mules from 1 to 3 years old.
1 Stallion, No. 1.
20 American Mares, No. 1.
80 Mares one-half and three-quarter breed. These Mares are all in foal, mostly by the Jack, as Mules are a ready sale at high prices.
100 Horses, mixed Stock.
500 Head Horned Cattle, American Stock and half breed.
400 to 500 Swine, good Stock.

The Stock now on the place can be sold with the Ranch and thus put the purchaser into a business profitable at once. This Ranch is so situated that a river surrounds the range on one side and mountains on the other to which the Stock have a fine run without any interference from any source, thus giving the Stock a complete swing. Without reducing the original Stock there can be sold annually from this Ranch 50 Mules, 30 Horses, 100 Beef Cattle, 300 fatted Hogs, worth in the aggregate $10 000, three fourths of which is clear profit

The timber is abundant Pine Oak, and other hard woods. Tar, Pitch, and Turpentine can be made in abundance.

This is one of the Rare Chances, such an one as is seldom offered.

Easy terms as to payments: A portion of the money can remain on time if secured.

For all particulars call on the Editor of the Farmer. 22

Pleasant Homesteads For Sale.

THE FOLLOWING PLEASANTLY located Properties, situated on the opposite side of the Bay, can be purchased at very reasonable prices and easy terms if applied for soon.

No. ONE.—A Handsome Two-story Cottage, with seven rooms and seven closets, hard-finished, and every convenience inside, Small Buildings, Chicken House, Good Water, Gardens, and a very fine view of the Bay. Price about $3,000. Buildings perfectly new.

No TWO.—Very similar Cottage, with eight rooms, and same good finish and conveniences inside and outside, and same views—price the same. Both the above have excellent soil in the garden, and some fruit trees ready for bearing. The fences are fine around the grounds, each about one acre.

No. THREE.—A large House, built some three years, large Garden and about 150 Fruit Trees in bearing yielding a handsome income yearly. All these three Dwellings are within three minutes of the cars. Price, similar These are really worthy special attentions. For all particulars inquire of the Editor of Farmer.

....ALSO....

A neat Cottage with eleven acres of land all covered with Fruit Trees, and small vines in abundance such as Blackberries, Raspberries, Strawberries, Gooseberries, etc. The income from the ground has been about $2,000 a year. The owner wishing to leave will sell at $6,000. A fine location and everything desirable—it will be sold at a bargain.

—LAND—

A Fine Building Lot all planted with Trees, about 500 of the best quality and in bearing. The Fruit alone will pay for the place in three years.

OTHER LOTS OF LAND.

We have several Fine Lots of Land, open; also some stocked with Fruit Trees, that can be offered on the most favorably terms to those who wish to secure desirable Homesteads.

Inquire for all the above of the Edito of Farmer. 19

A Beautiful Eden for Sale.

ONE OF THE MOST DESIRABLE Estates on the Pacific Coast is now offered for sale by reason of a desire of the owner to travel abroad and to regain his lost health—no other inducement could tempt the owner to part with it.

The Estate now offered is beautifully located in a retired valley away from any immediate neighborhood, free from noise, dust, etc, and shielded on all sides by lofty and picturesque hills giving a varied scenery, truly delightful, no season of the year without real beauty.

The whole Estate comprises a little less than ONE HUNDRED ACRES, the greater portion of it is covered with Orchard, Vineyard and Garden Grounds, comprising all that is desirable, and unsurpassed by any grounds in this State

The Orchard covers many acres, and the Vineyards are very extensive, and everything rare and desirable in these departments are here found

Pleasantly built and located is the Cottage residence. This with Barns, Fruit Houses, Wine Cellars, and other appurtenances make the whole complete, a highly prosperous Garden Ground around the residence with large Orange, Lemon, Fig and Olive Trees in bearing gives the whole the true "Eden" appearance.

The productiveness of the place can be estimated when we say more than Ten Thousand Dollars is annually produced from the Orchard and Vineyard, and these can be easily and greatly enlarged.

This whole Estate can be had at a bargain if soon applied for.

The approximate value is about a THREE-YEAR INCOME, and any person having ready cash of some amount, who wishes to secure one of the finest Estates on this coast, can find the present a rare chance. No person need apply who has not ready money to a reasonable amount, and none but a real purchaser To such, one of the best chances for a Fortune is now offered, as in good hands the Estate can be paid for with the income from the product in three or four years, sure.

For particulars apply to Editor of Farmer. 20

Fine Farms for Sale.

YOU WHO WANT GOOD FARMS CAN SECURE them by applying to the Editor of the Farmer. The following can now be had:

FOUR VERY FINE FARMS in the splendid San Joaquin District, within a few miles of Stockton, all very productive.

Several STOCK RANCHES in various parts of the State, from $1,500 to $25,000; in all these, good and permanent settlers can find bargains. Address by letter, or in person, for particulars to Col. Warren, Editor of the Farmer. 23

Two Splendid Farms for Sale.

TWO SPLENDID FARMS FOR SALE, IMMEDIately, in one of the best localities in our State—one of the best chances ever offered for an immediate purchaser, parties wishing to close business contracts.

One Farm of 30 acres, and Orchard, worth $6,000, will be sold for about half that sum.

A large Farm, 5,000 acres, worth $15,000, will be sold for $10,000 or less. Inquire of Editor Farmer.

Loan Wanted---$5,000.

WANTED, FOR TWO YEARS, $5,000 ON VALUable improved property in a neighboring County the buildings of $6,000 goes with the collateral. The money is wanted at a fair interest, which will be paid promptly. Inquire of Editor Farmer 7-1

California Art Union Address.

The following is the excellent address which was presented at the opening of the Art Union. We give this address with the hope that it may call attention all over the State to this institution, which is truly worthy of public attention and public patronage, and although our newspapers seem to delight to find fault with the management, we hope the managers will go onward, and kill out all petty feeling and jealousy, and carry the society to a high and honorable position:

Some few months since, at a chance meeting of a few gentleman of this city, it was suggested that there was in this community a growing taste for the Fine Arts, and that it needed but Art Associations to shape and direct it to beneficial ends. The fact, too, was recognized, that there were among us artists of merit, and that by combination and association their labors could be made to conduce to the education of the public in matters of Art, and at the same time, the merits of this class would be more prominently brought into general notice. The truth, too, was not lost sight of, that such organizations exercise a powerful influence in the formation of national character, and that there is, in our American intellectual constitution, a positive æsthetic element, which has already achieved proud triumphs in the chief branches of the Fine Arts. From such premises these gentlemen reached the conclusion, that the time had arrived when such an organization would not only be liberally supported and encouraged, but was, in a certain point of view, a measure of public necessity.

In Europe, and in the Eastern cities of our country, such is, and has been, for a half century, the interest in Art, that its illustration and progress have occupied some of their most brilliant and philosophical writers. In addition to Art Unions, International Expositions, and hundreds of books illustrated in the highest style of typography, it has been regarded as so necessary an element in national education, as to have been the subject of Parliamentary and Congressional investigation and encouragement. It is now accepted as an undeniable truth, that the promotion and culture of æsthetics is an advance, *pari passu*, towards the highest civilization.

Since the organization at Paris, in the early part of the century, of the "*Société des Amis des Arts*," associations of the same character and aims have been established in almost every city of Europe and the United States. The "London Art Union," founded in 1837, had, at the close of that year, subscriptions to the amount of but $500; yet in 1850 it had reached the sum of $90,000 per annum. A similar institution at New York, after an existence of scarce ten years, numbered 18,900 members, and had an income of $96,300. During a space of thirteen years, the subscribers numbered 80,610; its receipts amounted to near a half million of dollars; it had distributed 4,402 paintings, medals and bronzes, and 165,797 engravings, as well as a monthly journal exclusively devoted to art essays, criticisms and descriptions, illustrating the history and progress of the Fine Arts, from the earliest ceramic remains of the Etruscan Age down to the highest triumphs of modern art-achievements. The benefits resulting from such an association are incalculable.

In imitation of such labors, and in the hope of accomplishing commensurate benefits to the people of this coast, it was determined, at the meeting referred to, to attempt the organization of a California Art Union. The public has here our first fruits, and on it depends the success of our experiment. The conditions of admission and membership bring our association within the reach of all. It has been the aim of the Trustees to make it a popular institution, and by the imposition of a light tariff open its doors to all those who feel an interest in the cultivation and expansion of a correct taste in Art. If such encouragement is extended to us, we propose to distribute to the stockholders, annually, from our net profits, paintings, engravings, lithographs and photographs. We have, too, the ulterior design of making the Art Union permanent—to so secure its success as to enable us, at some future day, to erect an Art Building that will be a worthy monument to the liberality and refinement of our population.

Thus far there is every promise of a good issue to our enterprise. The private collections of many of our citizens have been placed at our disposal, with a promptness and generosity most commendable and hopeful, and the artists themselves are using their best endeavors to advance the interests of the organization. The inauguration of the association has been marked with such happy auspices as to encourage us to believe that our scheme will be successful. As our only aim is to reach all who feel an interest in the cultivation of Art, without reference to class or condition, we hope that this, our effort, to form an Art Union, will meet with appreciation and patronage.

GREENHOUSES OF J. McCALL, ESQ., STATEN ISLAND, N. Y.

Conservatory, Camellia House and Grapery.

We present our readers with a view of one of the best designs for a large and spacious Greenhouse, which shall combine in its uses the Conservatory for a collection of Plants in perfect bloom and in growing order, with a separate department for a Camellia House, a Forcing House for Grapes and a cold Grapery.

We present the ground plan and also the finished building, so that the eye can easily comprehend its appropriateness for those uses, as well as its beauty when completed.

This building was designed for the owner by Wm. Chorlton, Esq., the author of the treatise on the Grape, and although it was erected some six years ago or more, it has seldom been surpassed in design or beauty.

The rapid increase in taste for Horticulture and Floriculture, and the large sums now expended in adorning the grounds and Homes of our wealthy citizens, has induced us to present this illustration, hoping it may induce them to copy from it an example of a Conservatory and Greenhouse; and in order that they may have all the information needed to aid them in building, we give them the letter descriptive of the building, its dimensions, uses, etc., from the builder himself, which he addressed to the editor of the Horticulturist at the time of its erection.

Let it be understood by the reader that the *shaded ground* in front of the building, as seen in the illustration, is the *Grape border*, the vines being planted outside and conveyed through the wall into the building, as is customary in all Graperies. With this notice the remarks of Mr. Chorlton on the planted Vines will be understood. The following is his descriptive letter:

DEAR SIR,—Enclosed I send you a perspective view and ground-plan of a collection of horticultural houses, designed by myself for J. McCall, Staten Island, and combining beauty of exterior with practical utility. In this case it was required to have an early and late grapery, a large and general conservatory, and a suitable apartment for camellias, and other polished-leaved greenhouse plants, which are subject to be scorched by the rays of the midday sun. The most available site was on a level plot, so situated that the longitudinal extension of the structure should be east-southeast, and west-northwest. It was also desirable that no part should appear as "sheds" or other like nuisance, consequently the ordinary conveniences are provided for a cellar, forty feet long by nine feet wide, being sunk under the northwest part of the building, and which contains the two boilers and sufficient room for the Winter's fuel. There are two cisterns, each fourteen feet wide by fourteen feet deep underground, and beneath the stage of the central house. Each house is furnished with a tank for tepid water, having a hose coupling attached, with faucets so arranged that one force-pump (which is fixed under the stage) answers all the purposes of drawing water from the cisterns into the tanks, or from any one of the tanks, to shower over the whole or any part of the interior, at pleasure. The center house is twenty-one feet wide by forty-six feet long, and seventeen feet from the ground level to the ridge. The two wings are fifty feet long by twenty feet wide, and fourteen feet to the ridges, which are on a level with the eaves where they join. The groundwork, making of borders, and planting, was executed by Mr. Nichol, the intelligent gardener, and from present appearances, future success is certain. The vines were one year old from the "eye," when planted last March, and the greater part are now (August 11) from twenty to twenty-five feet long, with proportionate strength of cane, and with good ripening, will be fully qualified to bear a light crop of fruit next year.

Most respectfully yours,
WM. CHORLTON.

The New England Farmer.

The Standard Agricultural Newspaper of twenty years standing, and which had been suspended for some months past, has again appeared. Four numbers, under the new Editors and Proprietors, Messrs. R. P. Eaton & Co., have been received. We rejoice to welcome this Old Pioneer Journal—the New England Farmer—as one of the *Old Live Books*.

The announcement of the New Firm of R. P. Eaton & Co., is as follows: Simeon Brown, Esq., Editor; S. Fletcher, Esq., Associate Editor; Russel P. Eaton, Esq., General Editor.

Right glad are we to welcome again to our sanctum the *Old* "New England Farmer" among our exchanges. It is a pattern newspaper—it looks to the best interests of the cause it serves, and its columns are always filled with useful matter. The Editors of the New England Farmer do not soil their sheet by the nonsense and tirade of the day—of murders, suicides, and monstrosities, but present the mind only such food as will make the reader better and wiser. In truth, the New England Farmer always will present an array of excellent dishes to suit the tastes of the many readers (may their names be legion), every dish fit to be "Eaton," and always done up "Brown."

The Latter Rains.

If ever the cultivator of the soil had reason to be grateful for a promising season, this is the time to show it, for never has there been a year to our knowledge when the season was more propitious.

The late rains have set the grass and established it; the recent cold weather has retarded the too rapid advance of the season, and the present week's rain comes as a healing balm to the chill earth, to refresh both leaf, bud and blossom, and save them from any injury that might arise from the cold.

Altogether, it is a indeed a glorious prospect ahead, and calls for a true and grateful recognition from the husbandman to Him—the Giver of all good.

It is to be hoped that all our farmers will be sure and improve the present moist season, and plow their land well, leaving goodly fields for "summer fallow," and thus be prepared for another year's crop, even though we should not be blessed, as we have been this year, by abundant rains. Prepare your fields now, and you will be ready for the next year.

Immense Importation of Breadstuffs from Chile, etc.

Our grain growers will now see the effect of speculation in breadstuffs, by the vast amount of flour, wheat, barley, bran, potatoes, etc., that has come or is coming from Chile, Australia, Oregon, and elsewhere, to flood our market.

With the stock on hand and the large amount that has been imported, and the immense amount still coming, the price of flour and wheat is beyond the price known before for a long time—and how long shall it continue?

By reports of some ten or a dozen vessels now on the way from Chile, etc., we have nearly 50,000 barrels flour, 20,000 sacks wheat, 20,000 barley, 10,000 oats, middlings, etc., bran and potatoes, etc.—food enough in these shipments alone to supply our State, with what comes from the East, almost until the new harvest, for it will be an early and a very heavy one. So farmers make your calculations for the price you will get.

To Business Men, Manufacturers, Inventors, Booksellers, and Wholesale Dealers in Agricultural Implements, Seeds, Etc.

We shall send you copies of this Journal that you may learn of California, and the opportunity there is for the sale of all New and Valuable Inventions, Books, Implements, Seeds, and Goods of all kinds, of a truly valuable and reliable character.

We can assert without the fear of contradiction, that California is the greatest Reading Population, according to its numbers, in the United States. We can assert, also, that no State in the Union is more ready to secure, buy and try everything new, that promises to be useful and valuable, and no State in the Union presents so wide a field for the sale of Valuable Goods of all kinds.

As a proof of this we can point to the fact that Fifty Millions of Dollars in Gold is sent away from our State, annually, to pay for Goods imported into our State, in addition to all the Grain, Wool, Wine, Ores, Hides and Tallow and other Products, the sum total of which is nearly Twelve Millions of Dollars more.

These are facts, and we desire to make them known to the best Business Houses in all departments of trade in *the Eastern* States and in Europe.

To do this effectually, we send this Journal abroad to those who are engaged in a large and prosperous trade, and we invite you to this journal and ask you to subscribe for it and place your business in its columns and thereby secure to yourselves a large and increasing business in the Golden State, thereby gaining to yourselves a Golden Harvest.

The Manufacturers and Business Men of the Old States know but little of the great opening in our State and its rapid increase in wealth, and we believe it is to their interest to learn of California, and the best way is to receive this Journal regularly, and thus learn of its vast resources and rapidly advancing greatness.

Those who receive the marked copies of our Journal are requested to communicate with us on business and we can accomplish much for them.

[For the California Farmer.]

NOW AND THEN.

Now, shadows rest upon our homes,
Freedom's land, freedom's land;
And shouts from every hamlet comes,
Sounds of war, sounds of war;
Old and young, now rush to arms,
Firmly stand, firmly stand,
Roused by ruthless wars alarms,
Echoing far, echoing far.

A gloom pervades our every heart,
Dark as night, dark as night;
Pray Heaven rend the clouds apart,
Sending peace, sending peace;
Then, shall brothers meet no more,
In deadly fight, deadly fight,
But dwell in love as days of yore,
And strife will cease, strife will cease.

So shall plenty bless our land,
And joy resound, joy resound;
And whitening sails invade each strand,
Freighted o'er, freighted o'er,
With offerings of a people's love,
Once in bonds, now unbound;
And Peace shall spread her wings above,
Evermore, evermore,

WOODBRIDGE, February, 1865.

Worth Reading.

We give the following *strictly private letter*, to show how things should be done, as the effort so carefully made to test the kinds of seed we have sent one of our kind and valuable subscribers, is a rich reward for the small favor at our hands. In the distribution of many thousands of packages of seeds, from our office, gratuitously, every season, it is truly most gratifying to receive even occasionally evidence that some care and attention has been given to the cultivation of varieties which, if only carefully tested, would prove deeply interesting and oftentimes very profitable. As we send out valuable varieties, for trial, into all sections of the State, and if our kind patrons but pay a visit to our Reading Rooms, when they visit the city, they would find it to their advantage as we always have some gift in store for them.

COLONEL WARREN—When, two years since, you so kindly sent us a lot of seeds and plants, we fully intended to give you a statistical account of our success with them, and my husband entered on his diary the times of planting and all such things concerning them. That book he had with him in Washoe, at the time of his death, and I have not been able to recover it, so I can only tell of the results in general terms. The coffee did not vegetate. The tobacco—we had no ground in good condition for that year, and last year I had so much care that I let it pass. North Carolina cotton grew and did very well; but not so well as the black seed cotton (Sea Island) the year before, as I raised about two pounds of lint from a small paper of seed; it seemed to mature earlier. The rice we sowed in drills, with great care; it grew finely until it had jointed for heading, then the rabbits discovered it, and preferring it to anything else, took all of it. The sweet corn did very fine, and last year I distributed it in the neighborhood. Beans from Tahati grew splendidly the first summer, did not bloom, and were killed by the next winter's frost. Of the flower seeds, six papers proved to be indigenous to California, and we had the wild and cultivated about the same time; the others were choice and highly prized; they succeeded, of course, as I never fail with flowers. The rhubarb promises well. The hop roots have supplied me with hops for my own use and some to give my friends. So you see how much we are your debtors for your generous gift, and though I have been unable to perform my promise of more detailed account of them, it is not from neglect or ingratitude. Now, much as I am indebted to you for past favors, I have still one more to ask, and that is that you will send me a few seeds of the true Hubbard Squash. I have raised them, and prized them very highly, for three years, but last year, through some inadvertency, they were planted too near the common yellow pumpkin, and the hybridization spoiled both, and I cannot get pure seed here. We feel very grateful for all your kindness, and hope some time to be able to make some more substantial return than words. Yours, with respect, *

Sportsman's Materials.—The Farmers of our State, who visit our city, or all who wish the best materials for a Sportsman, can always be sure of finding them at the Store of Wm. Rudolph, Pacific street, whose card is in our columns. Mr. Rudolph thoroughly understands his profession, and has some of the finest Rifles, Shot Guns and Sportsman's Goods, to be found in our city.

Daguerrean Partner Wanted.—We call attention to the card of an advertiser for a Business Partner in the Daguerrean Business. As we know the parties, the position and the business, we can say that it is a rare chance and an unusual opening. For a man with from $3,000 to $4,000 capital, it is one of the best openings for a permanent business and a profitable investment that can be offered.

NEW ADVERTISEMENTS.—We are grateful to our friends for a press of new advertising. We could only make room for a part this week. Next week we will do justice to all, and notice them as they deserve.

—The State of Nevada has negotiated a loan of $180,000 for one year, at the rate of two per cent. per month.

Horticulture.

Confusion in the Nursery.

When an amateur plants a garden, and shows that interest in his trees which he must to make them a pleasure of peculiar charm, his disappointment is intense if he finds a large portion of them prove false to their labels. These trees he has watched from year to year, by sunlight and perhaps by moolight; he has dug around them, and endeavored to make their bed soft and comfortable; has tried to make them grow regular by proper training and direction, as he would his children; has gazed with great delight upon their early vigorous shoots, and has particularly sought out their first appearance of fruit buds. But perhaps his Duchesse proves a Vicar, his Sheldon a Jargonelle, his Superfin a Napoleon, and his d'Anjou something of unknown worthlessness. Not so bad as they might be, some may say. No; sometimes something better than was ordered is got; but even with the few exceptions, it does not much mitigate the vexation. It amounts to about this—instead of having a choice selection of pears, or other fruits, he has only an ordinary mixture. He now begins to cut away and insert grafts of his choice. And here, unless he is very cautious in procuring his cions, he will be again brought to grief.

This evil may be unavoidable to an extent; but if we would seek a reform in the nursery, we must complain of its delinquencies. Honest men will be more careful; rogues less daring. The poet Butler wrote the following well-known couplet:

"Doubtless the pleasure is as great
Of being cheated as to cheat."

But this is more applicable to legerdemain than to labeling fruit trees. Mistakes or frauds in the nursery are so common that the victims may smile even at a simple allusion to them; and I fear myself I shall not be able to write a serious article? "Why," says one, "you must expect one-third of your trees false. Nurserymen have no means of telling one variety from another, except in rare cases, by leaf or peculiar growth; and even then it's nothing but reasonable conjecture. They are as frequently deceived as any one, and innocently propagate the deception." Perhaps this is generally true; new varieties particularly are subject to mistakes, as they are not readily recognized. But then if occasionally a man should get into the business whose ethics in trade are not "first rate," or are falling into decay—degenerating, as we say of some old fruits—and who thinks that rapid and handsome-growing trees, even of very poor sorts, are more readily brought into the market and sell better than those of a contrary character (some of our best varieties growing slowly), he might have the weakness to yield to the temptation, and furnish such trees for all varieties ordered? To the honor of nurserymen, however, I must say that I have never encountered but one in my limited dealings with them, who arrested such suspicion. With him I now think it was a fault rather than a misfortune. His establishment was within thirty miles of Boston, and as he has passed hence, to avoid offense, I will give him the posthumous synonym of "Crisp," should I again have occasion to allude to him. Pardon the retaliation.

About twelve years ago, having some pear stocks to work, I went into a neighbor's ground—who had lately set some choice pear trees from a popular nurseryman—and finding a tree marked "Seckel," I took a cion therefrom, and also, one from a tree labeled "Glout Morceau." The stock into which I inserted the Seckel soon commenced to grow rapidly, and continued most of the season to do so, surpassing everything else. It was very stocky and bushy. I began to suspect it was not the Seckel, and from a few specimens which it bore three years ago, I judged it might be the Buffum—not being acquainted with the habit of that tree. In 1863 it again bore a few small fruit, which plainly showed that it was neither Seckel nor Buffum, but a little pear so shocking and bitter as to nauseate one. How came it in the nursery? After waiting, however, ten years for disappointment, I felt partly recompensed by the splendid stock it gave me; being six inches through at the butt. It has anew a vigorous head of Swan's Orange, from cions which I knew grew on a Swan's Orange tree. The bitter specimens alluded to above I showed to the gentleman from whose nursery my neighbor's trees were purchased, and he quietly observed that it was some poor sort which had "crept in." In a year or two I can laugh with him about it.

The cions marked Glout Morceau also grew rapidly, and threw up very long shoots. They had the ash-colored wood of that variety. Getting a few specimens, I inquired of the same gentleman what it was, and he said it was the Glout Morceau. It certainly looked like it then. The following year it ripened up yellow in early autumn, with a fine blush, cracked and rotted badly on the tree. I then showed another specimen (a greenish one) to the gentleman, when he pronounced it the Catillac. Whatever it was it grew like a rocket. The stock is now doing good service.

Meeting Crisp one spring in Boston, about ten years ago, I bought of him some cions of the Duchesse d'Orleans—a variety which stood high in my mind—and they were inserted in a vigorous stock. They grew into a beautifully-shaped tree, and presented a clean, thick, very glossy, dark-green leaf like the Camellia. I imagined I recognized the leaf in Hovey's Fruits of America, where it is described. Whenever I saw the fruit or heard it praised, I exultingly exclaimed to myself, "Well, I've got that!" I watched it with interest, and in time it bore one fruit, which looked rather hard, dark and irony all summer; and when frost came it was placed in the cellar, where it remained till February. At this time it had changed its color (I had changed color about it before) seeming to be about ripe, and on being tasted proved rather sweet, but coarse and ugly. The Winter Nelis soon took the place of *such* an "Orleans."

At the same time I bought of Crisp some grafts of the famous Beurre d'Anjou. Inserting one in a good stock, it grew about five feet the first season, and was an inch in diameter at its base! The next year it threw out graceful and vigorous laterals, and from season to season continued to grow very rapidly, forming one of the most beautiful pyramids I have ever seen, without a touch of the knife. The shoots were a dark brown and the leaves dark green; but as I did not then know that the color of the wood of the d'Anjou was much lighter and ashy in general appearance, the error was not detected. But alas, a few years brought a cluster of small, worthless, dark-brown pears, which suddenly rotted on the tree, and showed conclusively that a tree is known by its fruit, not by its label. Could so handsome and rapid a grower as this have been retained in the nursery for the mere purpose of raising splendid trees?

Wishing to procure some buds of the Beurre Clairgeau, which stood at the top of the list of European pears, I called on a respectable nurseryman and found him in his nursery. I told him my errand, when he proceeded to a certain tree in a nursery row which he said had borne a little, and clipped me a twig. The same afternoon they were inserted in the branches of a vigorous Jargonelle, in hopes of sooner seeing the fruit. The next spring they started well, and I felt as if I had grown several inches myself, as I now had the "crack" pear! I used no other buds that day, nor in fact during the season. In a few years several pears appeared. It was a solace. But about midsummer I fancied the fruit was rather too round for the Clairgeau, and knew it a month after—as they began to turn yellow! Still they were hard, and were suffered to remain a little longer, till they assumed a blush, but were soon found all rotten at the core, with a rather firm shell. I showed one to the author of the buds at the Horticultural Rooms, and asked him to give its name. He said he did not know it, neither did he grow it! But, said I, you gave me the cions for the Clairgeau. He was astonished. Finally, he thought he might have it at a given place in his garden. A singular confession this, which compelled me to re-work two good stocks that now delight in the Bosc. Job had his trials, no doubt; but stocking a garden with choice fruit trees was not one of them!

Falling in with Crisp every spring for the first few years of my gardening experience, I bought a couple of dwarf pear trees for special locations—one the Beurre Diel, the other the Flemish Beauty. In about five years the latter bore; but the fruit, though small, was brown and had some resemblance to that variety. I was deceived for a year or two, but it grew better, when I ascertained it to be the Henry IV., a very excellent pear. The Diel grew very rapidly, even under disadvantages; and after about eight years bore one small button pear, succeeded by another the following year! As I inserted in its stock the d'Anjou, I could not help thinking that Crisp was not much unlike the pear described in the last paragraph.

This gentleman also gave me some cions of the Fulton, which proved to be the Lawrence; and some Lawrence which proved to be the Belle Lucrative. Also some of the Golden Beurre, which grew rapidly, but turned out a large worthless fruit, like the one noticed as the Glout Morceau above.

Wishing to grow the famous Tompkins County King apple, the ubiquitous Crisp was ready, and said I might have some cuttings from some young trees then on their way from New York State. When they arrived I paid him for them, and worked them on two vigorous stocks. In a few years one of them bore a few specimens. They were handsome and smooth, but seemed in August to be rather light-colored for the King, and a little too flat. A month more confirmed my suspicions, and still another told plainly that they were the Salmon Sweet! For this mishap I reserve *half* of my indignation, as one of the trees I shall let grow—in memory of the transaction and the man.

It must not be inferred that I was equally unfortunate in all my trees, or with most other nurserymen; for in several instances all, or nearly all, were true to label—even bundles of trees from Western New York, bought at auction, have proved so. But in regard to Crisp, truth compels me to say, that I do not recollect of ever having a tree or a cion from him that proved to be the variety for which it was purchased! Were he now among us, how muchsoever of the agreeable he might exhibit, I am impressed—in remembrance of the record he has left in my behalf—that I could not reciprocate it.

I did not intend to write anything like a sermon, but if, from the facts presented, a moral can be drawn, it will be gratifying. The reputation of nurserymen should be made known, whether good or bad; and purchasers of trees should be careful to whom they give orders, and in procuring cions endeavor to know from what trees they were taken. A great deal of delay and vexation may thus be avoided.—[D. W. Lothrop, in Magazine of Horticulture.

To Strengthen Fruit Trees.—Fruit and ornamental trees will sometimes so form their crotches as to split down under a heavy load of fruit or violent wind. This evil can be obviated in arching or cross-grafting. Take a vigorous shoot, in the Spring, and insert one end under the bark of the main stem and the other under that of the opposite branch. Tie the branches firmly together, to prevent slipping apart in windy weather. Or, instead of taking a separate cion, a growing sprout may sometimes be found near by the place needing to be strengthened, and by cutting off the top it may be inserted under the bark of the opposite limb. These braces may be put in every few years, as the tree needs them. Such "Siamesed" trees are quite neat and interesting objects to look at.

Fruit Trees.

HORACE WATERS, Ag't,
No. 481 Broadway, N. Y

THE DAY SCHOOL BELL.

40,000 copies issued. A new Singing Book for Schools and Seminaries, called the Day-School Bell, is now ready. It contains about 200 choice songs, rounds, duets, trios, quartets, and choruses, many of them written expressly for this work, besides 32 pages of the Elements of Music, which are easy and progressive.

Among the large number of beautiful pieces may be found, "Uncle Sam's School," "Don't you hear the children coming," "Always look on the sunny side," "The little lass," and "Little Lad," "Oh, if I were a little bird," "Bird of beauty," "Pretty pair tree," "Anvil Chorus," "Meet me by the running brook," etc. It is compiled by Horace Waters, author of "Sabbath School Bell," Nos. 1 and 2, which have had the enormous sales of 825,000 copies. Prices—paper covers, 25 cents, $20 per 100; bound 30 cents, $25 per 100; cloth bound, embossed gilt, 40 cents, $35 per 100. 25 copies furnished at the 100 price. Mailed at the retail price.

SABBATH SCHOOL BELL, NO. 1,

contains 144 pages, and nearly 200 tunes and hymns, and is the most popular S. S. Book ever issued. Among the most popular pieces are "Kind Words," "Eden Above," "Christian Hero," "Beautiful Zion," "I ought to love my Mother," "The Angels told me so," "In the Light," "Rest for the Weary," etc. Prices—paper covers, 20 cents each, $15 per 100; bound 25 cents, $20 per 100: clothbound, embossed gilt, 30 cents, $25 per 100.

SABBATH SCHOOL BELL, NO. 2,

is an entire new work of 192 pages, and nearly two hundred and twenty-five tunes and hymns. One million of these Bells have been issued and are now ringing through this and other countries. Among the many choice pieces may be found, "Shall we meet beyond the River?" "There is a Beautiful World," "Sorrow shall come again no more," "Don't you hear the Angels coming?" "Thou, God, seest me," "Sabbath Bells chime on," etc. Prices of Bell No. 2. are same as Bell No. 1. Both numbers can be obtained in one volume, price, bound copy, 40 cents, $35 per 100; cloth bound, embossed gilt, 50 cents, $45 per 100. 25 copies furnished at the 100 prices. Mailed at the retail price.

WATER'S CHORAL HARP.

A new Sunday School Book of 160 pages of beautiful hymns and tunes. It contains many gems, such as "Shall we know each other there?" "Suffer little children to come unto me," "The Beautiful Shore," "Oh, 'tis glorious," "Leave me with my mother," "He leadeth me beside still waters," etc. Price, papers covers, 20 cents; $15 per 100. Bound, 25 cents, $20 per 100. Cloth bound, embossed gilt 35 cents, $30 per 100. Mailed at the retail price. It is edited by HORACE WATERS, author of "Sunday School Bells," Nos 1 and 2, which have had the enormous sale of over 800,000 copies.

Just published by HORACE WATERS,
No. 481 Broadway, New York.

THE NEW PATRIOTIC SONG BOOK

contains 96 pages of songs, duets, and choruses, both sacred and secular, including 14 pages of prayers for sick and dying soldiers, and soldiers' Scripture Manual. It is well suited for social singing, as well as Sabbath worship. Among the many beautiful pieces may be found, "Where liberty dwells is my country," "The Christian Hero," "Three cheers for our Banner," "Come sing to me of Heaven," Columbia, the Gem of the Ocean," "Freeman's Gathering," "Columbia's King forever," "Marching Along," etc Prices—paper covers, cents, $10 per 100. Mailed at retail prices.

THE HARP OF FREEDOM

contains 32 pages of songs, duets, and choruses for Freedom. Among the choice pieces we would name, "Fair Freedom's morn," "O let my people go," "Over the mountain," "They worked me all the day," etc. Price 5 cents single, 50 cents per dozen, $3 per 100; postage 1 cent each

RUTH: A SACRED CANTATA

contains 126 pages. Words by Rev. Sidney Dyer, music by Prof. Cull. This is an excellent book for concerts for the young. Prices—paper covers, 20 cents, $15 per 100; bound 25 cents, $20 per 100.

THE REVIVAL MUSIC BOOK

contains 73 pages of tunes and hymns, designed for revival prayer, and conference meetings. Price in paper covers single copies 10 cents, $8 per 100. Mailed at the retail price

THE ATHENÆUM COLLECTION

contains 512 pages of tunes and hymns, new and old of the choicest kinds, for church, Sunday school, revival, missionary, temperance, prayer, and conference, and all kinds of sacred and social meetings. The music in this book has life and animation in it, like "Shining Shore," "Rest for the Weary," "Shall we know each other there?" "Shall we meet beyond the River?" "There is a Beautiful World," "Kind Words," "Sweet Hour of Prayer," "There is a Land of Love," "Suffer little children to come unto me," "God save the Nation," etc. Prices—single copies, bound, 65 cents, $55 per 100; cloth bound, embossed gilt, 75 cents, $65 per 100 Mailed at the retail price.

HORACE WATERS, Ag't
481 Broadway, New York,
Publisher of the above Books.

NEW INSTRUMENTAL MUSIC,

"Idlewild," "Polka Caprice," by M. Keller: "Morning Prayer," by W. F. Muller; "Summer House of Roses," gallop, by Mrs. Parkhurst; "Le Piri Polka;" "West Point March," 25c each. "Omstepe Waltz;" "L'Armetee Waltz; "Frederica Waltz," J. G. Bernard, 40c each. "We are coming Father Abraham," "Always look on the Sunny Side," "Brilliant Variations," by Charles Grobe, 50c each. "Shall we know Each Other There," for Guitar, by Bloomer, 25c. "Sunny Side," set of 20 easy arrangements for the piano, 10 by James Bellak, and 10 by Mrs. Parkhurst, 15c each. Mailed free.

HORACE WATERS,
Publisher, No. 481 Broadway.

NEW VOCAL MUSIC.

"Land of the Brave and Free," Rev. G. S. Plumley; "Your Fortune is too Small for Me," Comic Song, Maurice; "I will Wait at the Gate for Thee," E. Holden; "We parted with a Cheerful Smile," M. Keller; "One by one the Stars of Evening," "The Flowers Bloom in Linden Vale," S. Lawrence; "The Morning is Dawning," H. S. Leland; "There is a Beautiful world," "Shall we Meet Beyond the River?" "The Angel's are Hovering Near," "The Year of Love," "How Softly on the Bruised Heart," Mrs. Parkhurst: "Kindly Words and Smiling Faces," J. R. SEEDS,

NO. 414 CALIFORNIA STREET

Old Number 110,

Between Sansome and Montgomery streets,

SAN FRANCISCO, CAL.

THE UNDERSIGNED HAS ESTABLISHED a correspondence and business in Europe as to enable him to secure from the very best source—the most successful growers—their choicest seeds grown, of which he will always be in receipt, and in endless variety, imported directly from France and England, from well known responsible houses; some of the most prominent named in our catalogues.

It has been the experience of our best gardeners, growers, and all others who plant seed, that seeds raised in California are not fully reliable and cannot be for a series of year, until more capital, experience and scientific knowledge shall be given to the business.

HAS FOR SALE

Alfalfa or Chile Clover; Hungarian Grass;
Kentucky Blue-grass; Orchard Grass;
Red-top Grass; Sainfoin Grass;
English Rye-grass, Timothy Grass;
Red Clover; White Dutch Clover;
Crimson Clover, Lucerne, &c. &c. &c.

With many entire new varieties of Garden Seeds and prepared Lawn Grasses never before offered.

EVERY VARIETY OF

BEET, CABBAGE, CARROT, RADISH, TURNIP, CUCUMBER, MELONS, LETTUCE, ONIONS, TOMATO, EARLY AND LATE PEAS, BEANS, &c., &c., &c.

Tobacco Seed.

HAVANA, VIRGINIA, CONNECTICUT SEED LEAF, AND MARYLAND TOBACCO SEED.

COTTON SEED.

Guano from Johnston's Island.

FLOWER SEEDS (300 Varieties)

BULBS:

LILIES,	TULIPS,	HYACINTHS,
Amaryllis,	Anemones,	Ranunculus,
Narcissus,	Tuberoses,	Peony-rooted
	Gladiolus,	Iris,

and in endless variety, imported direct from France and GERMANY.

From his long experience in the Seed Business (thirteen years), and his very extensive stock of goods appertaining to an establishment of this kind, he is confident of his ability to satisfy his patrons.

Native California Evergreen

TREE AND SHRUB SEEDS

FOR EXPORTATION.

THE UNDERSIGNED, FROM HIS EXTENSIVE facilities and

Large Stock of Every Variety of Seeds

Can offer unusual inducements to

MERCHANTS IN THE TRADE, FARMERS AND LARGE RANCH OWNERS,

Who wish to be supplied in his line.

And would recommend that ORDERS FOR SEED be sent DIRECT to the undersigned, through the Express or by Mail, otherwise parties run GREAT RISK of being imposed upon, in case their Orders should be filled by some IRRESPONSIBLE ESTABLISHMENT.

☞ The Agents of Wells, Fargo & Co.'s Express are hereby authorized to act as Agents for the undersigned in taking Orders for Seeds and receipting for the same.

The undersigned is also permitted to refer to Dr. Warren, editor of California Farmer, who has had the experience of twenty years in the Seed and Nursery business, and is conversant with the high value of imported seeds, and their superiority to all other.

☞ Send for a Catalogue.

Eastern Correspondence.

Letters from an Old Californian at the East

NUMBER THIRTY-NINE.

New York, Jan. 16th, 1864.

War, Wealth and Music.

EDITOR CALIFORNIA FARMER:

The topics of conversation, recently, have been about two particular subjects of interest. First: The movements of Sherman's army. Second: The revelations of the Income Tax List. I cannot do your readers a greater favor than by cutting out some portions of our daily newspapers which will in all probability be new to them.

In the first place, every army officer or private can sing "Benny Havens, O," and for their especial benefit I copy the—

SONG OF THE ARMY OF THE TENNESSEE.

Tune—"Benny Havens, O!"

To the Army of the Tenne see,
Upon whose banners ride
The noble bird of victory,
The eagle of our pride.
Where'er there's death and danger,
'Tis ever sure to go,
To vindicate the noble flag
Of Benny Havens, O!

Chorus—Benny Havens, O!
Benny Havens, O!
To vindicate the noble flag
Of Benny Havens, O!

Here's to our first commander,
Vicksburg's U. S. Grant,
Who, in searching through the lexicon,
Could find no word like "can't;"
But he has since found what's better—
A way to crush the foe
That arrays itself against the flag
Of Benny Havens, O!
Chorus, etc.

Here's to honest Billy Sherman,
Our gallant old tycoon;
May his star of fame be ever bright
As the summer's sun at noon;
May his name float down time's channel
Where our country's fame will go,
As one among the brightest lights
Of Benny Havens, O!
Chorus, etc.

To the memory of our McPherson
We drink in silent sorrow;
A night of grief now shrouds our hearts,
A night that knows no morrow.
He fell as falls the soldier,
With his face towards the foe—
A nobler never clinked a cup
At Benny Havens, O!
Chorus, etc.

To our noble brothers lying
At Vicksburg's bloody rear,
May their lonely graves be watered
By an honest comarade's tear;
May the traitorous hands who slew them
No mercy ever know;
Nor in the future world e'er meet
With Benny Havens, O!
Chorus, etc.

To the martyr heroes fallen
In Atlanta's grand campaign,
Their life blood still cries out to us,
From the gory battle plain,
For vengeance on the traitorous
And sacrilegious foe,
Who dared betray the starry flag
Of Benny Havens, O!
Chorus, etc.

In the days that are coming,
When the present scenes are fled,
And the prairie flower's blooming
Above our final bed,
May those who survive us
Pass the bottle to and fro,
And drink to those who are sleeping
With Benny Havens, O!
Chorus, etc.

Here's a health to Christian Howard,
The "Havelock" of the day;
The hero who gave his own right hand
At Fair Oaks' bloody fray.
May his days' grow bright and joyous
With ages coming snow,
And his name be e'er embalmed in song,
With Benny Havens, O!
Chorus, etc.

And their staffs so gay and festive,
As they rove through Southern bowers;
And talking sweet to Southern belles,
Of moonlight, love, and flowers.
May they ne'er forget their duties,
As they sentimental grow;
But teach the darlings Union
With Benny Havens, O!
Chorus, etc.

Secondly: In California we have been in the habit of speaking of the incomes of some of our rich men as being large. Herewith I send a tax list of only a portion of *one* of the districts of New York city. The Treasury Department put a stop to the publication of the other lists:

In addition to the names above printed, there are ninety-one others in the same district whose incomes range from $22,000 to $60,000 each, per annum.

Fashions and Dresses.

My lady friends may expect me to say something about the dresses and appearance of the fair New Yorkers. The handsomest costumes were made of blue and pink silk, universally made high in the neck; the lace and diamonds were worn in greater profusion than I have ever before observed. Unfortunately there seemed to be a rivalry among the ladies as to who should build up the most extensive flower garden on top of the puffs which seem to be the favorite head-dress of the fashionable belles of the Metropolis. Flowers are beautiful in their place, but they certainly do not look attractive when they are used for such a ridiculous purpose. Occasionally I called on some lady whose bright face I could look at without laughing at the immense garden the hair-dresser had built on her head.

The Elopement Case.

The San Francisco elopement case excites great comment among the Californians in New York. To a few of us the painful details are spoken of with profound regret. I shudder with horror when I close my eyes and remember the blue-eyed child who used to be such a favorite with the circle which we used to belong to in days gone by. Will parents, in California, never learn wisdom? The newspapers are continually calling public attention to evils which are strangely and criminally neglected. You will not, probably, be surprised to know that the gossip of San Francisco is in less than a month current here.

California Belles.

There are so many Californians here that one feels at home in Broadway, or in the parlors of the Fifth Avenue or Metropolitan Hotels. The belle of the Metropolitan is a young lady from Benicia; and another lady, from Benicia, shines among the brilliant galaxy of ladies who crowd the splendid halls of the Fifth Avenue Hotel after dinner. M. A. S.

EDUCATIONAL.

Miss Lammond,

LATE PRINCIPAL OF

BENICIA SEMINARY,

HAS THE PLEASURE TO ANNOUNCE THAT she has purchased the Seminary for Young Ladies known as the

CALIFORNIA COLLEGIATE INSTITUTE,

For Young Ladies,

No, 64 Silver Street,

SAN FRANCISCO, CAL.,

formerly under the control of Mrs M. B. SWEDEN STIERNA, and has removed there with her entire corps of

Superior Teachers and Professors.

The New Term Commenced

January 4th, 1865.

The location of this Institution (on the suburbs o the city) commands at once for its boarding pupils, the retirement of a country life, with the advantages of the finest professional talent from the city.

As Miss Lammond desires to make this a permanent Institution, no efforts will be spared to make it worthy of the patronage which has been so liberally extended to her during the past four years.

As the class of Boarding pupils is nearly filled, those desiring admission will find it necessary to apply early.

For further particulars, Catalogues may be obtained by calling upon or addressing

MISS M. LAMMOND,

10 Principal.

Oakland Seminary for Young Ladies.

Mr. G. M. Blake.....Principal.
Mrs. I. G. Huggins.....Associate Principal.

THE SEVENTH YEAR OF THIS INSTITUTION COMmenced on

MONDAY, JANUARY 9th, 1865.

For Catalogues and other particulars apply to the Principal, corner of Eleventh and Washington streets, Oakland.

Catalogues can also be obtained at the Book Stores on Montgomery street, San Francisco. 23tf

EDUCATIONAL.

PACIFIC

National Business College,

SAN FRANCISCO, CAL.

Practical, useful Education for Young Men, Boys, and Men of Middle Age.

A BUSINESS EDUCATION FOR A BUSINESS MAN—THE RIGHT KIND OF AN EDUCATION FOR YOUNG MEN.—THIS IS THE BEST PLACE FOR MERCANTILE BUSINESS IN THE WORLD.

IMPORTANT TO THOSE WHO CAN DEVOTE A FEW WEEKS OR MONTHS TO STUDY, AND TO PARENTS WHO HAVE SONS TO EDUCATE.

THE BEST COURSE OF STUDY AND THE GREATEST AMOUNT OF PRACTICAL AND USEFUL INFORMATION ACQUIRED IN THE SHORTEST POSSIBLE TIME AND AT THE LEAST EXPENSE, TO INSURE SUCCESS IN LIFE.

"Acquire a Good Commercial Education, and you will as surely succeed in Life as that cause produces effect."—Abbott Lawrence.

A MODEL COMMERCIAL COLLEGE.

THIS NOTICE IS INTENDED TO GIVE FULL INFORmation of the course of Study and operation of the Pacific National Business School, San Francisco.

We respectfully solicit from Young Men and Men of Middle Age, who would succeed in business, and Parents and Guardians who have Boys to educate, an examination of our system of Practical, Useful Education, the superiority it possesses over every other institution of learning on this coast.

This School claims superiority and great merit over other institutions professing to teach the Commercial branches, by its system of combining THEORY and PRACTICE, on the London Cora Excuange principle, it being done in no other School on this coast.

COURSE OF STUDY.

The plan adopted in teaching combines PRACTICE with THEORY; instead of being confined to Text Books, the pupils are exercised in making original entries of every-day business transactions; journalizing, posting, balancing accounts, opening and closing a great variety of different sets of Books, both for individual and partnership business, where the business has been prosperous or adverse, thus qualifying the student for entering into the practical duties of the accountant in any kind of business.

THE COURSE OF INSTRUCTION

Consists of Double-Entry Book-keeping, embracing Wholesale, Retail, Commission, Manufacturing, Banking, Steamboating, Railroading, Individual, Partnership, Joint Stock, Compound, Company, Mining, Ranching, Farming, etc. In the routine of practical instruction the pupil becomes familiarized with changing books from single to double entry, changing stock books to partnership, and every form and principle known in well regulated establishments,

PENMANSHIP.

The beautiful and easy system of specimen Penmanship is taught in this College, and the only place where it is taught on this coast.

CORRESPONDENCE

Is carefully explained, and rules and principles are laid down, the observance of which will lead to the highest attainment in this art.

It is known to all that there is a great deficiency existing in this commercial branch.

BUSINESS ARITHMETIC.

This is a branch of the greatest importance, and you can be assured will not be neglected.

LECTURES

Are given to the students on Commercial Law, Nature and Causes of Wealth, Political Economy, Advertising, and general topics relating to success in business.

DIPLOMAS.

Those completing the course and passing a satisfactory examination before the Examining Committee, will receive Diplomas of the Institution.

THERE WILL BE NO VACATIONS.

Each pupil receives individual instruction, and persons can therefore enter at any time.

TERMS.

Scholarships are issued which give the scholar the privilege of reviewing the course at any future time, free of charge, for SIXTY DOLLARS, with a deduction of FIVE DOLLARS when two enter from the same family or the same place at the same time. When four enter at the same time from the same place, TEN DOLLARS will be deducted from each scholarship.

THE TIME REQUIRED

To complete the course depends somewhat upon the previous education and ability of the student, usually from ten to sixteen weeks, scholarships granting the holders the privilege of completing the course regardless of time.

A common school education is all that is necessary to enter the course of this College advantageously.

For further particulars, call at the College, 747 Market street, or address

M. K. LAUDENSLAGER,
President Pacific National Business College.

Santa Clara College.

THE FOURTEENTH ANNUAL SESSION OF THIS INstitution will commence on MONDAY, August 29th. The plan of instruction embraces two regular courses—the Classical and the Commercial, besides a preparatory Department

THE CLASSES OF THIS ESTABLISHMENT ARE opened since the 31 inst., and the select and attending scholars receive a solid instruction proportionate to their age and mental facilities.

The programme includes all the branches of tuition fitted for children from 6 to 12 years of age, as the first step for a higher teaching.

The English, French and Spanish Languages are taught practically and theoretically, by competent and special teachers.

Boarders can be accommodated in the establishment, where they will find the comforts and care of a home.

An evening class of French and Spanish is also open for young men every other day, at 7 o'clock, P. M. Call on the Principal from 9 A. M. to 12 M. 1

EDUCATIONAL.

NAPA

COLLEGIATE INSTITUTE,

For Young Ladies and Gentlemen.

NAPA CITY, CALIFORNIA.

NAPA CITY, IN POINT OF LOCATION AND Climate, is unsurpassed in the State. It is about four hours' ride by steamboat from San Francisco, and three by stage from Benica. There will soon be a daily boat from the former place, and there are now two daily stages from the latter. There are extensive accommodations for Boarders in the College Building, with large and well-ventilated sleeping apartments. Teachers reside in the Building, and will have a constant oversight of the Students who are Boarders.

GOVERNMENT.

Young Ladies will receive no calls from any except Parents and Guardians. Ladies and Misses will not leave the College grounds, except in company with their Instructors. Young Men and Lads are not allowed to lounge about the Stores, Hotels, and Saloons of the village. All pupils are required to attend Church on the Sabbath. Parents will choose the place of worship for their children.

MILITARY DEPARTMENT.

This Department has been opened with a view to the permanent establishment of a Military Academy on this Coast. From three to four years will be requisite to complete the course in this Department. The State has furnished us the necessary equipments for such a school. The Drills will be attended to daily.

TUITION.

Spelling and Reading, per month	$2 50
Common English, with the above, per month	4 00
Higher English, with the above, per month	6 00

No deduction will be made to any pupil leaving the Academy before the expiration of the term—cases of sickness excepted.

Foreign Languages, Plain and Fancy Needle-work, form no Extra Charge.

For further particulars, refer to the Superioress of the Academy. 4

S. D. & H. W. SMITH'S

American Organs.

SIBERIA OTT, Wholesale Agent,

748 Broadway, New York City.

THE

MOST PERFECT AND BEAUTIFUL

Musical Instrument

IN THE WORLD

FOR THE

American Home Circle.

WITH THE MOST PERFECT CONFIDENCE, we call the attention of the public to the AMERICAN ORGAN, as an instrument long desired in the Family Circle, and with our patent improvements is adapted to all kinds of Music, more especially to Sacred Music, with its sustained tones and harmonies, so much desired and sought for in American homes.

The AMERICAN ORGANS are superior to all other instruments of the kind, in many important particulars.

They are superior in their greater fullness and completeness of tone, volume and power. They are superior in expression, quickness of action, and elasticity of touch, rendering them perfect in rapid movements.

They are superior in quality and beauty of tone, and when controlled by the DOUBLE BELLOWS and BLOW PEDALS, Knee Swell, etc, the most charming effects can be produced, from the softest whisper of the Æolian harp to the full volume and power of the church Organ, thus enabling the performer to give expressions not to be found in any other instrument.

The TREMOLO stop has a pleasing and beautiful variety sympathetic in quality, appealing to the tender emotions of the soul, producing effects the most charming and soothing; it is universally admired and appreciated. The KNEE SWELL gives the performer full control of the tone, enabling him to graduate from the *Pianissimo* to the *Fortissimo* at pleasure, and combines the effect of the Expression Stop of the French Organ in the AMERICAN ORGAN, more perfectly and easily managed.

With all these combinations and improvements of Double Bellows, Pedals and Swell, the AMERICAN ORGAN excels in Expression, Variety, and Power, and has all the quality and capacity of a full Orchestra, and in the hands of a master is capable of the most complete orchestral effects.

The AMERICAN ORGANS are superior in Mechanical finish of the action and interior portions of the Musical parts. The valves are of material expressly prepared to avoid all sticking, cracking, or decomposition, are thus durable and will be always in order.

The Keys, Reeds, etc, are perfect in their finish, and this gives the quickness and sprightliness of tone, brilliancy, etc, equal in every respect to the "percussion stop" of the French Organs, but not like them in danger of getting out of order.

The AMERICAN ORGANS are by far the most beautiful in exterior finish, forming a handsome piece of furniture for the Parlor, Boudoir, or Sitting Room, occupying but little space, and perfect and complete in every particular.

THE

AMERICAN ORGAN

Makes Home Attractive; and Refines and Elevates the Minds of All.

Beautiful in its Appearance and Effects.

The AMERICAN ORGANS are finished in Rich Rosewood Cases, varnished and polished, forming an elegant piece of Furniture. Also, in Black Walnut Cases, and in Oak, finished in oil, and especially adapted for Churches, Lecture and Lodge Rooms.

They take but little room, are only 35 inches high, and from 34 to 47 inches wide. *They cost but a trifle more than Melodeons*, and yet possess many times their advantages in musical capabilities.

The California Farmer.

SAN FRANCISCO:

FRIDAY.....MARCH 3, 1865.

THE CALIFORNIA FARMER READING-ROOM AND MUSEUM OF NATURAL HISTORY.

20 Clay street—Marble Building—Up Stairs.

The Farmer's Headquarters.

The Editorial Rooms and Museum of the FARMER OFFICE are always open, and an attendant ready to make a visit instructive to those who take an interest in the productions of our State. Samples of all productions: grains, grasses, fruits, models, inventions, minerals, and specimens in Natural History innumerable, are constantly being added.

Farmer's Reading-room.

Farmers and Mechanics, from the country, who visit San Francisco, should visit the Free Reading-room and Museum, at the FARMER OFFICE. Members of the Press, and Strangers, are particularly invited to avail themselves of these rooms. Newspapers from every State to which we have access by mails, as well as Foreign Newspapers, Periodicals, and Magazines, are upon file and on the tables for use; a Good Library of hundreds of volumes, with works illustrative of Agriculture, Horticulture, and Floriculture, works for reference upon all Sciences, with a Cabinet of Minerals, Coins, and Curiosities of interest to the Naturalist, to which we invite all.

Immigration Office.

ew comers to California can always obtain all needed information about Lands, Farms, etc, at the Farmer's Reading room, 320 Clay street. Most cheerfully we bid all welcome to our Sanctum.

TO AGRICULTURAL SOCIETIES ABROAD

Exchange of Seeds, Books, Etc.

HAVING established large and spacious Reading Rooms, in this city, which contain Libraries, Cabinets, and hundreds of Newspapers, all free to those who wish to enjoy the benefits thereof, we now ask coöperation from all Agricultural Associations in the Old States and Europe, for the *Exchange of Seeds, Specimens, Books, Etc.* We shall be happy to reciprocate any and all favors, and comply with any direction made to us connected with such an enterprise.

Purchasing Agency.

Having had the experience of over thirty years in dealing in Trees, Plants, Seeds, and Agricultural Implements, we feel that we are fully competent by our experience in purchasing such articles to make a saving of from five to fifteen per cent for the great mass of purchasers. We will therefore offer to make purchases for all who wish our services, of any of those articles named, or for any articles of merchandise for our Farmers or Ranchmen, and ship the same as they shall direct.

In order that we may do their business in the most satisfactory way for them and ourselves, we shall wish that all who send orders should be as explicit as possible as to their wants—describing as minutely as they can; and, where they desire our judgment, we will do our best to suit them.

Our charge will be Five per cent, together with the cost of packing, freight, drayage, etc. Orders should inclose satisfactory references or the Cash; or bills could be sent by Express, to be collected on delivery.

We shall be happy to attend to the purchase and shipment of Trees, Seeds, Plants, etc., as this is our especial "hobby," and we know we can satisfy all that send us their business attend to.

☞ THOSE who receive a number of the FARMER with this paragraph marked, may understand that it is sent to them for their examination, hoping it will meet their approval and induce them to subscribe, and ask their neighbors to do so.

Postmasters and others, who may receive the paper, will oblige us by soliciting subscriptions, or putting it in the hands of those that will. Subscriptions may commence at any time.

Send for Sample Papers and get up a club. Address PUBLISHER CALIFORNIA FARMER, San Francisco.

TERMS OF ADVERTISING.

THE charge for Advertising in the CALIFORNIA FARMER (payable in advance), is **One Dollar** for five lines, or less of space, in nonpareil type, for one insertion, and ten cents a line for any larger space. Each subsequent insertion half these rates. This it is believed affords the cheapest and best medium of reaching the Agricultural community on this coast. As heretofore, the right is reserved to reject any advertisements deemed objectionable.

☞ SEND MONEY BY EXPRESS.

reason of the present uncertainty of our mails and post office arrangements, we would request those of our patrons who remit us money in letters, to do so through Wells, Fargo & Co's Express, or register them, then they will come safely and promptly. Letters are so long delayed and so repeatedly lost that we make this request—we will cheerfully bear the extra expense.

☞ Take a Copy.—Are You a Subscriber?

WE have distributed many thousands of copies of this journal during the Fair Season, and we have a just reason to hope that among these thousands we shall find many persons who will desire to become subscribers to this paper, now the oldest newspaper of the kind on the Pacific coast, a journal, too, that has been wholly devoted to the Home Interests of of our State. Those who desire it, in our city, can have it left at their residences by a carrier, every week. See terms at head of column.

Transactions of Agricultural Societies.

WE would ask of those Societies in the Atlantic States and Europe, to whom we send our Journal, to send us the transactions of their several Socities, so that we may give the benefit of their perusal to visitors, from the several States, who are callers at our Reading-rooms. By this means we can lay before them the progress of Agriculture in their former homes, and thus advance the interest of both Atlantic and Pacific States.

Patent Rights.

IT has been, and will be, one of our specialties to aid all who desire to secure PATENT RIGHTS, and to give them information and assistance in preparing their papers. We can facilitate them greatly in this matter as we have all the Laws and Rules of Action touching these things. Many models can be seen at our Office and Reading-rooms, where all are invited freely.

TO READERS AND CORRESPONDENTS.

We have received some very interesting original lines from an early Californian, entitled "The Return of the Wanderer." They will appear in our next.

A valuable Essay on the the subject of Petroleum, Mining and Agriculture, and also bearing upon Education. It will appear next week.

We most cordially thank our many friends for their communications and many kindnesses. They are fully appreciated.

A VISIT FROM I. N. HOAG, ESQ., SECRETARY STATE AGRICULTURAL SOCIETY.—We have had a very pleasant and satisfactory visit from the able Secretary of the State Agricultural Society, from Sacramento. Mr. H. comes to our city to gather information and plan out the work for the coming State Fair, this autumn at Sacramento. From many interviews, we are convinced the Secretary is head, heart and soul in the work, and he will aim to place the Society on a better standing than ever before.

MY FARM FOR A SHEEP!—We notice this heading to an advertisement which appears in the Middlebury Register. The farm is described as containing fifty acres, meadow land, and mostly fenced—the price a No. 1 "Merino Buck," or its equivalent in Greenbacks. This shows the value of Merino Sheep in Vermont, if land is worth anything, and from what we have recently seen of sales in Vermont it must be so. The advertiser is S. B. Rockwell, Esq., well known in California in late years as a large dealer in Sheep, an excellent writer of prose and poetry, now residing in Vermont.

Our Country Newspapers.

We wish the citizens of every county, especially the working men—the real industrials of our towns—would feel a proper interest in their local papers and give them a just and liberal support. There are many ways in which the citizens of all classes can aid their own county journals, and do a great good to the public as well as advance their own interests. There are three ways which occur to our mind in which citizens can aid the newspapers of their own counties, and these plans they should be sure and carry out. 1st—They should subscribe and *pay* for the paper voluntarily and cheerfully, as a means to advance the interests of their community. 2d—They should communicate often with the Editor, and be ready to make known to him all the important facts, the publication of which will advance the true good of that county. Giving him information of the success of every production of the earth, and especially new products, and of all inventions or discoveries, the knowledge of which will do good to somebody; all information about schools, roads, bridges, markets, etc. By a manifestation of such an interest for their own paper, men advance their interests and take the very means for prosperity to themselves. 3d—They should not only inform the Editor what has been done, but show him what can be done by the exhibition of the product thus grown or manufactured. The office of the country newspaper should be the *bulletin board* and the *barometer* that shows the prosperity of the county. By such a course there never would be a complaint that the newspaper is not worth taking, for it would be a paper made by the people themselves and full of interest to them. We have always found the *best* and *truest* patrons of *our* paper among those men who were the subscribers of our county papers, and when they have thus become interested in their local paper, they are ready to receive one of a wider or more extended circulation, and embracing interests identified with their own.

OUR EXCHANGES ABROAD.

It has been the custom of this Journal to exchange with all the prominent Agricultural Journals of the United States and Europe, and also with the prominent Scientific and Literary Journals everywhere, and to obtain all the information from them that would be of advantage to spread before our own readers, to aid them in all their enterprises. From all our exchanges we have always taken pleasure to give credit where credit was due, no matter whence valuable information came, whether from the wealthiest and most influential Journals or from the humblest. What we sought was Truth, that would advance our cause. For Eleven years we have been liberal, even profuse in our Exchanges, often giving our Journal (price $5 per annum), to a Journal that solicited an "exchange," although the price of that Journal was but *fifty cents* per annum. We did so hoping they desired information of our Golden State, that they might give that knowledge to their readers, but we regret to say we look in vain for much manifestation of good will to California, and rarely do our Eastern Journals speak in praise of her, but on the contrary they seize every opportunity to spread before their readers such wild and marvellous stories and tragical scenes, as tends to disparage immigration to our shores, and we know, for we have proof sufficient in our possession to show, that the Eastern Journals are not willing to present California to their readers as she truly is—"THE GARDEN OF THE WORLD,"—lest the picture should tempt their energetic and thriving population to come to our shores.

We have been earnestly watching for several years during the war, to find those journals that seem to look toward California with any interest, and to see if they ever would speak encouragingly of our State, but we look in vain. Here and there, like an oasis in the desert, some of the Horticultural Journals do us justice, but these are the *exceptions*, not the rule, and it is only with sorrow that we note this. For instance, the remarks so disparaging to our State, attributed to *Dr. Bellows*, are heralded all over the East; they seem to take pleasure in telling that California is *bankrupt*, and her people spend all as they go. Let those who thus slander California look to the *munificent charities* of our State, and blush for their own littleness.

We shall watch a brief time more to see what journals will do justice to California. We shall hope they will occasionally speak of her as she deserves, and remember, too, that unless they can speak well, *they better be silent;* and if justice is not done by the press abroad to our State, the *Press of California* will do it for the State. After a brief term, those journals that now receive the Farmer in exchange, that fail to reciprocate courtesies, and *see others as they themselves are seen*, must not expect that we shall send them a journal that is $5 a year in gold, in exchange for a paper that is one-fourth the value in currency. If they desire exchage at our hands, they must either send us the difference in *gold*, or give their readers such facts of interest about our State as will do our people good. Such acts on their part will amply repay us. This is the only condition on which we can continue the exchange.

We cannot consent to exchange with papers that seem to take pleasure only in showing up the dark side, and never speaking of California a word of cheer. California has built up the East with her treasures, and she must have justice if the Heavens fall.

Economy Washing Machine.—This truly valuable Machine, invented by our Pioneer Farmer, John M. Horner, Esq., of Mission San Jose, is now winning golden opinions from the Housewives of our State. We are glad to know Mr. Horner has a good prospect soon of being rewarded for the untiring industry in perfecting his invention. Several valuable improvements have been recently added to it, and it is now one of the best Machines known. Several of our Public Institutions that purchased *one* on trial have now secured several of them on account of their superior excellence.

ARTICLES RECEIVED AT THE CALIFORNIA FARMER EXHIBITION ROOMS, No. 320 Clay Street.

We have received from the Publishers, Messrs. Ticknor & Field, Boston, a copy of that beautiful Poem, Enoch Arden, by Alfred Tennyson. We are pleased to know that the publishers have issued a large edition in a cheap form, one edition at the price of Twenty-five Cents, so as to place it in every household in the land. Let every family secure a copy of some form, it is one of the most charming Poems written by the gifted author.

We are in receipt of the new and varied Catalogues of Messrs. Vilmorin, Andrieux & Co., the celebrated Seedsmen of Paris, France.

We have received also the new Catalogues of J. M. Thorburn & Co., Seedsmen, of New York, the most extensive and reliable Seed Warehouse in the Eastern States. We call special attention to their advertisements in our columns—their House is one of the most reliable in the land.

We have received copies of the reply of the President and Directors of the Central Pacific Railroad, to the letter of L. L. Robinson.

Let the public fully understand that L. L. Robinson and the Sacramento Valley Railroad, and L. L. Robinson and the San Francisco Steam Car Railroad to the Mission, are synonymous terms—let the public understand fully that L. L. Robinson versus these roads are antagonistic to the great public interests connected with the Pacific Railroad, and the whole spirit of the opposition will be fully known.

We have the very able speech of the Hon. C. W. Tozer, Speaker of the Nevada Assembly, upon the Pacific Railroad. The honorable Speaker has done himself and his constituents honor by his manly effort to aid a good and noble work, against the moneyed influences of combinations and monopolies that retard the growth of Nevada and all the Mountain region.

Blackwood's Magazine, for January of the present year, comes to us with renewed interesting contents. The article entitled "A Visit to the Cities and Camps of the Confederate States," is of great interest, and written with care. "Italian Patriots," and "Life in an Island," are each superior articles. Blackwood's Magazine is one of the old standard periodicals, unrivaled in its able contributions, and ever filled with the choicest productions of the times. Geo. H. Bell, Esq., is the special agent of Blackwood.

The Twelfth Annual Report of the Superintendent of our Public Schools has been sent us by the able head of the schools. At the earliest moment we shall present such facts as we esteem of greatest interest. The Report should be read by all who are interested in the cause of education.

The California Teacher, for March, is out, and as usual filled with excellent and useful matter. The "Geography of San Francisco" is continued, and as a statistical table of important records, worthy of the attention of all. We would like to see literary productions from some of the teachers in this monthly. It would add much to its interest. Every teacher in the State should have it, and coöperate with it in its good work.

We have a very interesting sample of Hops, a native of Mazatlan, to which we call polite attention. Sample can be seen at our rooms. They were kindly sent us by our highly esteemed friend, the good old pioneer, formerly of our city, Colonel A. J. Grayson, truly the Audubon of the Pacific.

Our Illustrations.

We feel confident that our patrons will be gratified with the present number of our Journal.

Besides the valuable matter it contains in every department, the present illustrations will be valuable to those who are about to erect such ornamental structures.

We have recently received many valuable cuts of Fruits, Stock and Buildings, so we shall be enabled to offer our readers one of the handsomest sheets ever published on this coast. The California Farmer, now in its *twelfth year*, is the oldest advocate of Home interests in the State, and we believe *we* can say, without egotism or vanity, one of the best Agricultural and Home Journals of the day.

Our list of contributors and friends that aid with valuable information, cannot be equaled by any journal of the kind, and our resources for useful intelligence superior to that of any other, by reason of a knowledge of the subject and familiarity with it for twenty-five years, in almost daily practice. We therefore invite the attention of our friends and the public to our forthcoming illustrated numbers, for one of the best Home Journals ever yet published.

Causes of Excessive Mortality of Infants.

We ask the special attention of our readers to the important and valuable Lecture of Professor Blake, of the Toland Medical College, which we give, in part, this week. The subject is one of so much importance to Humanity that we give it in full. This Lecture speaks volumes, and we trust that every *Mother* in the land may read it. Bold, fearless and truthful, it tells home as to the causes by which the slaughtered innocents are sent by thousands to their early graves. The conclusion we will give next week.

This able Lecture, of Professor Blake, is worth ten times the whole cost of this College, to suffering innocents.

THE great American farm of Hale & Spring, Buenos Ayres, is doing grandly. No flock this year has done badly, and some have gained fifty per cent. That farm will ship two hundred and fifty bales of wool this year, of eight hundred and fifty pounds each, being over one hundred tuns of wool.

SEEDS FOR OUR SUBSCRIBERS.—Our subscribers from the country, who visit the city, are invited to call our rooms, and obtain such seeds as they can use to advantage, and such varieties as we have now on hand for distribution.

PREMIUMS FOR THE FARMER!

$500 in Premiums!

Splendid Inducements to Clubs!

Desirous to offer inducements to all who will form Clubs for this journal, we offer the following liberal Premiums:

For every Club of FIVE, and $25, we give Atlantic Monthly, $4, Godey's Lady's Book, $3, and an extra copy of the Farmer, $5, for one year.

For every Club of TEN, and $50, we give Atlantic Monthly, $4, Godey, $3, Harper's Monthly, $4, Arthur's Magazine, $2, and an extra copy of the Farmer, $5.

For Clubs of TWENTY, and $100, we give Atlantic Monthly, $4, Harper's Magazine, $4, Godey, $3, Arthur, $4, Gazley's New Pacific Monthly, $5, the Eclectic Magazine, $5, any of the Quarterlies, $5, and an extra copy of the FARMER, $5.

For Clubs of FIFTY, and $250, we will give as a Prize one of *Wheeler & Wilson's* best plain *Sewing Machines*, valued at Sixty Dollars, with the Atlantic Monthly, Harper's and Godey.

For Clubs of SIXTY, and $300, we will give as a Prize a Sewing Machine, valued at Seventy-Five Dollars, the Atlantic, Harper's and Godey,

For Clubs of EIGHTY, and $400, we will give a splendid Wheeler & Wilson Sewing Machine, valued at One Hundred Dollars, with two selected Magazines.

For a Club of ONE HUNDRED, and $500, we will give one of Wheeler & Wilson's best Machines, with all the Extras, worth One Hundred and Twenty-five Dollars, and two Magazines selected by the party.

The above offers we believe will richly pay persons for giving a portion of leisure time and influence, and we believe it can be easily done, for there are many places where we have never used exertions to circulate where success is certain, in these many new localities, and we offer these inducements as an encouragement to win the premiums.

This will furnish any family with a library for a little brief labor to extend our circulation.

☞ We will suit the wants of all who procure us Clubs, by substituting for any of the above the Scientific American, Country Gentleman, Rural New Yorker, Prairie Farmer, Genessee Farmer, Boston Cultivator, Massachusetts Ploughman, Maine Farmer, or Agriculturist, making, however, the total value of premiums the same.

SPECIAL PRIZES FOR COLLEGES.

We desire to procure Views of all the Colleges and Seminaries of note, in our State, and we know of no better way than for us to offer Premiums to those Artists who shall be connected with the Drawing Departments. We therefore offer the following:

For the best Pencil Sketch, of *three offered*, of the Buildings only—a richly chased Gold Thimble.

For a Drawing of the Buildings and Grounds—a Ladies' Rich Needle Case and Materials, worth double the First Prize

For a Crayon Sketch of Buildings and Grounds—a Prize the value of the Second offered.

For an Oil Painting—a Prize worth double the latter—an Opera Glass, or a Japan Writing Desk.

For the Second Crayon Sketch—an elaborate Photograph Album.

The New Terms of Our Colleges.

As it will be our aim always to serve the cause of Education, we shall devote a space in our columns to the time of the new Terms of the various Colleges, Academies, and Seminaries of learning, and if the Principals of each will send us information of the same, the time of each will be placed in this column; and if they will send us their catalogues we shall be happy to distribute the same from our Reading-room, to which we invite all who are interested in the Cause of Progress in California.

We hope we shall have the earnest co-operation of all Principals and Teachers, and to receive communications for publication that will advance the cause of Education. Our journal having a wide circulation, we can thus give extended notice to our Colleges and Schools, and materially help the cause, we therefore hope a new interest in the work. We cannot keep the public advised of changes unless we are notified.

PACIFIC NATIONAL BUSINESS COLLEGE—
At San Francisco, for Males,
M. K. Laudenslager, Principal.

FRENCH COLLEGE—
At San Francisco, for Males,
Prof. J. Mibielle, Principal.

At San Francisco, commenced last Monday in August. *Rev. N. Congiato, S. J., President.*

MEXICAN COTTON SEED.—Invoices of this seed can be purchased in lots of from 100 to 500 lbs., by calling on the Editor of the FARMER.

Important to the Sick and Afflicted.—Electropathic Institute, San Francisco, No. 645 Washington street, established February 12th, 1860, by an association of scientific gentlemen, for the cure of diseases and the suppression of quackery. Persons suffering from disease can rely upon the most scientific and honorable treatment at the above Medical Institute; and should their cases be within the limit of cure the Resident Physician will warrant them a perfect and permanent relief from their affliction. And if their case be incurable he will so state, and advise them of the best means of relief, so far as science can go to accomplish the object. The basis of treatment at the Institute is the ELECTROPATHIC SYSTEM; but the resident Physician, J. H. JOSSELYN, M. D., a graduate of the University of Pennsylvania, has discovered several valuable remedies in the vegetable kingdom that will cure any nameable disease. Since the establishment of the Institute, almost every kinds of disease have been treated with success, especially those complaints which have been ill-treated by quacks, the names of which shall not be mentioned here.

FEMALES should bear in mind that the only safety in the treatment of complaints peculiar to their sex, is to be physician who has made the female economy his particular study. In the Resident Physician at the Institute, they will find a surgeon who sympathizes with them in their troubles and relieve them, no matter what they may be.

To the rheumatic and nervous person, this Institute offers the blessing of certain and permanent cure.

For those suffering from the effects of mercury, and all diseases for which mercury is usually given, there is no remedy as sure as the Electropathic system, as practiced at the Institute, 645 Washington street.

The Resident Physician is no Foreign Adventurer, nor wedded to one idea. All scientific systems are made by him source of benefit to those who may see fit to consult him.

Come one, come all, and receive the blessings of health. The motto is—A Perfect Cure, or no money required.

Persons living at a distance from the city, can consult the Resident Physician by letter, stating the case, and will receive advice and medicines, as the case may require. All communications strictly confidential.

J. H. JOSSELYN, M. D.,
Resident Physician, Electropathic
7 Institute, 645 Washington st., San Francisco.

For particulars, and all appertaining to the above, address EDITOR FARMER. All Letters confidential.

...our through Northern California and Oregon

BY LISLE LESTER.

PAPER NO. 2

The California Stage Company's route, passes through Trinity Center directly north of Shasta to Yreka, the most northern county seat in the State; in making this part of the trip it is necessary for the traveler to make up his mind to put on the heaviest coat of patience and long endurance he can obtain. If the journey is made in the winter one needs the good use of energy, good humor and a good blanket. Crossing "Scott's Mountain," a place notorious for difficult ascent, snows and frequent "mists," lasting eleven months of the year, the human depraved heart begins to learn, that it requires considerable good disposition to become a good traveler. All nights on that mountain are schools of education, never to be forgotten; the winds whistle dirges of whole notes, chants requiems of frightful solemnity bordering upon the unearthly, shriek graveyard horrors through the moaning pines, and down in the valleys verge off into wails, groans and sounds appalling. The rain pours and patters, then freezes in long icicles to the pines, the curtains of the stage, your hair and whiskers, for all stages have a fashion of catching water *inside* as well as out; and passengers learn the beauty of a "dripping bath," by process more to be imagined than described. It rains until it seems as if the clouds might grow tired, then down comes the snow; then a blast from the windy elements cutting one's warm sensibilities into wee atoms of ice and bits of frost-work, while the easy (?) "thorough-brace," "cushion-covered" vehicle, sidles around on the slippery grade, testing the nerves to the very verge of desperation, and setting the heart into a kind of clog-dance, more painful than pleasant. Now and then a staccato movement of the entire concern, lifts you by unseen force, to a sudden proximity with the "top of the inside," and sending you back to the battered cushions with an emphasis which might be detrimental to bones, flesh and muscles. One night of this kind of staging and we are over "Scott's" mountain, rushing through "Scott's" valley, past Fort Jones to Yreka.

Yreka is the county seat of Siskiyou county, and was formerly called *Shasta Butte City*. The name "Iereka" was an Indian word from which the place derived its present name. Siskiyou is also an Indian word, and the name of the county is supposed to be derived from it, although it is attributed to the French words, meaning "Six-stones," applying to the fact; that in the old trail crossing the Trinity river there were formerly six large stones; others claim that it received its name from the Indian words, meaning a "bob-tail" horse, and the following explanation is given: A band of traders (Indians), were crossing the Siskiyou mountains, and from some mishap were obliged to leave, on the summit, a "bob-tailed" horse, which was unable to perform the balance of the journey; they were accustomed afterwards to speak of the mountain as Siskiyou, or the Bob-tail-horse mountain. The Indian signification of *Yreka* is "a pile of rock covered with snow," which refers to Mount Shasta, apparently quite near to the valley, which is far above all surrounding peaks and ledges.

Yreka is a busy spot, clinging to olden California times with more adhesiveness than other places we have passed through. Miners are more like the rough unshorn men of '49, and the gambling houses are more crowded, than in the more southern portion of the State. The description of a Miner's Life, given by a rather inelegant-named writer, "Rural Betts," of Oregon, is applicable here, where we have seen so much to remind us of the description of early mining life:

"Back to his lonely camp at close of day
The luckless miner wends his weary way,
In pensive study where on earth to make
Another raise, a small provision stake.
Uncombed, unwashed, unshaven, and unshorn,
His clothes in strips by chaparral torn;
Toes peeping from his boots, and battered hat,
Tired, wet, and weary as a drowned rat:—
How changed from him we in the city knew,
In stove-pipe beaver, and a long-tailed blue,
Cigar in mouth, and carpet sack in hand,
By steamer bound to California land.
His store of wood collected for the night,
To dry his clothes, and cook his little bite;
A broken shovel fries his meat, and bakes
A hasty mixture of unleavened cakes;
An oyster-can for tea-pot will suffice,
And pine or fir leaves Hyson's place supplies.
His supper over, he improves a chance
To patch with flour-sack his demolished pants.
In musing mood he listens to the sound
Of night winds moaning in the woods around;
The mountain wolf or cougar's long-drawn howl,
The shrill coyote and the hooting owl;
While as he plied his busy task, thus ran
The meditations of the lonely man."

Of which "meditations," says the editor we have only space to give the eight concluding lines, which certainly imply that there may be disadvantages connected even with gold-digging:

"Poor as the Prodigal who fed with swine,
His dimes all spent in rioting and wine,
Chased by misfortune over hill and dale
Like a stray dog with a tin-pail at his tail;
Too poor to leave, and out of luck to stay,
The chance is small to ever get away;
Thus thousands live, exposed to all the ills
The luckless miners suffer in the hills."

In this county we found many natural caves of immense size and singular appearance, and when explored will prove of great interest to the public. We cross the Siskiyou mountain, and at a distance of about two hundred miles from Yreka, when the Golden State is behind us, and Oregon before us. Oregon! With what fear and trembling a traveler crosses the line, in the winter season, can be judged by those who are used to the prevalent stories, bug-bear tales, and reports spread into the belief of visitors by Californians, of this new and interesting State. Long before we reached Shasta we saw grave shakes of the head, at the idea of a trip through Oregon in the winter. Their stories of "*Mud, Water, Eternal Rains, Falling Mists*," of "Ignorant Heathens," and "Web-foots," until had we been anything of a coward we should have fled in terror, from the nearer approach to the State of Oregon. Courage being a well developed bump of our nature, we determined to *see*, and commenced at Jacksonville.

Jacksonville is the first town of any size north of the dividing line of the two Pacific States; by the time we had reached the "Stage House," called Hotel, we had heard numerous tales of the State of Oregon, and its society, and for the benefit of those coming behind us, a word or two of advice may not be out of place. First of all, believe nothing of what will be told you by Californians of Oregon; remember the spirit of rivalry that ever characterizes two near adjacent States, or neighboring cities, and be prepared to find its narrations, mere results of rivalship and envy. The first new term or phrase which will meet your ear, of Oregonians, is "*Web-foot*." The State will be spoken of as the "Web-foot country," and you will be told by the wise Alderman, and the loquacious Stage Agent that "you will drown out before spring up among the 'Web-foots.'" This term has grown out of the *damp* fact, that the rainy season of Oregon is protracted into the Spring and Fall (like wings of the winter), and sometimes rains almost incessantly from October to June; and a most disagreeble, unhappy rain at that; it comes down in a fine penetrating mist, reaching into the very buildings, its unpleasant dampness swelling the brooks to great rivers and the rivers to floods, and rapids, flooding the valleys to the utter destruction, sometimes of stock, buildings, villages and cities. Much is said of "Oregon Mists;" it is a common subject of mirth and joke among travelers and especially Californians, who in speaking of Oregon will remark, "they are having *some mist* in Oregon, just now," or if a person says "it rains this morning?" some fun-loving face will assume a very meaning look, and the reply will be a significant "yes; a little of our mist." The "*Oregon Mist*," is a native product of which the State has an undisputed right and title.

HUBBARD SQUASH.

THIS VERY BEST OF ALL SQUASHES SHOULD BE planted by every person who wishes the best Squash that can be grown.

The HUBBARD SQUASH is different from all other Squashes; has a hard rind, but very rich meated, sweet and luscious as the finest Carolina Sweet Potato.

The Hubbard makes the finest Pies in culinary art, superior to a Custard Pie—the Squash, however, is to be baked only. Saw the Squash in halves, bake in the shell, and scoop it out when baked, or serve it on the table in the shell. For Pies, first baked, then scooped out, and used as other squash.

Fresh Seed just received from the East, pure from the grower's, for sale at the FARMER OFFICE.

Packages $1 each; $3 per pound 3

MAN WANTED TO GROW SUGAR BEET.

A WEALTHY MAN, DESIROUS OF TESTING THE capabilities of our climate and soil for the cultivation of the Sugar Beet, and the manufacture of Sugar, desires to find a man who has had experience in growing the Sugar Beet for this purpose. To such a person a liberal offer will be made, and no other person need apply than one who has knowledge and experience.

Address or call on the Editor of the California Farmer. 1

TO NURSERYMEN.

A FEW THOUSAND VERY GOOD SEEDLING PEACH Trees can be had at reasonable rates, if applied for soon. Nurserymen are aware that soon Peach Trees will be scarce, and they should be planted now.

A CARD
TO OUR PATRONS.

'Tis said *competition* is the life of trade. Fair, honorable competition, we never fear; but when *our name*, or the *same name*, is used to deceive others or injure our business, it becomes our duty to notify our patrons and friends that such is the case.

We were recently called upon by a person in this city, to supply a large order for more than One Thousand pounds of Seed of various kind, and also for several thousand Seed Bags—these were said to be for a store or stores in the country.

It soon came to our knowledge that these Seeds were to establish a Seed Store on Washington Street, in this city, under the same *Sir*-name as ourselves. The secret and unfair manner in which these Seeds and Bags were attempted to be procured of us, was so singular and so unfair, that we had just suspicion of wrong intent. We soon learned that *falsehood* was told us, and we refused to supply the order, knowing that no other establishment on the coast had laid in the stock of Seeds as ourselves, and having every reason to presume that our name will be used in the sale of Seeds elsewhere, we feel it a duty to remind our Customers and Purchasers of Seeds everywhere, that they should all be careful in sending their orders, and to be particular in their directions.

We have been established nearly ten years in the Seed Business, and we trust that by the extent and system with which our business has been conducted, we have justly earned the reputation of a regular Seedsman.

We import our Seeds direct from the best houses in Europe and the Eastern Growers, we have the most extensive stock in California by a large extent, and purchasers need only call at our establishment to satisfy themselves that our business is so conducted as to meet their approbation and business.

We return our thanks to our many Customers for their liberal support for these many years past, and trust a continuance for many years to come.

We would remind all our Friends and Customers the necessity of being particular and to address all letters and orders to

Home Miscellany.

PRO PATRIA.

L. M. S., Jun.—Sept. Dec. 21, 1864.

[The following appropriate yet sad and touching requiem notes on the grave and to the memory of the brave and gallant soldier, Lucius M. Sargent, Jr., of Boston, are from the pen of the afflicted parent, Hon. Lucius Manly Sargent, a man of eminent standing in the Old Bay State.]

Drift, snows of winter, o'er the turf
That hides in death his cherished form!
And roar, ye pine-trees, like the surf
That breaks before this eastern storm!

O turbulent December blast!
O night tempestuous and grim!
Ye cannot chill or overcast
The tender thought that dwells on him!

Wilder the tumult he defied,
Darker the leaden storm he braved,
Where swept the battle's smoking tide,
And banners, torn and blackened, waved.

Not scatheless he amid the fray:
"Shot through the lungs,"—the message went:
Now surely Love shall find a way
To hold him here at home content.

"Oh, thou hast done enough," Love cried,
"For duty, fame,—enough, indeed!"
He touched his saber, and replied,—
"It is our country's hour of need."

Back to the field, from respite brief,
Back to the battle's fiery breath,
Hurried our young high-hearted chief
To lead the charge where waited Death.

Oh, fallen in manhood's fairest noon,—
We will remember, 'mid our sighs,
He never yields his life too soon,
For country and for right who dies.

THE RETURN OF SPRING.

BY BAYARD TAYLOR.

Have I passed through Death's unconscious birth,
In a dream the midnight bare?
I look on another and fairer Earth:
I breathe a wondrous air!

A spirit of beauty walks the hills,
A spirit of love the plain;
The shadows are bright, and the sunshine fills
The air with a diamond rain!

Before my vision the glories swim,
To the dance of a tune unheard;
Is an angel singing where woods are dim,
Or is it an amorous bird?

Is it a spike of azure flowers,
Deep in the meadows seen,
Or is it the peacock's neck, that towers
Out of the spangled green?

Is a white dove glancing across the blue,
Or an opal taking wing?
For my soul is dazzled through and through,
With the splendor of the Spring.

Is it she that shines, as never before,
The tremulous hills above,—
Or the heart within me, awake once more
To the dawning light of love?

Causes of the Excessive Mortality of Infants.

Introductory Lecture delivered at the Toland Medical College, by James Blake, M. D., Professor of Midwifery and the Diseases of Women and Children.

The subject on which I propose to offer a few observations is one which at first sight appear not to be of much interest to a general audience; but I trust before I have concluded, to bring forward facts which have been observed during the last few years, which will invest it with sufficient importance to render it worthy of the serious consideration of all who take an interest in the welfare and progress of society. In order to show how important is the subject, I propose first, to bring before you some statistical observations showing the fearful mortality that prevails during the first years of childhood, and then to trace it to its causes, at least in so far as the present state of sanitary science will enable us so to do.

To many of you it is probable that the term sanitary science is even a novelty—and yet it a branch of knowledge that can be readily shown to involve some of the most important interests affecting our race. In alluding to it as a science, however, I would not have you consider that it is a subject only to be studied by the philosopher, or that its consideration belongs more particularly to medical men. This would be a great mistake. In order to be of any practical utility, it must be taught in our schools, it must be learned by our children, by the mothers and fathers of the next generation, as well as by ourselves, and more particularly by women. It is to them that we must, after all, principally look for carrying out the principles of sanitary science. They have constant opportunities of practising its teachings in their households, of inculcating them in their conversation and correspondence, and visiting with messages of mercy places where ignorance of its dictates is most productive of misery and suffering. Legislation can undoubtedly do much towards improving the sanitary state of the community, but there is still a large amount of preventable disease and death which legislation can never reach, and which can only be remedied by those quiet teachings, those silent influences of which woman is so eminently the apostle.

If we now come to consider more particularly the subject of infant mortality, the first startling fact that strikes us is that of all the children born, more than one-fifth of the number, or twenty-two per cent., die within the first year, and at the end of five years but little more than half of those born remain alive. If we compare this with the death rate of the general population, we shall see the great excess of mortality of infants, for whilst in a thousand individuals living of all ages, the number who die in a year averages about 20; yet in the same number of children under one year of age, 220 would die in the same time, or more than ten times as many. These are facts surely calculated to attract attention, the more so when we consider that a very large proportion of these deaths arise from preventable causes. we talk a great deal of the loss of human life in war. We are the fools of smoke and noise. Because there are cannon balls, gunpowder and blue coats, and because it costs a great deal of money, and makes a great deal of noise in the newspapers, we think what a terrible thing war is. And yet there is something going on every day under our own eyes, infinitely more terrible than war, and this is the retribution of outraged nature on those who neglect her laws. A writer on sanitary reform in England has given expression to those ideas in language far more eloquent than I could command. The Rev. Mr. Kingsley observes, "Nature, insidious, inexpensive, silent, sends no roar of cannon, no glitter of arms, to do her work; she gives no warning note of preparation, she has no protocol, nor any diplomatic advances, whereby she warns her enemy that war is coming. Silently, I say, and insidiously, she goes forth; no—she does not even go forth—she does not step out of her path, but quietly, by the very same laws by which she makes alive, she puts to death. By the very same laws by which every blade of grass grows, and every insect springs to life in the sunbeam, she kills, and kills, and kills, and is never tired of killing until she has taught man the terrible lesson he is so slow to learn, that Nature is only to be conquered by obeying her. And bear in mind one thing more, Man has his courtesies of war, and his chivalries of war; he does not strike the unarmed man, he spares the woman and child; but Nature is fierce when she is offended, as she is bounteous and kind when she is obeyed. She has no pity; for some awful but most good reason, she is not allowed to have any pity. Silently she strikes the sleeping child, with as little remorse as she would strike the strong man with the musket or pick in his hand. Ah! would to God that some man had the pictorial eloquence to put before the mothers of England, the mass of preventable suffering, the mass of preventable agony of mind and body which exists in England year after year. And would that some man had the logical eloquence to make them understand that it is in their power, in the power of the mothers and wives of the more educated classes, I will not say to stop it all—God only knows that—but to stop as I believe three-fourths of it." Such are the words of this eloquent writer, and although his remarks was addressed to a society whose object was the promotion of sanitary science generally, still they are fully applicable to that limited portion of it which we are now considering.

As I have before stated, the mortality amongst infants attains a large proportion when compared with that of the general population. That out of 100 children born, 22 should die before they have completed the first year of their existence, is a most startling fact, and invests with the greatest interest every inquiry tending to throw light on its causes. Among the young of no other animal except man, the Lord of the Creation, does anything like such a mortality exist. If the shepherd loses five lambs in the hundred during the first year, he is dismissed from his employment, unless he can point out to his employer some satisfactory reason for the loss; and should he feel a proper interest in his flock, he will not rest without at least using every endeavor to find out the cause of such an unusual mortality. And shall we show less solicitude in endeavoring to discover why we lose twenty-two infants out of every hundred born? Some persons will probably think the comparison I have just made as irreverent, or misapplied. They are very fond of looking upon the loss of children as an *affliction*, or as a *dispensation* of Providence; but the writer whom I have just quoted, and who as a clergyman of the Church of England, is much more entitled to be heard on this point than an anatomist, observes, "I see this, that three persons out of every four are utterly unaware of the general causes affecting their own ill health, and of the ill health of their children." (*And remember this lecture was delivered before an audience composed of the best educated classes in England*). They talk of their "*afflictions*" and their *misfortunes*, and if they are pious people, they talk of *the will of God*, and of the *visitation of God*. I do not like to touch on these matters, but when I read in my Book, and in your Book, that "It is not the will of our Father in heaven that one of these little ones should perish," it has come to my mind with very great strength, that that may have a physical application as well as a spiritual one, and that the Father in heaven who does not wish the child's soul to perish, may possibly have created that child's body for the purpose of its not dying, except in good old age. Not only in the lower classes, but in the middle and upper classes, when one sees an unhealthy family, then in three cases out of four, if one takes time, trouble and care enough, one can, with the help of the doctor who has been attending them, run the evil home to a very different cause than *the will of God:* and that is, to a stupid neglect, a stupid ignorance, or what is just as bad, a stupid indulgence."

I will now endeavor to point out the causes which can be shown to exert an influence in causing the increased mortality amongst children. The chief of these are:

Overcrowding and vitiated air.
Bad feeding.
Want of exercise in the open air.

Of these causes I believe the first is the most important, even in our comparatively sparsely populated city, as it undoubtedly is in the more densely inhabited districts of the Old World. Of all the processes that are concerned in maintaining life, that of respiration is by far the most important, and that by which we are most directly brought into vital contact with the surrounding media. More particularly is this the case with the infant, the rapidity of whose respirations is double that of the adult. Only imagine a human being, and that human being a baby, taking a small dose of poison forty times in a minute, which it is certainly doing while breathing a vitiated air. The word poison, perhaps may appear too strong an expression, but when I have related the following facts which directly prove the deleterious influence of vitiated air, I think you will be ready to admit that, taken in such repeated doses and for days and weeks together, it must be about as certain a poison as arsenic or strychnine. In the Rotunda Hospital, in Dublin, some years since, of 17,050 children born there, 2,944, or 17 per cent., died within the first fortnight after birth, and of these, 19 out of every 20 died of convulsions. Dr. Clarke, who was at that time master, entertained a strong opinion that deficient ventilation was the cause of these too familiar nine day fits, as they were then called, and accordingly he took efficient means to secure a much more free circulation of air. The result was, that of 8,033 children born subsequently to the wards being ventilated, only 419 died, being at the rate of 5.20 per cent., or less than one-third of the previous mortality. Under additional improvements, the death rate of these infants became reduced to 1.7 per cent., or about one-tenth of what it was before; whilst convulsions as a cause of death were reduced to a still more insignificant figure. Fortunately we have no such well marked examples of wholesale slaughter in the recent records of our foundling hospitals, but the census returns from some parts of Europe, where the returns show the mortality in town and country districts, and also the ages at which death takes place, furnish figures which prove plainly the same fact. In statistics derived from the French Foundling Hospitals, it appears that in 52,883 foundlings placed in establishments in the cities, 72 per cent., or 38,160, died before they reached the age of five years; whilst of 112,110 foundlings placed in institutions in the country, only 6,090 died, or about 11 per cent. Had the 52,883 town foundlings been placed in the country, 32,070 lives would have been saved in five years. In the city districts, the mortality of infants is more than twice as great as in rural districts, and there can be no doubt but that the greater part of the difference is due to the greater purity of the atmosphere in the country. We have the same fact plainly indicated even by the figures furnished by the interments in this city. In the Catholic graveyard, where the greater portion of our Irish citizens are buried, the interments of children under three years of age, generally equals nearly the half of the whole number of interments, whilst in the Protestant Cemetery the proportion of children's interments generally average about one-fourth of the whole number. There can be no doubt but a large proportion of the excess of deaths among the children of our Irish population is caused by their breathing a vitiated atmosphere. In using the term a vitiated atmosphere, or at least as applying to a degree of vitiation capable of injuring the health of an infant, I would not be understood as meaning an atmosphere which is so far impure as to be cognizable to our senses. Unfortunately the human olfactories are incapable of detecting the slightest shades of deterioration in the air we breathe; and still more unfortunately, habit will at length deaden them, even to odors which are very far indeed from that of Otto of Roses. But it can easily be shown, that even a comparatively moderate amount of vitiation of the atmosphere to a degree which is not at all cognizable to our senses, does exert a most deleterious influence on the human frame, even in adults, in strong and apparently healthy men.

"Dr. Guy investigated with great care the circumstances attending certain derangements of health in 320 of the journeyman printers of London. He found that he could, after careful inquiry, divide them into three classes nearly equal in numbers. In the first class, the men were habitually breathing in their workshops an atmosphere of less than 500 cubic feet of air per man; in the second class, the quantity was between 500 and 600 cubic feet; in the third class, it was more than 600 cubic feet. Now, taking as his guides two of the leading symptoms of consumption, which could easily be detected by questions, he found the difference between the first and the last of these classes of workmen was as follows: Of the *first* or *worst-off* class (as respects air) 12½ per cent. had spat up blood, and a like proportion had been subject to catarrh; while of the *third* or *best-off* class, only 4 per cent. had suffered from spitting blood, and only 2 per cent. from catarrh. The medium class of workmen occupied also a precisely intermediate position, with respect to both these unfavorable symptoms."—*Gairdner, Public Health in relation to Air and Water.*

Dr. Cotton, physician to the Hospital for Consumption at Brompton, England, has drawn up a table showing the relative frequency of consumption, in persons of various occupations. The occupations are placed in two lists, one containing those pursuits which are conducted principally indoors, as tailors, shoemakers, etc., and the other containing those which are conducted principally out-doors, as bricklayers, cabmen, etc. In 1,000 cases of phthisis, 841 were furnished by those who had been engaged in in-door occupations, and only 159 from amongst those whose occupations were principally in the open air. Nothing can more plainly prove the ill effects of breathing a vitiated atmosphere than the above figures, and it must be remembered that these tables only include adults, on whom the influence of disease-producing causes act with far less intensity than on infants. It has been proved by comparing the death rates of adults and infants in the healthy and unhealthy districts in England, that whilst the most unhygenic conditions in which any portion of the population exists, increases the yearly mortality but 15 in 1,000, yet amongst children under six years of age a difference of 90 deaths in 1,000, and in children under one year of age, a difference of 200 deaths in 1,000 is found to exist between the healthy and unhealthy districts; so that the same amount of bad air and bad food that will take off during the course of a year 15 in 1,000 adults, would kill 200 infants under one year; or in other words, that the power of unhygenic conditions, is more than twelve times as great on infants as on adults. And yet in the face of such facts as these, how often do we see children shut up during the day in ill-ventilated school-rooms, and during the night in still worse ventilated bedrooms. Surely it is time that the teaching of sanitary science were made available in the education of those who are to be the fathers and mothers of the next generation.*

There can be no doubt but that this excessive mortality amongst infants placed in unfavorable sanitary conditions, is a complicated fact, that it does not depend entirely on the contamination of the atmosphere. Other causes have to be taken into consideration, such as bad nourishment, want of care, and neglect of other laws of health; but still it is an important element, and as it admits of being remedied perhaps more easily than any other, it is deserving of our serious attention. That infants should suffer more than adults from breathing a bad atmosphere would be rendered probable on physiological grounds, even had not experience proved that such was the case, for from the rapidity of the respirations in infancy as compared with that of adults, any poisonous element existing in the air they breathe, would be taken in much more frequent doses by the infant. Respiration in the infant at birth takes place 44 times in a minute, and at the age of five years the respirations are still at 26 in a minute, whilst in the adult they are but 16 in the same time, so that the infant takes in 44 doses of the poison whilst the adult takes but 16. True it is we are not able to detect the poisonous element in this vitiated air; it is something more than a little excess of carbonic acid or ammonia, something that our reagents cannot discover; but the same is the case with other morbid poisons. The poison of small-pox, of measles, of scarlet-fever, even in their most concentrated form, totally escape our most searching means of chemical analysis, and like the poison of a vitiated atmosphere, only reveal their existence by the diseases they produce.

* As regards ventilation, it is difficult to say how much crowding will vitiate the air. In the prisons in England, 1,000 cubic feet of space, or a space of 10 feet long, 10 feet broad, and 10 feet high, is considered the proper allowance for each prisoner. It is probable that in a healthy individual, with a good constitution, the conservative power of the body would suffice to resist any vitiation that would be caused with such a supply, but in a person with any innate cause of disease in his system, either accidental or constitutional, what an advantage would this limited supply of air give it in undermining the vital powers. In consumption, for instance, where shall we say the vitiation begins? Give the patient 1,000 feet and he will die. Give him 2,000—10,000—and still the result will be the same. But send him out to live in the open air, away from the crowded town, up in the mountains, where the purest, the most uncontaminated of the atmosphere is to be found, and then, and then only, will the disease be cured, and health permanently restored. Had you witnessed cases of advanced pulmonary consumption, such as have come under my observation, cured by this out-of-door treatment, you would have a living faith in the sanitary influence of pure air—an influence which in this disease far surpasses that of any or all of the drugs in the pharmacopia.

(To be concluded in our next.)

How to Make Pencil Writing Indelible.—A correspondent of an Agricultural paper gives the following information, which may be of service to some of our readers:

"A great many valuable letters and other writings are written in pencil. This is particularly the case with the letters our brave soldiers send home from the army. The following simple process will make lead pencil writing or drawing as indelible as if done with ink: Lay the writing in a shallow dish, and pour skimmed milk upon it. Any spots not wet at first may have the milk placed upon them lightly with a feather. When the paper is wet all over with the milk, take it up and let the milk drain off, and whip off with a feather the drops which collect on the lower edge. Dry it carefully, and it will be found to be perfectly indelible. It cannot be removed, even with India rubber. It is an old recipe, and a good one."

TEAS of every Variety, of the FINEST QUALITY, Imported expressly for our Family Trade.
HERKIMER COUNTY CHEESE, superior to any Cheese in the country.

SELECT WINES AND LIQUORS, the very purest, taken from Bond, as we handle none but the best; those that desire choice Table Wines, etc, or for Medicinal purposes, can rely upon what we offer them.

Messrs. Bowen Brothers commenced their business at an early day in Stockton, which they conducted successfully to themselves up to about the year 1860. Flattered with the success that had attended their efforts there and ambitious for a more extended field of operations, they accordingly, about the period above mentioned, established themselves in the City of San Francisco. Since then each returning year has continued to mark the expansion of their trade, until now their annual sales, in the aggregate, are exceeded by no other House in the State.

They have superior facilities for procuring their goods from the East, which gives them great advantage besides, they pride themselves in keeping articles of goods found in no similar establishment in the city.

These with every other article needed in the Culinary department of the Household, and the usual Family necessaries, furnished by the Grocer. It will be our aim and our pride to give satisfaction to all who may favor us with their patronage. In order to make the business of our Patrons light and pleasant, all orders left with us will be filled with care and dispatch, and Goods sent to any part of the city promptly, without cost of carriage.

Our friends from the Country that favor us with Orders, will have their goods sent to the wharves without expense of cartage. Every Order sent us will be attended to with the same care as if purchases were present.

Tobacco Raising and Grape Growing.

A MAN OF EXPERIENCE IN TOBACCO RAISing would like to enter into contract with some good man who has proper land and good location, and will have suitable buildings erected for that business. The advertiser has a thorough knowledge of the business in all its branches and can make it profitable to both. He is also familiar with Grape Growing, and can lay out a Vineyard and take care of it. He feels confident he can give satisfaction. A letter addressed to "Tobacco Grower," and left at the Farmer Office will be attended to. 17

Cashmere Goat.

A SPLENDID HALF-BLOOD CASHMERE GOAT can be had at a fair price, or will be leased on fair terms on application to the Editor of Farmer. 4

PATENT RIGHTS FOR SALE.

THE FOLLOWING PATENT RIGHTS OF NEW AND valuable inventions (of which we have models to show their value) are now offered for the States of California and Oregon, and Utah and Washington Territories.

NO. 1. THE MECHANIC'S SPIRIT LEVEL.

Patented September 13, 1859.

This Implement will be of great value to Contractors and Builders, being one of the most valuable inventions yet out. Builders will do well to examine the model.

NO. 2. IMPROVED CLOTHES REEL AND BAR.

Patented January, 3, 1860.

This valuable domestic piece of furniture can be used in the Laundry, the Kitchen, the Nursery, or Chamber, and can be made plain or ornamental; standing in the same relation as a piece of important furniture as does Wheeler & Wilson's Sewing Machines, near when used and ornamental when not in use.

NO. 3. A CORN CULTIVATOR.

With this implement the soil is first thoroughly plowed and deeply pulverized, and on the return it smoothly and perfectly hills up and harrows the ground between the rows. A very new and valuable implement.

NO. 4. A MUSKETO BAR.

This will be much wanted in California. It is simple in its contrivance, perfect in its working, and can be affixed very cheap to all styles of bedsteads. Hotels, public houses and private families will find it a useful invention.

NO. 5. HYDE'S PATENT POST-DRIVER.

A most excellent labor and money-saving machine, for which we offer rights.

NO. 6. SEED-SOWER.

This is a new inventions, and one of great importance to all who sow grain, or any garden seeds. The working model can be seen at the Farmer's Reading-room.

Holding the rights to all these new inventions, we invite the public to call and see the models. All persons who may be desirous to purchase either County, City, Town, or Individual Rights, can do so on application to

Mrs. J. WEINMANN,

Who will use every effort to give satisfaction to the many patrons of this Hotel for the last nine years. Mrs. Weinmann hopes to receive the remembrance of all who have heretofore patronized this Hotel. 19

GOLDEN EAGLE HOTEL

Corner Seventh and K streets,

SACRAMENTO.

THIS HOTEL IS OFFERED TO THE PUBLIC AS a "Home for Families," and for the Traveler.

The Proprietor has spared neither expense or care to make his Hotel one that shall always be acceptable and pleasant to all that may favor him with a call.

With ample accommodations by means of spacious Suites of Rooms for Families, and by recent enlarged accommodations, he is confident that visitors will always be satisfied and feel at Home.

Particular attention will always be paid to the comfortableness of the apartments, by well ventilated Rooms, clean Beds and Bedding, and strict attention to the wants of Boarders; while the TABLES will be provided with the very best the season affords.

CARRIAGES, to and from the Hotel to the Railroad Cars and Steamers, at all times, Free of Charge to the Patrons of the Hotel. Hotel open all night.

☞ Connected with the Hotel is a Fire-proof STABLE expressly for the care of Horses and Carriages of the Patrons of the House.

D. E. CALLAHAN,
PROPRIETOR.

A CARD.

YEARS HAVE ELAPSED SINCE THE Subscribers first invited public attention to the peculiar properties of their Patent Axle-grease. At first their invention made but slow progress, but thanks to the liberal and appreciative spirit of a large portion of the teamsters and coach proprietors of California, the demand for their manufacture has gradually increased, and notwithstanding the many spurious imitations which from time to time have been introduced from the Eastern States to compete with their article, the H & L AXLE-GREASE has now acquired an unrivaled reputation, extending throughout the length and breadth of California, Oregon, and the neighboring Territories.

The subscribers return their grateful acknowledgments to a discerning public, who have so largely patronized them in all their enterprises which they are now happy to say, are beginning to be justly appreciated as belonging to our California industry.

The supply of material from the East having, in consequence of the war, been cut off, the subscribers turned their attention to the substitution of COAL-OIL as a basis of their manufacture, but after applying every means suggested by the modern application of the science of chemistry, they were reluctantly compelled to the conclusion that however fit COAL-OIL might be for illuminating purposes, and for which it stands unequaled, it was not at all adapted to make a permanently satisfactory Axle grease. In this dilemma the subscribers turned their views to the native produce of California, believing that large quantities of natural resin might be collected from the noble pine trees of her boundless forests.

Having invited attention to this subject, th with steady progressive steps, advanced this until, at the present time, they have established a manufactory of Rosin and Turpentine at Forbestown, from which considerable quantities of both articles are daily manufactured, of such a quality as to find a ready market at fair prices.

It is hoped that increased efforts may continue to be put forth, and new discoveries made, so that California may soon be independent of all foreign supply, for we believe our lofty mountains and our mighty pine forests will yet give us that supply. The subscribers are now receiving native resin in sufficient quantities to be le to sell their celebrated AXLE-GREASE at a LOWER PRICE than any of the spurious COAL-OIL varieties which may hereafter be imported.

HUCKS & LAMBERT,
Manufacturing Chemists,
21-9 Natoma and Minna streets, San Francisco.

A Complete Treatise on the Breeding, Management and Diseases of Sheep,

BY HON. HENRY S. RANDALL, LL. D.,

Author of "Sheep Husbandry in the South," "Fine-Wool Sheep Husbandry," Etc., Etc.

PUBLISHED BY

D. D. T. MOORE, ROCHESTER, N. Y.

THOUGH FIRST PUBLISHED ABOUT A YEAR ago, this work has already reached its TWENTY-FIRST EDITION, and the demand thus far has been extraordinary. A new and revised edition is now ready, and others will follow in such rapid succession that all orders can hereafter be filled promptly. No volume on any branch of Agriculture ever had so rapid a sale or gave such universal satisfaction. The work is a timely one, and unquestionably THE BEST AND MOST COMPLETE TREATISE ON SHEEP HUSBANDRY ever published in America. It is cordially welcomed and highly approved by both Press and People. Witness the following extracts from a few of the numerous Reviews and Letters the work has elicited:

OPINIONS OF PRESS AND PEOPLE.

From the New England Farmer, Boston.

"The Practical Shepherd" is a work that has long been needed by our people. It should be in the hand and head of every person owning sheep.

From the Country Gentleman and Cultivator.

As a whole, this book is unquestionably in advance of anything of the kind now before the public.

From the Maine Farmer.

The name of the author, Hon. H. S. Randall, is a guarrantee of its completeness and reliability,

From C. I. B. P. Johnson, Sec'y N. Y. State Ag't Society.

It is the best practical Sheep Book, I think, ever published, and does great credit to Dr. Randall.

From the New York Tribune.

In this volume the author has exhausted the subject, and given all that is necessary for any farmer to know about selecting, breeding, and a general management of sheep, in health or sickness. We heartily commend this work to all who wish for a sound and thorough treatise on sheep husbandry.

From the Michigan Farmer.

Mr. Randall has made the very best book extant on American Sheep Husbandry.

From the Ohio Farmer.

The reputation of the author—who ranks as THE authority in this country upon all that pertains to the breeding and management of sheep—will induce a large and continued demand for "The Practical Shepherd."

From the Prairie Farmer.

The illustrations of sheep are by the best artists of New York, and well done. The letter press and paper are all that could be desired in a work of this description. It will undoubtedly meet with the large sale its merit demands.

From the Scientific American, New York.

It is vastly important that those who raise sheep should obtain all the information possible how best to manage their flocks, and we unhesitatingly recommend the "Practical Shepherd" as the most interesting and reliable work on the subject extant.

☞THE PRACTICAL SHEPHERD is sold only by Agents and the Publisher. The demand for the work was, for months, greater than the supply, and hence it has not been offered or advertised in the Pacific States. It comprises 454 large duodecimo pages, and is printed, illustrated and bound in superior style. Price $2, Sample copies mailed, post-paid, on receipt of price.

OLD NEWSPAPERS FOR SALE.

50,000 OLD NEWSPAPERS FOR SALE, AT the FARMER Office. 23t

Pomology.

Hon. M. P. Wilder, of Massachusetts.

We are most happy to announce the gratifying intelligence, received by the last steamer, that Mr. Wilder who has been long ill, has so far recovered as to be again among his friends, heart and soul engaged in the cause he so loves. The Horticultural world will rejoice at this intelligence.

The Colors of Pears.

It is an interesting question, how far the colors of pears may be influenced by climate, soil, special manuring, mulching or other treatment. It is quite certain that some cultivators produce fruit much more delicate in complexion, and more highly colored than others. The Duchesse d'Angouleme, which is generally of a pale green, changing to a dull yellow, is frequently seen with a bright glossy skin and a brilliant scarlet blush on one side, adding much to its beauty. The red color on the Louise Bonne de Jersey is frequently very intense, while other specimens are of a dull brown. Dr. Boynton, of Syracuse, New York, once exhibited some pears at a meeting of the National Pomological Society, covered with a skin like glass, and tinted with the most brilliant hues, crimson, scarlet, and gold. We have never seen any fruit since equal, in finish and color, to those specimens. Dr. Boynton attempted to explain the cause of this perfection and color, by some geological theory and special manuring; but either pomologists could not understand him, or he did not understand himself; nothing ever came of it.

How far is it possible to discover and control the causes of *color?* Many cultivators of fruit have no doubt observed that sickly trees, or those in a stunted and unhealthy condition, will generally produce fruit more highly colored than healthy and thrifty trees. The fruit will probably be smaller than on more vigorous trees, but will take on a much richer color. This may perhaps be attributed to the fact, that growing slowly, the juice of the fruit and the fabric of the skin may be more perfectly elaborated early in the season, and hence may be more thoroughly acted upon by the rays of the sun. It has been remarked by Prof. Balfour, a distinguished English botanist, that "the colors of flowers appear to depend upon the oxidation of their juices." The colors produced on the leaves of trees, in autumn, we are constantly told by vegetable physiologists, is due to the action of oxygen upon the juices and the texture of the foliage. We are also told, by the same authorities, that the sap of trees carries up with it common air, carbonic acid and oxygen, as gases, in addition to the mineral elements which may be in solution in that fluid.

Now from these facts it would appear that a stunted or checked growth, and free oxidation of the juice of the fruit would tend to increase the brilliancy of the color.

But to obtain a good ambrotype, you must have a plate properly prepared for the action of the sun's rays; and to get highly colored fruit you must undoubtedly have a texture of skin fitted to take on the desired tints. What shall be the constituents of this skin? and how shall these constituents be collected and organized?

The first evident constituent or element of a proper skin is a somewhat dense fiber; next, a certain amount of silica, as in the cornstalk and bamboo; then perhaps (for all this is something like guess work) some iron and other minerals, in free supply; after these, what acids? or what phosphates? Who can tell?

One of the substances employed in manure, which has been supposed to have a great influence on the colors of *flowers* is *charcoal.* Whether there are any facts in existence to show what the effect of charcoal is upon fruit, in respect to color, we do not know. We have used many hundred cords of fine charcoal, about fruit trees, as a top-dressing, and as a mulching agent, without discovering that it produced any effect on the color of the fruit. That charcoal attracts oxygen with considerable avidity, and yields carbonic acid gas pretty freely, we presume there is little doubt. Further experiments in its use, in respect to its effect on color, are to be desired.

Of the mineral substances which enter into the composition of manure, the alkalies, oxide of iron, and sulphate of iron, have been supposed by some writers to have an influence upon the color of fruit.

We must confess that although we have tried some experiments with a view to produce color in pears, by a special treatment, we have not yet arrived at anything like certainty in this respect. But we are still experimenting, with the hope of greater success.

Of one thing we feel convinced, and that is, that the art of manipulating the soil and managing the trees (special manuring and training), is still in its infancy, and much improvement may yet be made in these departments of gardening. We should be gratified to see this subject further discussed by the Editor of this Magazine, and other pomologists, who have succeeded in growing highly colored pears. Has any body ever so looked into "the womb of time," as to discover the process by which their most beautiful pets were produced?—[J. S. Houghton, in Hovey's Magazine of Horticulture.

Meeting of Fruit Growers.

The annual session of the Ohio Pomological Society was held at Painesville last week, and it was our privilege to attend. The meeting was well attended by the leading fruit-growers of the State, and also by gentlemen from Indiana, Pennsylvania, and New York. The citizens of Painesville and the country thereabouts manifested an interest in the meeting, which imparted a goodly spice of encouragement and was highly appreciated by the members of the Society. In this particular we have never seen a meeting of the Pomological Society go off with as much zest and satisfaction.

But not to stop with a commendable spirit of general hospitality, the citizens of Painesville got up a bountiful banquet to which the Society was invited and made heartily welcome, and where they met over a hundred of the best gentlemen and ladies of the town, in which brilliant company the night was made joyful with the good cheer of the ample tables and the flow of wisdom and wit which clustered about them. Altogether it was most handsomely done, and the recollection thereof will remain as a benediction in the hearts of all who shared in the compliments of the occasion.

The transactions and discussions of the Society were reported at length, and will be published.—[Ohio Farmer, Cleveland.

[Why should we not organize such a Society, here, and sustain it?

FROM OUR EXCHANGES.

—The ranchmen located on the east bank of the Sacramento, between Sacramento city and Freeport, and indeed the occupants of all the tule lands between the two points designated, are suffering from the accumulation of water to as great an extent as the residents of the lower part of the city. The substantial levees built along the American and Sacramento rivers, so far as they extend, fully answer the purposes for which they were constructed. During a great portion of the winter the rivers have been found so high that a large area of the lands referred to would have been deeply inundated except for the interposition of the levees. The difficulty encountered, however, arises from the percolation and from the accumulation of the rain which falls within the lines of the levees. In addition to the water which seeps through the earth along the river and finds the surface of the low grounds, the entire drainage from the valley lands finds its way to this point. The small sloughs and ravines descend of course toward the river. From these causes the most productive lands in the county are rapidly being rendered useless for the present year, unless some remedy can be adopted. The loss of these lands for the season is not all, for in many places grain, which is sown and up, is likely to be destroyed, and fruit trees and shrubbery are in danger of being ruined. In view of this state of affairs it is not surprising that the Swamp Land Commissioners' Office, at the Water Works building, was visited on Saturday by from one to two dozen ranchmen and fruit-raisers from Sutter and Franklin townships. At a meeting of the Board, held at 2 o'clock in the afternoon, the facts of the case were presented, and the subject generally canvassed. Engineer Reese was instructed by the Board to stake out a line of canal to connect the several sloughs or lake at Sutterville with Beach's Lake, for the purpose of securing permanent drainage. There is no money in the treasury of the district to pay for digging this canal, and it is believed that the only way to complete it at present will be for the ranchmen to turn out along the line *en masse* and do the work themselves, unless money can be raised by subscription to pay for it.

—On the passage of the missionary packet Morning Star, from the Micronesian Islands to Honolulu, says the Advertiser, Captain Gelett discovered a new island, located in north latitude 24° 4′, and east longitude 154° 2′, or about 800 miles N. N. E. from Guam. On the evening of December 16, he observed numerous land-birds, which increased in number the next morning, and remarked that land must be near by, which was discovered at 3 P. M. of the 17th. The Island is about five miles long, densely covered with trees and shrubbery, with a white sand beach, and rises in a knoll at the center, perhaps two hundred feet above the sea. The brig passed within three or four miles of it about sunset, and breakers were seen all around. There were no signs of inhabitants living on it, though all hands on board kept a close lookout. A reef extends to the north of the island. On the old Admiralty charts a doubtful island is noted in the vicinity of the one discovered, but on Wilkes' American chart and on Laray's London chart none is laid down within one hundred miles of the spot. The discovery of this fertile island is important, and is reliable. We propose to name it Gelett Island, in honor of the captain of the brig. It ought to be visited by some war vessel, and fully explored. It lies directly in the track of whalers bound from Ascension to the Ochotsk or Arctic.

—In common with others of our colemporaries, says the Scientific Press, we have been in error in attributing to Mr. Fairbanks, the discovery of the new species of turpentine, to which we made lengthy reference two or three weeks since. The real discover is Mr. J. W. Jacobson, of Marysville, to whom was awarded the State premium bounty for producing the first thousand gallons of California turpentine. Mr. J. has no associate in the discovery, and is entitled to the fullest credit therefor. He was also the first to produce camphene in this State through the agency of steam.

—A new school is to be established on the Island of Oahu—an Industrial and Reformatory School—to be conducted under the direction and supervision of a board of education. The purposes of said reformatory school are to be solely the detention, management, reformation, education and maintenance of such children as shall be committed or surrendered thereto.

—The Statesman says the following are the current rates of farm products in Salem, Oregon: Wheat, $1 30 per bushel; oats, 75 cents; bacon, 15 to 20 cents, and scarce at that; fresh butter, 37½ to 40 cents; eggs, 30 to 33½ per dozen; potatoes, $1 per bushel.

—A destructive fire occurred at Mokelumne Hill, Calaveras county, on the evening of the 25th ult., by which twenty-three buildings were destroyed, including the Union Hotel, where the fire originated. The loss is estimated at $50,000; insurance $20,000.

—The State of Nevada has adoped a concurrent resolution protesting against the taxing and selling of the mineral lands for Government purposes, as recommended by the Secretary of the Treasury.

—The Legislative Assembly of Washington Territory passed a Specific Contract Act, and also an act against the admission of negroes into the Territory—both of which Governor Evans vetoed.

—A bill has been introduced in the Nevada Legislature for the repeal of the Specific Contract Act, and another providing for the adoption of the paper currency.

—The Mazatlan Times claims that 30,000 emigrants will leave San Francisco for Northern Mexico this season.

—The Napa Reporter announces the discovery of petroleum springs on Eel River, Mendocino county.

—The Grand Jury at Portland, Oregon, has been endeavoring to rid the town of Chinese, by indicting them as a nuisance.

—The San Francisco and Alameda railroad has been extended from Oakland to San Leandro, a distance of ten miles.

—The contract for building the Western Pacific Railroad, from Sacramento to San Jose, has been let to Mr. McLaughlin, for $5,400,000.

—A gentleman named Bernet has established a glue factory in Marysville.

How to Get Early Tomatoes.—A correspondent thus writes: "A large turnip is far better than any bothed for propagating early tomatoes. Cut off at the top, and scoop out into a shell three quarters of an inch thick. Fill the cavity with rich mold, plant half a dozen seeds, and place the turnip in a box of loam. Should the turnip send out roots, pinch them off, and the shell will soon rot, affording a fertilizer to the tomato plant, that will send it ahead wonderfully. A dozen turnips tomatoized will afford an abundant supply of early tomatoes for an ordinary family."

It is proposed by some English capitalists to go into the business of raising ostriches at the Cape of Good Hope, for the sake of the feathers, which may be plucked every six months. Each plucking of feathers will be worth from £10 to £15 for each bird.

The Markets.

Wholesale Produce Report.

This represents the prices paid by the dealer to the producer.

Corrected weekly, by A. H. Toon & Co., corner of Clay and Drumm Streets.] March 3d.

Markets for all kinds of Grain and Produce are firm and prices rule high, notwithstanding the liberal supplies that are arriving from Chile, of Wheat, Flour and Barley, "with Flour from the East," and the large quantities of Grain and Flour from Oregon, our market rates have advanced until the highest prices, for years, have been reached. That there is any actual necessity or any well-founded grounds to warrant or sustain present ruling rates we very much doubt, knowing, as we do, that *speculation* is the prime and sole cause of the advance. Our present Market is inviting shipments from abroad, that will doubtless work a great injury to the future Crops, which from appearances promise large and abundant yield. The present cold weather has had the effect to retard the growth of early feed and cause more demand for Oats, Hay and Barley, etc., which have advanced a shade. Many farmers are yet planting, and have been buying seed, which had the effect to stimulate and sustain the price of Wheat and Barley. Beans are more in demand at better prices.

Our receipts from all sources, for the past week, are as follows: Wheat, 9,234 sks; Barley, 1,467 sacks; Beans, 1,022 sks.; Mustard Seed, 16 sk.; Flour, 7,852 qr sacks; Hay, 1,350 bales; Straw, 116 bales; Oats, 4,237 sks; Potatoes, 5,001 sks; Wool, 86 bales; Bran, 1,621 sks; Middlings, 110 sks; Corn, 270 sks.

Prices at Pacific Fruit Market—March 3d.

Messrs. Addison Martin & Co. report to us the following prices as the ruling rates for fruit

Apples, $1 50@4 50 ₹ box; Pears 10@15c ₹ lb.; Plums (Dried) 14@22c ₹ lb. Dried Peaches 10@15c. ₹ lb. Figs 20@30c ₹ lb. Blackberries (Dried) 40@15 cents ₹ lb. Lemons, $6 00@7 00 ₹ 100; do. retail, ..c@$1 ₹ dozen. Oranges, $4@7 00 ₹ 100; do. retail, 75 cents@$1 50 ₹ dozen.

Lemons are nearly all gone. The last, direct from Malaga, are long over due, so we may expect a supply soon.

Boston Wool Market.

Boston, January 7th, 1865.

From the Annual Statement of Geo. Wm. Bond & Co., Wool Brokers, Boston, we copy the following details of the market:

Prices Current, in these times, are of little value, and we have published none since our last Annual Report. We have twice prepared them, but before they could be issued the gold fluctuations so influenced prices that they did not represent the market.

We give them as near correct as we can, and you must take them for what they are worth.

Few articles, however, for so large a part of which, we must rely on foreign countries, have varied so little amid the severe changes of the currency, as Wool.

This is owing, largely, to the fact that in consequence of the reluctance of the growers to sell, in 1863, when gold was low, at a corresponding advance upon former prices, importation was stimulated, and again in 1864, by their call for a high duty upon Wool. Manufacturers, considering the increased duty inevitable, and foreseeing an advance in prices when the new tariff should become the law, freely purchased the Wool imported under the old duty, early in the season, and before gold had reached an extreme high point, when, owing to the large imports and the crowding of the balance of the clip of 1863 upon the market, which, as stated in our last year's report, had been held back, importers were ready to dipose of it at prices barely remunerative—say equivalent to 60@70c. for domestic fleece. Consequently, since the clip of 1864 has been on the market, though gold has averaged $2 34, the average price of fine Ohio fleece has not exceeded $1 05, equal to 45½c. gold, or, deducting for increase of duty, 10c., only 35½c. for comparison with prices of former years.

Meanwhile, the increase of machinery has been very great, and the machine shops, which have been enlarged, are still engaged to the full extent of their capacity.

It is thus seen that the growers of Wool, instead of reaping benefit from the increase of duty, have suffered from the effects following it, under the inevitable laws of trade. The same laws, however, decree that its influence is to be felt, as indicated by the import tables, which show that the imports have dwindled to an insignificant point during the last two quarters. Nearly all the Wool which has been imported during this period, has been shipped abroad, or remains in bonded warehouse. The stock of American Wool on the Eastern markets is about the same as last year; but it is supposed that the quantity yet back in the interior is much less than then.

During the last year there has been a great increase of combing machinery, and its extension is only limited by the supply of Wool. Long, coarse, combing Wools, like those of Canada West, are worth more than the finest fleeces. It is to be hoped that our growers will turn their attention to this class of Wools, for which the demand is sure to increase with the supply, as we are dependent upon Europe for an enormous quantity of worsted goods, which we could manufacture at home, if we had a supply of Wool suitable.

Walter Brown's Monthly Wool Circular.

New York, February 1st, 1865.

During the early part of January there was a healthy activity in our Wool Market; the sales to consumers were large, at rather improving prices, and some considerable parcels were bought by dealers and speculators; but towards the middle of the month business was checked by the decline in Gold and the announcement of several auction sales; these were well conducted, and passed off with better spirit than was anticipated, at a decline, however, of about 5 per cent. from rates previously current.

At the close we quote prices a trifle lower than thirty days ago, the demand fair, and many holders disposed to meet the market; some still maintain that there will soon be a material advance, and do not offer their stock.

California Wools are nearly out of importers' hands, and shipments have about ceased. We shall have a larger proportion than usual of burry Wool next season, as, owing to the drought, flock masters have been compelled to resort to localities unfavorable in this respect, in order to obtain pasturage.

Pulled Wools are rather dull, but there is not much accumulation, and we look for more activity.

Foreign Wools, of medium grades, have been in demand; sales of over 4,000 bales. Some movement also in fine Mestiza and Cape Wools. Blanket Wools are in light supply, and find a ready market.

We have reported the following sales during the past month: Fleeces, 1,480,000 lbs, 85@115c., Pulled, 250,000lbs, 88@100c.; 365,000lbs. California, 50@65c.; 50 bales Canada, 90c.; 200 bales Cordova, 65@74 cents; 20 bales Guayaquil, 40c; 12 bales Montevideo; 120 bales Rio Grande; 20 20 bales Odessa; 10 bales Carimani, 60c; 3,400 bales Rabbatt, 23c., (gold;) 165 bales Douskoi, 32½c., (gold;) 200 bales Jaffa; 25 bales African; 1,582 bales Cape, 58@62c.; 5 bales Syrian; 600 bales Persian; 57 bales East India, on private terms.

At Auction—478,000lbs. Fleeces, 76@95½c.; 390 bales East India, 38½@85c.; 1,100 bales South America, 30@68c.

In Boston—Fleeces and Pulled, 1,525,000lbs., 90@110c.; Canada, 233,000lbs. 88@1.25c.; 87 bales Cordova; 20 bales Odessa; 109 bales Mediterranean; 250 bales Cape.

In Philadelphia—Fleeces, 802,000lbs., 90@110c.; Pulled, 35,500lbs., 83@87½ cents; 54,000lbs. Tub, 115@125c.; 100 bales Cordova; 25 bales Donskoi; 30 bales Smyrna, 73c.

The imports of the past month, as published, are—from London, 160 bales; Odessa, 508; Taganrog, 901; Aspinwall, 611; Rio Grande, 66. Total, 2,246 bales.

Philadelphia Wool Market.

Coates, Bro's Wool Circular, of February 1st, says:

The Wool Trade, during the early part of the past month was characterized by increased activity and a gradual hardening in prices, more buyers appearing in the market than had been noticed for some time previously, and dealers had generally made up their minds that the tendency of prices would be for a higher range than during the month of December. The Mills at the eastward had also made arrangements for manufacturing their Spring products, thereby causing an increased inquiry for the finer grades of fleeces—the stocks, in consequence, were becoming gradually reduced, and it seemed as though, with a continuance of the demand, the supply would not be sufficient to last until the new clip could be made available.

Under ordinary circumstances this condition of the Market would lead to speculations and greatly enhanced prices, but the constant and repeated Peace rumors which have been daily occurring during the last two weeks have counteracted the upward tendency and have induced many holders of considerable lots to press their stocks for sale at the best price to be obtained, thus making the Market panicy and irregular and destroying the confidence of buyers. The month thus closes at a rather lower rate of quotations than at the commencement, and with a tendency for a gradually declining scale. Should there be, however, any absolute certainty that the war must continue through the Summer, there is little doubt that we would have a rising Market, and probably insufficient stocks to meet the demands for the next three months.

Cotton, our rival staple, has declined heavily since the fall of Savannah; and the decline in Dry Goods generally, but particularly in Cotton Goods, has been marked, Woolen Goods sympathising to a limited extent; while lower prices for Gold has also had the effect of checking any tendency towards advancing prices both in Foreign and Domestic Wool; at the same time it is evident that manufacturers have no large supplies on hand, and to keep their machinery in motion, must be steady purchasers on the best terms that the market affords, future prices depending very much upon the persistency with which those who own the Wool are willing to part with their stock.

The auction sales in New York, on the 25th and 26th, although at rather lower than previous quotations, did not have the effect of breaking down prices to any considerable extent.

The sales for the month, of Domestic Fleece and Pulled, foot up about 1,500,000 pounds, within the range of 95c. to $1 10 for Fleeces, and 80@92c. for Pulled.

In New York, we have reported sales of 1,380,000 pounds of Fleece and Pulled, at 85c. to $1 10 for Fleece, and 88@96c. for Pulled.

In Boston, 1,375,000 pounds of Fleece and Pulled at 94c. to $1 10 for Fleeces, and 90c. to $1 15 for Pulled.

PRICES CURRENT OF CALIFORNIA WOOL.

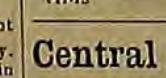
Medium Unwashed Fleeces, 45@55c.
Common Unwashed Fleeces, 35@45c.

TRAVELING.

Pacific Mail Steamship Company

For New York, via Panama.



THE FOLLOWING STEAMSHIPS will be dispatched on the following named days:

Mar. 3.—GOLDEN CITY.....Capt. W. F. Lapidge.
Mar. 11.—GOLDEN AGE.....Capt. E. S. Farnsworth.
Mar. 21.—CONSTITUTION.....Capt. J. T. Watkins.

From folsom street Wharf, at 10 o'clock, A. M., punctually.

FOR PANAMA.

Passengers will be conveyed from Panama to Aspinwall by the Panama Railroad Company, and from Aspinwall to New York by the Atlantic and Pacific Steamship Company.

OLIVER ELDRIDGE,
Agent Pacific Mail Steamship Company,
1 Corner Sacramento and Leidesdorff streets.

California Steam Navigation Company

Departure daily from Broadway wharf, at 4 o'clock, P. M

CARRYING UNITED STATES MAIL.

THE FAST AND SPLENDID STEAMERS
CHRYSOPOLIS and YOSEMITE

Will leave on alternate days for SACRAMENTO, at 4 o'clock p. m., from Broadway wharf.

Steamer CHRYSOPOLIS, Chadwick, Master, will leave on Tuesdays, Thursdays and Saturdays. Steamer YOSEMITE, Poole, Master, will leave on Mondays, Wednesdays and Fridays.

Other steamers will also leave for STOCKTON every day at 4 o'clock, p. m. (Sundays excepted), from Broadway Wharf.

For Marysville and Intermediate Landings, Every Day.

Steamer YOUNG AMERICA, Littleton, Master, and Steamer SWALLOW, Summers, Master, will leave Sacramento on alternate days, at 6 o'clock a. m.

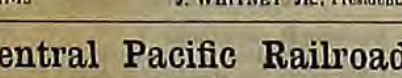
NE TRIP A WEEK FOR COLUSA, RED BLUFF, AND INTERMEDIATE LANDINGS.

The steamers LARK and GEM will leave for the above named places on SATURDAYS, at 7 o'clock, a. m. from the Storeship, foot of K street, Sacramento.

For freight or passage by any of the above boats, apply on board, or at the Office of the Company, corner of Jackson and Front streets.

v17-13 J. WHITNEY JR., President.

Central Pacific Railroad.



Winter Arrangement.

ON AND AFTER TUESDAY, DECEMBER 13, 1864, Until further notice, the trains of the Central Pacific Railroad will be run as follows:

Leave Sacramento for Newcastle,
At 6:30 A. M., and 2 P. M.
Leave Newcastle for Sacramento,
At 10:15 A. M., and 4:45 P. M.

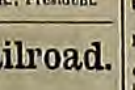
The 6:30 a. m. up trains connect at the junction with the cars of the California Central Railroad for Lincoln and Marysville and all parts north, and at Newcastle with the stages of the California Stage Company, for Grass Valley, Nevada, and via Dutch Flat and Donner Lake, to Virginia City.

The 10:30 A. M. down train will connect with cars for Folsom.

On Sunday one train only will be run, leaving Sacramento at 6:30 A. M. and Newcastle at 10:15 A. M.

C. CROCKER,
19 tf President C. P. R. R. CO.

GRAPE VINES.



50,000 CUTTINGS OF THE STANDARD Varieties of FOREIGN GRAPE VINES, for sale by S. W. SHAW, McCrary's Building, North-east corner of Montgomery and Pine streets, San Francisco, or to O. S. WEST, Sonoma.

Our Vines are Five and Six Years old, and of course are in bearing; therefore we are enabled to guarantee every Cutting true to name, thus avoiding those vexatious disappointments heretofore attending the planting of Foreign Vines.

4-tf S. W. SHAW.

FOR SALE, TO LEASE, ETC.

A Magnificent Stock Farm For Sale.

WE HAVE ONE OF THE VERY FINEST STOCK FARMS for sale to be found in the State. The location is a Valley in the Coast Range, and in a situation unequaled for excellence. A place secluded from all of Stock by mixing, etc.

There are 1200 acres all inclosed with a fine stock oak fence with strong riders, to this can be added many thousands of Uncle Sam's acres as may be wanted. The fenced land is the best of bottom land. During late dry weather a large amount of Stock has been driven to these hills for feed and have been profitably kept.

This Ranch produces a big yield of Wheat, Barley, Oats Corn, Root Crops, etc. Tobacco, Hemp, Flax, etc. can also be raised most profitably. Floods never reach it, and it is never affected by drought.

On this Ranch are good, ordinary Buildings, Houses, Barns, Sheds, Corrals, Smoke Houses, etc., to this Farm belong Harrows, Teams, working Oxen, etc., to do the work of the place.

On this Ranch there is now the following Stock:
One Jack of the very best character
100 Mules from 1 to 3 years old.
1 Stallion, No. 1.
20 American Mares, No. 1.
80 Mares one-half and three-quarter breed. These Mares are all in foal, mostly by the Jack, and will be sold at a ready sale at high prices.
100 Horses, mixed Stock.
500 Head Horned Cattle, American Stock and high breed.
400 to 500 Swine, good Stock.

The Stock now on the place can be sold with the Ranch and thus put the purchaser into a business position able at once. This Ranch is so situated that a range surrounds the range on one side and mountains on the other to which the Stock have a fine run without any interference from any source, thus giving the Stock a complete eating. Without reducing the original Stock can be sold annually from this Ranch 50 Mules, 100 Horses. 100 Beef Cattle, 300 fatted Hogs, worth in aggregate $10 000, three fourths of which is clear profit.

The timber is abundant Pine Oak, and other woods Tar, Pitch, and Turpentine can be made in abundance.

This is one of the Rare Chances, such an one as seldom offered.

Easy terms as to payments: A portion of the money can remain on time if secured.

For all particulars call on the Editor of the Farmer. 22

Pleasant Homesteads For Sale.

THE FOLLOWING PLEASANT Homesteads, located Properties, situated on the opposite side of the Bay, can be purchased at very reasonable prices and on terms if applied for soon.

No. ONE—A Handsome Two-story Cottage, with seven rooms and seven closets, hard-finished, and every convenience inside, Small Buildings, Chicken House, Soft Water, Gardens, and a very fine view of the Bay. Price about $3,000. Buildings perfectly new.

No TWO—Very similar Cottage, with eight rooms and same good finish and conveniences inside and outside, and same views—price the same. Both the above have excellent soil in the garden, and some fruit trees ready for bearing. The fences are fine around the grounds, each about one acre.

No. THREE—A large House, built some three years, large Garden and about 150 Fruit Trees in bearing, yielding a handsome income yearly. All these Dwellings are within three minutes of the cars. Price similar. These are really worthy special attention. For all particulars inquire of the Editor of Farmer.

....ALSO....

A neat Cottage with eleven acres of land all under with Fruit Trees, and small vines in abundance and Blackberries, Raspberries, Strawberries, Gooseberries, etc. The income from the ground has been about $ a year. The owner wishing to leave will sell at $ A fine location and everything desirable—it will be sold at a bargain.

—LAND.—

A Fine Building Lot all planted with Trees, about of the best quality and in bearing. The Fruit alone will pay for the place in three years.

OTHER LOTS OF LAND.

We have several Fine Lots of Land, open; also stocked with Fruit Trees, that can be offered on most favorable terms to those who wish to secure desirable Homesteads.

Inquire for all the above of the Edito of Farmer.

A Beautiful Eden for Sale.

ONE OF THE MOST DESIRABLE Estates on the Pacific Coast is now offered for sale by reason of a desire of the owner to travel abroad and regain his lost health—no other inducement could induce the owner to part with it.

The Estate now offered is beautifully located in a retired valley away from any immediate neighborhood, free from noise, dust, etc., and shielded on all sides by lofty and picturesque hills giving a varied scenery, delightful, no season of the year without real beauty.

The whole Estate comprises a little less than HUNDRED ACRES, the greater portion of it is covered with Orchard, Vineyard and Garden Grounds, containing all that is desirable, and unsurpassed by any grounds in this State.

The Orchard covers many acres, and the Vineyards are very extensive, and everything rare and desirable in these departments are here found.

Pleasantly built and located is the Cottage residence. This with Barns, Fruit Houses, Wine Cellars, and all appurtenances make the whole complete, a beautiful prosperous Garden Ground around the residence with large Orange, Lemon, Fig and Olive Trees in bearing gives the whole the true "Eden" appearance.

The productiveness of the place can be estimated when we say more than Ten Thousand Dollars annually produced from the Orchard and Vineyard, and these can be easily and greatly enlarged.

This whole Estate can be had at a bargain if applied for.

The approximate value is about a THREE-YEARS COME, and any person having ready cash of that amount, who wishes to secure one of the finest Estates on this coast, can find the present a rare chance. No person need apply who has not ready money to a reasonable amount, and none but a real purchaser. To one of the best chances for a Fort

A Valuable Essay to the Cultivators of the Soil.

We present to our readers the following letter from Father Accolti, S. J., of the Santa Clara College, whose means of observation of men and things are extensive, and whose opinions and decisions upon the matters presented will be admitted to be sound and wise.

Father Accolti, from his stand point, can make observations and point to results as skillfully as a commander of an army who from an eminence sees the workings of all the troops in the field below and before him. We are truly grateful to him for such a letter. Coming from his pen it will be received by our farmers and those who are engaged in Agriculture as from a kind Parent who wishes them well and advises them in the true spirit of affection and good will.

We commend this letter most earnestly with our grateful thanks for the kind interest he manifests for the cause we love; for the kind manner he speaks of our efforts and labors, he has our warmest gratitude. We do wish all who are engaged in Agriculture would read our Journal, for we know *they would* be the gainers:

SANTA CLARA COLLEGE, March 1st, 1865.

EDITOR CALIFORNIA FARMER:

I will try to take advantage of some detached moments of leisure, and give you some scrawlings of mine on "Education," even with the risk of conflicting perhaps with some views of yours on this subject. I have presented your requests to some of our Professors, and they will try to do the same. We have read a good many communications in the FARMER and other Journals, concerning the all-absorbing topic of the day, "the Petroleum." Many opinions have been emitted in some of them which seem to be in open opposition to the most obvious principles of Chemistry and Geology, and therefore capable of misleading the mind of the uninformed. I have requested our learned Professor of Chemistry, Fr. Varsi, to enter into this field of disquisition. He has promised he would; but I am afraid he will not be able to redeem, so soon, his promise; for he is utterly taken up with his daily professional duties.

Meanwhile, be assured, my dear sir, that I think a good deal of the FARMER, and, indeed, I should wish to see it introduced into every fireside in California. It is almost the only paper in the State, that truly justifies the title it bears (and really is what it professes to be). It is pregnant with most useful information, and is the best calculated for educating our farming classes, according to the rules of Science, and conformably to the wisdom of experience. I do not intend to give you a puff of flattery, for this would be utterly foreign from the usual frankness of my character. I truly say what I think, and I mean what I say. This is so true that I never miss an opportunity for commending your valuable paper to our agriculturists, as a safe guide in every branch of an intelligent husbandry.

In a new country like ours, where everything is in a state of formation, people undoubtedly need to be guided by principle in everything, in order to lay down the right precedents of a prosperous future. Our present time is fraught with great responsibilities towards the coming generations; and unless we establish now the foundations of good systems in every department connected with the prosperity of this State, and the happiness of its inhabitants, we will not escape the blame, and even the scorn of our posterity. To be sure, amongst all other branches, agriculture is one of the most important departments, upon which the weal of a nation depends; but, at the same time it is one too much acted upon by common people, so to say, mechanically, and on that kind of traditional rule "so my father has done and so must do I;" or "so this or that is done in my native country and so must I do here." In this way men may be considered simply as living machines, but not as living intelligent beings. Forsooth, we give all credit and praise to the agricultural systems prevailing in New England, in Illinois, Ohio, and elsewhere, but, although we may avail ourselves of a good many things which have proved useful in those countries, yet I would not advise to accept their systems altogether. We want to establish here not an imported system, but a system of our own characteristic of California, and peculiarly adapted to our own circumstances. In order to do this the most of the people must be enlightened, and guided by the intelligence of their betters, lest they take a wrong way. In other countries, where the population is already settled, and the long experience of scores of years has already established the proper standard of husbandry, everything is carried on smoothly, and every new-comer already knows what he shall do. But here, we are still on the track of experiments, and the standard of agriculture is still uncertain and unreliable. Besides, in order to be a good farmer a person must be raised, so to say, in a farming atmosphere, and have his own mind full of all associations relating to, and connected with, husbandry. But here it is not so, at least to a great extent. Great many of our farming classes are people who have never lived on farms, and before coming out to this country, scarcely knew how to handle a plow. I know scores of farmers who have spent the early and better part of their life, some on whale-ships, some in the navy, some in blacksmith shops, others in a wheelwright shop, or in a bakery, others who had been nothing else but carpenters or cabinet makers, or saddle and harness manufacturers; and even some who had passed their days in a dry-goods store, in the genteel capacity of clerk, and so on. Perhaps, some from among them will become tolerably good farmers after ten or twelve years of blunders, disappointments, and shortcomings; but the most of them, and especially those who foster in themselves the pretention of knowing already everything well enough, very seldom will rise above the sphere of an averaging mediocrity in ability and prosperity; and not unfrequently, such persons, overcome by despondency, will abandon all exertions, and doom themselves to live almost entirely on the mercy of Mother Nature, accepting from her bounty what she may give, with the least work, in order to support a lingering and wretched existence. It would have been far better for them, if they had remained in the practice of their former trade; or, having made up their mind to devote their attention to farming operations, they would have spared a great deal of trouble and disappointment to themselves, if they had taken for guide, in their new sphere of action, the CALIFORNIA FARMER. But now I don't know what amount of knowledge and ability the children of such uninformed farmers will inherit after the death of their unfortunately misguided parent. Reared under the influence of unskillfulness, carelessness, and disappointments, they will grow up ignorant like their parents, and perhaps will surpass them in sluggishness, indolence and misery. We do not want here, my dear sir, more laborers, who work and toil all the year round, so to say, at random, without principles, and without knowing what they are about. We want farmers, true intelligent farmers, and not ground-scratchers, who drudge for two months in the beginning of the agricultural year, in order to secure their seeds in the bosom of mother earth, then two other months in gathering her returns, and then spend the rest of her time, between the two seasons, in filling up bills at the grocer's store, at the dry-goods store, and perhaps at the grog-shop, etc.

A true, intelligent, and industrious farmer should study thoroughly well the soil on which he spends his labors; test all its capacities, and let not one inch of it remain useless, and without producing something. He should never confine his own industry to one single item of produce; for, if that one fail, everything must fail with it. Under the mild and benignant climate of California, we have stretches of lands capable of affording a great variety of products. But, unfortunately, the generality of our farmers confine themselves too much within the compass of very few items, under the general denomination of grain, but they never think how to meet their eventual failure. If, on account of a drought, the high, or gravelly land fail to give a satisfactory crop of corn, it may, on the other hand give a satisfactory compensation in a copious yield of rich grapes, from which abundant and generous wine might be obtained for the market; likewise, if the low land, on account of superabundant showers in the rainy season, give more straw than corn, the deficiency might perhaps be made up by a copious crop of hops, which will always find a good price in the market; and so on. Thus, by establishing a systematical rule, so to say, of compensation, and devoting a piece of the tenement to the cultivation of some other items of produce, besides the principal one, a farmer may have something on which to fall back in case of failure in either of them.

I have often heard some common farmers say: It is no use to labor so much on our farms, for our labors never will receive a corresponding remuneration in California. I should wish to know from such kind of reasoners what compensation they derive from their doing so little, and from their wasting away the precious treasure of time, which might be profitably employed in improving their lands. If every one thus improved his landed estate as to increase its actual value five per cent. every year, at the end of ten years he would be possessed with such a property as to command a great credit; and credit is a good capital, too; for, I would not credit ten dollars to a man who is backward in every point concerning his principal business. Besides, even supposing that the labor employed will not produce a great deal of money, if a farmer can come out square at the end of the year, without incurring new debts, at least, he will have the inward pleasing satisfaction, which will give to him the consciousness of having avoided idleness—the mother of all mischief—and of having set before his children the good example of steady and industrious habits, and thus secured for them the most valuable inheritance he may ever bequeath to them after his death.

It is impossible, I think, that a farmer who understands well his own business, and attends to it with thoroughness, should ever have a moment of leisure; and, if he have any to spare, he should devote it, at least, in keeping everything around clean, orderly, and even ornamented with the natural beauty of luxuriant growth. I wish that every traveler through our agricultural districts should feast his own eyes in looking around, and be refreshed by the sight of fine and well-kept rural homesteads, on both sides of the road. But I am afraid that people, generally, in this country are very exuberant in selfishness, and have very little of what the French call, with a comprehensive name "*amour propre*," which near about means "self-respect, or ambition." A man here will think that his back-bone is too stiff to stoop down and remove a stone of three pounds weight, which may be in the way between the fence-gate and his residence, unless he has some good reason to believe that underneath that stone he will find a solid and glittering dollar. Perhaps this looks something like exaggeration; be it so; at least it illustrates pretty well the spirit of the age. But this low groveling spirit is not conformable to the views and intentions of the Great Master of Creation. In His plan, the immediate destination of man is not rest and idleness; we leave this doctrine all to the benefit of the swinish herd of Epicureans and Sybarites; but man is made for labor and work, and even when labor is not required in order to obtain bread, it should be employed for creating beauty. When the first progenitor of mankind was put in possession of the enchanted, paradisiacal Garden of Eden, he was not dispensed from the duty of keeping it in good order, and exert the powers of his natural ingenuity, though the hand of the Almighty Architect had planned it with His creative power, and had lavished upon it all the exuberance of beauty, and made it a place of pleasure. "And the Lord took man, and put him in the Paradise of pleasure, to dress it and to keep it."—(Gen. ch. ii, v. 15.)

One of the greatest mistakes with our people here, is that every body thinks that he may become rich all at once, and wonders why he should not. Being under the influence of such a mistaken idea, he whets his desires, and directs its operations. He has no faith in gradual operations, he does not know, or can hardly believe, that Nature does nothing by jumps, but takes its time, and step by step reaches its great ends. The consequence is, that such people are continually laboring under disappointments from the beginning of the year to the end, and so on successively. Indeed they are always in the same predicament of an unskillful and impractical swimmer, who when struggling more against the waters in order to avoid drowning, then he is in greater danger of being swallowed up by the waves. A man, for instance, who has a farm of one hundred and sixty acres, wishes to cultivate one hundred of them, if not more, in order to raise a very large crop of wheat, and make a very good thing of it. But, he cannot forward his plan alone; therefore he must hire help for plowing, sowing and harvesting, and whereas labor in this country is too high, so it must absorb a good deal of the profit. Had he cultivated only fifty acres, not in haste, but seasonably, giving to that tract of land all the attention that a good, industrious, and intelligent farmer should give to his business, and I am sure that the yield would repay him abundantly, and even better than if he tilled the full tract of his domain. But, some person may say, supposing he cultivates only fifty acres, what shall he do with the rest? Well, taking for granted that the fifty other acres, which gave a crop the previous year, remain in fallow, I have told before, he may devote another portion of his tenement to the culture of some other item in order partially to supply the eventful deficiency of the main crop; and then are there no cattle and horses to provide for? Undoubtedly they must have an eye to a certain proportional number of cattle, that they may be kept in good order not in Spring and Summer only, but all the year round, so that the dealers in beef may find them always in good condition, and ready for market, and give a good price for them. And why a farmer could not raise a certain proportion of peas, which are a first rate food for pigs, and produce a fat not soft and oily, but solid and consistent? Besides, the stocks of these leguminous plants, it is generally admitted, are a splendid fodder both for cattle and horses. Horse-beans, too, are (as the very name indicates), a very nutritious food for the cavaline species, and particularly adapted to swine kept in pens. And with regard to milch cows, what is the use of keeping ten of them, and then not to take a good and proper care for their keeping? California people are very much for big figures, no matter if the quality is not superior; and this is a great mistake, for this is the cause why in this country good butter is not more common, and unexceptionable cheese is even less. Thus by keeping more cows than the owners can support properly and profitably, they will not give milk enough to compensate for the occupancy of a space of land set apart in order to supply them with a meager pasture. Five cows fed in stalls, and allowed to rove in the pasture for only three or four hours a day, would give more milk with less feed, than would ten cows let free in the pasture all the time, and devouring the double of feed. Of course such a system would require the raising of some roots, as beets, turnips, carrots, and I would greatly recommend also the cabbages of Brittany, of which we have plants as tall as ten feet; but all this would be exceedingly justified by the yield of abundant milk, and by the sparing of a good tract of land, which, not being required for their continued pasture, might be turned to a more profitable use.

I wish every farmer should be convinced of this practical truth, that one hundred and sixty acres of land, and even less, are exceedingly sufficient for occupying their time and their own industry, and for making themselves and their families not only comfortable, but even independent, and, I dare say, comparatively rich, provided they attend to their own business with steadiness and intelligence. These two conditions will dispense them from seeking other additional ranches in other far distant sections of the country, in order to enlarge the scope of their industry, and thus, by multiplying landed estates, diminish the relative profit; for it is impossible for any man to take good care of two ranches at fifty or sixty miles apart. Strength and efficacy generally are found nowhere except in condensation. I must confess the truth, my dear sir, I have no faith in extensive landed estates, and in very large herds of cattle held and raised by proportionably few persons. These, I think, are real obstacles to the development, weal and prosperity of the country. A country then, and then alone will be wealthy, when the lands are approximatively equalized among the masses of the population. It is not the soil alone that begets wealth, no matter how bountiful it may be, but it is the amount of labor and industry which is spent on it, that will fill up the safe. I do not care if a man is possessed with five or six leagues of land, under the sun, if he cannot make that tract really productive he is not richer than his modest neighbor who has only one hundred and sixty acres. Perhaps he may have ten thousand head of cattle on it, in order to supply the market with bad beef; but let a drought come on, and his large ranch will be covered with dead carcasses for the benefit of the crows and the coyotés; and perhaps he will be compelled to send to his humble neighbor of five cows for some milk in order to whiten his own tea. Had he divided and sub-divided gradually and successively, every year, his landed estates into small tenements of one hundred and sixty acres, and sold them, or given them in lease either temporary or perpetual, with the privilege of being redeemed and bought by the same lessee, after a certain number of years, and under certain equitable conditions, and he would have secured a fair profit to himself, and a home to many a family; would have increased the income of the public treasury, and in every respect really contributed to the substantial improvement of the country.

It is my firm conviction, my dear sir, that this State will never have any prosperity, unless manufacturers and agriculture receive proper attention. I have no confidence whatever in mining operations exclusively; merely mining countries have always been very poor countries. All the metal extracted from the mines goes into the hands of a few capitalists who, generally speaking, live out of the country, and all the rest of the people are nothing but slaves of labor for the benefit of capitalists. Only agriculture and manufacture will make us independent, provided the people at large are raised to the sense of the importance of these two branches of national prosperity, and know how to develop the natural resources of this magnificent country. This, my dear sir, is the glorious mission you have undertaken to fulfill in this State, and nobly, courageously, and steadfastly carried it on for more than ten solid years, and I hope you will continue to forward for many scores of years to come.

I had begun this letter with the intention of writing no more than a page, and I perceive I have overtasked your kind forbearance with a prolix and desultory "*causerie*." Please, then, to excuse me for my indiscretion, and take it as one of those conversational chats, I have so seldom the pleasure of entertaining with you.

Please kindly to remember me to friends and family, and believe me sincerely and affectionately yours. M. L. ACCOLTI, S. J.

The President's Message.

We give our readers one of the most remarkable documents, we think, that ever emanated from the Presidential mansion. One of the most brief, concise, emphatic and important documents that has ever been issued in our nation.

Every patriot and lover of his country must feel that President Lincoln's message just issued bears upon it the impress of inspiration. Abraham Lincoln wrote that message seemingly as if he stood in the presence of his Maker and felt the responsibility of his position, and was rendering up an account of his stewardship.

However great and important his other great message was, his Emancipation Proclamation, that was but the herald of the completion of his great work, and his inspired words fully prove that he has always been governed by the spirit of a God-fearing, God-serving Patriot and Christian.

Abraham Lincoln's Message should be printed in letters of gold and placed upon the door-posts of our dwellings, that coming generations may read and learn the lessons of this age:

FELLOW COUNTRYMEN—At this second appearing to take the oath of the Presidential office, there is less occasion for an extended address than was at first. Then, a statement somewhat in detail of the course to be pursued seemed fitting and proper. Now, at the expiration of four years, during which time public declarations have been constantly called forth on every point and phase of the great contest which still absorbs attention and engrosses the energies of the nation, little that is new can be presented. The progress of our arms, on which all else depends, is as well known to the public as to myself, and is reasonably satisfactory, encouraging all with the bright hopes for the future. No prediction in regard to it is ventured. On the occasion corresponding to this, four years ago, all thoughts were anxiously directed to the impending civil war; all dreaded it—all sought to avert it. While the inaugural address was being delivered from this place, devoted altogether to saving the Union without war, insurgent agents were in this city seeking to destroy it without war—seeking to dissolve the Union and divide the effects by negotiation. Both parties deprecated war, but one of them would make war rather than let the nation survive, and the other would accept war rather than let it perish. War came. One-eighth of the whole population was colored slaves, not distributed generally over the Union, but localized in the Southern part of it. These slaves constituted a peculiar and powerful interest. All knew that this interest was somehow to cause war. To strengthen the institution and extend its interest was the object for which the insurgents would rend the Union by war, while the Government claimed no right to do more than restrict the territorial enlargement of it. Neither party expected for the war the magnitude or duration which it has already attained; neither anticipated that the cause of conflict might cease, or the event happen before the conflict itself should cease. Each looked for an easier triumph, and a result less fundamental and astounding. Both read the same Bible, pray to the same God; each invokes his aid against the other. It may seem strange that any men should dare to ask the just God's assistance in wringing their bread from the sweat of other men. These are facts. But let us judge not that we be not judged. The prayers of both should not be answered; that of neither has been answered fully—the Almighty has his own purposes. Woe to the world because of the offense, for it must needs be that offenses come; but woe to that man by whom the offense cometh. If we shall suppose American slavery an offense, the Providence of God must needs come; but this having continued through His appointed time, He now wills more than He gives to both North and South—this terrible war as a woe due those by whom the offense came. Shall we discern that there is any departure from these Divine attributes which believers in a living God always ascribe to him? Fondly as we hope for the event, we pray that this mighty scourge of war may speedily pass away. Yet if God wills that it continue until all the wealth piled by the bondsmen's two hundred and fifty years unrequitted toil shall be sunk—until every drop of blood drawn with the lash shall be paid by another drawn with the sword, as was said three thousand years ago, so still it must be said that the judgments of the Lord are true and righteous altogether. With malice towards none; with charity to all, with firmness and right, as God gives us to see right, let us strive on to finish the work we are into, and bind up the national wounds, and care for him who shall have borne the battle, and for his widow and his orphans, and do all which may achieve and cherish a just and lasting peace among ourselves and with all nations. ABRAHAM LINCOLN.

MEXICAN COTTON SEED.—Invoices of this seed can be purchased in lots of from 100 to 500 lbs., by calling on the Editor of the FARMER.

The California Farmer.

SAN FRANCISCO:

FRIDAY.....MARCH 10, 1865.

THE CALIFORNIA FARMER READING-ROOM AND MUSEUM OF NATURAL HISTORY.

20 Clay street—Marble Building—Up Stairs.

The Farmer's Headquarters.

The Editorial Rooms and Museum of the FARMER OFFICE are always open, and an attendant ready to make a visit instructive to those who take an interest in the productions of our State. Samples of all productions: grains, grasses, fruits, models, inventions, minerals, and specimens in Natural History innumerable, are constantly being added.

Farmer's Reading-room.

Farmers and Mechanics, from the country, who visit San Francisco, should visit the Free Reading-room and Museum, at the FARMER OFFICE. Members of the Press, and Strangers, are particularly invited to avail themselves of these rooms. Newspapers from every State to which we have access by mails, as well as Foreign Newspapers, Periodicals, and Magazines, are upon file and on the tables for use; a Good Library of hundreds of volumes, with works illustrative of Agriculture, Horticulture, and Floriculture, works for reference upon all Sciences, with a Cabinet of Minerals, Coins, and Curiosities of interest to the Naturalist, to which we invite all.

Immigration Office.

New comers to California can always obtain all needed information about Lands, Farms, etc, at the Farmer's Reading room, 320 Clay street. Most cheerfully we bid all welcome to our Sanctum.

TO AGRICULTURAL SOCIETIES ABROAD

Exchange of Seeds, Books, Etc.

HAVING established large and spacious Reading Rooms, in this city, which contain Libraries, Cabinets, and hundreds of Newspapers, all free to those who wish to enjoy the benefits thereof, we now ask cooperation from all Agricultural Associations in the Old States and Europe, for the *Exchange of Seeds, Specimens, Books, Etc.* We shall be happy to reciprocate any and all favors, and comply with any direction made to us connected with such an enterprise.

Purchasing Agency.

Having had the experience of over thirty years in dealing in Trees, Plants, Seeds, and Agricultural Implements, we feel that we are fully competent by our experience in purchasing such articles to make a saving of from five to fifteen per cent for the great mass of purchasers. We will therefore offer to make purchases for all who wish our services, of any of those articles named, or for any articles of merchandise for our Farmers or Ranchmen, and ship the same as they shall direct.

In order that we may do their business in the most satisfactory way for them and ourselves, we shall wish that all who send orders should be as explicit as possible as to their wants—describing as minutely as they can; and, where they desire our judgment, we will do our best to suit them.

Our charge will be Five per cent, together with the cost of packing, freight, drayage, etc. Orders should inclose satisfactory references or the Cash; or bills could be sent by Express, to be collected on delivery.

We shall be happy to attend to the purchase and shipment of Trees, Seeds, Plants, etc., as this is our especial "hobby," and we know we can satisfy all that send us their business attend to.

☞ THOSE who receive a number of the FARMER with this paragraph marked, may understand that it is sent to them on their examination, hoping it will meet their approval and induce them to subscribe, and ask their neighbors to do so.

Postmasters and others, who may receive the paper, will oblige us by soliciting subscriptions, or putting it in the hands of those that will. Subscriptions may commence at any time.

Send for Sample Papers and get up a club. Address

PUBLISHER CALIFORNIA FARMER, San Francisco.

TERMS OF ADVERTISING.

THE charge for Advertising in the CALIFORNIA FARMER (payable in advance), is **One Dollar** for five lines, or less of space, in nonpareil type, for one insertion, and ten cents a line for any larger space. Each subsequent insertion half these rates. This it is believed affords the cheapest and best medium of reaching the Agricultural community on this coast. As heretofore, the right is reserved to reject any advertisements deemed objectionable.

☞ SEND MONEY BY EXPRESS.

reason of the present uncertainty of our mails and post office arrangements, we would request those of our patrons who remit us money in letters, to do so through Wells, Fargo & Co's Express, or register them, then they will come safely and promptly. Letters are so long delayed and so repeatedly lost that we make this request—we will cheerfully bear the extra expense.

☞ Take a Copy.—Are You a Subscriber?

We have distributed many thousands of copies of this journal during the Fair Season, and we have a just reason to hope that among these thousands we shall find many persons who will desire to become subscribers to this paper, now the oldest newspaper of the kind on the Pacific coast, a journal, too, that has been wholly devoted to the Home Interests of of our State. Those who desire it, in our city, can have it left at their residences by a carrier, every week. See terms at head of column.

Transactions of Agricultural Societies.

We would ask of those Societies in the Atlantic States and Europe, to whom we send our Journal, to send us the transactions of their several Socities, so that we may give the benefit of their perusal to visitors, from the several States, who are callers at our Reading-rooms. By this means we can lay before them the progress of Agriculture in their former homes, and thus advance the interest of both Atlantic and Pacific States.

Patent Rights.

IT has been, and will be, one of our specialties to aid all who desire to secure PATENT RIGHTS, and to give them information and assistance in preparing their papers. We can facilitate them greatly in this matter as we have all the Laws and Rules of Action touching these things. Many models can be seen at our Office and Reading-rooms, where all are invited freely.

TO READERS AND CORRESPONDENTS.

Read the Letter on Greenhouses, by "Improvement," it contains a very good suggestion and we are glad to present it, approve it and earnestly recommend it.

We present our readers with another Letter from our esteemed New York correspondent which our readers will always welcome.

Draining Swamp Lands is worth reading. Read "Return of the Wanderer," it is a true picture of California Life.

Messrs. Newman Brothers.—By their card it will be seen that this firm, so long and favorably known in our city as the only regular Brush Manufactory and sale warehouse, have recently removed to the new and spacious double store, Nos. 406 and 408, Battery street, near Clay. We think all who desire to make purchases of such goods as are advertised by this house can be sure of being pleased, for there must be something in a name—a *New man* and *Brother*, a *New Store* and *New Goods*. This is typical of success, and this house deserves it, for their many years of steady attention to their business, and the excellent satisfaction they have given to their patrons.

PLANTING TREES.—Early planting in ordinary seasons is the best, but seasons like the present, when the earth is cold and wet, and the water stands in the earth to saturate the roots, it is highly injurious to the fibrous roots. We therefore urge the lifting of trees from the nursery and keeping them in some dry, cool place, until the ground where they are to be placed is in good condition. Practice this way, and trees can be safely planted as late as April or even into May, with success.

To Mothers!—Mortality among Children.

No subject upon which any journal could speak is of more moment than the one to which we now allude, the "Causes of the Excessive Mortality of Infants."

In the last issue of the FARMER we commenced the very able and highly important and instructive Lecture of Professor Blake, upon this subject, delivered at the Toland College. We give the concluding part of it in this number. Let every mother in our State read it and re-read it. We esteem it one of the most important and valuable Lectures ever delivered in *this* or any other State, and it is such documents that we take pleasure in laying before our readers.

Well does the lecturer say: If a shepherd loses *five lambs* in a hundred, he would be discharged as not worthy his place. But *mothers* see their precious lambs die—ten, twenty, thirty and even forty in a hundred, and *wonder* at the terrible calamity, and yet *this Lecture* shows the cause—will mothers read it? *Will mothers heed it?* And will a *New Era come* to these precious young plants in the *Garden and Nursery* of the Household, the Home, the Heart.

This Journal points out the way to raise and grow up beautiful *Trees, Plants and Vines*, but we never recommend sending out *dwarfed, stunted and crippled* stock, and expects good fruit from the result.

This Journal has done much to advance the cause of good Stock of every species, but we have ever and earnestly advocated the kindest care of the *growing brood*, for unless care *is* taken of Stock while young the result is always loss and ruin. Now the question is not *trees* and *plants*, sheep, horses and swine, but *human beings*. Shall we nurture with care and skill the first two classes, the vegetable and animal, and refuse aid to the Immortal beings entrusted to our care. The appeal is made to *parents*, to *mothers* especially, and we hope the appeal will not be made in vain.

Professor Blake's Lecture should be scattered world-wide. It is indeed a happy thought to know that Light is breaking on this subject and truths are being uttered.

The Song of Spring and the Song of Birds.

The time of the Singing of Birds hath come! Spring-time and Bright Flowers is with us, and on hill-side and valley the Song of Birds come to woo us to the country. Bright Flowers cover the hill-sides and every tree is musical with the feathered tribe who now go forth to find their mates and thus add melody and happiness to every strain they sing.

But every citizen cannot go into the country—to the hillside among the flowers, nor to hear the song of birds; but every citizen can have a pretty garden spot full of flowers that send their fragrance into their dwellings, and they can have sweet-singing birds in their gardens and in their balconies, and thus with the music of birds and the perfume of flowers they can almost believe they are in the God-made country, for they can thus ask Nature's aid to make their Homes bright, beautiful and pleasant for all, and thus make it a "Happy Home."

Spring-time is with us, let us receive the voice and blessing of Spring with true, grateful hearts and enjoy it to the utmost. Awake with the early light and go forth and hear the song of birds and inhale the early perfume-breath of flowers. Every Home should have beds of flowers, they are a part of Home. Go by all means and secure, for each home these God-praisers of the morning, whose anthems are the first offered to the Deity. As in the strains of the beautiful poetess, "Amelia:"

"Birds of the pure and dewy morn!
How soft thy heavenward lay,
Floats up where life and light were born,
Around the rosy day!"

Letter from Sacramento.

[We give the following Letter, although it was a private communication on business, and the season for trade, etc., because it has many valuable hints, such as we hope Planters of the Vine will note. The Orange and Lemon we know can be grown to advantage in all our warm sections with perfect safety in our open gardens. Mr. Gaffanesh is a good and skillful cultivator and has a pretty garden spot and Plants and Vines worth looking at, and we feel pleased to know has met with large sales. This is the result of advertising wisely. See his card in our columns:]

SACRAMENTO, March 7th, 1865.

EDITOR CALIFORNIA FARMER:

There has been a large demand for Vines and Cuttings, so far, during the season, principally for Table, Raisin and Market kinds. I regret to notice that so few of our wealthy men, farmers and others, do not cultivate more of our approved European Wine Grapes, such as Burgundy, Medocs, Reislings, Auvernas, Claeuvers, Orleans, Tokay, Alicantee, etc. The rage runs altogether on the *largest bunches and berries*, they, as market grapes bring, for the present, the highest price, but the time is not far distant when the people will know the good from the poor grapes, and then there will be a change in the market. Many of the now neglected kinds may not bring as much per pound but will average more per vine, or per acre—the same rule is to be applied to the Wine Grape. The one that plants to-day the most approved kinds for generous Wines, will not have cause to regret it; he will sell his Wine at a higher price, and always dispose of his stock.

The late frosts have been rather hard on our early Fruit Trees, such as Apricots, Almonds and Plums, yet I think there is no harm done as there will be just enough left to do well both for the fruit and the tree. As a general thing we leave more fruit on the trees than they can well afford to bring to perfection.

Grapevines are beginning to move and things, in general, look green in and around this city.

The sale of Plants, Evergreens and Shrubs is good. I have a fair lot of Sweet Orange trees in full bloom, they are selling from five to ten dollars each, as it is proven that Orange trees will do well in many locations in this State.

I am very busy just now—some other day I will speak to you again. Respectfully yours,

A. GAFFANESH.

ARTICLES RECEIVED AT THE CALIFORNIA FARMER EXHIBITION ROOMS, No. 320 Clay Street.

We have received two valuable and interesting volumes "The Transactions of the Massachusetts Horticultural Society." These volumes contain the full doings of that very flourishing Society, with Reports of various Committees, full of interest. Also the Reports of ceremonies of laying the corner stone of their new and splendid Hall, erected at a cost of *one hundred thousand dollars*. We shall, in our next, give these interesting ceremonies, addresses, etc., and sketch of building, etc., as a matter of great interest, and an example to the world of what can be done for the cause of Horticulture.

We have, by this steamer, also, Thorburn & Co.'s New and Supplementary Catalogues of Farm, Garden and Florist's Seeds and Bulbous Roots.

Randall's great work on Sheep, received last steamer. See the advertising columns.

We have received a communication from Columbia on the "Cultivation of the Grape," touching the subject of distance in planting, etc. It will appear next week.

We have received a large and valuable package of Seeds from Hon. Isaac Newton, Washington, D. C., which came in good order and which we have quickly scattered, and had the quantity been ten times the amount would have as quickly gone. The good accomplished we hope to report at harvest time from those to whom we have dispensed them. The Bi-Monthly Report for January has been received, as usual, full of valuable statistical matter, of which we shall avail ourselves at an early day.

Greenhouses.

EDITOR CALIFORNIA FARMER:

In your last paper, you gave a beautiful picture of a Model Conservatory and Graperies, by that celebrated Horticulturist, Wm. Chorlton, of New York. As you have given that for the benefit of those who are blessed with means to gratify their taste, allow me to suggest a plan for many of your more humble patrons, who cannot command *feet* sufficient to erect such an expensive edifice.

There is scarcely a house but has a porch or piazza which is, or can be, cheaply enclosed with glass, and formed into a miniature conservatory, or Plant cabinet. Instead of having the roofs of such places of wood or tin, make them of glass, which is nearly as cheap, and as durable, and will be the means of gratifying one of the most humanizing tasks, the cultivation of plants. How many choice plants can be grown in some place of this kind, forming a picture from the windows of the rooms, such as no lace curtains or Brocatelle would be permitted to hide. One of your correspondents gave a hint of this kind a short time since, on Rustic Adornments for Homes of Taste. There is not a family in the city or country, who, if they should try an experiment of this kind, would afterwards consent to do without it at any price; it would become as necessary to the pleasure and comfort of the inmates as the sitting-room. I have known cases where it became the chief sitting room and living room of the house, with the clear light from above, the bright and cheerful green of the foliage, and the moist air that falls so exhilarating to the invalid that they cannot be induced to leave it.

To those who have the means and desire to have a more extensive place, and have not the space or location suitable, how easy to form the tops of their houses into splendid Greenhouses, or *Hanging Gardens*. Instead of the wood or tin roofs, substitute glass; the floors can be made sufficiently tight to prevent any leakage. As most of upper stories and garrets are mere receptacles for rubbish, this would be putting them to a far better use, and the increase of health and exercise obtained by going up and down stairs, would be ample payment for any extra expense in arranging it. In such a place, all kinds of plants could be grown in the greatest perfection, as the air would be more pure, and not subject to the cold damps of a greenhouse on the ground; the free light, no shade or shadows from other buildings, all would tend to develop the full capabilities of plants or fruits, and it would open up a new era in amateur plant culture; it would be so pleasant to invite our friends to *walk up stairs* and see our grapes, and Camellias, instead of out in the *cold air* of the lower regions.

Who will try this? Think for a moment what a delightful addition can be made to your house at a trifling cost, and how soon it would repay itself in fruits and flowers, and be a constant source of pleasure. Here the occupants or attendants could be as private as they chose, and not be overlooked or intruded upon by any one.

To an invalid, what a new life it would impart, and in many cases be the means of restoration to health.

Who of your readers will try it?

IMPROVEMENT.

THE SEVERE LATE FROSTS.—From all parts of the State we have accounts of severe frosts, in many instances doing considerable damage, cutting down young Vegetables, Peas, Potatoes, etc., so much so as to cut short the supply of early stock for market, and caused an advance in price. But we do not think the damage is very serious, in fact we look upon the check to vegetation a wise provision of nature, the earth is full of water, and the rapid advance of hot weather would cause trees, vines, etc., to advance too rapidly; then a check would be fatal to a whole crop—now a partial check is a blessing to our fruit trees—the loss of half will give better fruit and more in weight.

PLANT THE "BRIGHT FLOWERS."—Lovers of the "bright flowers" should bear in mind that flower seed of many kinds should be planted every month, in order to have a continuous blooming. This can always be had the whole summer long. S. W. Moore has received per last steamer, some very rare and choice Flower seed. The bright sun will now bring them forth readily.

PREMIUMS FOR THE FARMER!

$500 in Premiums!

Splendid Inducements to Clubs!

Desirous to offer inducements to all who will form Clubs for this journal, we offer the following liberal Premiums:

For every Club of FIVE, and $25, we give Atlantic Monthly, $4, Godey's Lady's Book, $3, and an extra copy of the Farmer, $5, for one year.

For every Club of TEN, and $50, we give Atlantic Monthly, $4, Godey, $3, Harper's Monthly, $4, Arthur's Magazine, $2, and an extra copy of the Farmer, $5.

For Clubs of TWENTY, and $100, we give Atlantic Monthly, $4, Harper's Magazine, $4, Godey, $3, Arthur, $4, Gazley's New Pacific Monthly, $5, the Eclectic Magazine, $5, any of the Quarterlies, $5, and an extra copy of the FARMER, $5.

For Clubs of FIFTY, and $250, we will give as a Prize one of *Wheeler & Wilson's* best plain *Sewing Machines*, valued at Sixty Dollars, with the Atlantic Monthly, Harper's and Godey.

For Clubs of SIXTY, and $300, we will give as a Prize a Sewing Machine, valued at Seventy-Five Dollars, the Atlantic, Harper's and Godey,

For Clubs of EIGHTY, and $400, we will give a splendid Wheeler & Wilson Sewing Machine, valued at One Hundred Dollars, with two selected Magazines.

For a Club of ONE HUNDRED, and $500, we will give one of Wheeler & Wilson's best Machines, with all the Extras, worth One Hundred and Twenty-five Dollars, and two Magazines selected by the party.

The above offers we believe will richly pay persons for giving a portion of leisure time and influence, and we believe it can be easily done, for there are many places where we have never used exertions to circulate where success is certain, in these many new localities, and we offer these inducements as an encouragement to win the premiums.

This will furnish any family with a library for a little brief labor to extend our circulation.

☞ We will suit the wants of all who procure us Clubs, by substituting for any of the above the Scientific American, Country Gentleman, Rural New Yorker, Prairie Farmer, Genessee Farmer, Boston Cultivator, Massachusetts Ploughman, Maine Farmer, or Agriculturist, making, however, the total value of premiums the same.

PREMIUMS FOR THE FARMER.

SPECIAL PRIZES FOR COLLEGES.

We desire to procure Views of all the Colleges and Seminaries of note, in our State, and we know of no better way than for us to offer Premiums to those Artists who shall be connected with the Drawing Departments. We therefore offer the following:

For the best Pencil Sketch, of *three offered*, of the Buildings only—a richly chased Gold Thimble.

For a Drawing of the Buildings and Grounds—a Ladies' Rich Needle Case and Materials, worth double the First Prize

For a Crayon Sketch of Buildings and Grounds—a Prize the value of the Second offered.

For an Oil Painting—a Prize worth double the latter—an Opera Glass, or a Japan Writing Desk.

For the Second Crayon Sketch—an elaborate Photograph Album.

A Good-Sense Letter.

We give the following as a sample of many letters we are receiving, and it gratifies us to know that the cultivators of the soil are now beginning to be reading, thinking men:

SOLANO COUNTY, February 28, 1865.

EDITOR CALIFORNIA FARMER:

Enclosed find a Five Dollar Greenback, for which send me your journal as long as you can afford, it being all I can spare. I wish for information respecting agriculture in this State, and do not know how I can procure it better than from your paper. Please send me the back numbers from the commencement of this year.

Yours, with respect, J. H. F.

Beautiful Plants in Oakland.—The citizens of Oakland cannot begin to beautify too soon, for Oakland is destined to be to San Francisco what Brooklyn is to the city of New York, and those who desire to increase the real value of their estates, should go to work and make them as beautiful as possible now. Every dollar expended now will bring ten back. Nolan's Belle View Nursery and Gardens, should be visited by all who love the beautiful. Mr. N. is an accomplished Gardner—a Master Workman—and lovers of Blooming Plants should by all means visit his Green Houses and see the Choice Plants there. An hour's conversation with one so thoroughly Master of his Profession, will give any person a new Love of Nature and compel them, by the Power of Truth, to become interested in Horticulture and Floriculture.

Special Notice.—We call attention to the Homestead advertised in our columns for sale, at Four Thousand Dollars. We are confident that if any one desiring a fine home will call on us, they will find it more than it is represented—we can convince them of it. Cash is the word, and a quick sale.

THREE ESSENTIALS.—The three great essentials to human health are: Keep the feet always dry and warm; have one regular action of the bowels every day; and cool off very slowly after all forms of exercise.—[Hall's Journal of Health.

A Complete Treatise on the Breeding, Management and Diseases of Sheep,

BY HON. HENRY S. RANDALL, LL. D.

Author of "Sheep Husbandry in the South," "The Wool Sheep Husbandry," Etc., Etc.

PUBLISHED BY

D. D. T. MOORE, ROCHESTER, N. Y.

THOUGH FIRST PUBLISHED ABOUT A YEAR ago, this work has already reached its TWENTY-FIRST EDITION, and the demand thus far has been extraordinary. A new and revised edition is now ready and others will follow in such rapid succession that orders can hereafter be filled promptly. No volume on any branch of Agriculture ever had so rapid a sale or gave such universal satisfaction. The work is a timely one, and unquestionably THE BEST AND MOST COMPLETE TREATISE ON SHEEP HUSBANDRY ever published in America. It is cordially welcomed and highly approved by both Press and People. Witness the following extracts from a few of the numerous Reviews and Letters the work has elicited:

☞ THE PRACTICAL SHEPHERD comprises 454 large pages, and is printed, illustrated and bound in superior style. Price only **Two Dollars.**

The Practical Shepherd was first published in October, yet has already reached its TWENTIETH EDITION, and so great is the demand for it that others are being issued as rapidly as possible. It is highly approved by both Press and People, and truthfully pronounced by far THE BEST AND MOST COMPLETE work on Sheep Husbandry ever published in America. The work is indispensable to every owner of sheep, the chapters on Breeding, Management and Diseases being alone worth ten times its cost.

OPINIONS OF PRESS AND PEOPLE.

From C. L. Flint, Secretary of the Massachusetts Board of Agriculture.

I am happy to acknowledge the receipt of "The Practical Shepherd," a beautiful book. I have devoted all my leisure moments to a perusal of the work, and congratulate author and publisher on what appears to me to be a complete success. May it have a large and satisfactory sale.

From T. S. Faxton, Esq., Woolen Manufacturer of Utica, and Ex-President of the New York Agricultural Society.

I have perused "The Practical Shepherd" with great interest, and do not hesitate to say that, in my opinion, it is just such a treatise on Sheep Husbandry as every man ought to have who deals in sheep or wool, and I hope it may have very general circulation with farmers.

From Geo. Livermore, the eminent Wool Commission Merchant of Boston.

The work seems to me, as far as I have been able to examine it, a complete success in its plan and its execution, and leaves nothing further on the subject to be desired at present.

From Samuel Thorne, the eminent Stock Breeder of Dutchess county, N. Y.

* * * "The Practical Shepherd" much more than equals my expectations, and is decidedly the best work of the kind I have ever seen of either European or American publications. It deserves so fully its name that it must meet with a very heavy call from all who own even a score or two of sheep.

From John P. Reynolds, Secretary Illinois State Agricultural Society.

* * * I have little doubt the work will meet fully the wants of those engaged in Sheep Husbandry. It has been looked for with much interest, and seems, from the not very careful examination I gave it, to be what the author desired to make—an impartial and useful book.

Other testimonials will be seen in the Publisher's card in another column, and we shall give others in future numbers.

FOR THE PACIFIC COAST.

Having received the agency for the whole Pacific Coast for the sale of this valuable Book, we are now prepared, by the arrival of large invoices of this Book by the last steamer, to supply the Booksellers over the State.

There has never yet been a Book on this subject so complete in all its details, and no Sheep-raiser, Wool Dealer or Shepherd should be without it.

WARREN & CO., Farmer Office,

8 Sole Agents for the Pacific Coast.

REMOVAL!

NEW STORE

THE UNDERSIGNED HAVE REMOVED FROM THEIR former place of business, No. 303 Battery street, to a large and spacious double Store,

Nos. 406 and 408 Battery Street,

Where they are now prepared to welcome their friends and patrons.

Newman Brothers,

BRUSH MANUFACTURERS,

And importers of all kinds of

Wood and Willow-ware

Have for sale:

Brushes of every Description,

BY LISLE LESTER.

PAPER NO. 3.

It is indeed astonishing with what rapidity the ...egon roads become almost impassable and the ...idges are swept away, while the valleys become ...undated beyond all use or travel. In the Fall, ...e gradual change in public conveyances, as the ...aveler pushes northward, is highly suggestive of ...his sort, and its baleful effects upon the high-...ays. At Yreka or Jacksonville the transition is ...om the Concord coach to the little more conve-...ient thorough-brace, or "mud wagons," as they ...re termed, which every one of the present day ...an picture as a covered wagon, a little lower be-...ind than before; yellow wheels and red box, ...with a huge driver's boot, made of stiff leather; ...inside there are three seats, cushioned with leather ...cushions, more solid in feeling than the boards ...beneath, while the floor of this stage has several ...good large cracks, suitable for the free circulation ...of cold air, and which are highly instrumental ...in making the feet very uncomfortable. The backs ...of these seats are strips of cushioned boards, ...which reach just to that place in one's back where ...a little support is ever so agreeable, and yet *fails* ...to reach it so universally that the spinal column ...weakens after a few miles' riding, and the inclina-...tion is to get into a variety of positions, more to ...be felt than enjoyed. The curtains of this vehicle, ...devoted to the "comfort of passengers," have ...several air holes, or rather ventilation places, ...through which the wind makes a very sad and ...deplorable squeak, as it squeezes through and ...pinches the auricular attachments of one's aching ...head. This "stage" has capacities for carrying ...freight, mail and passengers, of enormous ampli-...tude. After piling on twelve or fourteen large ...trunks, six or seven valises and as many blankets, ...baskets and bundles, the *small* effects of passen-...gers usually, the mail is added, sometimes ten or ...more bags; then express boxes, made of pine ...wood, but mounted with an iron lock large enough ...to use on a London penitentiary; then a few box-...es "going by express;" at small stations along, a ...variety of loading is added, a Mexican saddle and ...a box of apples, for instance; then a ham for the ...man living on a ranch, thirty miles from Whisky ...Creek, somewhere; then a box of candles, a few ...pounds of old cheese, a pair of boots, to be mend-...ed at Bob Taylor's, down at the ferry; a small ...chicken coop and a new shovel for Smith, on the ...summit; a keg of mackerel, a bottle of old rye, ...a bag of corn and case of kerosine oil, "for young ...Douglass, who married Mr. Wheeler's girl last ...week, and lives about four miles from the third ...station, in that new house, on Grave Creek, be-...yond the Canon." The driver, whose name is ..."Bill," will please "see that it goes all right." ...Then if he can "take along a couple of letters, ...and drop into the office, all right." Bill cracks his ...whip, the leaders jump, plunge and dance, as if ...the blood of fiery war horses coursed in their ...veins, when "Hold on a minute, Bill," and an old ...citizen rushes out, pantingly, with "will you ...just stop at Wilson's when you come back to-...morrow, and put aboard the blacksmith-shop? the ...blacksmith comes down to-morrow to shoe the ...teams, and he told me to tell you to bring down ...his shoes and tools, and bring down his valise, ...he's going into town to the ball to-morrow night, ...and wants his traps; probably he'll ride down ...with ye." "All right," says Bill, and away goes ...the wild team until they turn the corner, then the ...coach gives a sigh of relief, and the hoofs of cat-...tle are not more secure in their tread than the ...peaceable going four-in-hand.

The next change is to an open lumber wagon, called "in these parts" "dead *ears*." This is more safe, and being heavier, easier to ride in—the driver has a spring seat, and the travelers have a seat with the spring left out. Every joggle is an emphatic dead bump, jarring the equilibrium of a good square position, and extending the shock along the bones up into the head, and through the back very much as if one had been set down very heavily on a stone pavement. The beauty of this style of coach, of "the California Stage Company running splendid Concord coaches through to Portland in seven days," is the easy access the passenger has of seeing the scenery and beauty of country lying around him. Nothing to obstruct the view now. About one hundred miles in this, and as the soil proves spongy and yielding, and the horses sink gradually lower into "bottomless road," we made yet another change. This is a two-wheeled *coupee*, balanced in the center with a box sometimes, and sometimes an airy, French-designed, open-worked enclosure, used primarily to bring China and earthenware safe to our shores. This being so light and tasteful in its braiding symmetry, the "stock" get over the road much faster, and the "mist" which in other stages might dampen the inside of the box, in this runs off, out of the convenient perforations, and so keeps the cage dry all the time. Passengers do not always appreciate the benefits arising from the use of these little *phetons*, used by the Stage Company for the comfort of their patrons, and with which they are surer of making good time, but they are conveniences (?) of vast importance, both to the "stock" and the traveler.

In describing the various means of making out a "line of stages," we have digressed from the "Web-foot" subject to one no less *damp*. Oregonians will always be known as "Web-footers," and the State will bear its now common name, "Web-foot," as long as there is one to remember the story of its origin and rise. Emigrants have been led to believe that the old settlers of Oregon were actually *web-toed*, and many still believe the foolish stories in circulation of children being born with their toes webbed, like ducks. An amusing incident is related of a man from Missouri who, in crossing the Plains, had heard these reports of the State he had set out for, to make his final home, and so exercised was he with these bugbear stories, his more knowing companions delighted to bore him with, he altered his mind and left the route, taking up his line of march for California. A few months later, he was found by one of his old traveling friends, who remarked to him that "he should have kept with the train and located in Oregon." Whereupon the poor man replied, "If I had been a single man probably I should, but I could not endure the thought of my children becoming deformed, and growing up with 'web toes,' like geese; that's too wet a country for me!"

Californians have been the instruments in the getting up of these ridiculous stories and phrases, and have spared no pains to give the State of Oregon a most decided slur, as regards its facilities and society. While they have been loud in their coarse jeers of this new State, they have been very earnest in their desire for a little more of its "mist," and have been gladdened by the rise of their muddy apologies for rivers, and been made to rejoice as the northern brooks swelled into cascades and inundated their dirty valleys, that they might have the wherewith to live and eat. Much as they may disparage the State of Oregon, they are, to an eminent degree, entirely dependent upon her for many actually necessaries.

To be Continued.

Letters from an Old Californian at the East

NUMBER FORTY.

NEW YORK, Feb. 18th, 1864.

California Politicians—Gold and Stocks.

EDITOR CALIFORNIA FARMER:

How strange it seems to meet with the old Democratic leaders of California, and talk with them about parties and politics. To their honor be it said, the best of them sustain the Administration with an earnestness of purpose that contrasts strangely with the narrow-mindedness of New York politicians. It excites a strange feeling to know that the party to which we all used to belong, has fallen into the hands of unscrupulous demagogues, and that it is no longer what it used to be, a National Party, a People's Party. Any honest Democrat who will come to New York will get over his attachment to the name. It is used here as a cloak to cover disloyalty. Think for a moment of the Express and World being the leading opposition papers, and such Know Nothings as Brooks being leaders. Mentioning the name of the Hon. Booby (as the Herald calls him) Brooks reminds me to say that his cowardice in the Butler matter is heartily laughed at, and his speeches are quoted as examples of sublime ignorance. The great topic of conversation is of Peace. It will be a National misfortune if peaces is made in any but in one way. Sherman, Grant, Sheridan, Farragut and Porter, are worth all the Blairs that can possibly arise. They are the real peace makers. God hasten their work, is the prayer of every patriot.

The merchants of the metropolis are as anxiously to stop the panic in gold and stocks as they can. What would be the gain of the country would be their loss, and they are therefore trying to keep up the premium on gold. It is to seen how far they will succeed. Certain it is that whenever gold falls, business is at a stand still, and when it rises trade becomes brisk again. The conviction is becoming general that there will come some of these days a sudden fall in gold that will play the mischief with those who are not prepared. The conduct of Congress, in not raising more money by taxation, is much deplored. The representatives of the people are too much afraid of taxation. They are not up to the intelligence of their constituents in this matter. Congress, evidently, thinks the Nation would rather submit to the high premium on gold than be taxed openly and aboveboard. Most thinking men are sure that Congress is wrong. Some very intelligent persons, however, argue that it makes but little difference. Sure it is, that the people so far bear every burden most cheerfully. This proves that this is emphatically a people's war.

Wealth and Poverty—Small-Pox—Weed and Opdyke.

One of the first things to strike the eye of a stranger in New York is the splendor of the private equipages, and the showy liveries of the servants. Many of them are not only dressed in brilliant-colored garments, but wear very expensive fur capes, and Rip Van Winkle would surely, if he should wake up in this city, believe that the Republican order of things had been overthrown, and would doubtless ask what all the heraldic devices on the carriages meant. Some irreverent mud-sill might tell him, "Pshaw, they are only polite signs of cobblers, tailors and workmen." The foppishly-dressed broker would stop his whistling to answer, "Petroleum, Uncle; Shoddy, Uncle; Greenbacks, Uncle;" and would walk away, leaving "Uncle" very much in doubt of his sanity.

Amid all the gaiety of New York a gaunt figure stalks, and his hideous presence creates an excitement. His victims are published as having died of small-pox. In the dreadful tenant houses of New York wretchedness reigns supreme. It is a shame that in an American city there should be such dwellings for the poor.

The Opdyke-Weed trial is over at last, and by this time nearly forgotten. The knowing ones think that Opdyke has cleared his character from the stain of corruption, but that he is evidently a bungling hand at managing the hangers-on of party politics. I pity any man who becomes a New York politician.

Theatricals, Amusements, Lectures and Music.

Mr. Hackett has been giving a series of entertainments in aid of the Shakspeare Monument Fund, that have attracted much attention. He is an inimitable imitator of character, and it is a great treat to hear him. Edwin Booth has been playing all Winter at the Winter Garden the character of Hamlet, and yet the rush to see him is as great as ever. The talk of the town is John Owens' representation of Solon Shingle. The best critics pronounce his rendering of the character perfect. The greatest treat to me is an evening at Wallack's. The acting, the music, the scenery, is each in its way faultless, and one goes home satisfied. At most of the other theaters the star actor alone is interesting, and one's pleasure is marred seriously by the other shortcomings. At Wallack's the play is perfectly cast, and the author is the only cause of criticism.

At present we have any quantity of good concerts. The public, however, indifferently patronize them. A single exception may be named in the case of the Philharmonic Society. Of lecturers we have about the usual complement. Gough draws the best audiences. I would advise him to visit California. He would be sure to "take' anywhere.

I have often heard of the fashionable congregation of Bishop Southgate's church, on Murray Hill, Madison Avenue, and last Sunday morning went up to judge for myself. It was almost immost impossible to obtain standing room, every seat being occupied before the singing of the "Venite." If I had been ignorant of the character of the church, I would have at once guessed it by the splendid costumes of the ladies. The gaudily decorated altar and the elegant memorial windows harmonized well with the gorgeously-dressed worshipers. In a former letter I spoke of the fact that the celebrated choir of the Roman Catholic Church on Twenty-eighth street had, by the offer of larger salaries, been induced to sing at Bishop Southgate's, and I was very curious to hear how the chants of the Episcopal Church would sound adapted to florid Italian music. The effect did not please me at all, and when in his sermon Bishop Southgate eloquently called upon his people to unite more fervently in the responses, and complained that they seemed to him to have grown lukewarm, I could have told the distinguished preacher that perhaps florid Italian music sung by Italian singers had destroyed the solemnity of the service for others beside myself. The "Te Deum" alone occupied half an hour, and was certainly splendidly sung, particularly the basso solo, by Centemeri; but it sounded to me more like the finale of an opera at the Academy of Music than a chant at Zion Church. In the "Inbilate" the soprano had a solo that was full of running passages, and embellished with a profusion of trills that would have disturbed the prayers of a saint.

Hope's Painting of the Army of the Potomac.

The exhibition of Hope's picture of the Army of the Potomac is particularly interesting, from the fact that this celebrated artist joined the army not only from motives of patriotism, but in order to study the picturesque events of a soldier's life. In this picture he places before the visitor the army as it appeared at Cumberland Landing, on the Pamunky.

This was the only occasion on which any one of our large armies was ever encamped on a single field. On this field, two by three miles, were encamped for a single night only, the whole Army of the Potomac, eighty thousand men. The magnificence and grandeur of the scene made it to be remembered by every officer and man on the ground.

For the truth of the painting, the highest testimonials have already been received from a number of the leading Generals of the army. As a historical picture it is of the greatest National interest. In the extreme distance are seen the hills near Richmond; on the right the Pamunky with gunboats and transports; near by are the General Headquarters; on the left, the army has already taken up its line of march, and the lines of infantry, cavalry, and the wagon train, are seen moving out. Also a group of secesh prisoners are being brought in under guard. In the center foreground are the commanding General and staff.

The Draft—Rowdyism in New York.

Of course the coming draft excites a great deal of apprehension. Outside of the city the feeling prevails that New York dodged the last call for men, and that this time she ought to furnish her quota. The repeal of the commutation clause, which was so violently demanded by the Democrats, they now feel very sore over. Grant and Sherman assure the country that a prompt appeal for men *now*, will save a long war. It is to be hoped that there will be no delay in giving them all they want. The New York way of raising soldiers is very generally condemned, except by bounty jumpers, bounty brokers, and by the open enemies of the National cause.

Think for a moment, New York city pays equal to five hundred thousand dollars in gold for volunteers. You can see at a glance what a chance there is for corruption. Rowdyism is so powerful here that a respectable citizen belonging to the Citizens' Party, was nearly killed by the men in the employ of Boole, the City Inspector of Streets, because he wished to investigate the reputed frauds in this one department. If ever the people of San Francisco allow the People's Party to be broken up, they will deserve the reign of terror which is felt in New York.

The hotels of New York are so crowded at present that the last passengers from California had difficulty in finding first class accommodadations. My fair California friends tell me that furs, silks, velvets, and all costly dress goods, are much cheaper in San Francisco than in New York.

California Schools—Personal.

I must not forget to say, that the other day I was walking with a young friend who has been placed in one of the first class educational establishments on the Atlantic coast. I asked him, "Well, D., do you like —— Cottage better than the Collegiate Institute at Benicia, do you fare as well, and do you think you learn as much?" "It is a pretty good place, sir, but we live poorly, and I am sure we are not going ahead much." I am sure, from my observation, that the boy spoke the truth. I am astonished that any Californian will go to the extra expense of sending a child East to be educated. The schools in California, rest assured, are equal, and in many respects superior, to the boasted establishments here.

I met one of the Senators from Nevada the other evening, and after I went home, and after thinking over the conversation, I could not help regretting the choice of the Silver State in not sending some man like B. C. Whitman to Washington. A good lawyer, a fine scholar, a finished orator, a polished gentleman, Mr. Whitman would have wielded a powerful influence in Congress. I hope that some of these days both Mr. Whitman and Mr. Edgerton will have a chance at Washington. If I should be asked to name the orators of California in regular order, I would place the names thus: T. Starr King, Baker, Tracey, Edgerton, Whitman, and so on. As it is, the Pacific coast has no one who can answer Charles Sumner. Mr. Conness is making an influence which will be valuable, but if he could debate as eloquently as either Edgerton or Whitman, he would be a leader indeed.

M. A. S.

The New Terms of Our Colleges.

As it will be our aim always to serve the cause of Education, we shall devote a space in our columns to the time of the new Terms of the various Colleges, Academies, and Seminaries of learning, and if the Principals of each will send us information of the same, the time of each will be placed in this column; and if they will send us their catalogues we shall be happy to distribute the same from our Reading-room, to which we invite all who are interested in the Cause of Progress in California.

We hope we shall have the earnest co-operation of all Principals and Teachers, and to receive communications for publication that will advance the cause of Education. Our journal having a wide circulation, we can thus give extended notice to our Colleges and Schools, and materially help the cause, we therefore hope a new interest in the work. We cannot keep the public advised of changes unless we are notified.

PACIFIC NATIONAL BUSINESS COLLEGE—
At San Francisco, for Males,
M. K. Laudenslager, Principal.

FRENCH COLLEGE—
At San Franciscisco, for Males,
Prof. J. Mibielle, Principal.

OAKLAND SEMINARY FOR YOUNG LADIES,—
Commenced Monday, Jan. 9, 1865.
G. M. Blake, Principal.

SACRAMENTO SEMINARY—
For Young Ladies, commenced Jan. 2, 1865.
Mr. and Mrs. Perry, Principals.

SANTA CLARA COLLEGE, S. J.—
At Santa Clara, commenced the last week in August.
Rev. B. Villiger, S. J., President.

ACADEMY OF NOTRE DAME—
At San Jose, commenced August 23.
Sister Marie Cornelie, Lady Superior.

COLLEGIATE INSTITUTE—
For Young Ladies, 64 Silver street, commenced January 4.
Miss M. Lammond, Principal.

SAN MATEO FEMALE INSTITUTE—
At San Mateo, Commenced January 12.
Miss L. A. Buckmaster, Principal.

ST. CATHERINE'S ACADEMY—
At Benicia, commenced last Wednesday in August.
Mother Louise, Lady Superior.

NAPA COLLEGIATE INSTITUTE—
At Napa, for Ladies and Gentlemen, commenced Jan. 3, 1865. *W. S. Turner, A. M., Principal.*

ST. IGNATIUS COLLEGE, S. J.—
At San Francisco, commenced last Monday in August. *Rev. N. Congiato, S. J., President.*

Important to the Sick and Afflicted.—Electropathic Institute, San Francisco, No. 645 Washington street established February 12th, 1860, by an association of scientific gentlemen, for the cure of diseases and the suppression of quackery. Persons suffering from disease can rely upon the most scientific and honorable treatment at the above Medical Institute; and should their cases be within the limit of cure, the Resident Physician will warrant them a perfect and permanent relief from their affliction. And if their case be incurable he will so state, and advise them of the best method of relief, so far as science can go to accomplish the object. The basis of treatment at the Institute is the ELECTROPATHIC SYSTEM; but the resident Physician, J. H. JOSSELYN, M. D., a graduate of the University of Pennsylvania, has discovered several valuable remedies in the vegetable kingdom that will cure any curable disease. Since the establishment of the Institute, almost every kinds of disease has been treated with success, especially those complaints which have been ill-treated by quacks, the names of which should not be mentioned here.

FEMALES should bear in mind that the only safety in the treatment of complaints peculiar to their sex, is to have a physician who has made the female economy his particular study. In the Resident Physician at the Institute, they will find a surgeon who sympathizes with them in their troubles, and relieve them, no matter what they may be.

To the rheumatic and nervous person, this Institute offers the blessing of certain and permanent cure.

For those suffering from the effects of mercury, and those diseases for which mercury is usually given, there is no remedy as sure as the Electropathic system, as practiced at the Institute, 645 Washington street.

The Resident Physician is no Foreign Adventurer, nor is he wedded to one idea. All scientific systems are made by him a source of benefit to those who may see fit to consult him.

Come one, come all, and receive the blessings of health! The motto is—A Perfect Cure, or no money required.

Persons living at a distance from the city, can consult the Resident Physician by letter, stating the case, and will receive advice and medicines, as the case may require. All communications strictly confidential.

J. H. JOSSELYN, M. D.,
Resident Physician, Electropathic
7 Institute, 645 Washington st., San Francisco.

A Farm for Sale.
260 Acres.

CONSIDERED THE BEST IN EVERY respect of its size in the county. More than One Hundred Acres under fence, about Fifty Acres has been in crop. The soil is good; a Farm house with six rooms, Barn 50 feet square, a Granary with store house and other buildings, a tasteful Flower Garden round the house, with picket fence, a young Orchard, a Culinary Garden, Four Yoke of Work Steers, and about twenty other Cattle; about fifty to sixty Sheep; Hogs and Poultry a considerable quantity; convenient small lots inclosed round about the house; a splendid spring of water, sufficient for Milling or other machinery; also, a good spring of fresh water, and house over it; two Plows, one good Harrow, a Wagon and other Farming implements, a considerable number of Carpenter's tools, most of the Household Furniture.

It is a good situation for a Mill, Store or Tavern.

All will be sold in one lot for CASH in order to save trouble. No person need apply who has not the cash to pay down, as the parties intend to leave this locality.

Price Four Thousand Dollars.

Reference to its excellence can be made to Wm. White, Esq., of San Jose.

For further particulars apply at the office of the CALIFORNIA FARMER. 7

ADVANCES MADE ON ORES---SALES OF QUARTZ STOCK, MINING SHARES & PETROLEUM LANDS.

PARTIES WITH AMPLE MEANS ARE DESIROUS TO become interested, buy or make advances on all kinds of Ores ready for shipment to them in New York.

The same parties being well established and controlling large capital, can make advantageous sale of Mining Shares, Mining interests of all kinds, and all well established property above named.

For particulars enquire to the EDITOR FARMER. 5

MAN WANTED TO GROW SUGAR BEET.

A WEALTHY MAN, DESIROUS OF TESTING THE capabilities of our climate and soil for the cultivation of the Sugar Beet, and the manufacture of Sugar, desires to find a man who has had experience in growing the Sugar Beet for this purpose. To such a person a liberal offer will be made, and no other person need apply than one who has knowledge and experience.

Address or call on the Editor o the California Farmer. 1

Loan Wanted---$5,000.

WANTED, FOR TWO YEARS, $5,000 ON VALUable improved property in a neighboring County The property is worth treble the amount, Insurance on the buildings of $6,000 goes with the collateral. The money is wanted at a fair interest, which will be paid promptly. Inquire of Editor Farmer. 7-

Home Miscellany.

[For the California Farmer.]

RETURN OF THE WANDERER.

From childhood and youth, I've roamed o'er the ocean,
When I last left my parents the parting was sore:
O! I ne'er can forget with what painful emotion
I bade them farewell, and my dear native shore.

The charming, sweet Lucy I clasped to my bosom,
And kindly endeavor'd to soothe all her fears;
I kissed her fair cheek, she blushed with confusion,
Then bade her adieu and left her in tears.

She turned to depart; with heart nigh to bursting
I hastened on board, for fair was the wind,
And sail after sail aloft quickly spreading,
Home, parents and Lucy were soon left behind.

Months, years, long had passed, ere I turned my face homeward,
For disaster and shipwreck had marked me its own;
And the hope that had lightened my burden, as onward
I pressed in life's battles, had vanished and gone.

The locks that once were as black as a raven,
Are bleached by the storms and turning to gray,
The once youthful cheek by care-lines is graven,
And the lithe limbs of manhood are wasting away.

When, on the lone isle of the blue boundless ocean,
I thought of the fair one who look'd (but in vain),
For the hour of my coming, and, with earnest devotion,
Breathed a prayer for the return of the absent again.

My thoughts did not paint her but as when I left her,
With the same buoyant step, as to meet me she sped;
Adown the green lane, where often I met her,
And talked, while she blushed, of the time we should wed.

Thirty years! O! Time. Hast thou spared her?
My anchor of Hope—of Desire the bright goal;
Or has Death, the insatiate monster, ensnared her,
Does earth shroud her body; an angel her soul?

Lo! In the distance the church spire is gleaming,
And soon shall I be in my boyhood's loved home;
Here's the brook 'cross the lane, its pure water still running,
And the seat 'neath the maple with moss overgrown.

The lane is still green, the birds and the flowers
Seem the same as I left them—I cannot be old—
The air flushes with fragrance, songs gush from the bowers, [bold.
And—God help me,—Yes! 'tis Lucy, 'tis her I be-

I stood in the shadow and waited her coming,
She tripp'd o'er the grass, approaching the brook,
And the "lang syne" song melodiously humming,
Sought the shade of the maple in the old cosy nook.

Was it all mockery, and was I but dreaming?
My heart its pulsations apparently stay'd;
It could not be real, yet, verily seeming
To be my own Lucy, this beautiful maid.

The maiden arose, as the name I'd long buried
In my heart I uttered, and as to me she came:
Who called you thus, my bright one? I queried.
"My own dear aunt Lucy, she gave me her name."

As she spoke, in her eyes the tears trembled; and dropping
On the hand that clasp'd hers, like heavenly dew;
And where is dear aunt? She answered, with sobbing:
"She lies in the churchyard, beneath the old yew."

And your own dear mother? "She lies there beside her;
I ne'er saw my father, he died years agone;
I was but an infant, and cannot remember [down."
The great storm on the ocean when his vessel went

And now you're alone? "Yes; but aunt and my mother
Oft said I'd find friends; their words have proved true,
And they told me of one whom mother called brother,
But aunt Lucy taught to me to call Uncle Hugh."

But where is your uncle? "O! I never have seen him,
He went away on the ocean before I was born,
And although *not* my uncle, yet I thus learned to love him,
And aunty was certain he'd sometime return.

For she prayed every night, when we all knelt together,
That God would protect him, where'er he might roam;
That He in his mercy would be his defender,
And speed his return to the loved ones at home.

I *know* God will do it, for nightly I thank Him,
—As Aunty and mother ever taught me to do—
For blessings received, and have faith when I ask Him
To bless and return again dear uncle Hugh."

God bless thee, my child, thy prayers have been granted;
Thy uncle's returned, and though rolling in wealth,
He values more highly the love that's implanted
In thy bosom, by those who are silent in death.

Then we entered the churchyard, and, kneeling together,
By four grassy mounds, beneath the yew tree,
I earnestly pray'd, that now and forever,
God would bless the fair being that was left unto me.

Ten years since have fled. When Spring with her flowers,
And wealth of warm sunshine unseals the clear brook,
In sweet, silent commune I pass many hours
In spirit with Lucy, at the old cosy nook.

Sweet Lucy that's with me has long since been married,
And golden-hair'd children now sport 'round the hearth,
While I thank the Good Master that thus long I've tarried,
To taste of His mercies bestowed upon earth.

O! when in peace thy servant shall leave them,
And rest 'neath the yew tree with those he doth love,
Guard them through life, from error's ways shield them,
Then gather them home in Thy mansion above. ‡

WOODBRIDGE, Feb. 28, 1865.

Causes of the Excessive Mortality of Infants.

Introductory Lecture delivered at the Toland Medical College, by James Blake, M. D., Professor of Midwifery and the Diseases of Women and Children.

[Concluded.]

As I trust the above facts will suffice to prove to you the importance of bad air as a cause of infant mortality, we will now proceed to consider the cause that takes the second rank in the slaughter of the innocents that is going on in our midst. As I have before stated, this is bad and improper nourishment. In a former part of this lecture, we had to quote the statistics furnished by the French Foundling Hospitals, to show the great difference of infant mortality in these institutions according as they were situated in the town or in the country, and it is from the records furnished from the same source, that we shall draw the most striking facts, showing the effect of diet on the mortality of infants. In the foundling institutions at Lyons and Parthenay where the children are suckled at the breast, the mortality is 33 and 35 per cent. during the first year, whilst at Paris, Rheims, and X———, where artificial feeding is either entirely or very generally employed, the mortality rises to 50, 63 and 80 per cent., so that in this last institution designated by X———, out of 244 children received, 197 died before they were a year old.*

In these hospitals, so far as can be ascertained, the general management was much the same, with the exception of the feeding, so that it would seem, even comparing the most favorable examples Lyons and Paris, the mere substitution of artificial food for breast milk was the cause of death to 17 children in every 100, during the first year of their existence. In private life the effect of artificial feeding is undoubtedly far less fatal, but still tends greatly to increase infant mortality, even under the most favorable circumstances. There are cases, however, in which artificial feeding must necessarily be employed, and it but too often happens that under such circumstances a great deal of mischief is done by giving food which even a slight knowledge of the peculiarities of an infant's stomach, would at once point out as improper. Pap and farinaceous substances generally are an abomination to the stomach of a young infant, as they are with great difficulty digested by them, and even if digested they do not furnish the elements of nutrition that the infant requires. Arrow-root and farina form occasionally useful additions to cow's milk, but with very young infants they should always be avoided if possible. Even where infants get their natural nourishment, a great deal of mischief is often done by improper nursing; either the child is nursed too frequently, that its food has not time to digest, or else too long an interval is allowed to elapse so that its stomach becomes weakened, and then being overloaded, indigestion is produced and as its consequence, diarrhea. In most well conducted households, the greatest regularity is observed as to the meal times of the older members of the family; but it too often happens that a prolonged visit, or an evening at the theater or at a party, is allowed to interfere with the regularity of the meals of the infant, although its delicate stomach is much more easily upset by such neglect than that of the adult. In young infants particularly the stomach is small, and digestion going on rapidly, they require to be fed every two or three hours. When too long an interval elapes between the times of feeding, the infant overloads its stomach, infant dyspepsia is the result—a disease much more easily established than cured. I am confident a large proportion of the children who die of what is called summer complaint in the Atlantic States, are killed by injudicious nursing. When the hot weather sets in, the stomach of the infant as well as that of the adult feels its influence, a certain amount of dyspepsia is produced, which in the adult leads to a lighter diet; the infant feels uncomfortable and cries, the remedy is to nurse it more frequently, it gets feverish and thirsty, it is put still oftener to the breast, and thus its stomach soon becomes entirely incapable of digesting its food; diarrhea is the result, naturally not curable by drugs, as long as the cause which first started it still keeps it up, and the child soon dies the victim of mistaken kindness, in fact poisoned by its own mother's milk. No sane woman would give her husband beefsteaks to relieve the pain of a dyspeptic stomach, or propose rich soup to quench his thirst when feverish, yet the absurdity of so feeding her infant when it is sick never strikes her.

Another cause of disease amongst children is improper clothing, although elder children are greater sufferers from the absurdities of fashion in this respect than infants, nevertheless, a great deal of disease is produced even amongst infants by the irrational manner in which they are dressed. Physiology plainly shows us that there are many peculiarities in the organization of an infant which render it much more susceptible to the influence of cold than the adult. There is, for instance, in the child a much larger surface exposed, in comparison with its bulk than in the adult, and this surface is defended by a much thinner skin, so that the blood-vessels and nerves are more directly affected by cold; thus the blood is readily driven from the surface, giving rise to interoal congestions and inflammations. Besides this, all young animals possess the power of generating heat less rapidly than adults, so that they react against cold less readily. And yet, notwithstanding these facts, which are plain and undeniable, infants are made to wear low-necked dresses and short sleeves, whilst their mothers are clothed well up to the neck and down to the wrists. Hartwick, in his treatise on the Physical Education of Children, observes: "The absurd custom of allowing young children to be about with short stockings, bare knees, thin drawers, short frocks, and uncovered necks and arms, has been the first cause of many a consumption, croup and early death; and can in no case be of advantage, for weakening and impeding the functions of an important organ (the skin) is surely not the proper way to harden the constitution." Another evil indirectly resulting from this irrational way of clothing infants is, that in order to keep them warm, the room in which they live has to be kept at a higher temperature, thus interfering with ventilation, whereas, were they properly clothed, they could breathe a less vitiated atmosphere. In these remarks on the prejudicial influence of cold on infants, I would not be understood as including the washing of the body with cold water, the effect of which is the very reverse of the prolonged application of cold from insufficient clothing, for whilst the latter gradually lowers the vitality of the skin, the momentary application of cold water to the surface, is, in a healthy infant, always followed by a speedy reaction which raises its vitality. I cannot conclude this part of the subject without calling your attention to the manner in which gradual deformity of the infant's foot is produced from the time it begins to wear shoes, and which is the source of much suffering in after life, under the form of corns, bunions, and all sorts of misplaced toes. The foundation for these deformities is generally laid in infancy, being carefully developed as the child grows up, and bitterly paid for in later years. They are owing entirely to the faulty construction of the shoes, but as more rational views on this subject are being brought to bear on the shoe manufacturers in Europe, and I believe in the Eastern States, it is to be hoped that this absurdity will soon be remedied.†

Another fertile source of disease and mortality in children is the indiscriminate drugging to which they are too frequently subject at the advice of every old woman or nurse who chooses to pretend tht she "*knows a great deal about babies*," although in the whole circle of her ignorance it is probably the subject on which she knows the least. For my own part, even after many years of study and experience, I never approach the cot of a sick infant without feeling that I have a more than usually difficult problem to solve—the derangements of the finest and most delicate of living mechanisms to investigate and set right. With as much reason would you give a delicate Geneva watch to be mended by a village blacksmith, as to drug an infant on the advice of an ignorant nurse.

But the hour informs me that I must bring my remarks to a close, although I have not exhausted the catalogue of morbific influences that hover around the cot of the infant. I have, however, endeavored to point out those which I believe to be the most powerful for evil, and at the same time the most capable of being alleviated. Amongst the twenty-two deaths that take place in every hundred infants during the first year of life, I believe that fully one-half might be prevented by the diffusion amongst the people of a few of the common sense dictates of sanitary knowledge. There are two methods by which this can be effected—through the organization of local sanitary associations by the ladies, for the direct diffusion of sanitary knowledge amongst their neighbors; and secondly, by some radical improvement in the present system of public and private education, by which the rising generation shall not be left in entire ignorance of those principles of sanitary knowledge, which will be of far more importance to their happiness as future fathers and mothers, than any other branch of knowledge that can be taught.

We cannot have a more striking proof the good to be effected by organization than by the result of the efforts that have recently been made in our midst to alleviate the suffering of our wounded soldiers; and a tithe of the energy and a hundredth part of the expense that has been devoted by the ladies of the community to this noble object, would, if employed in the diffusion of useful knowledge amongst the poor and ignorant in our midst, be rewarded by a still richer harvest in lives saved and suffering alleviated. It is, however, to the general diffusion of the teachings of sanitary science by a more rational system of education, that we must look for the radical cure of that ignorance which at present consigns so many infants to a premature grave. But this can only be accomplished when the fathers and mothers of to-day shall have so far modified their views of education, as to feel that it is a more useful accomplishment for their daughters to be able to interpret the cry of a sick infant, than to translate the pages of a French novel, and that of the knowledge of the changes in that cry which would reveal whether the seat of its sufferings is in the head, or its chest, or its stomach, is more valuable than that which would serve to detect a false note in an operatic air. This, however, is not the place to enter on the subject of education, but the following remarks from Spencer's work on education contain so much common sense that I cannot avoid quoting them:

"If by some strange chance not a vestige of us descended to the remote future save a pile of our school-books or some college examination papers, we may imagine how puzzled an antiquary of the period would be on finding in them no signs that the learners were ever likely to be parents. 'This must have been the *curiculum* for the celibates,' we fancy him concluding. 'I perceive here an elaborate preparation for many things; especially for reading the books of extinct nations and of coexisting nations (from which, indeed, it seems clear that these people had very little worth reading in their own tongue); but I find no reference whatever to the bringing up of children. They could not have been so absurd as to omit all training for this gravest of responsibilities. Evidently, then, this was the school-course of one of their monastic orders.'

"Seriously, is it not an astonishing fact, that though on the treatment of offspring depend their lives or deaths, and their moral welfare or ruin, yet not one word of instruction on the treatment of offspring is ever given to those who will by and by be parents? Is it not monstrous that the fate of a new generation should be left to the chances of unreasoning custom, impulse, fancy—joined with the suggestions of ignorant nurses and the prejudiced counsel of grandmothers? If a merchant commenced business without any knowledge of arithmetic and bookkeeping, we should exclaim at his folly, and look for disastrous consequences. Or if, before studying anatomy, a man set up as a surgical operator, we should wonder at his audacity and pity his patients. But that parents should begin the difficult task of rearing children, without ever having given a thought to the principles—physical, moral, or intellectual—which ought to guide them, excites neither surprise at the actors nor pity for their victims.

"To tens of thousands that are killed, and hundreds of thousands that survive with feeble constitutions, and millions that grow up with constitutions not so strong as they should be; and you will have some idea of the curse inflicted on their offspring by parents ignorant of the laws of life. Do but consider for a moment that the regimen to which children are subject is hourly telling upon them to their life-long injury or benefit; and that there are twenty ways of going wrong to one way of going right; and you will get some idea of the enormous mischief that is almost everywhere inflicted by the thoughtless, hap-hazard system in common use. Is it decided that a boy shall be clothed in some flimsy short dress, and be allowed to go playing about with limbs reddened by the cold? The decision will tell on his whole future existence—either in illness; or in stunted growth; or in deficient energy; or in a maturity less vigorous than it ought to have been, and in consequence hindrances to success and happiness. Are children doomed to a monotonous dietary, or a dietary that is deficient in nutritiveness? Their ultimate physical power and their efficiency as men and women will inevitably be more or less diminished by it. Are they forbidden vociferous play, or (being too ill-clothed to bear exposure), are they kept in doors in cold weather? They are certain to fall below that measure of health to which they would else have attained. When sons and daughters grow up sickly and feeble, parents commonly regard the event as a misfortune—as a visitation of Providence. Thinking after the prevalent chaotic fashion, they assume that these evils come without causes; or that the causes are supernatural. Nothing of the kind. In some cases the causes are doubtless inherited; but in most cases foolish regulations are the causes. Very generally parents themselves are responsible for all this pain, this debility, this depression, this misery. They have undertaken to control the lives of their offspring from hour to hour; with cruel carelessness they have neglected to learn anything about these vital processes which they are unceasingly affecting by their commands and prohibitions; in utter ignorance of the simplest physiologic laws, they have been year to year undermining the constitutions of their children; and have so inflicted disease and premature death, not only on them but on their descendants."

In conclusion, I have to apologise for the very imperfect manner in which, owing to restricted time, I have been able to treat the subject of Infant Mortality, and also for having detained you so long in bringing before you facts which, judging from the manner in which they are neglected are not of a nature to please the intellectual tastes of the present generation. It is possible at some future period, when our race shall more completely have thrown off its intellectual gorillaisms, and shall more firmly have secured its position as being composed of rational beings, that as much attention will be given to saving the lives of one-half of our children, as is now devoted to teaching those that survive to spin in unmeaning gyrations over the floor of a ball-room, and that even the charitable instincts of our species will find as agreeable and useful an employment in saving the lives of half the infants that perish, as in feeding and clothing a few orphans amongst the survivors.

* In face of this sad mortality, it is not surprising that the person who drew up these statistics hesitated in exposing the name of the institution so fatally celebrated as an example of mismanagement.

† A sensible little pamphlet on the subject, entitled, "Why the Shoe Pinches," by Meyer, a celebrated German anatomist, has been translated into English, and after running through several editions in England, has been republished by Trall & Co., New York. It can, I believe, be found at the Book Stores in this city.

Corner Seventh and K streets,

SACRAMENTO.

THIS HOTEL IS OFFERED TO THE PUBLIC AS a "Home for Families," and for the Traveler.

The Proprietor has spared neither expense or care to make his Hotel one that shall always be acceptable and pleasant to all that may favor him with a call.

With ample accommodations by means of spacious Suites of Rooms for Families, and by recent enlarged accommodations, he is confident that visitors will always be satisfied and feel at Home.

Particular attention will always be paid to the comfortableness of the apartments, by well ventilated Rooms, clean Beds and Bedding, and strict attention to the wants of Boarders; while the TABLES will be provided with the very best the season affords.

CARRIAGES, to and from the Hotel to the Railroad Cars and Steamers, at all times. Free of Charge to the Patrons of the Hotel. Hotel open all night.

☞ Connected with the Hotel is a Fire-proof STABLE expressly for the care of Horses and Carriages of the Patrons of the House.

D. E. CALLAHAN,
PROPRIETOR.

A CARD.

YEARS HAVE ELAPSED SINCE THE Subscribers first invited public attention to the peculiar properties of their Patent Axle-grease. At first their invention made but slow progress, but thanks to the liberal and appreciative spirit of a large portion of the teamsters and coach proprietors of California, the demand for their manufacture has gradually increased, and notwithstanding the many spurious imitations which from time to time have been introduced from the Eastern States to compete with their article, the H & L AXLE-GREASE has now acquired an unrivaled reputation, extending throughout the length and breadth of California, Oregon, and the neighboring Territories.

The subscribers return their grateful acknowledgments to a discerning public, who have so largely patronized them in all their enterprises which they are now happy to say, are beginning to be justly appreciated as belonging to our California industry.

The supply of material from the East having, in consequence of the war, been cut off, the subscribers turned their attention to the substitution of COAL-OIL as a basis o their manufacture, but after applying every means suggested by the modern application of the science of chemistry, they were reluctantly compelled to the conclusion that however fit COAL-OIL might be for illuminating purposes, and for which it stands unequaled, it was not at all adapted to make a permanently satisfactory Axle grease. In this dilemma the subscribers turned their views to the native produce of California, believing that large quantities of natural resin might be collected from the noble pine trees of her boundless forests.

Having invited attention to this subject, th with steady progressive steps, advanced this until, at the present time, they have established a manufactory of Rosin and Turpentine at Forbestown, from which considerable quantities of both articles are daily manufactured, of such a quality as to find a ready market at fair prices.

It is hoped that increased efforts may continue to be put forth, and new discoveries made, so that California may soon be independent of all foreign supply, for we believe our lofty mountains and our mighty pine forests will yet give us that supply. The subscribers are now receiving native resin in sufficient quantities to be le to sell their celebrated AXLE-GREASE at a LOWER PRICE than any of the spurious COAL-OIL varieties which may hereafter be imported.

HUCKS & LAMBERT,
Manufacturing Chemists,
21-3 Natoma and Minna streets, San Francisco.

PATENT RIGHTS FOR SALE.

THE FOLLOWING PATENT RIGHTS OF NEW AND valuable inventions (of which we have models to show their value) are now offered for the States of California and Oregon, and Utah and Washington Territories.

NO. 1. THE MECHANIC'S SPIRIT LEVEL.

Patented September 13, 1859.

This Implement will be of great value to Contractors and Builders, being one of the most valuable inventions yet out. Builders will do well to examine the model.

NO. 2. IMPROVED CLOTHES REEL AND BAR.

Patented January, 3, 1860.

This valuable domestic piece of furniture can be used in the Laundry, the Kitchen, the Nursery, or Chamber, and can be made plain or ornamental; standing in the same relation as a piece of important furniture as does Wheeler & Wilson's Sewing Machines, neat when used and ornamental when not in use.

NO. 3. A CORN CULTIVATOR.

With this implement the soil is first thoroughly plowed and deeply pulverized, and on the return it smoothly and perfectly hills up and harrows the ground between the rows. A very new and valuable implement.

NO. 4. A MUSKETO BAR.

This will be much wanted in California. It is simple in its contrivance, perfect in its working, and can be affixed very cheap to all styles of bedsteads. Hotels, public houses and private families will find it a useful invention.

NO. 5. HYDE'S PATENT POST-DRIVER.

A most excellent labor and money-saving machine, for which we offer rights.

NO. 6. SEED-SOWER.

This is a new invention, and one of great importance to all who sow grain, or any garden seeds. The working model can be seen at the Farmer's Reading-room.

Holding the rights to all these new inventions, we invite the public to call and see the models. All persons who may be desirous to purchase either County, City, Town, or Individual Rights, can do so on application to

---

A Complete Treatise on the Breeding, Management and Diseases of Sheep,

BY HON. HENRY S. RANDALL, LL. D.,

Author of "Sheep Husbandry in the South," "Fine-Wool Sheep Husbandry," Etc., Etc.

PUBLISHED BY

D. D. T. MOORE, ROCHESTER, N. Y.

THOUGH FIRST PUBLISHED ABOUT A YEAR ago, this work has already reached its TWENTY-FIRST EDITION, and the demand thus far has been extraordinary. A new and revised edition is now ready, and others will follow in such rapid succession that all orders can hereafter be filled promptly. No volume on any branch of Agriculture ever had so rapid a sale or gave such universal satisfaction. The work is a timely one, and unquestionably THE BEST AND MOST COMPLETE TREATISE ON SHEEP HUSBANDRY ever published in America. It is cordially welcomed and highly approved by both Press and People. Witness the following extracts from a few of the numerous Reviews and Letters the work has elicited:

OPINIONS OF PRESS AND PEOPLE.

From the New England Farmer, Boston.

"The Practical Shepherd" is a work that has long been needed by our people. It should be in the hand and head of every person owning sheep.

From the Country Gentleman and Cultivator.

As a whole, this book is unquestionably in advance of anything of the kind now before the public.

From the Maine Farmer.

The name of the author, Hon. H. S. Randall, is a guarrantee of its completeness and reliability,

From C. L. B. P. Johnson, Sec'y N. Y. State Ag't Society.

It is the best practical Sheep Book, I think, ever published, and does great credit to Dr. Randall.

From the New York Tribune.

In this volume the author has exhausted the subject, and given all that is necessary for any farmer to know about selecting, breeding, and a general management of sheep, in health or sickness. We heartily commend this work to all who wish for a sound and thorough treatise on sheep husbandry.

From the Michigan Farmer.

Mr. Randall has made the very best book extant on American Sheep Husbandry.

From the Ohio Farmer.

The reputation of the author—who ranks as THE authority in this country upon all that pertains to the breeding and management of sheep—will induce a large and continued demand for "The Practical Shepherd."

From the Prairie Farmer.

The illustrations of sheep are by the best artists of New York, and well done. The letter press and paper are all that could be desired in a work of this description. It will undoubtedly meet with the large sale its merit demands.

From the Scientific American, New York.

It is vastly important that those who raise sheep should obtain all the information possible how best to manage their flocks, and we unhesitatingly recommend the "Practical Shepherd" as the most interesting and reliable work on the subject extant.

☞ THE PRACTICAL SHEPHERD is sold only by Agents and the Publisher. The demand for the work was, for months, greater than the supply, and hence it has not been offered or advertised in the Pacific States. It comprises 454 large duodecimo pages, and is printed, illustrated and bound in superior style. Price $2, Sample copies mailed, post-paid, on receipt of price.

Wanted a Farm Manager.

A PRACTICAL MAN, THOROUGHLY INFORMED in farming in a dry climate on a light loam on a porous subsoil. A Scotchman with a Californian or Australian experience preferred. Experience in a dry climate is absolutely necessary. Address, "Farmer," Lock Box 943, San Francisco P. O., giving particulars of past experience. 12

OLD NEWSPAPERS FOR SALE.

50,000 OLD NEWSPAPERS FOR SALE, AT the FARMER Office. 23t

Literary Shrubbery.

THE following verse contains every letter in the alphabet except E:

A jovial swain may rack his brain,
And tax his fancy's might;
To quiz is vain, for 'tis most plain
That what I say is right.

CONUNDRUMS.—Which is at once the easiest and hardest of occupations? The musician's—for he plays when he works, and works when he plays.

A good husband is all that a wife can expect; but a good wife is no better than she ought to be.

A good way to "kill time"—sleigh it. Yes, sleigh it without distinction of age or sex.

Why are chickens liberal? Because they give a peck when they take a grain.

It is not kind to say of an actor that he succeeded in *executing* his character.

—Carlyle says: When I gaze into the stars, they look down upon me with pity from their serene spaces, like eyes glistering with tears, over the little lot of man. Thousands of generations, all as noisy as our own, have been swallowed up by time, and there remains no record of them any more; yet Arcturus and Orion, Sirius and the Pleiades, are still shining in their courses, clear and young as when the shepherd first noted them on the plain of Shinar. What shadows we are, and what shadows we pursue!

"TALKIN' of law," says Pompey, "make me tink of what the mortal Cato, who lib most a tousand years ago, once said, 'De law is like a groun' glass winder, that give light enuff to light us poor mortals in de dark passage of life; but it would puzzle the debbil himself to see troo it.'"

A MAN who contemplated attending the great fair at Springfield, last Spring, applied for accommodations to the agent, and said he wanted a "box stall for his horse, himself, wife and daughter, which is one of the best animals that ever stood on American soil."

AN IRISHMAN going to market saw a farmer with an owl. "Say, Mister, what will you take for the big-eyed turkey?" "'Tis an owl," replied the astonished farmer. "Divil a bit do I care whether its *owld* or young."

California Grass Seeds.

EVERY VARIETY OF NATIVE GRASSES, the seed of which can be saved, will find a ready purchaser for the seed, on application at the Farmer Office.

FROM OUR EXCHANGES.

—A destructive fire occurred in Yreka, on the night of the 6th inst. The office of the Union newspaper, with several other buildings, was destroyed. The fire is supposed to have been the work of an incendiary. Total loss about $12,000.

—The fare to New York by the steamers Golden City, via. Panama, and America, via. Nicaragua, on Monday next, March 13th, is as follows: Golden City, first cabin, outside state-rooms, $150; dining saloon, $115; second cabin, $56; steerage, $40. By the America, first cabin, $110; second do, $65; steerage, $35.

—The work of grading the Western Pacific Railroad from San Jose to Stockton is progressing finely. About seven miles of it is completed, and it is the intention of the overseer to have it done to the county line within ten days. The iron of the road is now en route from New York, and will in a short time arrive in San Francisco. The most difficult part of the work will be through the Livermore Pass, but the Company are determined to push through to Stockton with all possible speed. So says the San Jose Courier.

—At last accounts there were ten feet of snow in American Valley, Plumas county, and good sleighing.

—Parties who arrived here from Arizona last week say that the several mining districts now exhibit signs of new life; the result of renewed energy. Some forty-five arastras are now in operation, working quartz from the Vulture lode, at the Hassiamp Diggings. A number of new arastras were being erected, which would increase the number to over sixty. It is stated that the quartz taken from the Vulture pays over $150, in gold, to the ton, when worked in the above manner.—[Los Angeles Star, Feb. 28.

—The late decision of the Supreme Court, in the Bear River case, establishes these points: State and county taxes must be paid in gold coin. A contract made in writing to pay gold will be enforced. Greenbacks are a legal tender for debts, where the debtor did not specially contract to pay in gold. Greenbacks are a legal tender for all debts contracted prior to the passage of the Legal Tender act by Congress.

—The Buena Vista Vineyard, in Sonoma county, is the largest in the world. It consists of 6,000 acres, with 272,000 vines planted previous to 1865, and 700,000 planted or to be planted this year. Last year, the yield was 42,500 gallons of still wine, 60,000 bottles of sparkling wine, and 12,500 gallons of brandy. One hundred men are constantly employed, and double that number during the vintage. There are 8,000 fruit trees, and 2,000 varieties of grapes.

The Voice of War at Fort Fisher.

We who are dwelling on the quiet, peaceful shores of the Pacific, know but little of the calamities of the dreadful war that has raged for the last four years, carrying death and desolation in its train.

Our newspapers can make only a feeble attempt at description, although now and then we find a description that gives a true conception of it.

In a letter from one of the 7th Regiment of Connecticut Volunteers, a description is given of the bombardment of Fort Fisher. Here we have a picture that gives some idea of what the reality must have been. The writer says:

So continuous and telling was the fire that the garrison was driven into the bomb-proofs and made no reply with their guns, several of which were already dismounted. At this time, the parapets, traverses and sloping sides of the vast earthwork were furrowed and notched by the unparalleled fire which had been concentrated upon the fort three days and nights. Yet the work was not weakened or damaged to any considerable extent. Although shot and shell fell either upon or within the fortress, to the number of 360 a minute, or 21,600 an hour, it was not breached nor swept away, but stood with distinct and dim outlines nearly as perfect as when the first gun opened upon it. This, and many other engagements, conclusively show that the most formidable offensive and defensive works are those made of earth. The bombardment, as it progressed on this day, can be but meagerly described. It was grand, terrible, impressive beyond the power of human description. The most concentrated and powerful fire had been reserved for this day. The uncomely monitors ran close in-shore, and delivered their huge shells with the greatest accuracy and fine effect. The frigates Colorado and Wabash, mounting two tiers of heavy guns, took their positions farther out than the vessels of lighter draught, and poured in their terrible and rapid broadsides. They were constantly enveloped in clouds of sulphurous smoke, through which lurid tongues of fire leaped from their oaken sides. Our other gunboats were formed in line of battle, and vied with each other in the terrible contest. The peaceful sea was overspread with a vast extended cloud of battle smoke, through which the sun could not force his genial beams. Probably a more concentrated and powerful navy fire was never witnessed—probably was never equaled. So powerful was it that the solid shot and shell hurled by our largest guns, penetrated in some instances through 15 feet of solid earth and exploded against or within the bomb-proofs. I was told by Col. Lamb's secretary that the concussion within the fort, from exploding shells and solid shot, was most terrible and deafening. It seemed as if volcanic fires were leaping and thundering from the earth. The air hissed, quivered, flamed with missiles of destruction. One unceasing thunder of artillery shook the earth. On this occasion, I saw what I never before observed in a bombardment. Large wreaths or rings of powder smoke frequently issued from the muzzles of the heavy guns, and rising slowly and regularly, increased in diameter and preserved their original form for a long time.

Use and Abuse of Ice.—The drinking of iced liquids in considerable quantity is highly injurious, and in some cases their use has been attended with inflammation of the stomach and bowels, and even sudden death—not always accounted for by the person being at the time in a heat. Ice, or iced water, retards digestion, chills the body, and often reproduces most dangerous congestions. On the other hand, ice or iced water applied to inflamations, croup, etc., has been productive of the best effects; it diminishes the quantity of blood in the vessels, and carries off the excess of heat. A piece of ice laid on the wrist will, in many cases, stop bleeding of the nose. If milk or butter is cooled with ice, it must be used at once, otherwise it will lose its freshness.

Wendell Phillips on Edward Everett.—In a recent speech, Mr. Phillips spoke of Mr. Everett as one of the new converts to the theory of progress in politics, adding: "And when I name Edward Everett I desire to say that I name the cap-sheaf of American magnanimity for the last three years. I know of few men in any age or language who at near seventy years of age, with such a career behind them, had the loftiness to stand before twenty millions of their countrymen and say 'I was mistaken.' Such men are rare in any age, and certainly deserve fair credit for such a confession. They are new converts."

The Markets.

Wholesale Produce Report.

This represents the prices paid by the dealer to the producer.

Corrected weekly, by A. H. Todd & Co., corner of Clay and Drumm Streets.] March 10, 1

Markets for all kinds of Grain and Produce are firm with high prices ruling, although actual sales have been materially lessened, and only a Jobbing trade in a small way exists "since the advance." This may be said not only of Flour and Wheat, but also of Feed and Grains, in which the strictest kinds of economy is apparently being practiced, and lessening the consumption materially. The cry of *scarcity, famine, short crops, etc., advance in prices*, and an *intimation* that a *further* advance may soon be looked for, do not accord with our views, when *weekly* large shipments of both *domestic and imported Flour* are being made to China, Mexico, etc. In our opinion, these shipments go to *markets where California prices do not rule*, proving conclusively that holders and operators fear the quantity on hand and to arrive is large *and beyond their control*. Neither is it probable that these shipments are made at prices now ruling, and doubtless, like the sale of 5,000 brls Chile Flour to a distiller at a low price ($6), they are made to reduce the stocks on hand and advance the price of the balance. That there will be a demand from the interior for Flour, as soon as the roads are open, no doubt exists, but the extent of that demand will materially depend upon the prices ruling. Potatoes, Beans, and many other articles that could be used as substitutes, have been advanced and sustained, through the sympathetic means or Flour not by any actual scarcity that exists, as our numerous well-filled Store Houses will attest. We, like many others, like fair prices and good profits, but regret to see such a vacillating and unsteady market; such a stock-jobbing gambling course as now exists, that sooner or later, bolstered-up as it may be by a daily evening cotemporary, must result in temporary distress and the future discomfiture of the operators and country at large. We have reason to believe our harvest will be early this year, and from appearances, abundant; and from favored localities, we may expect Wheat by the 15th or 20th of June. Only three and a half or four months at farthest, before the New Crops will be upon us. Speculators will have to bestir themselves, for the period of high prices are short.

Our receipts from all sources, for the past week, are as follows: Wheat, 8,726 sks; Barley, 1,408 sacks; Beans, 1,205 sks.; Potatoes, 6,773 sks; Flour, 26,474 qr-sacks; Hay, 1,734 bales; Straw, 590 bales; Oats, 5,592 sks; Onions, 100 sks; Bran, 100 sks.

A CARD TO OUR PATRONS.

'Tis said *competition* is the life of trade. Fair, honorable competition, we never fear; but when our *name*, or the *same name*, is used to deceive others or injure our business, it becomes our duty to notify our patrons and friends that such is the case.

We were recently called upon by a person in this city, to supply a large order for more than One Thousand pounds of Seed of various kind, and also for several hous and Seed Bags—these were said to be for a store or stores in the country.

It soon came to our knowledge that these Seeds were to establish a Seed Store on Washington Street, in this city, under the same *Sir*-name as ourselves. The secret and unfair manner in which these Seeds and Bags were attempted to be procured of us, was so singular and so unfair, that we had just suspicion of wrong intent. We soon learned that *falsehood* was told us, and we refused to supply the order, knowing that no other establishment on the coast had laid in the stock of Seeds as ourselves, and having every reason to presume that our name will be used in the sale of Seeds elsewhere, we feel it a duty to remind our Customers and Purchasers of Seeds everywhere, that they should all be careful in sending their orders, and to be particular in their directions.

We have been established nearly ten years in the Seed Business, and we trust that by the extent and system with which our business has been conducted, we have justly earned the reputation of a regular Seedsman.

We import our Seeds direct from the best houses in Europe and the Eastern Growers, we have the most extensive stock in California by a large extent, and purchasers need only call at our establishment to satisfy themselves that our business is so conducted as to meet their approbation and business.

We return our thanks to our many Customers for their liberal support for these many years past, and trust a continuance for many years to come.

We would remind all our Friends and Customers the necessity of being particular and to address all letters and orders to

W. R. STRONG'S American Seed Store

NO. 206 J STREET, SACRAMENTO,

IMPORTERS

—AND—

WHOLESALE AND RETAIL DEALERS

Garden Seeds, Tree Seeds, Grasses,

The Largest and Best Collection of Seeds the Garden, Field and Orchard that can be found in all the upper section of the State.

THE UNDERSIGNED BY AN EXPERIENCE of many years has made himself familiar with the character of the seeds especially wanted for the Sacramento Valley, or any portion of our State, and has taken pains to import, from the very best sources in Europe and the States, only those of the most reliable character and quality, such as are adapted to this climate, all guarranteed PURE and FRESH, and which he can most cheerfully offer to his customers.

The Collection of Seeds will embrace every desirable variety of

GARDEN,
FLOWER,
—AND—
FRUIT SEEDS
Together with
AGRICULTURAL SEEDS

For every Department including all the New Grasses, GRAINS, etc.

Ornamental Trees

....AND....

SHRUB SEED.

Choice Flower Seeds

Over Two Hundred Varieties, and these of the CHOICEST KINDS.

GRASSES.

A large Collection of all the Valuable Clover and other Grasses suitable for high or low lands.

A large Invoice of Alfalfa, or Chile Clover, last crop, best quality, imported to order, will be for this year also.

California-raised Alfalfa, of a very superior and of extraordinary purity.

Cotton Seed, Seed Rice, and Tobacco Seed

All these of the most approved sorts.

Bulbous Roots

In great variety. In this collection will be found Hyacynths, Tulips, Naracissus, Crocus, Lillies, Gladiolus and all choice Bulbous Roots that flourish well in this clime.

It has been the object and aim of the undersigned to import and prepare for his patrons a collection of Seeds superior to any yet offered in this section and by the opening over fifty large packages, of many thousand pounds of new and choice Seeds, all of the present growth, just received by the last steamer, to which he would call their especial attention.

He can assure those that desire pure and reliable Seeds, that they can send their orders with full confidence that they will be attended to, and filled to their satisfaction as if they were present themselves.

Catalogues of the Seed of this warehouse will be sent to all applicants.

A fine collection of Fruit Trees, Grape-vines, Ornamental Trees, Flowering Plants and Shrubs will also be found in the yards connected with this Store during the season of transplanting.

Agricultural Books, Pruning Knives, etc., always on hand.

W. R. STRONG,

Laying the Corner-Stone of the New Horticultural Hall, Boston, Massachusetts.

[We have given a considerable space in our column to present to our readers the doings of this influential, prosperous, and admirably conducted Horticultural society. We feel a pride always in speaking of this society, because it has done so much good by its labors and exhibitions.

We remember well its early day—for we were a contributor for many years—its small beginning in an upper chamber in "old Cambell" its dishes, common white ware, without name, fame or means. It thus commenced, but its friends had hearts worthy of the cause, and that gave the spring to its prosperity that now shines upon it so resplendently when the Treasury nearly foots up a quarter of a million dollars. We intend to show the pecuniary prosperity of this Society hereafter, suffice it to say the new building cost over one hundred thousand dollars, and the Society have over one hundred thousand invested.

We know that it is the most prosperous society of the kind in the world. And this has been the result of a wise management from its beginning.]

The Corner-Stone of the New Hall of the Massachusetts Horticultural Society was laid on the 18th of August, 1864.

At a Special Meeting of the Society, called on the 13th day of August, at the rooms in Armory Hall, the President stated that the work of building the new Hall had so far progressed as to be in readiness for laying the Corner-Stone.

He remarked that the magnitude of the building was such, that it was deemed proper to observe the occasion in a manner commensurate with the importance of the work; and, although it was not the desire of the Building Committee, or be presumed of the Society, to make any ostentatious display, yet it was thought that some notice should be taken of such an event, and that the Corner-Stone should be laid with such ceremonies as were deemed appropriate. It remained for the Society to take such measures as would render the occasion interesting to the members and creditable to the association.

On motion of G. W. Pratt, Esq., it was voted that a Committee of ten be appointed by the President, with full power to make all necessary arrangements thought proper for the occasion, and the following gentlemen were appointed the Committee: George W. Pratt, S. H. Gibbens, W. H. Spooner, Jr., William Gray, Jr, C. H. B. Breck, F. Lyman Winship, J. C. Hovey, D. T. Curtis, E. W. Bushwell, R. McCleary Copeland.

Agreeably to the arrangements made by the Committee, the members of the Society, with His Honor Mayor Lincoln, the members of various kindred societies, and other invited guests assembled at the Rooms of the Society, in Amory Hall, at the corner of West and Washington Streets, at nine o'clock A. M., on the 18th of August. The meeting was opened by the President, who stated its objects and requested those present to form in procession in the Hall, and thence under the marshalship of Samuel Hatch, Esq., proceed to the site of the building, at the corner of Tremont and Bromfield Streets. The Order of Procession was as follows:

Detachment of Police,
Chief Marshal,
Brigade Band,
Committee of Arrangements,
President of the Society and Chaplain,
His Honor the Mayor, and Members of the City Government,
Building Committee,
Stewards bearing the Boxes and Documents for deposit beneath the Stone,
Architects of the Building,
Past Officers of the Society,
Invited Guests,
Members of the Massachusetts Charitable Mechanic's Association,
Members of the Natural History Society,
Trustees of Mount Auburn Cemetery,
Members of the Massachusetts Historical Society,
Members of the Institute of Technology,
Trustees of the Public Library,
Members of the Massachusetts Society for Promoting Agriculture,
Members of the Boston Numismatic Society,
Members of the Massachusetts Horticultural Society.

The procession proceeded up West St., through Tremont Street Mall and Tremont Street, to the site of the new building, and formed upon the platform, a raised dais being erected for the President, Chaplain, and invited guests. After music by the band, the following address was delivered by C. M. HOVEY, Esq., President of the Society:

GENTLEMEN OF THE MASSACHUSETTS HORTICULTURAL SOCIETY:—We are assembled here to-day, agreeable to your direction, to take the first formal step towards the erection of a building for the use of the Society, to more effectually carry out its purposes of "encouraging and improving the science and practice of Horticulture, promoting amelioration of the various species of trees, fruits, plants and vegetables, and the introduction of new species and varieties."

Such were the original objects of the Society, as named in the act of incorporation, and such, I am happy to say, they have always been, and I doubt not ever will be, as long as this beautiful edifice you are about to erect shall endure.

This is the second time that you have, in the course of your organization, erected a building for the Society. It will be just twenty years, on the 14th of September next, since the corner-stone of Horticultural Hall in School street, erected on the site of the old Latin school-house, was laid by your late President, the Hon. Marshall P. Wilder, now prevented from uniting in these ceremonies by long continued illness. It was the only important act of the Society since its foundation in which I have not been present or taken part; but absence abroad prevented me from witnessing the services on that interesting occasion, and I esteem it a source of the very highest gratification that, through your continued kindness and great confidence, I have now the honor not only to be present with you, but to take so prominent a part in laying the corner-stone of another magnificent structure, which will undoubtedly be the home of the Society long after we and many succeeding generations have passed away.

The Massachusetts Horticultural Society was organized February 24th and incorporated June 12th, 1829, and it is highly gratifying to me, and I doubt not to every member, to recognize among those who are assembled here to-day, gentlemen whose names are borne upon the charter, and many others who were prominent and active members the first year of its organization. Though thirty-five years have glided away, and age may have lessened their active labors, it has not checked their enthusiasm, diminished their zeal, or lessened their devotion to the interests of a pursuit which, in their younger days, was a source of instructive occupation and pleasure, and which now amuses and solaces their declining years.

It would scarcely be possible, should I make the attempt, in these brief remarks, to recount the progress of the Society, from its small beginning in State street, up to that period when the old hall in School street was erected, since which time its history is more familiar; but I should be recreant to duty did I not, standing on these solid foundations, refer to one who did more than all others to place the Society in its present flourishing condition, and enable it now to undertake the building of an edifice of such magnitude and architectural beauty. Need I say that I refer to the late General Dearborn? Without detracting in the least from the labors of a band of intelligent and distinguished men, who were pioneers to the enterprise, it is not too much to say that to him are we indebted for the "sacred garden of the dead," Mount Auburn Cemetery, and the consequent results from his plan of an experimental garden. His enlarged knowledge, liberal views, accomplished mind, practical skill, and elevated character, alone carried the project through. His pen was never idle in gathering facts and writing reports to show the undertaking a safe one, and the objects to be attained worthy the consideration of the whole community. By the happy combination of an experimental garden and cemetery, horticulture was to be recognized as an art and science, and the dead removed to secluded and shady groves, away from the busy marts of crowded cities, and though a combination of circumstances changed a part of his favorite scheme, it is undoubtedly owing to its failure that we are indebted for the means to erect this Temple, no less calculated "to foster and extend a taste for pleasant, useful, and refined gardening." We love and revere the name of such a noble man: we shall never forget his unselfish labors, and when our edifice is completed, it will, I am sure, be the hope that his statue may have a prominent place within it. But whether his statue or bust will ever grace our hall, this building will be the enduring memorial of his genius and services, and his name will be held in grateful remembrance by a thousand generations.

But it is since the completion of the former hall that the progress of the Society has been more rapid, and its influence felt throughout the entire country. New life and fresh vitality were infused into the Society. It had the sympathy, as it had been the substantial aid, of the public. It was appreciated as its founders intended it should be. Its object seemed all at once to become apparent. It encouraged and promoted the science and practice of horticulture; it stimulated the production and introduction of new flowers, fruits, trees, and plants; it rewarded the cultivator for the best specimens of his skill; it gathered together, for the use of its members, a library of the most celebrated English and French works on gardening; it made known through its weekly and annual exhibitions of all the choicer productions of the garden, the orchard and the greenhouse; it awakened a taste for ornamental and landscape art, and it disseminated through its annual reports a vast fund of information upon every branch of horticulture.

Who does not see in whatever direction he may turn, the results of the influence which has gone out from the Massachusetts Horticultural Society? Beautiful villas enrich and embellish all parts of the country; suburban gardens of greater or less extent give a cheerful and picturesque aspect to our towns and villages; and even the little gardens and city lots denote some unseen influence which has changed these weedy and neglected places into verdant and fertile spots. Who will compare the rural aspect of the country thirty-five years ago with its present appearance, and say the Massachusetts Horticultural Society has wasted the resources with which a liberal public have in part endowed it, for objects so beneficent, and for purposes which confer both individual comfort and happiness upon the people.

Thanks to the generous men of Boston, that after they had witnessed our good stewardship, they reposed every confidence in us, and came forward liberally with their aid, determined that no loss should come from an enterprize then deemed hazardous for our means. Yes, gentlemen, we were the owners of a new hall, but beyond that we had little to accomplish the great objects in view, namely, to create a laudable competition by the offer and distribution of liberal prizes, and thus attract the people to see the superior specimens which the skill of our cultivators could produce. We had not, fortunately, any occasion to wait; and I deem this a most fitting opportunity to allude to their liberal acts. Few of the large number of members, who have recently joined us, know by what means we have reached our present prosperity, and, if they did, we should be ungrateful were we to forget those among the dead, or those among the living, to whom we are indebted for aid to more effectually carry forward the great objects of our association.

This building, it is true, is erected by the funds of the Society principally received from Mount Auburn Cemetery. This beautiful location, however, was only secured by the most persevering efforts of the Committee appointed for that purpose, who believed it possessed all the facilities the Society required, and was just within the means of the Society to purchase. Two years have your Committee assiduously labored to bring the work to its present state. We hope and believe the Society will never have cause to regret what they have done.

And we have established funds, the income of which we distribute yearly in premiums. This has been the life of the Society; and, the larger the amount at our disposal, the more rapidly will the art of Horticulture be promoted, and a genuine taste for gardening be encouraged.

And now let me name, because first, and just at the right time, just at the time we had expended our funds in the building of the old hall, came the liberal donation of the venerable merchant, Samuel Appleton, whose many benefactions to various institutions will render his name honorable, and cause his memory ever to be cherished.

Next, we have the same generous gift from the public spirited and well-known gentleman, the son of one who presided at the first formal call to organize the Society, and whose name is intimately associated with everything connected with the early improvements in horticulture around Boston. Need I name John A. Lowell? "Not being able," as he says in his letter to the Society, "to actively coöperate with you, but wishing to contribute in a moderate way, I send you one thousand dollars." May he long be spared to witness the good results of his timely aid.

And now, standing conspicuously in the group of our many benefactors, we have another name, not only associated with horticulture and agriculture, but with the finer art of landscape gardening. Who does not remember the once and yet elegant demesne at Waltham, where, years gone by, the beautiful deer might be seen bounding o'er the lawn, or gently reposing beneath some graceful elm? Need I name Theodore Lyman, Jr.? who bequeathed us the munificent sum of $10,000, having during his life made the same generous gift as those already named. His memory will ever be dear to us and our successors.

And yet we have the aid of that kind-hearted and liberal merchant, Josiah Bradley, whose aim it was to see the effects of his liberality during his own life. Not only was his donation of one thousand dollars most gratefully received, but his many acts of friendship towards the Society, in its time of need, are indelibly recorded in our memory.

Then we have the legacy of one who was among the earliest friends of the Society, always an active and honorable member, and for many years one of its Vice Presidents; whose special and successful culture of one of our most valuable fruits has been of great service to pomological progress. The appropriation of the income of the French fund to the encouragement of one particular fruit, has already been highly beneficial, and the yearly exhibition of superior specimens of apples will always remind us of his early and later participations in the prominent acts of the Society.

Others among those who have gone from us, and whose ashes repose beneath the fragrant turf, or lie beneath the shady groves of Mount Auburn, have made us participators of their bounty. Each and all will be remembered by every member of our association.

But, gentlemen, there is one at least among the living who has given us recently and so liberally,—encouraging us by his sympathy and devotion to our interests,—that I think I shall not be transgressing the bounds of friendship to mention. I refer to H. Hollis Hunnewell, whose beautiful country residence at Wellesley so many of you have seen and admired, and which displays so much taste in its arrangement and keeping. His generous gift of $2,500, just now that we wish to increase rather than curtail our premiums, is most opportune. Mr. Hunnewell is now absent in Europe; and from these foundations we waft across the broad Atlantic our best wishes for his health and prosperity, and a safe return to his home.

Of other donors it would be a pleasure to speak, but I am not permitted to do so.

But the most colossal edifice which associated wealth could erect, though it might be a perpetual monument of architectural taste and skill, would be of little avail without the aid of zealous and coöperative association; and while we recount with pride these many benefactions, we ought not to forget that to a host of intelligent amateurs and cultivators—to Cook, Downer, Lowell, Manning, Kenrick, Winship, Perkins, Prince, Phinney, Vose, Cushing, Walker, Lovett, Harris, Teschemacher, Haggerston, Williams, and many others—not to enumerate the living—are we indebted for the invaluable services and unflagging zeal which have given to the Society a renown second to no other horticultural association in the world.

And now, gentlemen, as we are to place beneath this granite block the records of what we have already accomplished, with the object of transmitting them to distant generations, let us hope that, whenever, at some very remote day, when these walls crumble and decay,—for decay, though slow, is the destiny of all earthly things,—and these memorials shall come to light, they will at least serve to show that the objects of the Society were solely to promote all those pursuits which bring pleasure and happiness to the social and domestic life; to enrich and embellish our homes and country; to create a refined taste, and to open new and exhaustless sources of instruction and wealth.

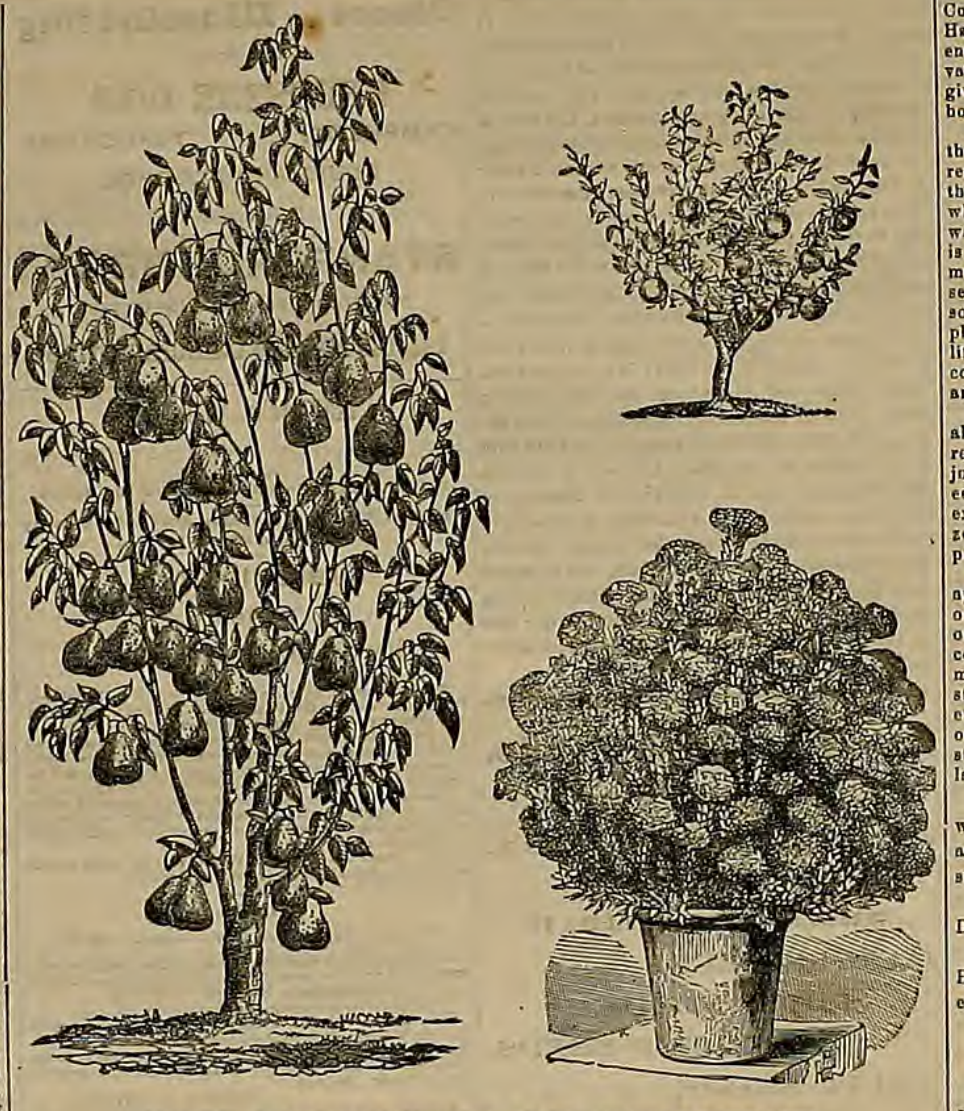
With the increased means with which the liberality of the public have in part endowed us,—the resources from the investment now believed to be judiciously made,—and the greater facilities afforded by this edifice, we shall be called upon for fresh exertion, greater activity, and the same persistent zeal which have thus far given us a name and reputation at home and abroad.

We feel the responsibility of the task, but an appreciating and enlightened public will cheer us on; and as those who have been so prominent in our councils are soon to pass away, and the "places which know them shall know them no more," may our successors, animated with their zeal, stimulated by their example, roused by their energy, and enlightened by their knowledge, not only preserve the Society in its present flourishing state, but extend its usefulness, increase its popularity, and give it an imperishable renown.

At the close of the Address, the Corner-Stone was laid by the President, who was presented with an elegantly burnished steel trowel for the occasion.

An appropriate prayer was then offered by Rev. Dr. Lothrop, Chaplain.

The whole audience then joined in singing Old Hundred, after which the ceremonies were concluded with a Benediction.



THE PICTURES OF PROMISE.

We present the above cuts to show the form and style that should be observed in growing Fruit Trees and Plants.

The larger tree is a Pyramidal Dwarf Pear, illustrating the manner the tree should be formed in order to fruit it well.

The smaller fruit tree is a Dwarf Apple, grown on the Paradise stock. These are now only grown in borders for ornament. When carefully attended to are very handsome; neglected, they are worthless.

The Flower represents an exhibition plant of the Kalosanthes—a Cape plant which is not generally liked on account of the difficulty of growing it, we give it however to show the *form* in which pot plants should be grown.

Drilling Grain—Inquiries.

MR. EDITOR:—Your journal, for which I subscribed recently, came to hand in "double quick," a transaction in mail matters rarely met with in these parts, I judge. In one number I noticed you advised farmers to sow some of their grain with a drill. Having been for several years in a part of the States where the drill is extensively used, I consider it good advice. The advantages of a drill are not well understood here.

Among those accustomed to their use it is considered one-fifth more grain is required when sown broadcast, as every seed put in with a drill is planted at the depth wished, in moist ground, where it germinates immediately, and *out of the way of birds*. It is a great saving of labor, also, as a man with one span of horses will put in from eight to ten acres per day. In this vicinity I have been unable to learn whether they were used, or whether they were kept for sale in this State. I have noticed none advertised among other agricultural implements, and if any have them for sale, they would do well for themselves, as well as the farming community, to advertise them in your paper, and also *state prices*—an item too often neglected. Will you please let us know, through your paper, the facts in the case. I should like to learn from the Editor, or some enlightened correspondent, whether the Osage Orange has been grown as a hedge in this valley sufficient to test adaptedness to this part of the State, and if any reason is known why it will not succeed.

Will you please give us a list of some of the different varieties of fruit (apples in particular) that succeed well here, and oblige a number of new comers.

Also, can you inform me whether Mole Drains, or the machinery for that purpose, has ever been introduced into California?

J. H. FISHER.

MAINE PRAIRIE, Solano Co., Cal., March 13, 1865.

We give the letter of our new subscriber with pleasure, we thank him for the *facts* on drilling grain—and hope others will profit by his advice—it has been practiced by some of our farmers in Alameda county with great success. Winter's Seed Sower is the *best* one we ever knew—we send our correspondent the Farmer, with a cut of Winter's Drill alluded to, which was advertised in the Farmer (for Mr. Winter was wise) before, however, our correspondent was a subscriber, (there's where he was a loser.)

The Osage Orange has been growing with success, large hedges are now in various parts of our State.

A list of fruits has been published in our journal some months ago.

Drain Tile is made over in Alameda county, if the maker was wise, he would advertise in the Farmer so our farmers could use them.

FINE SENSIBILITIES are like woodbines, delightful luxuries of beauty to twine around a solid, upright stem of understanding, but very poor things if they are left to creep on the ground.

—— A Portland (Oregon) paper says the "population of Portland is running to girls," and that something will have to be done to restore the equilibrium.

Agricultural Department.

Non-Swarming of Bees.

Mr. Miner, of the Rural American, says the season has been a remarkable one, in regard to bees swarming in Central New York. In some cases not a swarm has issued. We have about forty hives of bees, and have not had a single swarm, such a circumstance never before occurring in our own apiary. The reason why the bees have not swarmed in our apiary, is the fact that no drones have been reared in it this season. We never before, in twenty-five year's experience, knew of such a circumstance with our bees. Why no drones were reared we cannot tell; but without drones, swarms are useless, as the young queens cannot be impregnated; and the bees knowing this fact, destroy all young queens—if any are produced—and in the absence of queens, no swarms issue.

Similar complaints are made in England. In answer to a statement of a correspondent about the failure of his bees to swarm, the editor of the London *Field* says: "We have known an apiary of twenty or thirty hives remain without a swarm during the whole season. Queen-cells are generally formed and young queens partially reared; but it not unfrequently happens that if unfavorable weather occurs at the time when the swarms are expected to go off, these young queens are destroyed, and no swarm issues. Non-swarming stocks are the most valuable for honey-collecting purposes, if properly supered. If the bees continue to crowd outside, it will be found advisable to raise the hive by an addition of an eke or second hive below. Near London the season had been very strange. During the first fortnight in May the bees collected large stores, and a great number of swarms issued; since then the weather has been cold, but little honey has been collected, and the swarms have been much fewer. The white clover has now come into bloom, but there has been no honey collecting days; and unless we have some hot weather with the lime blossoms, and during the remainder of the clover season, the honey harvest near London will, indeed, be a very poor one."

PLANTING PEAS DEEP.—Deep planting is not generally resorted to under the impression that the seed will rot in the ground. This is a mistake. Peas covered six or eight inches deep will produce twice as much as those covered but an inch, they will continue flowering longer, and the vines are more vigorous and do not die down, as is often the case when shallow plantings are made. We have tested this matter, and therefore know from experience that if it is desired to get a large crop, the seed must be buried deep in the soil. A suitable piece of ground which had been enriched the previous year was deeply plowed in the fall and again in the Spring, and put in fine tilth. One-half of the piece was marked off in drills and the seed covered two inches deep. On the other half the plow was sunk beam deep and the seed scattered at the bottom of the furrow. In this way one-half the piece was gone over and afterwards merely leveled, leaving the seed at least eight inches below the surface. The peas that were plowed in were a little longer in making their appearance, but they shot ahead of the others, the vines were more thrifty and vigorous and produced double the quantity of those in the two inch drill by their side. The seed used was of the same lot, the Champion of England variety, and the soil, time of planting and culture (except the manner of putting in), were precisely the same for both pieces. This experiment convinced me that peas flourish best in deep planting, and we have repeatedly had our attention called to the fact in observing different crops and learning the manner of culture.—[Utica Herald.

PROCESS OF THE MANUFACTURE OF CHEESE AT THE FARMER'S FACTORY, MARCY, ONEIDA COUNTY—PRIZE CHEESE.—Milk drawn to factory at nights and emptied into vats holding about five hundred gallons each, and water left running about the vats until the milk cools to sixty degrees; left until the morning's milk is added. Heat is then applied to eighty-two degrees; liquid annato is then applied for giving color to the cheese; the rennet is then added, and it is then suffered to stand about forty-five to sixty minutes. The curd is then broken up with a wire curd cutter, and it is then left to stand for about one hour, or until the curd settles. About one-third of the whey is then taken from the vat; steam is then applied to eighty-eight degrees, and the curd broken by the hand, and suffered to stand for about forty-five minutes, and then more steam applied until it reaches ninety-six degrees; the curd in the meantime must be occasionally stirred and broken by the hand. It is then allowed to stand from one to three hours, according to the condition of the milk and the temperature of the weather. After the whey becomes acid the curd is taken to a sink, and when the whey leaves the curd salt is applied at the rate of two lbs. seven-tenths to one hundred lbs. of curd. After the curd becomes cool it is put into hoops and pressed for twenty-four hours.—[N. Y. Agricultural Journal.

THE SPANISH MERINO SHEEP.—At a late meeting of the Wool Growers' Association of Vermont, a resolution was passed to the effect that as great improvements had been made in breeding the Merino sheep since its introduction into the United States, that the name Improved Spanish Merino be adopted, as the most appropriate to the thoroughbred Spanish sheep in New England, and that Agricultural Societies be requested to designate them as such.

BLOODY MILK.—A farmer writing to the Rural American says:

"I had one of the worst cases in my dairy that I ever saw. Knowing of no remedy, I experimented. I gave the cow one ounce of saltpetre and a handful of common salt in a bran mess and washed the udder thoroughly with strong soap-suds as hot as I could apply with my hands. A perfect cure was immediately effected."

F. W. Collins' Cheddar Cheese.

Cheddar cheese, made in Morris, Ostego county, by F. W. Collins, was exhibited at the State Fair, at Rochester, and was awarded a first premium, and pronounced by gentlemen familiar with English Cheddar in every respect equal to the best. We believe Mr. Collins is the only extensive manufacturer in this country, and finds a ready market at forty cents per lb. This cheese, known in market as Cheddar cheese, is made in Ostego Co., New York, after the plan of English Cheddar.

Process of Manufacture.—Warm all the milk at all seasons to about 90° before introducing the rennet. A curd is thus produced of the proper consistency to make one cheese at the heat. Use calves rennet, soaked in cold water, with plenty of salt to preserve it. When the curd becomes solid, and the whey commences to separate, cut the curd each way with a long knife, leaving it in blocks of an inch square, then leave it half an hour for the whey to separate, and the curd to toughen; then break the curd carefully with the hand, so as to help the separation of the curd from the whey, gently moving it for twenty minutes and gradually increasing the heat to 96 deg. The process of drawing off the whey now begins. The milk is heat by steam and the same degree of heat through the season. Keep the curd gently moving in order to retain all the cream of richness in the curd. In from one to two hours the curd will be sufficiently dry to receive the salt, which is an ounce to every five pounds of curd. It is mixed in the vat, and when sufficiently cool lift it into large hoops and put it under press for half an hour; it is then removed and ground (in a mill for that purpose) into particles as fine as Indian corn; it is then put into small hoops and pressed for two days, turning them once in the time. When taken from the hoops they are inserted into scalding brine to form a rind, which is impervious to flies. If the curd is sufficiently cool it obviates the difficulty of sticking to the stringer. The weight to be applied is 1,000 lbs. to every twenty lbs. of curd. Annato is used for coloring inside and out, and is mixed with butter for the outside. This cheese is sold in market at wholesale for forty cents per lb.; size of the dairy thirty cows, and will produce about two hundred and fifty lbs. each.

THE DAY SCHOOL BELL.

40,000 copies issued. A new Singing Book for Schools and Seminaries, called the Day-School Bell, is now ready. It contains about 200 choice songs, rounds, ducts, trios, quartetts, and choruses, many of them written expressly for this work, besides 32 pages of the Elements of Music, which are easy and progressive.

Among the large number of beautiful pieces may be found, "Uncle Sam's School," "Don't you hear the children coming," "Always look on the sunny side," "The little lass," and "Little Lad," "Oh, if I were a little bird," "Bird of beauty," "Pretty pair tree," "Anvil Chorus," "Meet me by the running brook," etc. It is compiled by Horace Waters, author of "Sabbath School Bell," Nos. 1 and 2, which have had the enormous sales of 825,000 copies. Prices—paper covers, 25 cents, $20 per 100; bound 30 cents, $25 per 100; cloth bound, embossed gilt, 40 cents, $35 per 100. 25 copies furnished at the 100 price. Mailed at the retail price.

SABBATH SCHOOL BELL, NO. 1,

contains 144 pages, and nearly 200 tunes and hymns, and is the most popular S. S. Book ever issued. Among the most popular pieces are "Kind Words," "Eden Above," "Christian Hero," "Beautiful Zion," "I ought to love my Mother," "The Angels told me so," "In the Light," "Rest for the Weary," etc. Prices—paper covers, 20 cents each, $15 per 100; bound 25 cents, $20 per 100; clothbound, embossed gilt, 30 cents, $25 per 100.

SABBATH SCHOOL BELL, NO. 2,

is an entire new work of 192 pages, and nearly two hundred and twenty-five tunes and hymns. One million of these Bells have been issued and are now ringing through this and other countries. Among the many choice pieces may be found, "Shall we meet beyond the River?" "There is a Beautiful World," "Sorrow shall come again no more," "Don't you hear the Angels coming?" "Thou, God, seest me," "Sabbath Bells chime on," etc. Prices of Bell No. 2. are same as Bell No. 1. Both numbers can be obtained in one volume, price, bound copy, 40 cents, $35 per 100; cloth bound, embossed gilt, 50 cents, $45 per 100. 25 copies furnished at the 100 prices. Mailed at the retail price.

WATER'S CHORAL HARP.

A new Sunday School Book of 160 pages of beautiful hymns and tunes. It contains many gems, such as "Shall we know each other there?" "Suffer little children to come unto me," "The Beautiful Shore," "Oh, 'tis glorious," "Leave me with my mother," "He leadeth me beside still waters," etc. Price, papers covers, 20 cents; $15 per 100. Bound, 25 cents, $20 per 100. Cloth bound, embossed gilt 35 cents, $30 per 100. Mailed at the retail price. It is edited by HORACE WATERS, author of "Sunday School Bells," Nos 1 and 2, which have had the enormous sale of over 800,000 copies.

Just published by HORACE WATERS,
No. 481 Broadway, New York.

THE NEW PATRIOTIC SONG BOOK

contains 96 pages of songs, duets, and choruses, both sacred and secular, including 14 pages of prayers for sick and dying soldiers, and soldiers' Scripture Manual. It is well suited for social singing, as well as Sabbath worship. Among the many beautiful pieces may be found, "Where liberty dwells is my country," "The Christian Hero," "Three cheers for our Banner," "Come sing to me of Heaven," Columbia, the Gem of the Ocean," "Freeman's Gathering," "Columbia's King forever," "Marching Along," etc Prices—paper covers, cents, $10 per 100. Mailed at retail prices.

THE HARP OF FREEDOM

contains 32 pages of songs, duets, and choruses for Freedom. Among the choice pieces we would name, "Fair Freedom's morn," "O let my people go," "Over the mountain," "They worked me all the day," etc. Price 5 cents single, 50 cents per dozen, $3 per 100; postage 1 cent each

RUTH: A SACRED CANTATA

contains 126 pages. Words by Rev. Sidney Dyer, music by Prof. Call. This is an excellent book for concerts for the young. Prices—paper covers, 20 cents, $15 per 100; bound 25 cents, $20 per 100.

THE REVIVAL MUSIC BOOK

contains 73 pages of tunes and hymns, designed for revival prayer, and conference meetings. Price in paper covers single copies 10 cents, $8 per 100. Mailed at the retail price

THE ATHENÆUM COLLECTION

contains 512 pages of tunes and hymns, new and old of the choicest kinds, for church, Sunday school, revival, missionary, temperance, prayer, and conference, and all kinds of sacred and social meetings. The music in this book has life and animation in it, like "Shining Shore," "Rest for the Weary," "Shall we know each other there?" "Shall we meet beyond the River?" "There is a Beautiful World," "Kind Words," "Sweet Hour of Prayer," "There is a Land of Love," "Suffer little children to come unto me," "God save the Nation," etc. Prices—single copies, bound, 65 cents, $55 per 100; cloth bound, embossed gilt, 75 cents, $65 per 100 Mailed at the retail price.

HORACE WATERS, Ag't
481 Broadway, New York,

Horticulture.

The Clinton Grape.

Professor North, of Hamilton College, in a late agricultural address, gives the following account of the origin of the grape, its habits, etc., which, as it comes nearly from the fountain-head, is both interesting and valuable. We will merely prefix that we have cultivated this grape upon our premises, and found it a vigorous grower and abundant bearer—the bunches not being very compact, and the berry about the size of the Delaware. It remains long upon the vine, and a few visitations of Jack Frost helps its quality considerably. It is hardly fit for the table, but is regarded on all hands as one of the very best for wine. For jellies, preserving, etc., it is also excellent. Persons who have old trees, which are in a measure useless, should train a Clinton vine upon it, and if let alone would soon afford abundance of fruit. But to Professor North's statement:

The Clinton grape, described in our standard fruit books, with no account of its history, was so named from our village, and originated in the horticultural amusement of a student at Hamilton College. The original Clinton grape is growing over a tall elm on the east side of Dr. Curtis' house, on College Hill. It was planted there in 1821, 43 years ago, by Hugh White, of Cohoes, then a junior in college. Having a fondness for gardening and tree culture, he planted a quantity of grape seed two years before in his father's garden, in Whitesboro'. Out of many hundreds that came up, Mr. White selected one that looked more promising than the others, and planted it east of the house of Dr. Noyes, with whom he then boarded. This seedling vine proved to be a rampant grower, and wonderfully productive; with bunches long, compact, quite uniform; with berries small, a very dark purple when fully ripe; quite palatable early in September; yet improved in flavor by the frost. As a grape for making wines and jellies, the Clinton is a favorite in latitudes where the Catawba will not ripen. It has come to be a popular grape with the masses, who have no special objection to a little foxiness, when the vine is so thoroughly hardy, and the crops so unfailing and abundant. It is the glory of the Clinton grape that it takes care of itself, and asks no odds of any one. The more you let it alone the more abundantly it bears. —[Germantown Telegraph.

Fruit Preserving House.

Messrs. Nyce, Shirk & Co., of Indiana, came to Cleveland last season and erected a building for preserving fruits and other perishable articles, such as butter, eggs, etc., which are damaged by exposure to the common atmosphere. The building is made with double walls, like an ice-house, the outer casing being of sheet iron, the space between the walls filled in with shavings, saw-dust, etc. The storing room of this building is of the capacity of holding fifteen thousand bushels of fruit, which is placed on shelves in tiers and ranges, so as to be readily accessible when wanted. The atmosphere of the room is kept dry by the use of chloride of calcium, which absorb the moisture, and it is passed out of the building in lead pipes from gutters upon the floor. By this means Mr. Nyce says he gets rid of decay by destroying the elements which produce or support the decay. Mr. Nyce has studied this principle for years, and is fully satisfied that his theory is correct. This building is now stored with six thousand bushels of apples, seven tons of Catawba grapes, fifteen hundred bushels of tomatoes, and a large quantity of butter and eggs, punkins, etc. As the house was not ready until late in the season, the proprietors were not able to get it entirely filled when the time came for closing it for the season. This enterprise is deeply interesting to all who raise and would preserve our fine fruits, and its perfect success is devoutly to be wished for, a fact which we hope to be able to announce when the fruit rooms are opened next spring.—[Ohio Farmer.

GRAPES AT CINCINNATI.—Notwithstanding Mr. Yeatman's opinion that the culture of the grape has proved a failure in the neighborhood of Cincinnati, there are others who yet have faith in its ultimate success. Among these latter may be named E. A. Thompson, Esq., of Cincinnati, who informs us that he is preparing his grounds on the Kentucky hillside to plant, this coming spring, 16,000 vines. The varieties that he chooses—excluding, it will be seen, the Catawba—are as follows: 6,000 Delaware, 3,000 Norton's Virginia, 2,000 Concord, 4,000 Ive's Seedling, and another 1,000 divided among some twenty varieties.

[We give the above item from the Ohio Farmer so that our vine growers may note the fact that the celebrated "Catawba" is rejected. Why is this? Vine growers look to this.—Ed. Farmer.]

THE ENGLISH LANGUAGE.—The words of the English language are a compound of several foreign languages. The English language may be looked upon as a complication, both in words and expressions, of various dialects. Their origin is from the Saxon language. Our laws were derived from the Norman, our military terms from the French, scientific names from the Greek, and our stock of nouns from the Latin, through the medium of the French. Almost all the verbs in the English language are taken from the German, and nearly every noun or adjective is taken from other dialects. The English language is composed of 15,733 words—of which 6,732 are from the Latin, 4,312 from the French, 1,665 from the Saxon, 1,069 from the Greek, 691 from the Dutch, 214 from the Italian, 106 from the German (not including verbs,) 90 from the Welch, 75 from the Danish, 56 from the Spanish, 50 from the Icelandic, 31 from the Hebrew, 15 from the Teutonic, and the remainder from the Arabic, Syriac, Turkish, Portuguese, Irish, Scotch, and other languages.

TIME TO GO.—"What time o' night is it?" said a country lass to a dull spark, of whose company she was tired. "Why," said he, "I reckon it's just about now." "Then just now is the time that boys ought to be at home," replied Miss, as she lighted her beau to the door.

A BLOW.—Hearing a physician remark that a small blow would break the nose, a rustic exclaimed, "Well, I donno 'bout that; I've blowed my nose a great many times and I've never broke it yet."

FOR SALE, TO LEASE, ETC.

A Magnificent Stock Farm For Sale.

WE HAVE ONE OF THE VERY FINEST STOCK FARMS for sale to be found in the State. The location is a Valley in the Coast Range, and in a situation unequaled for excellenc. A place secluded from loss of Stock by mixing, etc.

There are 1200 acres all inclosed with a fine staked oak fence with strong riders, to this can be added as many thousands of Uncle Sam' acres as may be wanted. The fenced land is the best of bottom land. During the late dry weather a large amount of Stock has been driven to these hills for feed and have been profitably kept.

This Ranch produces a big yield of Wheat, Barley, Oats Corn, Root Crops, etc. Tobacco, Hemp, Flax, etc., can also be raised most profitably. Floods never wash it, and it is never affected by drought.

On this Ranch are good, ordinary Buildings, Houses, Barns, Sheds, Corrals, Smoke Houses, etc., to this Plows, Harrows, Teams, working Oxen, etc., to do the work on the place.

On this Ranch there is now the following Stock:
One Jack of the very best character
100 Mules from 1 to 3 years old.
1 Stallion, No. 1.
20 American Mares, No. 1.
80 Mares one-half and three-quarter breed. These Mares are all in foal, mostly by the Jack, as Mules are a ready sale at high prices.
100 Horses, mixed Stock.
500 Head Horned Cattle, American Stock and half breed.
400 to 500 Swine, good Stock.

The Stock now on the place can be sold with the Ranch and thus put the purchaser into a business profitable at once. This Ranch is so situated that a river surrounds the range on one side and mountains on the other to which the Stock have a fine run without any interference from any source, thus giving the Stock a complete swing. Without reducing the original Stock there can be sold annually from this Ranch 50 Mules, 30 Horses, 100 Beef Cattle, 300 fatted Hogs, worth in the aggregate $10,000, three fourths of which is clear profit

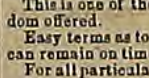
The timber is abundant Pine, Oak, and other hard woods. Tar, Pitch, and Turpentine can be made in abundance.

This is one of the Rare Chances, such an one as is seldom offered.

Easy terms as to payments: A portion of the money can remain on time if secured.

For all particulars call on the Editor of the Farmer. 22

Pleasant Homesteads For Sale.



THE FOLLOWING PLEASANTLY located Properties, situated on the opposite side of the Bay, can be purchased at very reasonable prices and easy terms if applied for soon.

No. ONE.—A Handsome Two-story Cottage, with seven rooms and seven closets, hard-finished, and every convenience inside, Small Buildings, Chicken House, Good Water, Gardens, and a very fine view of the Bay. Price about $3,000. Buildings perfectly new.

No TWO.—Very similar Cottage, with eight rooms, and same good finish and conveniences inside and outside, and same views—price the same. Both the above have excellent soil in the garden, and some fruit trees ready for bearing. The fences are fine around the grounds, each about one acre.

No. THREE.—A large House, built some three years, large Garden and about 150 Fruit Trees in bearing yielding a handsome income yearly. All these three Dwellings are within three minutes of the cars. Price, similar These are really worthy special attentions. For all particulars inquire of the Editor of Farmer.

....ALSO....

A neat Cottage with eleven acres of land all covered with Fruit Trees, and small vines in abundance such as Blackberries, Raspberries, Strawberries, Gooseberries, etc. The income from the ground has been about $2,000 a year. The owner wishing to leave will sell at $6,000. A fine location and everything desirable—it will be sold at a bargain.

—LAND.—

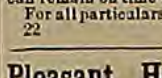
A Fine Building Lot all planted with Trees, about 500 of the best quality and in bearing. The Fruit alone will pay for the place in three years.

OTHER LOTS OF LAND.

We have several Fine Lots of Land, open; also some stocked with Fruit Trees, that can be offered on the most favorably terms to those who wish to secure desirable Homesteads.

Inquire for all the above of the Edito of Farmer. 19

A Beautiful Eden for Sale.



ONE OF THE MOST DESIRABLE Estates on the Pacific Coast is now offered for sale by reason of a desire of the owner to travel abroad and to regain his lost health—no other inducement could tempt the owner to part with it.

The Estate now offered is beautifully located in a retired valley away from any immediate neighborhood, free from noise, dust, etc., and shielded on all sides by lofty and picturesque hills giving a varied scenery, truly delightful, no season of the year without real beauty.

The whole Estate comprises a little less than ONE HUNDRED ACRES, the greater portion of it is covered with Orchard, Vineyard and Garden Grounds, comprising all that is desirable, and unsurpassed by any grounds in this State

The Orchard covers many acres, and the Vineyards are very extensive, and everything rare and desirable in these departments are here found

Pleasantly built and located is the Cottage residence. This with Barns, Fruit Houses, Wine Cellars, and other appurtenances make the whole complete, a highly prosperous Garden Ground around the residence with large Orange, Lemon, Fig and Olive Trees in bearing gives the whole the true "Eden" appearance.

The productiveness of the place can be estimated when we say more than Ten Thousand Dollars is annually produced from the Orchard and Vineyard, and these can be easily and greatly enlarged.

This whole Estate can be had at a bargain if soon applied for.

The approximate value is about A THREE-YEAR INCOME, and any person having ready cash of some amount, who wishes to secure one of the finest Estates on this coast, can find the present a rare chance. No person need apply who has not ready money to a reasonable amount, and none but a real purchaser To such, one of the best chances for a Fortune is now offered, as in good hands the Estate can be paid for with the income from the product in three or four years, sure.

For particulars apply to Editor of Farmer. 20

Fine Farms for Sale.

YOU WHO WANT GOOD FARMS CAN SECURE them by applying to the Editor of the Farmer. The following can now be had:

FOUR VERY FINE FARMS in the splendid San Joaquin District, within a few miles of Stockton, all very productive.

Several STOCK RANCHES in various parts of the State, from $1,500 to $25,000; in all these, good and permanent settlers can find bargains. Address by letter, or in person, for particulars to Col. Warren, Editor of the Farmer. 23

VALUABLE TRACT OF LAND

ON THE SACRAMENTO RIVER, CONTAINING 80 Acres, the soil the very best, will be offered at an excellent bargain, if applied for soon. Enquire of EDITOR FARMER. 5

EDUCATIONAL.

PACIFIC National Business College, SAN FRANCISCO, CAL.

Practical, useful Education for Young Men, Boys, and Men of Middle Age.

A BUSINESS EDUCATION FOR A BUSINESS MAN—THE RIGHT KIND OF AN EDUCATION FOR YOUNG MEN.—THIS IS THE BEST PLACE FOR MERCANTILE BUSINESS IN THE WORLD.

IMPORTANT TO THOSE WHO CAN DEVOTE A FEW WEEKS OR MONTHS TO STUDY, AND TO PARENTS WHO HAVE SONS TO EDUCATE.

THE BEST COURSE OF STUDY AND THE GREATEST AMOUNT OF PRACTICAL AND USEFUL INFORMATION ACQUIRED IN THE SHORTEST POSSIBLE TIME AND AT THE LEAST EXPENSE, TO INSURE SUCCESS IN LIFE.

"Acquire a Good Commercial Education, and you will as surely succeed in Life as that cause produces effect."—Abbott Lawrence.

A MODEL COMMERCIAL COLLEGE.

THIS NOTICE IS INTENDED TO GIVE FULL INFORmation of the course of Study and operation of the Pacific National Business School, San Francisco,

We respectfully solicit from Young Men and Men of Middle Age, who would succeed in business, and Parents and Guardians who have Boys to educate, an examination of our system of Practical, Useful Education, the superiority it possesses over every other institution of learning on this coast.

This School claims superiority and great merit over other institutions professing to teach the Commercial branches, by its system of combining THEORY AND PRACTICE, on the London Corn Exchange principle, it being done in no other School on this coast.

COURSE OF STUDY.

The plan adopted in teaching combines PRACTICE with THEORY; instead of being confined to Text Books, the pupils are exercised in making original entries of every-day business transactions; Journalizing, posting, balancing accounts, opening and closing a great variety of different sets of Books, both for individual and partnership business, where the business has been prosperous or adverse, thus qualifying the student for entering into the practical duties of the accountant in any kind of business.

THE COURSE OF INSTRUCTION

Consists of Double-Entry Book-keeping, embracing Whole sale, Retail, Commission, Manufacturing, Banking, Steamboating, Railroading, Individual, Partnership, Joint Stock, Compound, Company, Mining, Ranching, Farming, etc. In the routine of practical instruction the pupil becomes familiarized with changing books from single to double entry, changing stock books to partnership, and every form and principle known in well regulated establishments.

PENMANSHIP.

The beautiful and easy system of specimen Penmanship is taught in this College, and the only place where it is taught on this coast.

CORRESPONDENCE

Is carefully explained, and rules and principles are laid down, the observance of which will lead to the highest attainment in this art.

It is known to all that there is a great deficiency existing in this commercial branch.

BUSINESS ARITHMETIC.

This is a branch of the greatest importance, and you can be assured will not be neglected.

LECTURES

Are given to the students on Commercial Law, Nature and Causes of Wealth, Political Economy, Advertising, and general topics relating to success in business.

DIPLOMAS.

Those completing the course and passing a satisfactory examination before the Examining Committee, will receive Diplomas of the Institution.

THERE WILL BE NO VACATIONS.

Each pupil receives individual instruction, and persons can therefore enter at any time.

TERMS.

Scholarships are issued which give the scholar the privilege of reviewing the course at any future time, free of charge, for SIXTY DOLLARS, with a deduction of FIVE DOLLARS when two enter from the same family or the same place at the same time. When four enter at the same time from the same place, TEN DOLLARS will be deducted from each scholarship.

THE TIME REQUIRED

To complete the course depends somewhat upon the previous education and ability of the student, usually from ten to sixteen weeks, scholarships granting the holders the privilege of completing the course regardless of time.

A common school education is all that is necessary to enter the course of this College advantageously.

For further particulars, call at the College, 747 Market street, or address

M. K. LAUDENSLAGER,
President Pacific National Business College.

Santa Clara College.

FRENCH COLLEGE,

Corner Mason and Jackson Streets,

Principal.....Prof. J. MIBIELLE.

THE CLASSES OF THIS ESTABLISHMENT ARE opened since the 3d inst., and the select and attending scholars receive a solid instruction proportionate to their age and mental facilities.

The programme includes all the branches of tuition fitted for children from 6 to 12 years of age, as the first step for a higher teaching.

The English, French and Spanish Languages are taught practically and theoretically, by competent and special teachers.

Boarders can be accommodated in the establishment, where they will find the comforts and care of a home.

An evening class of French and Spanish is also open for young men every other day, at 7 o'clock, P. M. Call on the Principal from 9 A. M. to 12 M. 1

EDUCATIONAL.

NAPA COLLEGIATE INSTITUTE.

For Young Ladies and Gentlemen.

NAPA CITY, CALIFORNIA.

NAPA CITY, IN POINT OF LOCATION AND Climate, is unsurpassed in the State. It is about four hours' ride by steamboat from San Francisco, and three by stage from Benica. There will soon be a daily boat from the former place, and there are now two daily stages from the latter. There are extensive accommodations for Boarders in the College Building, with large and well-ventilated sleeping apartments. Teachers reside in the Building, and will have a constant oversight of the Students who are Boaders.

GOVERNMENT.

Young Ladies will receive no calls from any except Parents and Guardians. Ladies and Misses will not leave the College grounds, except in company with their Instructors. Young Men and Lads are not allowed to lounge about the Stores, Hotels, and Saloons of the village. All pupils are required to attend Church on the Sabbath. Parents will choose the place of worship for their children.

MILITARY DEPARTMENT.

This Department has been opened with a view to the permanent establishment of a Militrry Academy on this Coast. From three to four years will be requisite to complete the course in this Department. The State has furnished us the necessary equipments for such a school. The Drills will be attended to daily.

CALENDER.

The Collegiate year is divided into two Sessions of 21 weeks each. The first Session will begin July 25 and end December 16. The second Session will begin January 2 and end May 28. The Winter vacation will be two, and the Summer vacation eight weeks long.

☞All articles of clothing should be plainly marked. Pupils will furnish their own Sheets, Pillow-cases, Towels, Napkins, and Lamps.

☞Payments, half-yearly in advance. Pupils can enter at any time, and be charged from the time of entering. No deduction will be made for absence, except in cases of protracted illness. The month consist of four weeks each.

For further particulars address

W. S. Turner, A. M.,
21-11 Principal.

Miss Lammond,

LATE PRINCIPAL OF

BENICIA SEMINARY,

HAS THE PLEASURE TO ANNOUNCE THAT she has purchased the Seminary for Young Ladies known as the

CALIFORNIA COLLEGIATE INSTITUTE,

For Young Ladies,

No, 64 Silver Street,

S'AN FRANCISCO, CAL.,

formerly under the control of Mrs. M. B. SWEDENSTIERNA, and has removed there with her entire corps of

Superior Teachers and Professors.

The New Term Commenced

January 4th, 1865.

The location of this Institution (on the suburbs o the city) commands at once for its boarding pupils, the retirement of a country life, with the advantages of the finest professional talent from the city.

As Miss Lammond desires to make this a permanent Institution, no efforts will be spared to make it worthy of the patronage which has been so liberally extended to her during the past four years.

As the class of Boarding pupils is nearly filled, those desiring admission will find it necessary to apply early.

For further particulars, Catalogues may be obtained by calling upon or addressing

MISS M. LAMMOND,
10 Principal.

Academy of Notre Dame,

SAN JOSE, CAL.

THE FOURTEENTH ANNUAL SESSION of this Institution will commence on TUESDAY, AUGUST 23d. The course of instruction embraces all the branches of a polite and useful education. Its aim is to form young ladies to virtue, accustom them to early habits of order and economy, and to cultivate in them those qualities which render virtue both amiable and attractive.

Foreign Languages, Plain and Fancy Needle-work, form no Extra Charge.

For further particulars, eier to the Superioress of the Academy. 4

S. D. & H. W. SMITH'S American Organs.

SIBERIA OTT, Wholesale Agent,

748 Broadway, New York City.

THE MOST PERFECT AND BEAUTIFUL

Musical Instrument

IN THE WORLD

FOR THE

American Home Circle.

WITH THE MOST PERFECT CONFIDENCE we call the attention of the public to the AMERICAN ORGAN, as an instrument long desired in the Family Circle, and with our patent improvements is adapted to all kinds of Music, more especially to Sacred Music, with its sustained tones and harmonies, so much desired and sought for in American homes.

The AMERICAN ORGANS are superior to all other instruments of the kind, in many important particulars.

They are superior in their greater fullness and completeness of tone, volume and power. They are superior in expression, quickness of action, and elasticity of touch, rendering them perfect in rapid movements.

They are superior in quality and beauty of tone, and when controlled by the DOUBLE BELLOWS and BLOW PEDALS, Knee Swell, etc, the most charming effects can be produced, from the softest whisper of the Æolian harp to the full volume and power of the church Organ, thus enabling the performer to give expressions not to be found in any other instruments.

The TREMOLO stop has a pleasing and beautiful variety sympathetic in quality, appealing to the tender emotions of the soul, producing effects the most charming and soothing. It is universally admired and appreciated. The KNEE SWELL gives the performer full control of the tone, enabling him to graduate from the *Pianissimo* to the *Fortissimo* at pleasure, and combines the effect of the Expression Stop of the French Organ in the AMERICAN ORGAN, more perfectly and easily managed.

With all these combinations and improvements of Double Bellows, Pedals and Swell, the AMERICAN ORGAN excels in Expression, Variety, and Power, and has all the quality and capacity of a full Orchestra, and in the hands of a master is capable of the most complete orchestral effects.

The AMERICAN ORGANS are superior in Mechanical finish of the action and interior portions of the Musical parts. The valves are of material expressly prepared to avoid all sticking, cracking, or decomposition, are thus durable and will be always in order.

The Keys, Reeds, etc, are perfect in their finish, and this gives the quickness and sprightliness of tone, brilliancy, etc, equal in every respect to the "percussion stop" of the French Organs, but not like them in danger of getting out of order.

The AMERICAN ORGANS are by far the most beautiful in exterior finish, forming a handsome piece of furniture for the Parlor, Boudoir, or Sitting Room, occupying but little space, and perfect and complete in every particular.

THE

AMERICAN ORGAN

Makes Home Attractive; and Refines and Elevates the Minds of All.

Beautiful in its Appearance and Effects.

The AMERICAN ORGANS are finished in Rich Rosewood Cases, varnished and polished, forming an elegant piece of Furniture. Also, in Black Walnut Cases, and in Oak, finished in oil, and especially adapted for Churches, Lecture and Lodge Rooms.

They take but little room, are only 35 inches high, and from 34 to 47 inches wide. *They cost but a trifle more than Melodeons*, and yet possess many times their advantages in musical capabilities.

The California Farmer.

SAN FRANCISCO:

FRIDAY.....MARCH 17, 1865.

THE CALIFORNIA FARMER READING-ROOM AND MUSEUM OF NATURAL HISTORY.

20 Clay street—Marble Building—Up Stairs.

The Farmer's Headquarters.

The Editorial Rooms and Museum of the FARMER OFFICE are always open, and an attendant ready to make a visit instructive to those who take an interest in the productions of our State. Samples of all productions: grains, grasses, fruits, models, inventions, minerals, and specimens in Natural History innumerable, are constantly being added.

Farmer's Reading-room.

Farmers and Mechanics, from the country, who visit San Francisco, should visit the Free Reading-room and Museum, at the FARMER OFFICE. Members of the Press, and Strangers, are particularly invited to avail themselves of these rooms. Newspapers from every State to which we have access by mails, as well as Foreign Newspapers, Periodicals, and Magazines, are upon file and on the tables for use; a Good Library of hundreds of volumes, with works illustrative of Agriculture, Horticulture, and Floriculture, works for reference upon all Sciences, with a Cabinet of Minerals, Coins, and Curiosities of interest to the Naturalist, to which we invite all.

Immigration Office.

New comers to California can always obtain all needed information about Lands, Farms, etc, at the Farmer's Reading room, 320 Clay street. Most cheerfully we bid all welcome to our Sanctum.

TO AGRICULTURAL SOCIETIES ABROAD

Exchange of Seeds, Books, Etc.

HAVING established large and spacious Reading Rooms, in this city, which contain Libraries, Cabinets, and hundreds of Newspapers, all free to those who wish to enjoy the benefits thereof, we now ask coöperation from all Agricultural Associations in the Old States and Europe, for the *Exchange of Seeds, Specimens, Books, Etc.* We shall be happy to reciprocate any and all favors, and comply with any direction made to us connected with such an enterprise.

Purchasing Agency.

Having had the experience of over thirty years in dealing in Trees, Plants, Seeds, and Agricultural Implements, we feel that we are fully competent by our experience in purchasing such articles to make a saving of from five to fifteen per cent for the great mass of purchasers. We will therefore offer to make purchases for all who wish our services, of any of those articles named, or for any articles of merchandise for our Farmers or Ranchmen, and ship the same as they shall direct.

In order that we may do their business in the most satisfactory way for them and ourselves, we shall wish that all who send orders should be as explicit as possible as to their wants—describing as minutely as they can; and, where they desire our judgment, we will do our best to suit them.

Our charge will be Five per cent, together with the cost of packing, freight, drayage, etc. Orders should inclose satisfactory references or the Cash; or bills could be sent by Express, to be collected on delivery.

We shall be happy to attend to the purchase and shipment of Trees, Seeds, Plants, etc., as this is our especial "hobby," and we know we can satisfy all that send us their business attend to.

☞ THOSE who receive a number of the FARMER with this paragraph marked, may understand that it is sent to them for their examination, hoping it will meet their approval and induce them to subscribe, and ask their neighbors to do so.

Postmasters and others, who may receive the paper, will oblige us by soliciting subscriptions, or putting it in the hands of those that will. Subscriptions may commence at any time.

Send for Sample Papers and get up a club. Address

PUBLISHER CALIFORNIA FARMER, San Francisco.

TERMS OF ADVERTISING.

THE charge for Advertising in the CALIFORNIA FARMER (payable in advance), is **One Dollar** for five lines, or less of space, in nonpareil type, for one insertion, and ten cents a line for any larger space. Each subsequent insertion half these rates. This it is believed affords the cheapest and best medium of reaching the Agricultural community on this coast. As heretofore, the right is reserved to reject any advertisements deemed objectionable.

☞ SEND MONEY BY EXPRESS.

reason of the present uncertainty of our mails and post office arrangements, we would request those of our patrons who remit us money in letters, to do so through Wells, Fargo & Co's Express, or register them, then they will come safey and promptly. Letters are so long delayed and so repeatedly lost that we make this request—we will cheerfully bear the extra expense.

☞ Take a Copy.—Are You a Subscriber?

WE have distributed many thousands of copies of this journal during the Fair Season, and we have a just reason to hope that among these thousands we shall find many persons who will desire to become subscribers to this paper, now the oldest newspaper of the kind on the Pacific coast, a journal, too, that has been wholly devoted to the Home Interests of of our State. Those who desire it, in our city, can have it left at their residences by a carrier, every week. See terms at head of column.

Transactions of Agricultural Societies.

WE would ask of those Societies in the Atlantic States and Europe, to whom we send our Journal, to send us the transactions of their several Socities, so that we may give the benefit of their perusal to visitors, from the several States, who are callers at our Reading-rooms. By this means we can lay before them the progress of Agriculture in their former homes, and thus advance the interest of both Atlantic and Pacific States.

ARTICLES RECEIVED AT THE CALIFORNIA FARMER EXHIBITION ROOMS, No. 320 Clay Street.

We have been favored with a pamphlet entitled "The Advantages and Necessities of a *Deep Drain Tunnel* for the *Great Comstock Ledge*." The pamphlet is issued by A. Sutro, Esq., a gentleman well known in our city, and now residing, and largely interested in the mining country of Nevada, and its surroundings.

The work is an address or proposition to the Mining Companies connected with the Comstock Ledge, and presents the subject of a Deep Tunnel system in so very important a light, that the owners of ledges have called a meeting to investigate the subject, and have highly approved the plan. We shall give a synopsis of the scheme at an early day, as it is highly important to our mining interest.

Messrs. Roman & Co. have sent us copies in pamplet form of that distinguished work recently published in England, called "Banting on Corpulence." This as a scientific publication is a work of great merit. With this letter of Professor Banting is a Review of the work from Blackwood's Magazine, and an article on Corpulency and Leanness from Harper's Weekly.

Every library should have this work. It is republished from the London Editors by Roman & Co., of this city.

[NOTE BY EDITOR—Strange idea of Messrs. Roman & Co., sending a work on Corpulency to Editors! Whoever heard of a corpulent Editor?]

We have a pamphlet from J. N. Hoag, Esq., Sec'y State Ag. Soc'ty, containing the Report of the Board of Agriculture to the State Agricultural Society, at their annual meeting, Jan. 26, 1865, with a Synopsis of the proceedings on that day. The plan presented in this pamphlet to employ a corps of professional men in each Department of Science, and attach them to the Society, is a grand one. Of this we shall speak in detail soon. One thing we think is of vital moment now,—that is for the Society to tell the public at once what they mean to do this coming year, and tell them so quickly, too.

The Auzerais Hotel, San Jose.

Progress is now the word with all our sister cities, and none more so than San Jose.

Since the completion of a railroad to San Jose city there has been a steady onward increase of marked improvement in property. The whole city and its surroundings indicates a coming improvement and prosperity beyond that of any former ear.

Availing ourselves of a very kind personal invitation of the proprietor to be present at the opening of the new Auzerais House, we took the cars and enjoyed the fresh breath of Spring as we swept by the green fields and blooming orchards on the route from city to city.

Never has Spring time opened more propitiously and looked more beautifully than the present year, and it is to be regretted that so few go forth to greet and enjoy the heart-refreshing scenes and life-giving energy which the season imparts.

The opening of the Auzerias House was quite an event at San Jose last evening, and was the cause of quite a large gathering of the citizens, their guests and friends, to celebrate the debut of mine host of the "Auzerias," S. W. Churchill, Esq., who has become lesse of this large hotel.

The Auzerais House of San Jose is truly one of the finest hotels in the State, and we can truly say that there is no hotel outside of this city can equal it. This hotel has been built by Mr. Auzerais, after whom it was named, not with an eye merely to show, but with strict reference to the wants of the public, their convenience and comfort, and also to the credit of the city in appearance, as well as durability and permanancy. The Auzerais has been built in the very best style of workmanship, outside and inside, with every new and valuable improvement for use, convenience or luxury. It has one hundred and ten rooms, including the parlors. The style of the inside finish is superb. The wood work finish is rich panelled oak with black walnut doors. The long vestibules with high wood work and rich mouldings, the arched doors with heavy architraved windows and high ceilings, the broad stairways and carved balustradings, give the inside finish an airy and grand appearance, a peculiar richness and completeness that we have not seen in any other hotel in our State.

The furniture of the Auzerais is in elegant keeping with the building. The carpets are rich and elegant, the curtains, etc., are of superb style, and hung in true taste. The carpets, curtains, etc., all the upholstery adornments were from the House of Wightman & Hardie. The rich furniture bedding, etc., were furnished by Messrs. Goodwin & Co.

The beds and bedding, and chamber appointments, the neat and chaste arrangements for washing bathing, etc., have never been surpassed.

This hotel building cost completed fully $100,000, and the furniture about $30,000 or more. The whole is highly creditable to Mr. Auzerais the gentleman who has erected a structure so beneficial to San Jose.

The grand opening night was a happy festive scene; when the hotel was fully lighted, the gay company of about one hundred and fifty persons, the lively strains of excellent music, the merry happy friends in full glee tripping it lightly and joyously, was a very beautiful picture, and we think "mine host" felt sure he had troops of friends.

A goodly number of San Francisco ladies and gentlemen were present, and happy men and beautiful women from Santa Clara and San Jose completed the happy material for a happy evening.

A very splendid supper was served at about 1 o'clock, and we challenge the artists of even the Lelands of the Occidental to surpass it in excellence or taste.

It was a pleasant circumstance, that we noted the presence of Mr. Sargent, of the American Exchange, in this city, Mr. Cameron of the Union of Santa Clara, and Mr. Bromley of the Continental of San Jose, and others, all Hotel-keepers, joining in these festivities, and wishing well to their friend and neighbor engaged in the same calling.

It is well for San Jose to have so splendid a hotel, for although they have an excellent Continental with a Bromley too, and the San Jose Hotel The increased business demanded the Auzerais, and it was again fortunate that so splendid a hotel has at its head so worthy a gentleman, one who has so excellent qualifications and experience as Mr. Churchill, so long and favorably known as the proprietor of the Merchant's Hotel, Marysville, and for a season at the American Exchange and the Lick House, where he has always made true friends by his sterling worth.

Travelers on a visiting tour to the lower country, or to the Almaden mines or the pleasant vallies of San Jose and Santa Clara, or to spend a season of rest, can find no better place than the Auzurais and with "mine host," Churchill.

Harvesting Machines.

Buy early! buy early! for the harvest of 1865 will be a heavy one, and owing to the drought of last year and the dullness of trade and the scarcity of money, there has not been an importation of harvesting machines large enough to meet the wants of the coming season.

Farmers, "a word to the wise we hope will be sufficient."

We now call your attention to the card of Messrs. Hawley & Co., and only repeat our advice, Buy early!

BOWEN & BROTHERS—NEW SIGNS.—The signs of the times now that attract attention daily are the large and showy signs of Messrs. Bowen & Brother, on Battery street, at their new wholesale and retail store—(see card.) Now if the farmers and ranchmen from the country, when they come in, would only call there, we think they would find it greatly to their advantage.

By telegraph—from the future.—Greenbacks, 2d day of April, 75c. Resumption of specie payments by the U. S. Government, July 4th and 5th 1865.

Important Essay.

We received last evening the annexed letter, justly commending the most excellent Lecture of Professor Blake, of the Toland College, and the letter of Father Accolti, of the Santa Clara College, both of which were published in the FARMER.

We fully agree with the writer as to the priceless value of such documents; we felt and appreciated their excellence, and did what we could to extend their usefulness—for we bore the costs of their publications in our columns, to the exclusion of money paying advertisements, and we sent out about five hundred copies at our own cost also, as we were glad to do it to serve the cause of Truth and Humanity.

For years it has been our aim and our pride to fill our columns with the most useful matter to be procured, to the exclusion of the *trash* usually found in such journals as are scattered over our State; we have done so to the exclusion of large paying advertisements of nostrums and quacks, and other matters injurious to the best interests of a family; but sometimes it seems as if respectable families prefer trash to better food.

We should indeed be glad to furnish our journal to every family in the land, for we know they would be the gainers by it ten times over, and we should be glad to publish as proposed, an edition of those two letters in handsome style on a card and send to every family in our State, and we will do so if it is desired, and "Improvement" may set the plan in motion. We have a few extra copies now of the articles referred to, four numbers, and will send them by mail, complete, for 50 cents remitted in silver, post paid.

SAN FRANCISCO, March 15, 1865.

EDITOR CALIFORNIA FARMER:

Allow me to make a suggestion to some of your readers, who wish to be the means of benefiting the State, and the poor farmers in particular, and to add to the intelligence and wealth of the country.

For as many as have the noble hearts to elevate and instruct their fellow man, let them forward to you, means sufficient to print an edition of the Farmer of March 10th, containing the valuable essay to the cultivators of the soil, by Father Accolti of Santa Clara College at San Jose, and enable you to place a copy of that in the hands of every farmer on the Pacific coast, and with it the admirable lecture of Professor Blake, both of which are truly worth, to every family, the price of your paper for a year. Both of these essays should be printed on neat cards, in plain type, and then framed and hung up in the most conspicuous place, where the farmer would be daily reminded of his duties and shortcomings, and the wife and mother would also be reminded what was her duties to her offspring and those committed to her care. There are those who want to do better, but do not, for the want of information, and much, very much that is published is not of that practical kind that can be appreciated and made use of these two essays are eminently so, and they should be put in a more durable form and be constantly before the mind to cause thought and suitable action. Who that wishes to benefit his fellow-man, elevate him, and enable him to assume the proper position, can accomplish more permanent good than by forwarding you the means to publish an extra edition containing these two essays and aiding you in distributing a copy to every family in the land.

To any one making such investment it will prove more remunerating and productive of more good than any wildcat mine or oil ranch in the country.

I hope some of your readers may look at it as I do, and see the importance of spreading broadcast such plain practical information, so necessary to all. Now is the time to bring these views before the farmers, when they are all extending their lands and crops, cause them to think and see if they are pursuing the proper course for success before it may be too late, this may save thousands of dollars, and as Franklin said, "A penny saved was twopence earned," the same rule would hold good in this case. There is not a farmer, gardener or amateur, that has a foot of ground, but will be benefited more than double the price of your paper, by reading it for a year; there is not a person who can read that last number of your paper but will be benefited by it more than can be expressed in mere dollars and cents.

Had I the means I would get a hundred copies for distribution among my friends and acquaintances.

IMPROVEMENT.

New Buildings in San Jose.

The new buildings on the corner of Santa Clara and Market streets, San Jose, is quite a grand affair. It occupies one-half a block of ground nearly a hundred and fifty feet each way. The building is four stories high, and furnished with splendid stores, six in number, and will be as handsome stores as any in our own Montgomery street. The second story is occupied as offices of business and for professional men: the third story for Masonic and Odd-Fellows, of which there are three Lodges. Their rooms will be splendidly furnished.

This block is called the "Masonic and Odd-Fellows' Hall," and has been started by a company comprized generally of the citizens; it has been built with San Jose capital, and is truly an honor to these associations and a great credit to the city. The costs of this noble structure was over $50,000.

The Lick Block—By Jas. Lick, Esq.

An immense block of buildings will soon be commenced by this wealthy and public spirited citizen, on Market street, joining the Auzerais House, and continue to the corner of First, thence down First, the entire block. The intention is, we learn, to lay a very strong foundation, suitable for a grand block of four stories, if required, and to erect a fine row of stores now, at the present time only one story. They will be elegant, and the structure when completed hereafter will cost $200,000, and be one of the finest blocks in the State.

Another new block has been commenced on the corner of First and San Fernando street, by C. J. Ryland, Esq., and another on Colordo street. There will be many others to give life and animation to the business as well as the general prosperity of San Jose.

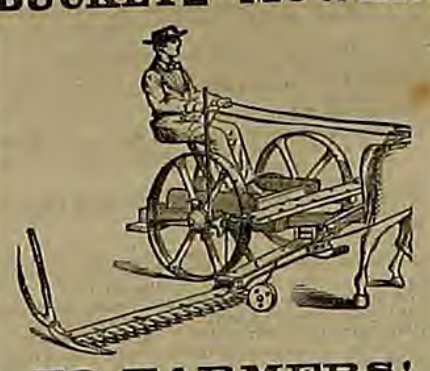
The Three Witnesses, or Perjury Unmasked—No 2.

We have a communication from *Veritas* with this caption, which will soon appear. It will be recollected by some of our readers that *Veritas* spoke in our columns on the *seventeenth day of June last*, and then said in his introductory these words:

I send you thoughts of what I witnessed, believing I wrote *truths* that some consciences must feel, if they are not "*seared* as with a hot iron." I will communicate farther, and send you more *truths* by-and-bye.

What we have *now* received we think will be apt to *scorch* more than *skin deep* into the conscience. Yet it is only the *truth*, and only a part of it Veritas says. More by-and-bye, still.

BUCKEYE MOWER.



TO FARMERS!

BUY THE BEST MACHINES!

2000 FARMERS IN THIS STATE WILL SAY that the

Buckeye Mower,

Buckeye Reaper,

Haine's Illinois Header,

....AND....

PREMIUMS FOR THE FARMER!

$500 in Premiums!

Splendid Inducements to Clubs!

Desirous to offer inducements to all who will form Clubs for this journal, we offer the following liberal Premiums:

For every Club of FIVE, and $25, we give Atlantic Monthly, $4, Godey's Lady's Book, $3, and an extra copy of the Farmer, $5, for one year.

For every Club of TEN, and $50, we give Atlantic Monthly, $4, Godey, $3, Harper's Monthly, $4, Arthur's Magazine, $2, and an extra copy of the Farmer, $5.

For Clubs of TWENTY, and $100, we give Atlantic Monthly, $4, Harper's Magazine, $4, Godey, $3, Arthur, $4, Gazley's New Pacific Monthly, $5, the Eclectic Magazine, $5, any of the Quarterlies, $5, and an extra copy of the FARMER, $5.

For Clubs of FIFTY, and $250, we will give as Prize one of *Wheeler & Wilson's* best plain *Sewing Machines*, valued at Sixty Dollars, with the Atlantic Monthly, Harper's and Godey.

For Clubs of SIXTY, and $300, we will give as Prize a Sewing Machine, valued at Seventy-Five Dollars, the Atlantic, Harper's and Godey,

For Clubs of EIGHTY, and $400, we will give a splendid Wheeler & Wilson Sewing Machine, valued at One Hundred Dollars, with two selected Magazines.

For a Club of ONE HUNDRED, and $500, we will give one of Wheeler & Wilson's best Machines, with all the Extras, worth One Hundred and Twenty-five Dollars, and two Magazines selected by the party.

The above offers we believe will richly pay persons for giving a portion of leisure time and influence, and we believe it can be easily done, for there are many places where we have never used exertions to circulate where success is certain, in these many new localities, and we offer these inducements as an encouragement to win the premiums.

This will furnish any family with a library for a little brief labor to extend our circulation.

☞ We will suit the wants of all who procure us Clubs, by substituting for any of the above the Scientific American, Country Gentleman, Rural New Yorker, Prairie Farmer, Genessee Farmer, Boston Cultivator, Massachusetts Ploughman, Maine Farmer, or Agriculturist, making, however, the total value of premiums the same.

PREMIUMS FOR THE FARMER.

SPECIAL PRIZES FOR COLLEGES.

We desire to procure Views of all the Collegiate Seminaries of note, in our State, and we know of no better way than for us to offer Premiums to those Artists who shall be connected with the Drawing Departments. We therefore offer the following:

For the best Pencil Sketch, of *three offered*, of the Buildings only—a richly chased Gold Thimble.

For a Drawing of the Buildings and Grounds—Ladies' Rich Needle Case and Materials, worth double the First Prize

For a Crayon Sketch of Buildings and Grounds—Prize the value of the Second offered.

For an Oil Painting—a Prize worth double the Latter—an Opera Glass, or a Japan Writing Desk.

For the Second Crayon Sketch—an elaborate Photograph Album.

☞ THE PRACTICAL SHEPHERD comprises 454 large 12mo pages, and is printed, illustrated and bound in superior style. Price only **Two Dollars.**

The Practical Shepherd was first published in October last, yet has already reached its TWENTIETH EDITION, and so great is the demand for it that others are being issued as rapidly as possible. It is highly approved by both Press and People, and truthfully pronounced by far THE BEST AND MOST COMPLETE work on Sheep Husbandry ever published in America. The work is indispensable to every owner of sheep, the chapters on Breeding, Management and Diseases being alone worth ten times its cost.

From C. L. Flint, Secretary of the Massachusetts Board of Agriculture.

I am happy to acknowledge the receipt of "The Practical Shepherd," a beautiful book. I have devoted all my leisure moments to a perusal of the work, and congratulate author and publisher on what appears to me to be a complete success. May it have a large and satisfactory sale.

From T. S. Faxon, Esq., Woolen Manufacturer of Utica, and Ex-President of the New York Agricultural Society.

I have perused "The Practical Shepherd" with great interest, and do not hesitate to say that, in my opinion, it is just such a treatise on Sheep Husbandry as every man should have who deals in sheep or wool, and I hope it may have very general circulation with farmers.

From Geo. Livermore, the eminent Wool Commission Merchant of Boston.

The work seems to me, as far as I have been able to examine it, a complete success in its plan and its execution, and leaves nothing further on the subject to be desired at present.

From Samuel Thorne, the eminent Stock Breeder of Dutchess county, N. Y.

* * * "The Practical Shepherd" much more than equals my expectations, and is decidedly the best work of the kind I have ever seen of either European or American publications. It deserves so fully its name that it must meet with a very heavy call from all who own even a score or two of sheep.

From John P. Reynolds, Secretary Illinois State Agricultural Society.

* * * I have little doubt the work will meet fully the wants of those engaged in Sheep Husbandry. It has been looked for with much interest, and seems, from the most careful examination I gave it, to be what the author designed to make—an impartial and useful book.

Other testimonials will be seen in the Publisher's card in another column, and we shall give others in future numbers.

FOR THE PACIFIC COAST.

Having received the agency for the whole Pacific Coast for the sale of this valuable Book, we are now prepared, by the arrival of large invoices of this Book by the last steamer, to supply the Booksellers over the State.

There has never yet been a Book on this subject so complete in all its details, and no Sheep-raiser, Wool Dealer or Shepherd should be without it.

WARREN & CO., Farmer Office,

8 Sole Agents for the Pacific Coast.

TO NURSERYMEN.

A FEW THOUSAND VERY GOOD SEEDLING PEACH Trees can be had at reasonable rates, if applied for soon. Nurserymen are aware that soon Peach Trees will be scarce, and they should be planted now.

Apply at the FARMER OFFICE. 1

[For the California Farmer.]

The Shamrock.

The national emblem of the Irish is supposed to be derived from St. Patrick, who, when preaching in Ireland, convinced his incredulous hearers of the Trinity in Unity, by exhibiting to them a Shamrock, or Trefoil, on which plant grow three leaves attached to a single stalk. Anciently the inscription of the Order of the Bath was "*Tria numina juncta in uno*," taken from the Holy Trinity. At the coronation of James I *numina* was omitted, and the motto is now looked upon as an allusion to the union of England, Scotland and Ireland, the word *Regna* being understood. The botanical name of the Shamrock, like that of the Scotch Thistle, is a matter of dispute. Mr. Bicheno in an amusing paper read before the Linnean Society, has with great ingenuity endeavored to show that the Wood Sorrel, *Oxalis acetosella*, is the true Shamrock, while Dr. Withering and Professor Rennie point out the White Clover, *Trefolium repens*, and Mr. Loudon marks the Black Medick, *Medicago lupulina*, as the genuine national emblem of Ireland.

XX.

As a fit accompaniment to the above we add "St. Patrick's Day," by the sweetest of Poets, Eliza Cook:

St. Patrick's Day.

St. Patrick's Day! St. Patrick's Day,
Oh! thou tormenting Irish lay—
I've got thee buzzing in my brain,
And cannot turn thee out again.
Oh, mercy! music may be bliss
But not in such a shape as this,
When all I do and all I say,
Begins and ends in Patrick's Day.

Had it been in opera shape,
Italian squall, or German scrape,
Fresh from the bow of Paganini,
Or caught from Weber or Rossini,
One would not care so much—but oh!
The sad plebian shame to know
An old blind fiddler bore away
My senses with St. Patrick's Day.

I take up Burke in hopes to chase
The plaguing phantom from its place;
But all in vain—attention wavers
From classic lore to triplet quavers;
An "Essay" on the great "Sublime"
Sounds strangely set in six-eight tune,
Down goes the book, read how I may,
The words will flow to Patrick's Day.

I take my meal, and knife and fork
Must do ochestral leader's work,
And strike my plate with tinkling jar,
To mark the fall of every bar.
I call upon a friend, and, lo!
There's no end to my rat-tat-blow—
Striving to make the knocker play
That rattling jig, St. Patrick's Day!

I dream of it throughout the night,
I hum it at the morning's light,
Walk, talk, or sit, do what I will,
'Tis dinning in my cranium still.
Oh, let the droning bagpipes swell
Bring hurdy-gurdy, dustman's bell,
Or anything to drive away
That spectral tune, St. Patrick's Day!

Every reader, especially every reader of poetry, wishes to know something more of an author than can be learned from their works, though these generally give a tolerable idea of their creator's mental nature. The following is a familiar letter by one of the cleverest women of our own country, with a genius like that of her English friend. It is now about five years, remarks Mrs. Osgood since I met Eliza Cook in England. She was then just what her noble poetry would lead you to imagine her a frank, generous, brave and warm-hearted woman, stout and sturdy in form, with a face not handsome but very intelligent. Her hair was black and very luxuriant, her eyes gray and full of expression, and her mouth indescribably sweet. For several weeks before we met, we carried on a playful, and on her part, exceedingly amusing and original correspondence. Her letters are the most natural, spirited, off-hand and *off-heart* effusions imaginable. Our first meeting was rather a droll one, and perhaps an account of it will amuse you. Miss Cook was announced one morning, when, unfortunately, our only reception room—my husband's atelier, was occupied by a sitter—what was to be done? I must deny myself or receive her in the entry. I was far too eager to see her to do the former, so I seated myself with as much dignity as I could assume under the circumstances on the top stair, and desired the servant to show her up. She came. I told her gravely, that the staircase was my drawing-room *pro tempore;* and resigning, as courtesy required, the highest seat to my guest, I took the next at her feet. In five minutes—thanks to the informality of her reception—we were chatting as gaily and freely as if we had known each other for years. But our conversation was interrupted, to my dismay, by the arrival of more visitors, and the stairs were soon nearly occupied. It was a gay party I assure you, and Eliza Cook was the soul of it. The sitter happened to be the Hon. Mrs. Norton, imagine the surprise of that dignified and *distinguée* personage when she encountered that party on the flight of stairs. In a letter to a friend, Eliza Cook says of herself, I can only write from my heart, and that heart has been left from infancy to the mercy of its own intense impulses. My rhyming tendency developed itself at a very early age, but the tones of judicious praise or improving censure never met my ear. The advantages of an enlightened, nay even a common education was denied me, lest knowledge should only serve to foster Poetry and make a "sentimental fool" of me. I was left like a wild cat on the fresh and boundless common of nature to pick up a mouthful of truth wherever I could. The woods and forests became my tutors, the rippling stream and bulrush sighing in the wind whispered to me in sweet and gentle breathings, the silver stars in the measureless night sky, and the bright flowers in my morning path awoke my wonder, and opened the portals that led to the high and mysterious temple of Thought. God and Creation were before my eyes in all their glory and as an untaught child I worshipped the Being who had endowed me with powers to contemplate his works and "rejoice therein."

XX.

Short Valedictory Address of Dr. J. F. Morse, Teacher of Clinical Medicine, to the Students of the Toland Medical College, delivered February 27th.

[We are most happy to lay before our readers the excellent valedictory address of Dr. J. F. Morse one of the Professors of the Toland Medical College. It was our pleasure to be present and hear this valedictory delivered to the students who were about to graduate and go forth to practice their profession.

We feel it a very pleasurable duty to publish such an address; there is so much of earnest, noble enthusiasm in the words of the Professor, that it carries conviction of the sincerity and importance of that address to those pupils, and we can attest to the power of its truth and value, for we witnessed many a moist eye when those words of parting counsel, advice, and admonition were given. There is in this address a moral beauty and sublimity, worthy the imitation of all Professors, and we are happy to have it in our power to lay such documents before our readers.

We ask the special attention of our readers to the most felicitous allusion to "Spring time" as comparative to the student in his opening life—we think it the most touching and beautiful address we have ever read. There is a magic comprehensiveness in the language used, that makes it electric. Under such a Professor the student should be, nay he must be, a good physician.]

It may not be inappropriate, ere we pronounce the Good Bye and God Bless you of friendship, to linger for a moment upon the significant suggestion of surrounding incidents and parting season.

Soon you will close the record of an interval of interesting, zealous, and we hope, profitable study. A large majority of your number to return for a short season to your homes, or collateral employments; to prosecute as diligently and successfully as possible those branches of science upon which, for the first time you have been receiving formal oral instruction.

To you, there is an important lesson, not the less potent because inarticulate, springing from the inanimate walls that have shielded you from the storms and blasts of Winter.

Coincidentally with the movement of those mysterious influences which summoned you from various pursuits and objects to the sacred shrines of an exalted and beneficient vocation, other forces were put into operation, quite as mysterious in essence, summoning from beds of clay, from wells or runningbrooks, from fire and labor, from carbonaceous rocks, from timber and architectural skill, the elements necessary for a grand superstructural house for the noblest science of man.

You have already been welcomed to the fields of labor within this Temple and acknowledged as devoted and promising husbandmen. The edifice, from quite as various sources and mysterious powers, has risen until by its imposing prominence it has secured a pleasant and inspiring recognition. In a limited sense at least, one is the parallel of the other. In the incipiency, both have been incorporated into and pledged to the science and service of Medicine.

It is therefore, quite legitimate to ask the question, which shall surpass the other in fidelity to the Divine Calling?

Shall these mute walls, unwarmed by vitality, without heart, without sensibility or soul, shall these, with unchangeable constancy, throughout years of patient, plodding, wiered industry, echo purposes, and virtues, which you have forfeited? Shall this edifice stand honored of men—esteemed and lauded by society—acknowledged and cherished by the genius of Medicine—while for you is written the faithless history of vascillation—of broken faith—of abandoned purposes? Whilst these walls and roof preserve their integrity against besieging elements of destruction, will you retire from the weariments of study, or affrighted fly from the trivial besetments which hedge every pathway to real fame?

There is something beautiful in the unostentatious harmony into which the varied elements of a grand edifice are formed. How supportive the uncomplaining foundation—how firm and faithful the upright walls—the constant and unbending roof—how genial the light, and air, and warmth of the inner Temple!

From the consolidated purpose which the thinking mind perceives in the mute eloquence of a common building there is inspiration for the longest life and the most insatiable ambition.

Between you of the First Class and this College there is a coincidence, and ought to be an emulation of purpose. Both pointing to the same end—the achievement of something worthy of the hallowed science of Medicine.

The advantage, however, is on your side. To you are given locomotion, sensibility, perception, reason, memory, capacity for enjoyment.

Let it never be said, that with these distinguishing superiorities, the bricks and mortar of Toland Medical College have surpassed you in acquiring the accorded rank and renown of society. No, no! Return to your Preceptors, with the solicitous desire of this school, that in diligence of study, in the exemplification of noble conduct, in the endurance, energy and power of inflexible will, you have gathered the elements of a prestige that shall finally carry you full of honor into the responsible fields of medical practice.

To you of the Second Course, whose schoolastic and formal period of study has expired, a tribute is also due.

You are the first born of the new Medical College—the first to test her capacity for labor—her maternal strength and solicitude. Through the rains and storms of winter she has protected you and not until beautiful and magic spring has commenced the unfolding of her charms has she ventured, even with the seal and signet of her approbation, to send you forth upon those sublime and self-sacrificing missions which make up the toils and trophies of Medical Philanthrophy.

The beautiful spring is the season of parting. How genial the coincidence! How exquisite its teachings! How glowing is the language of its inspiration! The opening, promising, exultant, ambitious spring!

Redolent with new life—bursting with quickened germs—breaking the soil and decorating earth with the first expanding leaflets of a new series of vernal visitants.

From the dark days of winter, from the cold and apparently inhospitable storms, these germs of new life, these candidates for vernal honors, have acquired strength and boldness, and at the signal touch of NATURE, with the endorsement of hopeful maternity they have sprung to the surface, and though delicate and fragile in form, yet they do not hesitate to challenge the sun, with all its power of light and heat, the air with its immense pressure, and moisture with its hydrostatic force, to their wiered laborations of growth, of expansion and beauty.

In a short season they are invested with exquisite foliage, a little longer and they are budding with the products of toil, anon they are gorgeous in blossom, making nature brilliant with beauty and filling the air with the perfume of innocence and sweetness. Yet never do they turn their faces from the sun, nor allow their heads to drop, until the autumn of existence is ended and the products of a glorious life are too weighty to be born by the parent stalk.

Throughout life they have charmed the world with their usefulness and beauty, and in dying have distributed their wealth with the pure spirit of disinterested benevolence.

The inspiring Spring is the season when you are to go forth from your professional *Alma Mater*, bearing her endorsement, invested with new functions, and commended to the quiet industry, the patient, analyitic, assimilative power which, rears the dormant cone to the gigantic mastodon of the forest.

What light and heat, air and water are to a multifarious vegetation, so are the elements of nutrition which usher in the spring-time of a physician's life. And the result must always be according to the native activity, power and force of the germ, the soil into which it has fallen, its capacity to face the sun, to eliminate light and heat from the dazzling orbits of science, to acquire vigor and force and wisdom from observation and experience, to so grow throughout the spring and summer of life, that when the autumn comes, the head shall *bend only* with the weight of years—of years so useful—of information so boundless, of fame so venerated—that death shall be like the falling of a leviathan pine, or cypress, or oak; a temporary shock perhaps, yet withal an interesting incident, affording humanity a better opportunity of estimating the real greatness and grandeur of the fallen member.

All that we can do for you, save to follow you with our prayers and wishes for your welfare, has been done. We believe you have been planted in the best soil which the science of Medicine affords. In your books and the maladies of human life you have the nutrition of which giants are made. You may clothe yourselves with the emerald dress of perpetual fame, you may bear blossoms rich in beauty and freighted with the very perfume of admiration and at last mature fruit which shall fructify and fertilize many a germ of professional intelligence after the wiered spirit of the body has been summoned to its home in Heaven.

All can be done with energy, observation and study, seeing and reading, practice and the books—constitute the only laboratory from which true professional greatness can be secured.

The true science of Medicine recognizes no bypaths, no coquetting with empyricism, no dalliance with Hypocratean querries, no corresponding with professional improprieties. Honest, ennobled, heart-warmed, disinterested labor, is the only alchemic crucible in which the pure gold can be separated from the alloys and base metals of the profession.

Collectively, I earnestly implore you to love the books, to make them your companions, your counsellors, your help-mates, your dearest friends. It is only by constant travelling from your books to cases, from cases to books, day and night, and all time that finally fills you with the practical wisdom of the profession.

For your patient and respectful attention to me during the winter I return you the expression of unaffected gratitude. And now with the Good Bye and God Bless you of friendship, let us remember the injunction of Dickens:—

"Not to linger with regretting,
Nor for passing hours despond,
Nor thy daily toils forgetting,
Look too eagerly beyond,
Hours are golden links, God's token,
Reaching Heaven—but one by one
Take them, least the chain be broken
E're the pilgrimage be done."

LECTURES AT THE TOLAND COLLEGE.—We have commenced to publish the various valuable Essays, Lectures, etc., of the Toland Medical College, and having received the various periodicals of the College thus far, we anticipate many valuable Essays in the future.

We shall be happy to give the Lectures of all the Professors of this excellent Collge, and hope to lay before our readers next week the Valedictory of the honored President, Dr. Toland, through whose management this noble College has been reared and presented to the State.

☞ *Special Notice.*—Newspaper correspondents are reminded that all manuscripts sent to publishers are entitled to be forwarded at the rate of two cents for four ounces, provided that one corner of the envelope is cut and left open, and the word "manuscript" is written on the face of the envelope. Authors availing themselves of the provisions of this law will remember, however, that a letter or note enclosed with the manuscript will subject the whole package to letter postage.

SAINT PATRICK'S DAY.—Our journal being published on this memorable day, we are glad to show our regard for the day and the patron saint by publishing the interesting sketch which will be found in our columns. There is much that is truly valuable as well as interesting in this sketch.

[For the California Farmer.]

MUTUAL SYMPATHY.

What e'er sorrow thou hast known
Thou'st not borne the grief alone,—
Others with thy woes do moan,
Many tears like thine are sown;
Others with thy anguish groan;
Others' joys, like thine, are flown.

With what blessing thou art blest
Many glad ones share thy guest;
Joys like thine are oft caressed,
Thanks for all thy good expressed:
With thine own are oft addressed
Songs of rapture, hymns of rest.

By these tokens without end,
Know thy brother, claim thy friend;
Joy to his rejoicings send,
To his griefs in love attend;
Under burdens should he bend,
Helping hand 'tis thine to lend:
Hopes and fears in union blend,
To one throne all prayers ascend.
Quick to cherish, or defend,
Prove thyself a brother, friend.

D. E. P.

Speculation in Breadstuffs.

DOWN, DOWN, DOWN GOES BREADSTUFF!

Stop, stop, stop, Mr. Farmer! says the speculator, we mean to carry up flour to $20 per barrel yet, so don't you cry down the price.

Well Mr. Speculator, if we don't say down, down, down, and warn the people who are led into this false stream of madness, the very green grass that is a foot high now to feed our cattle, will cry out against us; and the wheat which is now growing night and day would cry out, too, if we were silent.

The fact is breadstuffs *must* come down, the present price is an abominable ficticious one. Let purchasers all over the State hold up and not buy a single barrel for a single week or two, and the *bubble would burst* at once—for burst it will soon.

We shall have *new wheat* in the market in June, and such a crop as we shall have this year is beyond all possible imagination, for grain has been sown even up and over the very hill-tops.

Breadstuffs must fall! Look at the fall on beef, mutton, butter and other products, and flour must come down.

If there was a real scarcity or if this extra price went to the *producer's hands* as a reward for his labor, we should be silent and let him receive the highest reward for his toil. But the price is beyond the value, and must come down, so let country stores be chary and buy only from day to day, and let each family do without flour for one or two weeks, and eat of the food of which all have an abundance, and we will see such a crash as has not been seen for a long while among the would-be millionaires who would speculate in the staff of life even if a thousand families perish of bread.

Silver Street College.

It is always highly gratifying to us to note the progress of the colleges and institutions of our State, and to note every improvement that tends to elevate character and secure to the social circle their refined amenities in life that shall not be objected to. It was our pleasure to enjoy one of the social gatherings of parents and pupils at this Collegiate Institute a few days since, and to witness the happiness which such meetings confer both upon parents and friends, and the good influence they seem to exert upon those who are in a measure shut out for a season from the enjoyment of public society.

Some forty pupils with the Principal, Miss Lammond, and the teachers, together with several parents passed the evening socially—conversations and music of a high order, together with the merry and happy dance; these with a handsome entertainment to refresh the body, gave to all present such a little season of happy enjoyment as to make one feel at "home." A good artist can tell a good picture. A good musician can tell a good instrument. And we think a good judge of the human face divine can generally tell when they meet a group of happy and contented spirits. Well, we profess to be something of a judge of faces, having never been but *once* badly deceived, and we think that on that evening when we saw the joyous and happy young ladies so kindly and affectionately cared for by their Principal and teachers, and the true kindness and affection that seemed to prevail between teachers and pupils we venture to say it is a happy school. Rarely has it been our lot to see a more healthy and happy group of young ladies, not to say beautiful, though that were so. We rejoice to know that the Silver Street College for young ladies is one of the most prosperous in our State, and truly worthy the confidence of parents.

NEW PLANTS.—We have some very handsome new plants of the Bulbous species, sent to us by S. W. Wolleb, Esq., from Menlo Park. As one of the fine native plants, to which "Orilla" alluded to some two weeks ago, as abounding in our State and preferable to many *imported* kinds. The plant sent to us has a beautiful green and brown variegated foliage, bearing a curious brown blossom, we shall more fully describe it in our next.

MISS LISLE LESTER.—This lady formerly the editress of the Pacific Monthly is now engaged in the country at various places, giving a series of readings to very good audiences and finding it more in accordance with her tastes and interests than editorial duties, she is, therefore, not now engaged at the Farmer office. We sincerely hope her literary efforts in readings will receive a due reward.

NEW ADVERTISLMENTS.—We regret we could not oblige those who sent us their new advertisements this week. Not having room enough next week they shall be accommodated. Our steady increase of circulation insures for all advertisers a certain success, not obtained in any other journal.

Important to the Sick and Afflicted.—Electropathic Institute, San Francisco, No. 645 Washington street—established February 12th, 1860, by an association of scientific gentlemen, for the cure of diseases and the suppression of quackery. Persons suffering from disease can rely upon the most scientific and honorable treatment at the above Medical Institute; and should their cases be within the limit of cure, the Resident Physician will warrant them a perfect and permanent relief from their affliction. And if their case be incurable he will so state, and advise them of the best method of relief, so far as science can go to accomplish the object. The basis of treatment at the Institute is the ELECTROPATHIC SYSTEM; but the resident Physician, J. H. JOSSELYN, M. D., a graduate of the University of Pennsylvania, has discovered several valuable remedies in the vegetable kingdom that will cure any nameable disease. Since the establishment of the Institute, almost every kinds of disease has been treated with success, especially those complaints which have been ill-treated by quacks, the names of which should not be mentioned here.

FEMALES should bear in mind that the only safety in the treatment of complaints peculiar to their sex, is to have a physician who has made the female economy his particular study. In the Resident Physician at the Institute, they will find a surgeon who sympathizes with them in their troubles, and relieve them, no matter what they may be.

To the rheumatic and nervous person this Institute offers the blessing of certain and permanent cure.

For those suffering from the effects of mercury, and those diseases for which mercury is usually given, there is no remedy as sure as the Electropathic system, as practiced at the Institute, 645 Washington street.

The Resident Physician is no Foreign Adventurer, nor is he wedded to one idea. All scientific systems are made by him a source of benefit to those who may see fit to consult him.

Come one, come all, and receive the blessings of health! The motto is—A Perfect Cure, or no money required.

Persons living at a distance from the city, can consult the Resident Physician by letter, stating the case, and will receive advice and medicines, as the case may require. All communications strictly confidential.

J. H. JOSSELYN, M. D.,
Resident Physician, Electropathic
7 Institute, 645 Washington st., San Francisco.

[For the California Farmer.]

NURSERY THOUGHTS.

Those little hearts that 'round me twine
The innocence of love,
Have magic in their looks divine,
That all my feelings move.
There's fairness on their sunny brows,
If mischief in their eyes,
And kisses on their ruby mouths
That from the soul arise.

Oh, who has felt a little heart
Beat mirror to his own,
Without a thrill, without a start,
To see himself foreshown?
The ties of home, the ties of birth
From springs of joy compiled,
Have naught so sweet in luscious worth
As th' loving little child. * * * *

THE OLD HOUSE.

My little birds, with backs as brown
As sand, and throats as white as frost,
I've searched the summer up and down,
And think the other birds have lost
The tunes you sang, so sweet, so low,
About the old house, long ago.

My little flowers, that with your bloom
So hid the grass you grew upon,
A child's foot scarce had any room
Between you,—are you dead and gone?
I've searched through fields and gardens rare,
Nor found your likeness anywhere.

My little hearts, that beat so high
With love to God, and trust in men,
Oh, come to me, and say if I
But dream, or was I dreaming then,
What time we sat within the glow
Of the old-house hearth, long ago?

My little hearts, so fond, so true,
I searched the world all far and wide,
And never found the like of you:
God grant we meet the other side
The darkness 'twixt us now that stands,
In that new house not made with hands.

—[Atlantic Monthly.

[For the California Farmer.]

Our Country.

I feel sometimes as though I must certainly speak in behalf of my beloved country. I feel as though there was altogether too much parleying at this time, when every man should know or ought to know what he should do. But what was the right step to pursue? It needs no critic's eye to discern the blemish, for it has covered a great portion of the surface. What are we waiting for? The South to gain more strength? Ah, yes, and they are endeavoring to do it. Their friends at the North understand this, and are cunningly devising ways and means to carry out their infernal machinations. All the while those who claim to be for the country and her rights, stand idly by, waiting for something to turn up. Now, do we not see that we are watched and sifted while we listlessly wait for a good opportunity to strike the blow that will crush out the evil that is upon us. But, my friends, we are wrong; we are detected in every movement, because we are a disjointed and disbanded people. We are like the bundle of sticks that a father told his sons to bring him, while on his deathbed. He took them and placed them together, and told them to break them. They tried, but could not. He then separated them, and gave them one at a time, and they broke them easily. That is the way with those who are willing and anxious to protect this beloved nation. They stand too far apart, and are therefore in danger of being broken by that Copperhead bundle, which is so compact and cemented as to secure a formidable band, which if allowed to grow might cause the overthrow of this once happy country. I have been a silent spectator, watching the movements of all parties, and must say that those who have anything to win do not show half the enterprise of those who are fighting against all odds. This determination tells wonderfully in favor of those who use it. There is too much apathy on the side of liberty, too much folding of the hands, a too quiet spirit, that as their cause is right and they have good souls in the battle-field, all will be well. But you must look out for the wolf that may be at your door. See how sharp and how firmly linked are those who have taken the stand against us. They never rest. The first thing is to know where we stand, and the next to feel that we are not of them. They are plausible enough to get at the bottom of our views, and then make them weapons of deadly hate against us. They are energetically moving heaven and earth to overcome us. Then friends of liberty who are not in the field, but at home, surrounded on every side by the foe who is seeking the life-blood of freedom, I say to you, be guarded, be earnest, be faithful, but above all be united. Strive to cement all and every one with a strength that can be depended on in a moment, when the crisis shall come. It would be very mortifying to find those we had always supposed true to the country, slink away like slimy snakes, to the holes and dens of those whose artful wiles have lured away, while we were resting secure under the belief that we could not be overcome. But everything that prospers must have a test, a trial of faith, by watchfulness and truthfulness ever pictured before the mind to keep alive the great truth. But our own carelessness and indifference lulled them into the belief that all was secure. And the syren's tongue wove beautiful tales of romance, which binds them in their toils. The greatest difficulty we have to overcome is carelessness, with too much confidence that Uncle Sam will see everything done right. But if Uncle Sam is to do it, his boys must take hold with a determination that will show the enemy there is no hope of disbanding a Union so strong. "United we stand, divided we fall." But never say divided; but if separated we must be, let us be broken in fragments clinging to the one great principle of Truth and Liberty. Arouse, my friends, arouse; do not let the great battle be fought by the brave souls alone who have staked their all. But you at home can fight a good fight by promulgating truth and showing the evil of oppression, by arousing the mind to a higher elevation of moral and spiritual strength. Create an earnest principle to do good, not only for the present, but for future generations, who are to look to that Temple of Liberty, clothed in flowers of beauty, written all over with imperishable names of brave and honest men, the "noblest work of God." I speak because I see the love of power from gain too fast developing itself with our rulers. They stand bantering for the highest round in the ladder of fame for themselves and their friends, to swell the ranks of pleasure and her votaries, regardless of the cries of those whose prayers are hourly going to Heaven for relief. Will they not turn from the flesh-pots of Egypt, put on the armor of truth and trust and become men, true to themselves, their country, and their God.

M. J. U.

EATING.

The stomach has two doors, one for the entrance of the food, on the left side, and the other, for its exit, after it has been properly prepared for another process. As soon as the food is swallowed, it begins to go round and round the stomach so as to facilitate dissolution; just as the melting of a number of small bits of ice is expedited by being stirred in a glass of water; the food, like the ice, dissolving from without, inwards, until all is a liquid mass.

Eminent physiologists have said, that as this liquid mass passes the door of the exit, where there is a little moveable muscle, called the Pyloric Valve, (a faithful watchman,) that which is fit for future purposes gives a tap, as it were; the valve flies open, and it makes an honorable exit. Thus it goes on until the stomach is empty, provided no more food has been taken than there was a supply of gastric juice for. If a mouthful too much has been taken, there is no gastric juice to dissolve it; it remains hard and undigested, it is not fit to pass, and the janitor refuses to open the door; and another and another circuit is made, with a steady refusal each time, until the work is properly done. Boiled rice, roosted apples, cold raw cabbage cut in fine vinegar, or souse, pass through in about an hour; fried pork, boiled cabbage and the like, are kept dancing around for about five hours and a half.

After, however, there has been a repeated refusal to pass, and it would appear that any longer detention was useless, as in the case of indigestible food, or a dime, or a cent, or a fruit-stone, the faithful watchman seems to be almost endowed with intelligence as if saying: "Well, old fellow, you will never be of any account; it is not worth while to be troubled with you any longer, pass on, and never show your face again."

When food is thus unnaturally detained in the stomach, it produces wind, eructations, fullness, acidity, or a feeling often described as a "weight," or "load," or "heavy." But nature is never cheated. Her regulations are never infringed with impunity; and although an indigestible article may be allowed to pass out of the stomach, it enters the bowels as an intruder, is an unwelcome stranger, the parts are unused to it, like a crumb of bread which has gone the wrong way by passing into the lungs, and nature sets up a violent coughing to eject the intruder. As to the bowels, another plan is taken, but the object is the same—a speedy riddance. As soon as this unwelcome thing touches the lining of the bowels, nature becomes alarmed, and like as when a bit of sand is in the eye, she throws out water, as if with the intention of washing it out of the body, hence the sudden diarrhœa with which two-legged pigs are sometimes surprised. It was a desperate effort of nature to save the body, for if undigested food remains too long, either in the stomach or bowels, fits, convulsions, epilepsies, apoplexies, and death, are a very frequent result. Inference: *Always eat slowly and in moderation of well-divided food.*

—[Hall's Journal of Health.

For Wives.—To those "lords of creation" who curve their nasal organs at the idea of communicating matters of business to their wives, we particularly commend a perusal of Carlyle's history of the great Frederick. Speaking of the queen he says: "Her judgment was good; and Frederick liked to have it on the weightiest things, though her power of silence might halt now and then. He has been known on occasion to run from his privy council to her apartment, while a complex matter was debating, to ask her opinion before it was decided. Excellent Louisa; princess full of piety, good sense and affection; a touch of the Nassau-heroic in her. At the moment of her death, it is said, when speech had fled, he felt from her hand which lay in his, three slight pressures; 'Farewell!' thrice mutely spoken in that manner—not easy to forget in this world."

Married and Single Life.—None but the married man has a home in his old age; none but he knows and feels the solace of domestic hearth; none but he lives and freshens in his green old age, amid the affections of his children. There is no tear shed for the old bachelor; there is no ready hand and kind heart to cheer him in his loneliness and bereavement; there is none in whose eyes he can see himself reflected, and from whose lips he can receive the unfailing assurances of care and love. The old batchelor may be courted for his money; he may eat, and drink, and revel, as such beings do; and he may sicken and die, with plenty of attendants about him, like so many cormants waiting for their prey; but he will never know what it is to be loved; he can never know the comforts of the domestic fireside.

Jennie June, in her recent "Talks on Women's Topics," says that in almost every instance when a man marries a *sensible* woman, it is after he has met with a severe disappointment, by *marrying a fool.*

What a world of gossip would be prevented if it was only remembered that a person who tells you of the faults of others, intends to tell others of your faults.

[For the California Farmer.]

Passing Bell.

Again we hear the passing bell. Who has gone? Some one we may not know has left us for the brighter shore; but some loved one knows too well. It is the last tribute that can be paid to mortality. Lay them down gently, cover them quickly, breath a prayer silently, and leave them to God. Their work on earth is done, they are left with God and the angels. Friends return sadly to their once happy home, now cheerless and desolate, for a loved one is gone. O! the anguish of that once happy family. Their loved one sleeps, but not on the soft, warm couch at home, surrounded by friends, but silently and alone, down deep in the silent grave, where pain nor sorrow no more disturbs the silent sleeper. Rest, dear one, rest; you are freed from suffering, and your bright spirit is winging its way through the clear vault of Heaven. Friends, mourn not, for your loved is not resting beneath the sod, but is unfolding its wings in a brighter clime. Unshackled and free, its opening life is full of brightness. Like a new-fledged bird, it tries its pinions to soar away to realms of beauty. Is it not a beautiful thought that those bright links bind us to them, and lead us on to a brighter world than this. Though our eyes behold them not, still we feel them near us, and we are listening to their silent voices. Yes, they lead us on, in spite of ourselves we are following them. How lovingly they come to us in our dreams. What happy scenes we enjoy. Then wait a few short years, or months, or days perhaps, and you too may finish your work here, and go to meet your loved ones on that blessed shore.

M. J. U.

A Discontented Man Made an Affectionate Husband

When the senior Jonathan Trumbull was Governor of Connecticut, a gentleman called at his house requesting to see His Excellency in private. Accordingly he was shown into his *sanctum sanctorum;* and the Governor came forward to meet Squire W., saying "Good morning, sir; I am glad to see you." Squire W. returned the salutation, adding as he did so, "I have called upon a very unpleasant errand, sir, and want some advice. My wife and I do not live happily together, and I am thinking of getting a divorce. What do you advise me to do, sir?"

The Governor sat a few moments in deep thought; then turning to Squire W., said: "How did you treat Mrs. W. when you were courting her? and how did you feel towards her at the time of your marriage?" Squire W. replied, "I treated her as kindly as I could, for I loved her dearly at that time."

"Well, sir," said the Governor, "go home and court her now just as you did then, and love her as when you married her. Do this in the fear of God for one year, and then tell me the result." The Governor then said, "Let us pray." They bowed in prayer and then separated. When a year had passed away, Squire W. called again to see the Governor, and grasping his hand, said: "I have called, sir, to thank you for the good advice you gave, and to tell you that my wife and I are as happy as when first we were married. I cannot be grateful enough for your good counsel." "I am glad to hear it Mr. W., and hope that you will continue to court your wife as you live." The result was that Squire W. and his wife lived happily together to the end of their married life. Let those who are thinking of separation in these days go and do likewise.

Little acts of kindness,
Little deeds of love,
Make this world an Eden,
Like to that above.

Bride Dying by Mistake.—The town of Perigneux, a few days ago, received a fearful shock. M. Daussel, member of the Council General, was on the point of getting his daughter married to a young gentleman of fortune. The latter, by some mischance, was stung in the arm by a venemous insect. His father, while rendering him assistance, was struck with apoplexy and died. The person who was charged to convey the melancholy intelligence to M. Daussel executed his mission so abruptly, that the young lady, thinking it was her intended husband who had died, was so affected that she expired in three days after from the effects of the shock.

DOMESTIC RECIPES.

FROSTED LEMON PIES.

Five table-spoons of brown sugar; one lemon, squeeze the juice and grate the rind; one tablespoon of flour, (perhaps two if you choose); one cup of cold water; two table-spoons of melted butter; yelks of four eggs. Beat the white of the eggs to a stiff froth and mix with them four tablespoons of powdered white sugar for the frosting, and put on the frosting just as the pies are taken from the oven and then put them back for three or four minutes until they are of a light brown.

WAFFLES.

Pour a pint of boiling water over a large spoonfull of lard, and a little salt; add one pint of milk, and thicken it with flour; add sufficient yeast, and let it rise over night; then add two eggs, half a teacup of melted butter, quarter of a teaspoon of soda; and if you like, mix in half a teacup of Indian meal.

MUFFINS.

Three cups of milk; three cups of water; five eggs, and a little salt. Batter very thin.

SUET PUDDING AND SAUCE.

One cup of chopped beef suet; one cup of raisins; one cup of milk; one cup of molassas; four cups of flour, and two spoonfuls of water; tie up and boil three hours.

The Sauce.—One teacup of molassas; half a teacup of sugar; half a teacup of butter; one teaspoon of flour, and one tablespoon of vinegar. Boil together.

COMPOSITION CAKE.

One and three-quarter lbs. of flour; one and a half lbs. of sugar; three-quarter lb. of butter; five eggs; one glass of wine; two nutmegs; one teaspoon of soda; two teaspoons of cream of tarter, and one lb. of fruit.

GINGER SNAPS.

One pint of molassas; one cup of sugar; quarter lb. of butter; quarter lb. of lard; one wineglass of milk; teaspoon of soda; two teaspoons of cream of tarter, and three teaspoons of ginger.

REMOVING STAINS.

Four tablespoonfulls of hartshorn; four tablespoonfulls of alcohol, and a tablespoonfull of salt. Shake the whole well together in a bottle, and apply with a sponge or brush, will remove paint, grease spots, etc.

HERKIMER COUNTY CHEESE, superior to any Cheese in the country.

SELECT WINES AND LIQUORS, the very purest, taken from Bond, as we keep none but the best; those that desire choice Table Wines, etc, or for Medicinal purposes, can rely upon what we offer them.

Messrs. Bowen Brothers commenced their business at an early day in Stockton, which they conducted successfully to themselves up to about the year 1860. Flattered with the success that had attended their efforts thusfar and ambitious for a more extended field of operations, they accordingly, about the period above mentioned, established themselves in the City of San Francisco. Since then each returning year has continued to mark the expansion of their trade, until now their annual sales, in the aggregate, are exceeded by no other House in the State.

They have superior facilities for procuring their goods from the East, which gives them great advantages; besides, they pride themselves in keeping articles of goods found in no similar establishment in the city.

These with every other article needed in the Culinary department of the Household, and the usual Family necessaries, furnished by the Grocer. It will be our aim and our pride to give satisfaction to all who may favor us with their patronage. In order to make the business of our Patrons light and pleasant, all orders left with us will be filled with care and dispatch, and Goods sent to any part of the city promptly, without cost of carriage or expense of cartage. Every Order sent us will be attended to with the same care as if purchasers were present.

PATENT RIGHTS FOR SALE.

THE FOLLOWING PATENT RIGHTS OF NEW AND valuable inventions (of which we have models to show their value) are now offered for the States of California and Oregon, and Utah and Washington Territories.

NO. 1. THE MECHANIC'S SPIRIT LEVEL.

Patented September 13, 1859.

This Implement will be of great value to Contractors and Builders, being one of the most valuable inventions yet out. Builders will do well to examine the model.

NO. 2. IMPROVED CLOTHES REEL AND BAR.

Patented January, 3, 1860.

This valuable domestic piece of furniture can be used in the Laundry, the Kitchen, the Nursery, or Chamber, and can be made plain or ornamental; standing in the same relation as a piece of important furniture as does Wheeler & Wilson's Sewing Machines, neat when used and ornamental when not in use.

NO. 3. A CORN CULTIVATOR.

With this implement the soil is first thoroughly plowed and deeply pulverized, and on the return it smoothly and perfectly hills up and harrows the ground between the rows. A very new and valuable implement.

NO. 4. A MUSKETO BAR.

This will be much wanted in California. It is simple in its contrivance, perfect in its working, and can be affixed very cheap to all styles of bedsteads. Hotels, public houses and private families will find it a useful invention.

NO. 5. HYDE'S PATENT POST-DRIVER.

A most excellent labor and money-saving machine, for which we offer rights.

NO. 6. SEED-SOWER.

This is a new inventions, and one of great importance to all who sow grain, or any garden seeds. The working model can be seen at the Farmer's Reading-room.

Holding the rights to all these new inventions, we invite the public to call and see the models. All persons who may be desirous to purchase either County, City, Town, or Individual Rights, can do so on application to

☞ Connected with the Hotel is a Fire-proof STABLE expressly for the care of Horses and Carriages of the Patrons of the House.

D. E. CALLAHAN,
PROPRIETOR.

A CARD.

YEARS HAVE ELAPSED SINCE THE Subscribers first invited public attention to the peculiar properties of their Patent Axle-grease. At first their invention made but slow progress, but thanks to the liberal and appreciative spirit of a large portion of the teamsters and coach proprietors of California, the demand for their manufacture has gradually increased, and notwithstanding the many spurious imitations which from time to time have been introduced from the Eastern States to compete with their article, the H & L AXLE-GREASE has now acquired an unrivaled reputation, extending throughout the length and breadth of California, Oregon, and the neighboring Territories.

The subscribers return their grateful acknowledgments to a discerning public, who have so largely patronized them in all their enterprises which they are now happy to say, are beginning to be justly appreciated as belonging to our California industry.

The supply of material from the East having, in consequence of the war, been cut off, the subscribers turned their attention to the substitution of COAL-OIL as a basis to their manufacture, but after applying every means suggested by the modern application of the science of chemistry, they were reluctantly compelled to the conclusion that however fit COAL-OIL might be for illuminating purposes, and for which it stands unequaled, it was not at all adapted to make a permanently satisfactory Axle grease. In this dilemma the subscribers turned their views to the native produce of California, believing that large quantities of natural resin might be collected from the noble pine trees of her boundless forests.

Having invited attention to this subject, they with steady progressive steps, advanced this until, at the present time, they have established a manufactory of Rosin and Turpentine at Forbestown, from which considerable quantities of both articles are daily manufactured, of such a quality as to find a ready market at fair prices.

It is hoped that increased efforts may continue to be put forth, and new discoveries made, so that California may soon be independent of all foreign supply, for we believe our lofty mountains and our mighty pine forests will yet give us that supply. The subscribers are now receiving native resin in sufficient quantities to be able to sell their celebrated AXLE-GREASE at a LOWER PRICE than any of the spurious COAL-OIL varieties which may hereafter be imported.

A Complete Treatise on the Breeding, Management and Diseases of Sheep,

BY HON. HENRY S. RANDALL, LL. D.,

Author of "Sheep Husbandry in the South," "Fine-Wool Sheep Husbandry," Etc., Etc.

PUBLISHED BY

D. D. T. MOORE, ROCHESTER, N. Y.

THOUGH FIRST PUBLISHED ABOUT A YEAR ago, this work has already reached its TWENTY-FIRST EDITION, and the demand thus far has been extraordinary. A new and revised edition is now ready, and others will follow in such rapid succession that all orders can hereafter be filled promptly. No volume on any branch of Agriculture ever had so rapid a sale or gave such universal satisfaction. The work is a timely one, and unquestionably THE BEST AND MOST COMPLETE TREATISE ON SHEEP HUSBANDRY ever published in America. It is cordially welcomed and highly approved by both Press and People. Witness the following extracts from a few of the numerous Reviews and Letters the work has elicited:

OPINIONS OF PRESS AND PEOPLE.

From the New England Farmer, Boston.

"The Practical Shepherd" is a work that has long been needed by our people. It should be in the hand and head of every person owning sheep.

From the Country Gentleman and Cultivator.

As a whole, this book is unquestionably in advance of anything of the kind now before the public.

From the Maine Farmer.

The name of the author, Hon. H. S. Randall, is a guarrantee of its completeness and reliability.

From C. L. B. P. Johnson, Sec'y N. Y. State Ag'l Society.

It is the best practical Sheep Book, I think, ever published, and does great credit to Dr. Randall.

From the New York Tribune.

In this volume the author has exhausted the subject, and given all that is necessary for any farmer to know about selecting, breeding, and a general management of sheep, in health or sickness. We heartily commend this work to all who wish for a sound and thorough treatise on sheep husbandry.

From the Michigan Farmer.

Mr. Randall has made the very best book extant on American Sheep Husbandry.

From the Ohio Farmer.

The reputation of the author—who ranks as THE authority in this country upon all that pertains to the breeding and management of sheep—will induce a large and continued demand for "The Practical Shepherd."

From the Prairie Farmer.

The illustrations of sheep are by the best artists of New York, and well done. The letter press and paper are all that could be desired in a work of this description. It will undoubtedly meet with the large sale its merit demands.

From the Scientific American, New York.

It is vastly important that those who raise sheep should obtain all the information possible how best to manage their flocks, and we unhesitatingly recommend the "Practical Shepherd" as the most interesting and reliable work on the subject extant.

☞ THE PRACTICAL SHEPHERD is sold only by Agents and the Publisher. The demand for the work was, for months, greater than the supply, and hence it has not been offered or advertised in the Pacific States. It comprises 454 large duodecimo pages, and is printed, illustrated and bound in superior style. Price $2, Sample copies mailed, post-paid, on receipt of price.

Miscellaneous.

A Letter from India.

HURRAH, ZILLAH HUDDEA, BENGAL, Oct. 19, 1863.

MY DEAR SIR—I write to thank you for the trouble you took in sending certain books to my father for me.

I am an indigo planter in Huddea, one of the most fertile districts in India; or, I may say, in the world.. Native agriculture here is very poor, but owing to the wonderful productiveness of the soil splendid crops are produced twice a year—rice in the hot season, and oil-seeds, pepper, wheat, oats, barley, pulse of different kinds, sugar cane, cotton, and many other crops in the cold season. Since the Russian war the cultivation of oil-seeds has been very great, and as the natives of lower Bengal never manure or irrigate their lands, as the natives up country do, the exhausting nature of the oil-seed crops is telling very severely, and the produce of the lands has within these last few years been reduced one-third. A large quantity of land is inundated every year. On those lands which do not quickly dry up *Anum dhau* or water rice (in constradistinction to *Aous dhua*, high land rice) is sown.

Indigo is principally sown on the "churs," or banks of rivers, which are formed of silt brought down by the Ganges during the annual inundation which takes place in August and September. The indigo is either sown down in October (along with a crop of mustard or linseed, which is cut in March,) or in April and May, and is cut in July or August, and manufactured at once while green, not dried, as I believe it is in Madras and Guatamala.

Four steam plows have been started in indigo concerns in this district, and have been found to answer extremely well. Fowler's steam plow has turned out much superior to any other. Where a sufficient amount of silt is deposited cultivation is not required, the seed being scattered on the mud as the water subsides, but the strength of the land on the high parts of the churs is so great that jungle gets up in an extraordinary manner, and it is impossible to clear the land without very deep cultivation, and for this the steam plow is admirably adapted.

Tea is grown to a great extent in Assam, Sylhet and Cachar provinces, to the northeast of this, and there are numerous silk factories in this part of the country. This soil is admirably adapted for coffee, many planters growing their own coffee, but none has been found as yet enterprising enough to enter into competition with Ceylon.

I am afraid these particulars will not interest you much, but if I can be in any way useful to you or your Society, please have no hesitation in applying to me. I lead a lonely life, and have lots of time on my hands, and anything I could do for you would afford me the greatest pleasure.

There is to be an agricultural exhibition held in Calcutta in January, 1864, when prizes will be given for the best specimens of country produce, live stock and agricultural implements. As all the railway and steamboat companies have consented to bring things to be exhibited from all parts of India and the colonies free of charge, and the exhibition has been got up by the Government, and all Government servants are exerting themselves to their utmost to obtain contributions, the exhibition will be a very fine one. I will send you all particulars as soon as I can procure them. With many thanks for your great kindness,

Yours, very sincerely,
ROBERT ANDERSON.

"The Testimony of the Rocks."

Late travelers amid the rocky solitudes of the deserts of Asia have brought accounts of strange fragmentary inscriptions upon the rugged heights of Sina. They asserted that thousands of inscriptions have been found; and that many of them were made upon spots reached only with the utmost difficulty, showing that whoever made them must have had the help of ladders and platforms, and have made long stops in the desert. Some English travellers, who penetrated to that lone and dreary region, copied a number of these inscriptions and brought them home. But it was in vain that attempts were made to decipher them—all was darkness with them. The tribes in the neighborhood of Sina could give no account of them. At length, after a great deal of study and research, some learned and shrewd men succeeded in making a key out of several different and very old languages, and with this key they once more essayed to read "the testimony of the rocks." With astonishment, awe, and delight, they read as follows: "The hard rock water, a great miracle;" "The people, the hard stone satiates with water, thirsting;" "Destroy, springing on the people, the fiery serpents. Hissing, injecting venom, heralds of death, they kill. The people prostrating on their back, curling in folds they wind round, descending on, bearing destruction;" "The people sustain on a pole, erecting a standard, the male serpent fiery of molton brass." Very disconnected are the sentences; but let any one compare them with the sacred Scriptures, particularly with the twenty-first chapter of Numbers, and see if he does not think those hoary rocks, silent for ages, are now speaking effectually in the ears of men of the truth of the Bible record.—[Oriental Researches.

THE DISCOVERY OF THE BAY OF SAN FRANCISCO.—It is supposed that the Bay of San Francisco was first discovered in the month of October, 1769, by Friar Juan Crespi, who started from San Diego on the 14th of July previous, at the head of a party of soldiers, with instructions to found a mission on the Bay of Monterey. Coming northward he reached that bay near the mouth of Salinas River, and finding no harbor there, he determined to continue his journey in the hope of finding a better site for a mission. He found a magnificent bay, believed that he was the first white man to discover it, and named it after the founder of his monastic order, San Francisco. Thus it was that the bay obtained the name which it still has, and which has been communicated to the mission and the city.

FROM OUR EXCHANGES.

—— We are somewhat astonished to find that so few people intend planting corn this season, when it is without doubt the most profitable crop that can be planted this year. When feed and seed are down to 1@1½c. ₱ lb, corn then is about as good a crop as either wheat or barley, and if it were raised in quantities it would be obliged to bear a price having some proportion to that of other grain. But the particular advantage of it this year is that it can be put in so very cheap. It can nearly all be done with work. Feed is getting so good now that a team can make a great deal towards a living on grass, and the seed costs next to nothing. We are satisfied that there is more clear money in a corn crop than in almost any other, and hope yet to see more of our farmers take hold of it.—Colusa Sun.

—— Considerable excitement seems to exists in Colusa over the discovery of petroleum near that town. A few days since nearly the entire population was out on a visit to the petroleum region which is among the foothills, about thirty miles north west of the town of Colusa. The petroleum is said to be of excellent quality and to exist in large quantities. The oil is found on Government land, and claims are being taken up in all directions.

—— Six distinct shocks of an earthquake were felt in the vicinity of Santa Rosa, Sonoma county on the 8th inst. In the upper portion of Bennet Valley, a few miles from Santa Rosa, the shock appears to have been felt more severe than at the latter place. Chimneys were thrown to the ground, and a stone fence was knocked down. Mr. Manion, a farmer, had his chimney thrown down, and the fire rolled upon the floor.

—— Judge Underhill has tendered his resignation as a Director of the State Insane Asylum, believing that the decision in the Supreme Court in the case of The People vs. Sanderson—the State Library matter—applies equally to himself as County Judge. That is, Underhill believes, according to the decision, he cannot be Asylum Director and Judge at the same time.

—— One of the most wonderful freaks of nature that we have ever heard of, says the Fresno Times, was on exhibition at Millerton a few days ago. It was a young lamb, from Mr. McCrary's ranch on Dry Creek, that had two distinct bodies, with seven legs and two tails. The head was perfect and natural, but otherwise the animal was singularly deformed.

—— We saw, one day this week, the fleece of a Spanish Merino Buck, two years old, the property of Amos Roberts, which weighed a little over twenty pounds. Mr. Roberts says he has quite a number which will weigh equally as heavy. This wool only brings now about twenty-five cents per pound, but even at that rate it will pay to raise fine sheep.—[Colusa Sun.

—— The Western Pacific Railroad.—The grading on the Western Pacific Railroad is now completed to Milpitas, a distance of seven miles. The culverts and bridges will be erected as soon as the ground becomes sufficiently settled after the Spring rains. The contractors are pushing the grading work northward, and in a few days it will be completed to the Alameda County boundary.

—— It is proposed by persons in this State, who have formed themselves into an organization for the purpose, to erect an appropriate monument over the place where the remains of Colonel Roderick Matheson, who was killed at Crampton Gap, Maryland. The body was brought back to California and interred at Healdsburg, Sonoma county, where his family is now residing.

—— Mr. S. H. Allen informs us, says the Independent, that he has a Spanish chicken which has laid fifty-four eggs in as many days, and is still keeping it up. Every morning regular, before eight o'clock, this chicken deposits an egg in her nest. These Spanish chickens are profitable fowls, and cost little trouble.

—— Trade is opening at Portland with brilliant promise for the coming season. It is thought that there will be more business transacted the coming year than during any preceding. The Oregonians have realized handsome prices for their produce owing to the drouth in California, and have plenty of money to purchase with.

—— The Spring shearing is now proceeding very rapidly in the lower counties, and, from the abundance of pasture, the quality of the clip promises to be much superior to that of 1864. Several hundred bales of wool may be expected to arrive at this port from below San Luis Obispo by the 1st of April.

—— At a recent convention of cheese manufacturers of New York, at Utica, twenty-five cheese manufactories were represented, from thirteen counties. They made 2,810,000 pounds of cheese last year, from the milk of 71,670 cows; 9½, or a fraction under 10 pounds of milk to a pound of cheese.

—— At a village called Oswego, on the banks of the Willamette, ten miles from Portland, is a mountain of iron ore. A few days since a company was organized to work it, being the first enterprise for the manufacture of iron ever established in.

—— The Indians are depredating in Secret Valley and in the northeast portion of Honey Valley. Fifty head of horses, thirty-five mules, and thirty head of beef cattle, are their latest achievements. The rascals are taking advantage of the removal of the troops from these localities.

—— The Supreme Court of the United States has confirmed the Lokaya grant, covering eight leagues of land, nearly the whole of the valley in which Ukiah is situated, and extending over a large portion of Mendocino county.

—— The Daniel Low Coal Company, in the vicinity of the Truckee river, has struck a vein of coal at the depth of three hundred and four feet. It is said to be of the English cannel variety. The coal was struck by boring.

—— The Chicago Historical Society have purchased grounds for the purpose of erecting a building for the use of a Society at $18,000. They propose erecting a building at a cost of $200,000.

—— Some three hundred Chinamen have been employed in cutting wood in Sooke this winter. The weather there and on Leech River has been excessively cold.

—— General Otho Hinton, of Santa Rosa, Sonoma county, died at his residence in that city on the 5th inst. His demise is deeply regretted.

A New Use for Magnesium.—The magnesium lamp promises quickly to become a regular article of furniture in every silk mercer's showroom. A dyer, of Paris, some months ago, saw the magnesium light for the first time, and discovering at once that its rays left colors unaffected, exclaimed, "This is just what we have long wanted!" Even in Paris there are many days in Winter when those who deal with delicate shades of color, are utterly at a loss to discriminate between tint and tint, but the magnesium light has completely removed the difficulty. Now, whether it be fog or night, any question as to color is in a moment set at rest in the flame of a bit of magnesium wire. —[Journal of Phonography.

The Markets.

Wholesale Produce Report.

This represents the prices paid by the dealer to the producer.

Corrected weekly, by A. H. Todd & Co., corner of Clay and Drumm Streets.] March 17.

The condition of our grain and produce markets are as last reported—prices much *inflated and stimulated*. Holders and speculators are firm in prices while buyers are few and scarce. Large and liberal supplies of Wheat, Flour and Barley continue to reach us from Chili, adding to stocks on hand. The arrivals within four days from Chili have been equivalent to 15,000 bbls. Flour, in Wheat and Flour, viz: the bark D. C. Murray's cargo was 12,000 100lb sks Flour and 1200 sks Bran; the bark Randolph was 750,000 sks Wheat. The bark Orita has about 700,000 sks Wheat. The bark Record has 8000 100lb sks Flour, 200 150lb sks Wheat, and 2540 sks Barley. We have advices of futher shipments from Chili, and doubtless the next mail steamer will bring additional advices. The Chili crop is reported to be large and *low prices ruling*. *California furnishes a handy and good market*, and it is reasonable to believe our supplies have but commenced coming. Parties in interest are buzzy, if there is truth in report, and effecting sales, for both export and distilling, on private terms, but *understood and known to be at less prices than daily market quotations*. We have no reason to change our opinion and believe that what we have on hand and that *en route* from Chili, Oregon and the East present prices cannot be longer sustained, and at the *risk* of being called *bears, croakers* and other trash names by *Breadstuff speculators*, have given our views. Our only fears are that the quantity to arrive will be so large that our market will flatten to such an extent that the incoming crop will suffer and that extreme low prices will follow, and that our farmers and State at large are to be the finale injured parties. The trade in Breadstuffs of the entire Pacific Coast is in our opinion one of too vast magnitude to be handled and controlled by a few rash speculators. It must be narrow minds and contracted brains that conceed this point. Economy and prudence will soon crush the Breadstuff market and reduce prices.

Our receipts from all sources, for the past week, are as follows: Wheat, 10,508 sks; Barley, 4,924 sacks; Beans, 1,922 sks.; Potatoes, 6,212 sks; Flour, 53,892 qr-sacks; Straw, 723 bales; Hay, 3,591 bales; Oats, 476 sks; Salt, 1,980 sks; Middlings, 65 sks; Bran, 1,640 sks; Corn, 62 sks.

A CARD TO OUR PATRONS.

'Tis said *competition* is the life of trade. Fair, honorable competition, we never fear; but when *our name*, or the *same name*, is used to deceive others or injure our business, it becomes our duty to notify our patrons and friends that such is the case.

We were recently called upon by a person in this city, to supply a large order for more than One Thousand pounds of Seed of various kind, and also for several hons and Seed Bags—these were said to be for a store or stores in the country.

It soon came to our knowledge that these Seeds were to establish a Seed Store on Washington Street, in this city, under the same *Sir*-name as ourselves. The secret and unfair manner in which these Seeds and Bags were attempted to be procured of us, was so singular and so unfair, that we had just suspicion of wrong intent. We soon learned that *falsehood* was told us, and we refused to supply the order, knowing that no other establishment on the coast had laid in the stock of Seeds as ourselves, and having every reason to presume that our name will be used in the sale of Seeds elsewhere, we feel it a duty to remind our Customers and Purchasers of Seeds everywhere, that they should all be careful in sending their orders, and to be particular in their directions.

We have been established nearly ten years in the Seed Business, and we trust that by the extent and system with which our business has been conducted, we have justly earned the reputation of a regular Seedsman.

We import our Seeds direct from the best houses in Europe and the Eastern Growers, we have the most extensive stock in California by a large extent, and purchasers need only call at our establishment to satisfy themselves that our business is so conducted as to meet their approbation and business.

We return our thanks to our many Customers for their liberal support for these many years past, and trust a continuance for many years to come.

We would remind all our Friends and Customers the necessity of being particular and to address all letters and orders to

DAGUERREAN GALLERY INTEREST.

The owner of one of the best Daguerrean Galleries in our State, with the best run of business, with fine work room, handsomely furnished, display rooms and everything to make it attractive and profitable, desires to find a partner, an active partner, a real working partner, for the business department, so that the business, which is constantly increasing, may be retained, and another and important branch added to it, which the present proprietor cannot do without a good practical, working, business man.

For particulars, and all appertaining to it, address EDITOR FARMER. All Letters confidential. 1

HUBBARD SQUASH.

THIS VERY BEST OF ALL SQUASHES SHOULD BE planted by every person who wishes the best Squash that can be grown.

The HUBBARD SQUASH is different from all other Squashes; has a hard rind, but very rich meated, sweet and luscious as the finest Carolina Sweet Potato.

The Hubbard makes the finest Pies in culinary art, superior to a Custard Pie—the Squash, however, is to be baked only. Saw the Squash in halves, bake in the shell, and scoop it out when baked, or serve it on the table in the shell. For Pies, first baked, then scooped out, and used as other squash.

Fresh Seed just received from the East, pure from the growers, for sale at the FARMER OFFICE.

Packages $1 each; $3 per pound 3

THE CALIFORNIA ART UNION,

OVER THE STORE OF
Messrs. Jones, Wool & Sutherland,

PERSONS DESIRING A FEW EXTRA SIZE EVERgreens and Ornamental Trees, can learn where they can find such, of unusual beauty, a few only, by applying at this office to EDITOR FARMER. 3

California Grass Seeds.

EVERY VARIETY OF NATIVE GRASSES, the seed of which can be saved, will find a ready purchaser for the seed, on application a the Farmer Office

ORNAMENTAL TREES, PLANTS, ETC.

W. R. STRONG'S American Seed Store,

NO. 206 J STREET, SACRAMENTO,

IMPORTERS

—AND—

WHOLESALE AND RETAIL DEALERS IN

Garden Seeds, Tree Seeds, Grasses, Etc.

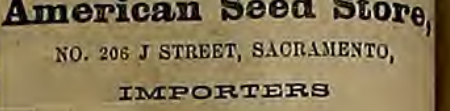
The Largest and Best Collection of Seeds for the Garden, Field and Orchard that can be found in all the upper section of the State.

THE UNDERSIGNED BY AN EXPERIENCE OF many years has made himself familiar with the character of the seeds especially wanted for the great Sacramento Valley, or any portion of our State, and he has taken pains to import, from the very best sources in Europe and the States, only those of the most reliable character and quality, such as are adapted to our climate, all guarranteed PURE and FRESH, and such as he can most cheerfully offer to his customers.

The Collection of Seeds will embrace every desirable variety of

GARDEN,
FLOWER,
—AND—
FRUIT SEEDS,
Together with
AGRICULTURAL SEEDS

For every Department including all the New GRASSES, GRAINS, etc.



Ornamental Tree,
....AND....
SHRUB SEED.
Choice Flower Seeds,

Over Two Hundred Varieties, and these of the very CHOICEST KINDS.

GRASSES.

A large Collection of all the Valuable Clovers and other Grasses suitable for high or low lands.

A large Invoice of Alfalfa, or Chile Clover, of the last crop, best quality, imported to order, will be offered this year also.

California-raised Alfalfa, of a very superior quality, and of extraordinary purity,

Cotton Seed, Seed Rice, and Tobacco Seed,

All these of the most approved sorts.

Bulbous Roots

In great variety. In this collection will be found Hyacynths, Tulips, Narcissus, Crocus, Lillies, Gladiolus, and all choice Bulbous Roots that flourish well in our clime.

It has been the object and aim of the undersigned to import and prepare for his patrons a collection of Seeds superior to any yet offered in this section and he is now opening over fifty large packages, of many thousand pounds of new and choice Seeds, all of this year's growth, just received by the last steamer, to which he would call their especial attention.

He can assure those that desire pure and reliable Seeds, that they can send their orders with full confidence that they will be attended to, and filled the same as if they were present themselves.

Catalogues of the Seed of this warehouse will be sent to all applicants.

A fine collection of Fruit Trees, Grape-vines, Ornamental Trees, Flowering Plants and Shrubs will always be found in the yards connected with this Store, during the season of transplanting.

Agricultural Books, Pruning Knives, etc., always on hand.

W. R. STRONG,

Horticulture.

LANDSCAPE GARDEINNG.

Perhaps it is not expected that in California where the "chief end of man" is to "keep what he's got and get more if he can," that science should make rapid strides, especially that branch of Horticulture and Horiculture denominated Landscape Gardening, because as a general rule "it don't pay," and it is only to those who have a real love of nature and the beautiful—those who value a Beautiful Home more than money, that do realize or can appreciate, or that will give due attention to Ornamental Gardening, and so study and plan as to secure to themselves a true style or a specimen of real Landscape Gardening.

We are free to admit that great improvements have been made and a great advance noticed within a few years in the garden grounds of our citizens, all over the State, but from a very careful examination of all that has been done there are few, very few places where true Landscape Gardening has been shown, or where there is anything like a copy of nature or true science in the work done: in fact we can hardly point to a single place where a complete and extended design has been perfected. And yet there is no country in the world where the true Landscape Gardener could make as perfect work as in California.

The true cause of this is, there are too many Botch Gardeners—too many that call themselves *Landscape Gardeners*, that are utterly ignorant of the science, they merely copy and guess, and guess and copy, they have no eye or heart for nature, or know what is beautiful. Their chief aim is to *get a job*—then get the pay.

We might point to many garden grounds over this State laid out and designed by Professional Gardeners, that are nothing but complete *abortions*. In such there is no law, order or design. Such grounds have a neat, cleanly and healthy look for a little time, but soon, trees, plants and shrubs *outgrow* their space and they look like a man with child's clothes on. There was exhibited at the Mechanics' Fair last autumn a "Labyrth Gardes" as a Model Gardes, and effort was made to lionize it. Had such a model been shown in an Exhibition in Europe or the old States, it would have been thrown out as rubbish. That very model displays the *skill and genius* of the builder. We have another living specimen of "Landscape Gardening" in the Plaza of the Metropolis of the Pacific. We suggest that it be put down in all future Horticultural publications as number $2970 model of Landscape Gardening. We should like to hear the opinions of a Committee on Landscape Gardening of the London Horticultural Society, or of the Massachusetts Horticultural Society, upon this great work. Let reflecting men—the citizens who are taxed for this monstrosity in taste, look to it well. Here is the Grand Plaza, in the heart of our city, designed and planted, at a large cost, not with choice specimens of the various trees of our own State, the finest on earth—not with a variety that will stand the winter or summer, or when grown form a design of Order and Beauty, but with common trees and shrubs of a few kinds, many that cannot stand the winds or the frosts of such winters as the last—trees and plants that in a few years will by their then appearance be an eyesore and a reproach, worse than the old fountain.

It is not a pleasant matter for us to state such things, but we have a pride in such things and our duty compels us to speak plainly. We are daily witnessing such miserable attempts to lay out public grounds and gardens by men calling themselves Professional Gardeners, etc., who never handled a spade or planted a tree, or knew the name of any class of trees before they came to California, and the consequence is they retard the prosperity and the beautifying our State instead of advancing it.

We have no wish in this present reference to the Public Plaza to put forth our own views of what should have been done, but this we know, *the Plaza should have been* a Representative of some of the finest trees that are indigeneous to our State, whereas it is now a mere baby-show to what it should have been, and in less than *five years* the public voice will uproot and remodel it, then we hope it will be what it should be.

In order to give the reader a true idea of "Landscape Gardening," as we understand it, and as we have seen it in the Gardens of Europe, of which we have examined the finest, we will give the reader a sketch on the subject from the pen of Wm. Paul, Esq., a scientific man whose sketch appeared in the Garden Chronicle of London. Let the reader peruse this and compare the plan of Mr. Paul with our Plaza and then say which is the true design. We shall refer to this subject often.

SPRING.

I have somewhere met with the remark that the poet revels most in the beauties of spring, the painter in those of autumn. The Landscape Gardner when selecting trees should perhaps be conversant with and consider the effect they produce at all seasons. Spring is the time of promise in gardening, and I purpose in the present instance to confine my remarks to that season. The dominant features of tree-scenery in spring are:

1. The outline of the trees.
2. The colors of the flowers.
3. The colors of the leaves.

1. *The Outline of Trees.*—From among the various forms which trees assume, I may perhaps be permitted to instance the following as clearly defined points of departure—spreading, round-headed, pyramidal, and weeping. Not that it is intended to say that all trees are well defined examples of one or the other of these forms; for it is admitted that in many there is an absence of strongly marked character, and that a tree may be neither perfectly spreading, round-headed, pyramidal, nor weeping, but in the intermediate forms will generally be found a dominant habit which renders them easily referable to one or other of these divisions.

Spreading.—This the form most prevalent in nature, and such must be the staple of ornamental planting. The ash, the beech, the oak, and its Spanish chestnut are of this character. Look abroad on the uncultivated landscape, and the probability is that nothing else will meet the view, unless it be a few Lombardy poplars, whose spire-like tops everywhere break into the blue vault above.

Round-headed.—Of these the Robinia inermis is perhaps the most strongly marked. This beautiful tree is not planted in England half so much as it deserves to be. In France it is meet with at every step, and the dense masses of leaves of a fresh bright beautiful light green never fail to attrac the attention of the traveler. Most of the round-headed trees are, however, of moderate or small growth, and therefore better fitted to fill various positions in the flower-garden than to adorn the distant landscape.

Pyramidal.—Pyramidal trees of large size are more numerous than round-headed ones. The Lombardy poplar, Turkey oak, and White Beam tree (Pyrus Aria), are well known examples of these. There are also pyramidal forms of the acacia, the common oak, the elm, the alder, and a beautiful new alder known in trade as Alnus asplenifolia. Then among evergreen trees we have the common cypress, the red cedar, and the Irish yew.

Weeping.—The weeping birch and weeping willow are both familiar trees, and from good illustrations of this group. They are less common round London than many other kinds, but they are distinct and attractive, and not likely to be passed unnoticed.

2. *The Color of the Flowers.*—Trees and shrubs which flowers in spring are especially valuable, and, fortunately there is no dearth of such. A group composed of scarlet thorns, laburnums, and lilacs will furnish an example of what may be effected by the introduction of spring-flowering trees.

3. *The Colors of the Leaves.*—Some deciduous trees put forth their leaves early, others late; but at whatever time they appear, being constantly moistened with the showers of spring, they present the eye with an agreeable freshness which we in vain look at a later date. The varied tints of the bursting leaves form a most agreeable feature in the landscape in spring—the blood red of the purple beech, the yellow of the Caragana, offer contrasts in themselves pleasing, but which lessen in intensity as the summer advances. With evergreens the difference in color between the new growth and the old, especially in the pine tribe, is too strongly marked to escape notice, and produces a very pleasing variety. The darkest and the lightest shades of green are often thus brought brought in immediate contact.

Within view of the spot where these lines were written, is a stream, whose margin, at the time they were penned, was overhung with the pale tender green spray of a weeping willow; behind were dark masses of the common yew, and still further beyond groups of blossoming hawthorn. The effect of this combination was admirable. Onward still, and in the distant upland, were trees innumerable; but so far as could be distinguished each seemed but a counterpart of the other.

Although not in a severely critical mood, I have been indulging the fancy by obliterating certain objects within range of sight—some of the comparatively meaningless trees which in many instances have been planted by the hand of man, but more commonly by nature. In their places I have conjured up examples of the rarer and more modern trees, and the landscape thus improved lies before me in increased loveliness. I have gazed and am satisfied. The youth and freshness of spring are still there, but the monotony has disappeared; the whole landscape is inspirited.

In endeavoring to give utterance to these views I do not seek to ignore the fact that the prevailing color in tree scenery is green, varying in shades, but still green. This is as it should be, for no other color in nature is so agreeable to the eye. Let us then take this color as the ground-work of our operations, and retain its ascendancy, but let us vary and increase the pictorial effect of the landscape by a more liberal introduction of other colors. Every demesne should be in itself a picture, or rather a series of skillfully united pictures.

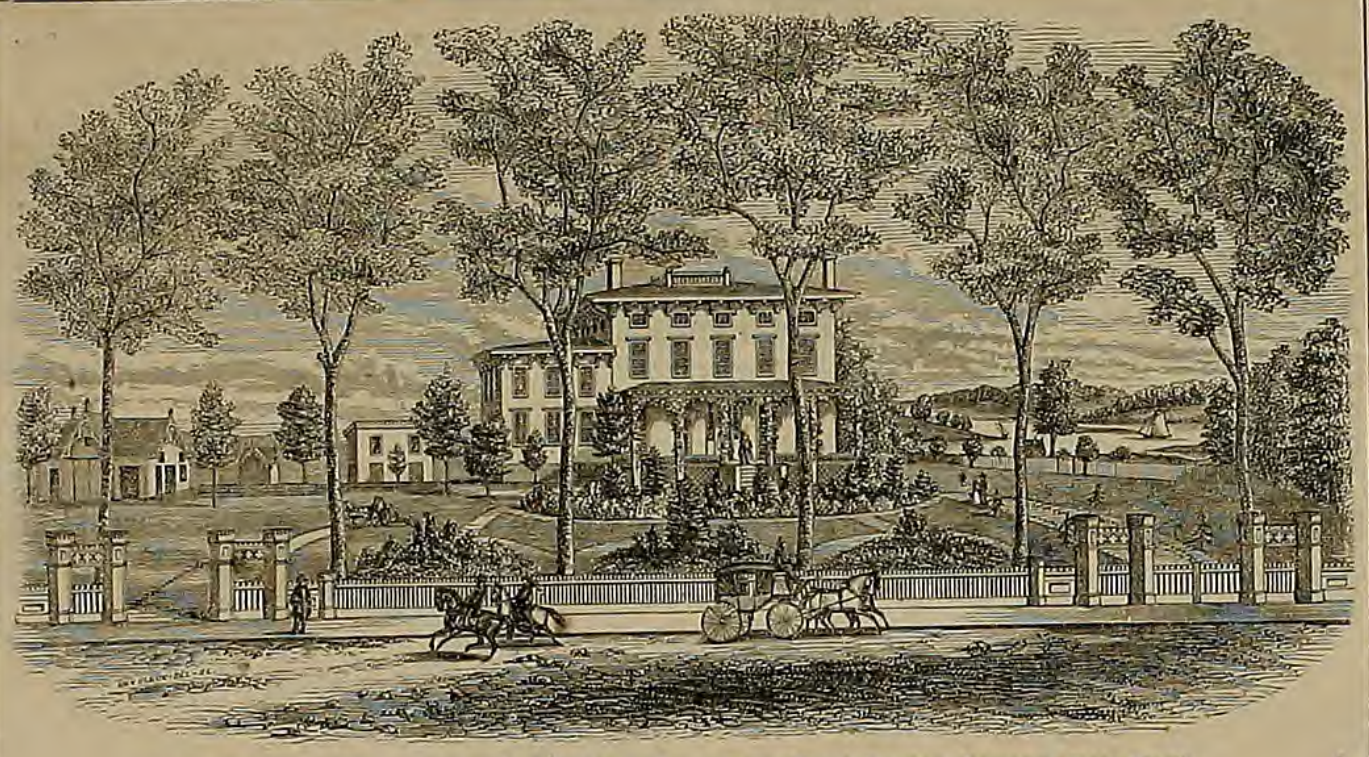
SUMMER.

Whatever may be the beauty of trees in spring there is an incompleteness attending it—the incompleteness of progress; it is not until the arrival of summer, when the leaves have attained their full size that trees appear in full dress, and produce that depth of light and shade in which the lover of nature finds so much pleasure.

If we seek to produce variety through the diversity in form of leaves, we shall find no difficulty in doing so. There are the needle-shaped, of which the pines, firs, and junipers, are examples. The small-leaved, which include such trees as the oak, the elm, the beech; the large-leaved, to which belong the Catalpa and Paulownia; and the compound-leaved, grand examples of which are met in the Ailantus, Koelreuteria, etc.

But the color of the leaves in summer is the most fertile source of variety. There are the light-green, for example, Taxodium distichum, and Gleditschia; dark green, Fraxinus crispa and Castanea vesca; purple, beech, elm, and sycamore; yellow, Acer Negundo variegatum, and silver poplar. I know of no trees so beautiful in the landscape in summer as the two latter, on account of the idea of coolness they suggest by the glitter of their white leaves. The aspen, too, is desirable at the same season, the ceaseless play of its foliage disclosing a breeze so faint as to be scarcely distinguishable by any other test.

Then as to shade—we want shade in summer. Trees which produce the densest masses of foliage should be selected for this purpose and planted in appropriate spots. Although "deciduous" trees are in their greatest beauty at this season, we cannot altogether dispense with "evergreens." The latter are invaluable on account of the variety they produce, and also for the coolness and almost impenetrable shade which they afford.



The Residence of the late John Griffin, Esq., Rye, Westchester County, New York.

A Beautiful Engraving.

Some few years since, in the year 1859, we had the above beautiful engraving made at considerable cost, in order that we might present to the readers of the Farmer a mansion and grounds where elegance of design and a perfected landscape, and a complete artistic finish would offer an example worthy of imitation.

This estate is a large and valuable one, it is situated on a gentle rise of ground, in the town of Rye, Westchester county, twenty-four miles from New York city, on the old Boston mail-road, and adjacent to the town of Mamaroneck, the name derived from the chief of the Braves.

The mansion is forty-eight feet square, with wings twenty-two by eighteen feet. Boat, and bathing houses are seen on the right; stables, coach-house, poultry-house, dove cote and ice houses on the left. The grounds slope down beautifully to the Mamaroneck river, which empties into Long Island Sound, half a mile distant; the Steamers make daily trips to this place, and the New York and New Haven Railroad cars pass within half a mile. The grounds were designed in 1851, and completed in 1852. John Griffin, Esq., was the father-in-law of our highly esteemed citizen, S. H. Meeker, Esq, whose sudden decease after he left San Francisco about two years since, was followed by that of his father-in-law in two weeks, leaving the widow of Mr. Meeker, the only child of Mr. Griffin, sole heir to a large estate by the father, in addition to that of her late husband.

But this noble mansion and grounds, where all is so beautiful, with all that wealth could add, these could not stay the hand of Death, for "all that is bright and beautiful must fade."

The beautiful designs, however, will be for years the example that can be copied, and we have taken this to illustrate what we esteem a picture which Landscape Gardeners can copy from, and appropriate to the subject we have given on this page of the Farmer.

"Before me rose an avenue
Of tall and sombrous pines,
Abroad their fan-like branches grew,
And when the sunshine darted through
Spread a vapor soft and blue
In long and sloping lines."

The Abies Douglasii, A. Deodara, and Pinus austriaca stand in the very foremost rank, both as summer and winter trees, for avenues, groups, or single specimens.

The examples above given are mostly trees attaining to considerable size and familiar samples of such. There are, however, others of medium and lowly growth similar in form, color, and general character.

Among novelties, I have not forgotten the remarkably beautiful trees introduced from Japan, by Mr. Fortune and Mr. Veitch. Some of these, the Acers especially, are wondrously beautiful, but are they hardy? Time is necessary to prove this. It is reported that some are difficult of propagation, and if so, it will require time before they become sufficiently reasonable in price to be generally available.

AUTUMN.

The prominent feature of tree-scenery in autumn is the changing and varied colors of the leaves.—As green is the dominant color of the mature leaf in summer, so is a russet brown that of the falling leaf in autumn. But there are some trees whose leaves grow brighter as they advance to maturity, and in the red, purple and yellow hues which they assume in autumn, we find materials to vary and increase the beauty of the landscape. The leaves of the scarlet maple and the scarlet oak change to a fine red; those of the Norway maple, the birch, the ash, the Koelreuteria and the tulip tree to yellow; the liquid-amber dies a variegated mass of green, red, purple and yellow; and there are various intermediate tints, which, if less marked, are nevertheless of infinite value. These in opinion, are seldom sufficiently used in the composition of tree-scenery.

The sumach (Rhus typhina) is valuable, not only for the brilliant tints of its dying leaves, but also for the feathery tufts of flowers which it produces, and which become dry and remain on the tree during autumn and winter.

Trees which bear fruits or berries are also worthy of notice at this season. The red and the yellow-berried mountain ash are beautiful. Then there are numerous varieties of the thorn (Cratægus), producing yellow, red, and black berries, some of them of large size; and the Siberian crab, and the Transparent crab, when laden with their respective fruits, are objects of matchless beauty.

As the greater number of English landed proprietors spend the autumn at their country seats, it becomes of first importance that every feature of beauty at that season should be fairly and fully developed. But what is the fact? We know of many first-class English residences where the monotony previously condemned in spring exists alike in autumn. From universal green to universal brown, and back again as the seasons revolve, is all the change that takes place. The flower garden, planted and arranged with exquisite skill, and taste, forms a series of glowing pictures; but everything beyond is dull, tame, heavy and monotonous. Now we would not that the garden should be a whit less beautiful, but the proprietor of a demesne is not expected to spend all his time there. The pursuit of country sports, if nothing else, will take him into the outlying parts of his estate, and as he traverses the dewy meads amid fogs and falling leaves, the intervals of sport may be enchantingly filled up by the contemplation of a varied, vigorous, and well-composed landscape. Whatever, therefore, is left undone, at least the park and the outlines of woods and plantations should be varied and adorned by all the forms and colors that can be drawn from the rich repertory of the vegetable kingdom.

At this season, as at others, there requires a due admixture of the deciduous and the evergreen to attain all that is desirable. The airiness, the grace, the glow of the former, is rendered far more beautiful when associated with the more solid-looking and durable forms of the latter. As the deciduous forms are stripped bare, and their leaves scattered by the autumnal whirlwind, it is pleasant to contemplate the permanency and repose of the evergreens, fitly represented by the pine an yew.

Oil Products.—The oil district in Pennsylvania in spite of the wild speculations with which it is associated, has proved a most important accession to our national wealth. The exports of oil alone during the past eleven months of the current year, amounted to 30,000,000 gallons, which, at an average price of 75 cents per gallon, is equivalent to $21,000,000. If to this were added the domestic consumption, which can not be estimated at less than 1,000,000 barrels, or 20,000,000 gallons, it would appear that the oil product of the Union must realize $35,000,000 to $40,000,000 per annum. The coal trade of Pennsylvania has also experienced a remarkable stimulus during the last three years, partly from the demand for Government purposes, and partly from the rapid substitution of coal for wood, as fuel. As the result, new coal lands have been opened in that State, and old mines, long idle from lack of capital and enterprise, have been transferred to new hands, who are working them at a large profit.

Agricultural Department.

Why Scalded Meal is more Nutritious than Raw.

The nutriment afforded to animals by seeds and roots, depends upon the rupture of all the globules which constitute their meal or flour. These globules vary in different roots, tubers and seeds. Those of potato starch, for instance, are usually from fifteen ten thousandths, to the four thousandth part of an inch; those of wheat rarely exceed the two thousandth part of an inch, and so on. From experiments made on these globules by M. Raspail, the author of "Organic Chemistry," and M. Biot of the French Academy of Sciences, the following conclusions have been drawn:

1. That the globules constituting meal, flour and starch, whether contained in grain or roots, are incapable of affording any nourishment as animal food, until they are broken.

2. That no mechanical method of breaking or grinding is more than partially efficient.

3. That the most efficient means of breaking the globules is by heat, by fermentation, or by the chemical agency of acids or alkalies.

4. That the dextrine, which is the kernel, as it were, of each globule, is alone soluble, and therefore alone nutritive.

5. That the shells of the globules, when reduced to fragments by mechanism or heat, are insoluble, and therefore not nutritive.

6. That though the fragments of these shells are not nutritive, they are indispensable to digestion, either from their distending the stomach, or from some other cause not understood; it having been found by experiment that concentrated nourishment, such as sugar, or essence of beef, cannot long sustain life, without some mixture of coarser or less nutritive food.

7. That the economical preparations of all food containing globules or fecula, consists in perfectly breaking the shells, and rendering the dextrine contained in them soluble and digestible, while the fragments of the shells are at the same time rendered more bulky, so as the more readily to fill the stomach.—[*Mass. Ploweman.*

THE WAY TO RAISE BLACKBERRIES.—At the last meeting of the Farmers' Club, Dr. Ward described his plan of cultivating and training blackberries, and as it is a manifest improvement over the common method, we present a condensed report of his remarks.

The vines are planted in rows three feet apart, and three feet apart in the rows. Over each row is stretched a stout wire at the hight of about four feet, with stakes at proper intervals to support it at this hight. As the vines grow they are tied to the wire, and bent down along the wire all in the same direction—that is, all toward the south, all toward the north, or in such direction as may be most convenient.

The berries are borne on the wood of the previous year's growth. In the Spring of each year, the bearing wood of the year before is cut out and removed, and the new shoots of the new wood being at the same time cut back within a foot of the main stalk. Thus the whole labor of trimming and training the vines is performed at one operation. It is better to manure in the Fall, and this all-important matter should be attended to every year.—[*Scientific American.*

A Farm for Sale.
260 Acres.

CONSIDERED THE BEST IN EVERY respect of its size in the county. More than One Hundred Acres under fence, about Fifty Acres has been in crop. The soil is good; a Farm house with six rooms, Barn 50 feet square, a Granary with store house and other buildings, a tasteful Flower Garden round the house, with picket fence, a young Orchard, a Culinary Garden, Four Yoke of Work Steers, and about twenty other Cattle; about fifty to sixty Sheep; Hogs and Poultry a considerable quantity; convenient small lots inclosed round about the house; a splendid spring of water, sufficient for Milling or other machinery; also, a good spring of fresh water, and house over it; two Plows, one good Harrow, a Wagon and other Farming implements, a considerable number of Carpenter's tools, most of the Household Furniture.

Its is a good situation for a Mill, Store or Tavern.

All will be sold in one lot for CASH in order to save trouble. No person need apply who has not the cash to pay down, as the parties intend to leave this locality.

Price Four Thousand Dollars.

Reference to its excellence can be made to Wm. White, Esq., of San Jose.

For further particulars apply at the office of the CALIFORNIA FARMER. 7

MAN WANTED TO GROW SUGAR BEET.

A WEALTHY MAN, DESIROUS OF TESTING THE capabilities of our climate and soil for the cultivation of the Sugar Beet, and the manufacture of Sugar, desires to find a man who has had experience in growing the Sugar Beet for this purpose. To such a person a liberal offer will be made, and no other person need apply than one who has knowledge and experience.

Address or call on the Editor of the California Farmer. 1

FOR SALE, TO LEASE, ETC.

A Magnificent Stock Farm

For Sale.

WE HAVE ONE OF THE VERY FINEST STOCK FARMS for sale to be found in the State. The location is a Valley in the Coast Range, and in a situation unequaled for excellenc. A place secluded from loss of Stock by mixing, etc.

There are 1200 acres all inclosed with a fine staked oak fence with strong riders, to this can be added as many thousands of Uncle Sam's acres as may be wanted. The fenced land is the best of bottom land. During the late dry weather a large amount of Stock has been driven to these hills for feed and have been profitably kept.

This Ranch produces a big yield of Wheat, Barley, Oats Corn, Root Crops, etc. Tobacco, Hemp, Flax, etc., can also be raised most profitably. Floods never wash it, and it is never affected by drought.

On this Ranch are good, ordinary Buildings, Houses, Barns, Sheds, Corrals, Smoke Houses, etc., to this Plows, Harrows, Teams, working Oxen, etc., to do the work on the place.

On this Ranch there is now the following Stock:

One Jack of the very best character
100 Mules from 1 to 3 years old.
1 Stallion, No. 1.
20 American Mares, No. 1.
80 Mares one-half and three-quarter breed. These Mares are all in foal, mostly by the Jack, as Mules are a ready sale at high prices.
100 Horses, mixed Stock.
500 Head Horned Cattle, American Stock and half breed.
400 to 500 Swine, good Stock.

The Stock now on the place can be sold with the Ranch and thus put the purchaser into a business profitable at once. This Ranch is so situated that a river surrounds the range on one side and mountains on the other to which the Stock have a fine run without any interference from any source, thus giving the Stock a complete swing. Without reducing the original Stock there can be sold annually from this Ranch 50 Mules, 30 Horses, 100 Beef Cattle, 300 fatted Hogs, worth in the aggregate $10 000, three fourths of which is clear profit

The timber is abundant Pine, Oak, and other hard woods. Tar, Pitch, and Turpentine can be made in abundance.

This is one of the Rare Chances, such an one as is seldom offered.

Easy terms as to payments: A portion of the money can remain on time if secured.

For all particulars call on the Editor of the Farmer. 22

Pleasant Homesteads For Sale.

THE FOLLOWING PLEASANTLY located Properties, situated on the opposite side of the Bay, can be purchased at very reasonable prices and easy terms if appued for soon.

No. ONE.—A Handsome Two-story Cottage, with seven rooms and seven closets, hard-finished, and every convenience inside, Small Buildings, Chicken House, Good Water, Gardens, and a very fine view of the Bay. Price about $3,000. Buildings perfectly new.

No TWO.—Very similar Cottage, with eight rooms, and same good finish and conveniences inside and outside, and same views—price the same. Both the above have excellent soil in the garden, and some fruit trees ready for bearing. The fences are fine around the grounds, each about one acre.

No. THREE.—A large House, built some three years large Garden and about 150 Fruit Trees in bearing yielding a handsome income yearly. All these three Dwellings are within three minutes of the cars. Price, similar These are really worthy special attentions. For all particulars inquire of the Editor of Farmer.

....ALSO....

A neat Cottage with eleven acres of land all covered with Fruit Trees, and small vines in abundance such as Blackberries, Raspberries, Strawberries, Gooseberries, etc. The income from the ground has been about $2,000 a year. The owner wishing to leave will sell at $5,000. A fine location and everything desirable—it will be sold at a bargain.

—LAND.—

A Fine Building Lot all planted with Trees, about 500 of the best quality and in bearing. The Fruit alone will pay for the place in three years.

OTHER LOTS OF LAND.

We have several Fine Lots of Land, open; also some stocked with Fruit Trees, that can be offered on the most favorably terms to those who wish to secure desirable Homesteads.

Inquire for all the above of the Edito of Farmer. 19

A Beautiful Eden for Sale.

ONE OF THE MOST DESIRABLE Estates on the Pacific Coast is now offered for sale by reason of a desire of the owner to travel abroad and to regain his lost health—no other inducement could tempt the owner to part with it.

The Estate now offered is beautifully located in a retired valley away from any immediate neighborhood, free from noise, dust, etc., and shielded on all sides by lofty and picturesque hills giving a varied scenery, truly delightful, no season of the year without real beauty.

The whole Estate comprises a little less than ONE HUNDRED ACRES, the greater portion of it is covered with Orchard, Vineyard and Garden Grounds, comprising all that is desirable, and unsurpassed by any grounds in this State

The Orchard covers many acres, and the Vineyards are very extensive, and everything rare and desirable in these departments are here found

Pleasantly built and located is the Cottage residence. This with Barns, Fruit Houses, Wine Cellars, and other appurtenances make the whole complete, a highly prosperous Garden Ground around the residence with large Orange, Lemon, Fig and Olive Trees in bearing gives the whole the true "Eden" appearance.

The productiveness of the place can be estimated when we say more than Ten Thousand Dollars is annually produced from the Orchard and Vineyard, and these can be easily and greatly enlarged.

This whole Estate can be had at a bargain if soon applied for.

The approximate value is about a THREE-YEAR INCOME, and any person having ready cash of some amount, who wishes to secure one of the finest Estates on this coast, can find the present a rare chance. No person need apply who has not ready money to a reasonable amount, and none but a real purchaser To such, one of the best chances for a Fortune is now offered, as in good hands the Estate can be paid for with the income from the product in three or four years, sure.

For particulars apply to Editor of Farmer. 20

Fine Farms for Sale.

YOU WHO WANT GOOD FARMS CAN SECURE them by applying to the Editor of the Farmer. The following can now be had:

FOUR VERY FINE FARMS in the splendid San Joaquin District, within a few miles of Stockton, all very productive.

Several STOCK RANCHES in various parts of the State, from $1,500 to $25,000; in all these, good and permanent settlers can find bargains. Address by letter, or in person, for particulars to Col. Warren, Editor of the Farmer. 23

VALUABLE TRACT OF LAND

ON THE SACRAMENTO RIVER, CONTAINING 80 Acres, the soil the very best, will be offered at an excellent bargain, if applied for soon. Enquire of EDITOR FARMER. 5

THE DAY SCHOOL BELL.

40,000 copies issued. A new Singing Book for Schools and Seminaries, called the Day-School Bell, is now ready. It contains about 200 choice songs, rounds, duets, trios, quartetts, and choruses, many of them written expressly for this work, besides 32 pages of the Elements of Music, which are easy and progressive.

Among the large number of beautiful pieces may be found, "Uncle Sam's School," "Don't you hear the children coming," "Always look on the sunny side," "The little lass," and "Little Lad," "Oh, if I were a little bird," "Bird of beauty," "Pretty pair tree," "Anvil Chorus," "Meet me by the running brook," etc. It is compiled by Horace Waters, author of "Sabbath School Bell," Nos. 1 and 2, which have had the enormous sales of 825,000 copies. Prices—paper covers, 25 cents, $20 per 100; bound 30 cents, $25 per 100: cloth bound, embossed gilt, 40 cents, $35 per 100. 25 copies furnished at the 100 price. Mailed at the retail price.

SABBATH SCHOOL BELL, NO. 1,

contains 144 pages, and nearly 200 tunes and hymns, and is the most popular S. S. Book ever issued. Among the most popular pieces are "Kind Words," "Eden Above," "Christian Hero," "Beautiful Zion," "I ought to love my Mother," "The Angels told me so," "In the Light," "Rest for the Weary, etc. Prices—paper covers, 20 cents each, $15 per 100; bound 25 cents, $20 per 100: clothbound, embossed gilt, 30 cents, $25 per 100.

SABBATH SCHOOL BELL, NO. 2,

is an entire new work of 192 pages, and nearly two hundred and twenty-five tunes and hymns. One million of these Bells have been issued and are now ringing through this and other countries. Among the many choice pieces may be found, "Shall we meet beyond the River?" "There is a Beautiful World," "Sorrow shall come again no more," "Don't you hear the Angels coming?" "Thou, God, seest me," "Sabbath Bells chime on," etc. Prices of Bell No. 2. are same as Bell No. 1. Both numbers can be obtained in one volume, price, bound copy, 40 cents, $35 per 100; cloth bound, embossed gilt, 50 cents, $45 per 100. 25 copies furnished at the 100 prices. Mailed at the retail price.

WATER'S CHORAL HARP.

A new Sunday School Book of 160 pages of beautiful hymns and tunes. It contains many gems, such as "Shall we know each other there?" "Suffer little children to come unto me," "The Beautiful Shore," "Oh, 'tis glorious," "I leave me with my mother," "He leadeth me beside still waters," etc. Price, papers covers, 20 cents; $15 per 100. Bound, 25 cents, $20 per 100. Cloth bound, embossed gilt 35 cents, $30 per 100. Mailed at the retail price. It is edited by HORACE WATERS, author of "Sunday School Bells." Nos 1 and 2, which have had the enormous sale of over 800,000 copies.

Just published by HORACE WATERS,
No. 481 Broadway, New York.

THE NEW PATRIOTIC SONG BOOK

contains 96 pages of songs, duets, and choruses, both sacred and secular, including 14 pages of prayers for sick and dying soldiers, and soldiers' Scripture Manual. It is well suited for social singing, as well as Sabbath worship. Among the many beautiful pieces may be found, "Where liberty dwells is my country," "The Christian Hero," "Three cheers for our Banner," "Come sing to me of Heaven," Columbia, the Gem of the Ocean," "Freeman's Gathering," "Columbia's King forever," "Marching Along," etc Prices—paper covers, cents, $10 per 100. Mailed at retail prices.

THE HARP OF FREEDOM

contains 32 pages of songs, duets, and choruses for Freedom. Among the choice pieces we would name, "Fair Freedom's morn," "O let my people go," "Over the mountain," "They worked me all the day," etc Price 5 cents single, 50 cents per dozen, $3 per 100; postage 1 cent each

RUTH: A SACRED CANTATA

contains 126 pages. Words by Rev. Sidney Dyer, music by Prof. Gall. This is an excellent book for concerts for the young. Prices—paper covers, 20 cents, $15 per 100; bound 25 cents, $20 per 100.

THE REVIVAL MUSIC BOOK

contains 73 pages of tunes and hymns, designed for revival prayer, and conference meetings. Price in paper covers single copies 10 cents, $8 per 100. Mailed at the retail price

THE ATHENÆUM COLLECTION

contains 512 pages of tunes and hymns, new and old of the choicest kinds, for church, Sunday school, revival, missionary, temperance, prayer, and conference, and all kinds of sacred and social meetings. The music in this book has life and animation in it, like "Shining Shore," "Rest for the Weary," "Shall we know each other there?" "Shall we meet beyond the River?" "There is a Beautiful World," "Kind Words," "Sweet Hour of Prayer," "There is a Land of Love," "Suffer little children to come unto me," "God save the Nation," etc. Prices—single copies, bound, 65 cents, $55 per 100; cloth bound, embossed gilt, 75 cents, $65 per 100 Mailed at the retail price.

SAN FRANCISCO, CAL.

THE UNDERSIGNED HAS ESTABLISHED SUCH a correspondence and business in Europe as to enable him to secure from the very best source—the most skilful growers—their choicest seeds grown, of which he will always be in receipt, and in endless variety, imported directly from France and England, from well known and responsible houses; some of the most prominent are named in our catalogues.

It has been the experience of our best gardeners and growers, and all others who plant seed, that seeds raised in California are not fully reliable and cannot be for a series of year, until more capital, experience and scientific knowledge shall be given to the business.

HAS FOR SALE

Alfalfa or Chile Clover; Hungarian Grass;
Kentucky Blue-grass; Orchard Grass;
Red-top Grass; Sainfoin Grass;
English Rye-grass, Timothy Grass;
Red Clover; White Dutch Clover;
Crimson Clover, Lucerne, &c. &c. &c.

With many entire new varieties of Grass Seeds and prepared Lawn Grasses never before offered.

EVERY VARIETY OF

BEET, CABBAGE, CARROT, RADISH, TURNIP, CUCUMBER, MELONS, LETTUCE, ONIONS, TOMATO, EARLY AND LATE PEAS, BEANS, &c., &c., &c!

Biographical.

Memoir of Schoolcraft, the Indian Historian.

BY REV. DR. SAMPSON, OF WASHINGTON.

[We are under obligations to Hon. Cornelius Cole for Dr. Sampson's Memoir of the late Mr. Schoolcraft, who died at Washington City on the 10th of December, 1864, aged seventy-two years, and which we take much pleasure in inserting, though slightly abridged, from want of room.

The Indian works in quarto, referred to by Dr. S., contain much matter on the Indian tribes of the Pacific domain, and copies of them are to be found in the public libraries of Sacramento and San Francisco.—EDITOR CAL. FARMER.]

* * * * *

Henry R. Schoolcraft was descended from an English gentleman who settled in Albany, N. Y., during the reign of George II, and was born in 1793, at the manor of Rensalærwyck, in New York. Having enjoyed the advantages of a common school education, he pursued advanced studies, first at Union College, Schenectady, New York, and afterwards at Middlebury, Vermont. Leaving college about the close of the last war with England, at the time when attention was specially called to the resources of the Mississippi Valley, Mr. Schoolcraft, at the age of twenty-four years, in 1817, induced by the influence of Governor De Witt Clinton, of New York, as well as by his own tastes, to engage in an exploration of the country west of the great river. Proceeding to St. Louis, he spent about two years in extending his researches westward, through the territory comprising the present States of Missouri and Arkansas, examining especially the mineral and industrial resources of the region, as well as the features of its natural history in its plants, animals, and savage inhabitants. Returning home, he published two treatises which greatly stimulated emigration thither, and brought his peculiar capabilities as a scientific explorer before the public. In 1830, Mr. Schoolcraft received instructions from the War Department to proceed into the Upper Mississippi Valley, to endeavor to terminate the renewed hostilities existing between the Chippewa and Sioux tribes. The expedition consisted of twenty-seven men, including a botanist and geologist, and a small military party. Now it was that the enthusiasm to discover the actual source of the Great Father of Waters took possession of Mr. Schoolcraft's enterprising mind. Sometimes on foot, sometimes in frail bark canoes, he spent months of dangerous toil, up many falls and rapids, and through numerous lakes, until he arrived at the actual resource of this mighty river, on the great water shed of the Mississippi, which he christened Itasca Lake, after running up the American flag; and, indeed, he left it flying there in triumph over his success on the 23d day of July, 1832, a fraction less than three hundred years, after the Spanish, under De Soto, had discovered its mouth. Mr. Schoolcraft published a narrative of this expedition, and he is believed to be the only man in America who has seen the Mississippi from its source in Itasca Lake to its mouth in the Gulf of Mexico.

In the latter part of 1822 he was appointed by President Monroe a special agent to visit the Indian tribes of the Lake Superior region, and from this time on commenced that long series of investigations as to the habits, language, and ancient traditions of the native red men of America, which filled up his active and eminently illustrious life.

* * * * *

He was united in marriage with Miss Jane Johnston, daughter of Mr. Johnston, a celebrated Irish gentleman who had married the daughter of the Indian Chief Webojeag in 1823, and lived together until 1842. With her aid and influence, Mr. Schoolcraft gained an access to our Aborigines, and an insight into their secrets and private life, and the peculiar modes of thought of the red man which would otherwise have been impossible, and which no white man of his philosophic mind and scientific enthusiasm has ever enjoyed. Numerous successive treatises came from his pen (perhaps thirty odd different works) descriptive, historical, scientific—some legendary, as that of Hiawatha, others philosophical, as that relating to the peculiarities of grammatical structure in Indian nouns, which makes all animate beings masculine, and all inanimate objects feminine. So greatly were these treatises appreciated by men of science, that as early as 1839 Mr. Schoolcraft was elected an honory member of the Royal Geographical Society of London, since which time more than twenty similar honors have been conferred upon him in Europe.

In the year 1847, about five years after the death of his first wife, during a part of which time Mr. Schoolcraft was engaged among the Indian tribes of Western New York, he was united in marriage to Miss Mary Howard, of South Carolina, a decendant from an old English family that had settled upon a Sea Island plantation, under a grant from the King, in early colonial times, and which ancestral heritage has, for unbroken generations, been a cherished home to the family. This lady, pre-eminently endowed by nature and culture, seemed to Mr. Schoolcraft, to the day of his death, providentially sent to him to be his associate in the higher mission of giving a scientific form and a literary finish to the results of his former explorations, especially as his afterwards crippled physical condition rendered it necessary that much of the labor of the pen should be performed thro' her as his amenuensis. From that time, 1847, the city of Washington became his residence, and he has been chiefly devoted, by order of the United States Congress, to the collection of those six large quarto volumes of Archives of Aboriginal Knowledge, which consists of documents relating to the history of the Aboriginal tribes occupying the territory now in possession of the United States—a work which, while it is valued in his own native country, is much more appreciated by the numerous Scientific and Historical Associations of Europe. At his death he left unfinished material *for two more volumes of similar size*, whose collection and compilation his long-protracted crippled condition prevented him from completing.

Not long after his settlement in the quiet life of study in Washington as Indian Historian, the reaction of his former exposures began to show itself in his physical frame; he was crippled by rheumatic affections; for many years he was unable to go much in society; for several years he could move about the house only on crutches; during subsequent years he could not be moved except on a chair fixed upon wheels: while during the last three or four years he had been confined to his with his limbs bent completely under him. Though suffering excrutiatingly at times, his great spirit rose so completely above his physical condition, that no one in his company for an hour would hear even an allusion to his infirmities and pains, or would even think of them as he sat and filled up the moments with vivacious and fascinating discourse. He died at last from dry mortification of the portions of his body rendered nerveless by rheumatic or paralytic affections. His countenance, however, in death, was full of the health and sweet radience of his best days, and his high, open brow grew more majestic as his noble mind still triumphed till the very last moment of his existence. * * *

The characteristicts of Mr. Schoolcraft's religious belief were the following, and as to them he spoke with the simplicity of a child: First, he believed the Bible—the Old Book revered by the wise and the aged—to be in truth the "Word of God." In this he, like other men of his cast of mind, such as Newton and Grotius, and kindred spirits among American statesmen and men of science, had a conviction most unlike to that of professional and controversial defenders of true authenticity and inspiration of the Sacred Scriptures. He spoke as one, every power of whose mind had been mastered and bowed in reverence and subjection before a teacher manifestly divine. Second, the doctrine of his Divine Teacher and Redeemer had in his mind resolved itself into two simple propositions: "I am an imperfect, sinful being, and in Jesus Christ," (the distinctive name by which he always spoke of the Savior,) "God has provided a living personal Redeemer adapted to my need." He had no theories to propose or advocate; there was in his faith the simplicity of Dr. Alexander, of Princeton, who, after more than forty years as a teacher of young men in theology, on his death bed summed up his practical deep convictions in the two same propositions. * * *

Mr. Schoolcraft died as he lived, calm and clear in intellect till he breathed his last. In the chill and pain of his struggle, as his wife was embracing him to give him warmth, he constantly repeated her name in a tone that seemed to imply that he wished her to be with him as the companion of his spirit in its journey to its new home.

* * * * *

May his children possess the treasure which, in his last wish, he craved for them—an interest in their Guide and Savior!

Mr. Schoolcraft has been almost continually in the service of the United States Government for half a century, and it is believed that the knowledge of his long and useful life and triumphant death will be of moral service to the rising generation, the newspapers in the country, and is believed will do great good by its extended publication.

EDUCATIONAL.

PACIFIC
National Business College,
SAN FRANCISCO, CAL.

Practical, useful Education for Young Men, Boys, and Men of Middle Age.

A BUSINESS EDUCATION FOR A BUSINESS MAN—THE RIGHT KIND OF AN EDUCATION FOR YOUNG MEN.—THIS IS THE BEST PLACE FOR MERCANTILE BUSINESS IN THE WORLD.

IMPORTANT TO THOSE WHO CAN DEVOTE A FEW WEEKS OR MONTHS TO STUDY, AND TO PARENTS WHO HAVE SONS TO EDUCATE.

THE BEST COURSE OF STUDY AND THE GREATEST AMOUNT OF PRACTICAL AND USEFUL INFORMATION ACQUIRED IN THE SHORTEST POSSIBLE TIME AND AT THE LEAST EXPENSE, TO INSURE SUCCESS IN LIFE.

"Acquire a Good Commercial Education, and you will as surely succeed in Life as that cause produces effect."—Abbott Lawrence.

A MODEL COMMERCIAL COLLEGE.

THIS NOTICE IS INTENDED TO GIVE FULL INFORmation of the course of Study and operation of the Pacific National Business School, San Francisco,

We respectfully solicit from Young Men and Men of Middle Age, who would succeed in business, and Parents and Guardians who have Boys to educate, an examination of our system of Practical, Useful Education, the superiority it possesses over every other institution of learning on this coast.

This School claims superiority and great merit over other institutions professing to teach the Commercial branches, by its system of combining THEORY and PRACTICE, on the London Corn Exchange principle, it being done in no other School on this coast.

COURSE OF STUDY.

The plan adopted in teaching combines PRACTICE with THEORY; instead of being confined to Text Books, the pupils are exercised in making original entries of every-day business transactions; journalising, posting, balancing accounts, opening and closing a great variety of different sets of Books, both for individual and partnership business, where the business has been prosperous or adverse, thus qualifying the student for entering into the practical duties of the accountant in any kind of business.

THE COURSE OF INSTRUCTION

Consists of Double-Entry Book-keeping, embracing Wholesale, Retail, Commission, Manufacturing, Banking, Steamboating, Railroading, Individual, Partnership, Joint Stock, Compound, Company, Mining, Ranching, Farming, etc. In the routine of practical instruction the pupil becomes familiarized with changing books from single to double entry, changing stock books to partnership, and every form and principle known in well regulated establishments.

PENMANSHIP.

The beautiful and easy system of Spensurian Penmanship is taught in this College, and the only place where it is taught on this coast.

CORRESPONDENCE

Is carefully explained, and rules and principles are laid down, the observance of which will lead to the highest attainment in this art.

It is known to all that there is a great deficiency existing in this commercial branch.

BUSINESS ARITHMETIC.

This is a branch of the greatest importance, and you can be assured will not be neglected.

LECTURES

Are given to the students on Commercial Law, Nature and Causes of Wealth, Political Economy, Advertising, and general topics relating to success in business.

DIPLOMAS.

Those completing the course and passing a satisfactory examination before the Examining Committee, will receive Diplomas of the Institution.

THERE WILL BE NO VACATIONS.

Each pupil receives individual instruction, and persons can therefore enter at any time.

TERMS.

Scholarships are issued which give the scholar the privilege of reviewing the course at any future time, free of charge, for SIXTY DOLLARS, with a deduction of FIVE DOLLARS when two enter from the same family or the same place at the same time. When four enter at the same time from the same place, TEN DOLLARS will be deducted from each scholarship.

THE TIME REQUIRED

To complete the course depends somewhat upon the previous education and ability of the student, usually from ten to sixteen weeks, scholarships granting the holders the privilege of completing the course regardless of time.

A common school education is all that is necessary to enter the course of this College advantageously.

For further particulars, call at the College, 747 Market street, or address

M. K. LAUDENSLAGER,

President Pacific National Business College.

Santa Clara College.

THE FOURTEENTH ANNUAL SESSION OF THIS INstitution will commence on MONDAY, August 29th. The plan of instruction embraces two regular courses—the Classical and the Commercial, besides a preparatory Department

Corner Mason and Jackson Streets,

Principal.....Prof. J. MIBIELLE.

THE CLASSES OF THIS ESTABLISHMENT ARE opened since the 31 inst., and the select and attending scholars receive a solid instruction proportionate to their age and mental facilities.

The programme includes all the branches of tuition fitted for children from 6 to 12 years of age, as the first step for a higher teaching.

The English, French and Spanish Languages are taught practically and theoretically, by competent and special teachers.

Boarders can be accommodated in the establishment, where they will find the comforts and care of a home.

An evening class of French and Spanish is also open for young men every other day, at 7 o'clock, P. M. Call on the Principal from 9 A. M. to 12 M. 1

EDUCATIONAL.

NAPA
COLLEGIATE INSTITUTE.
For Young Ladies and Gentlemen.

NAPA CITY, CALIFORNIA.

NAPA CITY, IN POINT OF LOCATION AND Climate, is unsurpassed in the State. It is about four hours' ride by steamboat from San Francisco, and three by stage from Benica. There will soon be a daily boat from the former place, and there are now two daily stages from the latter. There are extensive accommodations for Boarders in the College Building, with large and well-ventilated sleeping apartments. Teachers reside in the Building, and will have a constant oversight of the Students who are Boaders.

GOVERNMENT.

Young Ladies will receive no calls from any except Parents and Guardians. Ladies and Misses will not leave the College grounds, except in company with their Instructors. Young Men and Lads are not allowed to lounge about the Stores, Hotels, and Saloons of the village. All pupils are required to attend Church on the Sabbath. Parents will choose the place of worship for their children.

MILITARY DEPARTMENT.

This Department has been opened with a view to the permanent establishment of a Militrry Academy on this Coast. From three to four years will be requisite to complete the course in this Department. The State has furnished us the necessary equipments for such a school. The Drills will be attended to daily.

TUITION.

CALENDER.

The Collegiate year is divided into two Sessions of 21 weeks each. The first Session will begin July 25 and end December 16. The second Session will begin January 2 and end May 28. The Winter vacation will be two, and the Summer vacation eight weeks long.

☞ All articles of clothing should be plainly marked. Pupils will furnish their own Sheets, Pillow-cases, Towels, Napkins, and Lamps.

☞ Payments, half-yearly in advance. Pupils can enter at any time, and be charged from the time of entering. No deduction will be made for absence, except in cases of protracted illness. The month sconsist of four weeks each.

For further particulars address

W. S. Turner, A. M.,

21-11 Principal.

Miss Lammond,
LATE PRINCIPAL OF
BENICIA SEMINARY,

HAS THE PLEASURE TO ANNOUNCE THAT she has purchased the Seminary for Young Ladies known as the

CALIFORNIA COLLEGIATE INSTITUTE,

For Young Ladies,

No, 64 Silver Street,

SAN FRANCISCO, CAL.,

formerly under the control of Mrs. M. B. SWEDENSTIERNA, and has removed there with her entire corps of

Superior Teachers and Professors.

The New Term Commenced

January 4th, 1865.

The location of this Institution (on the suburbs o the city) commands at once for its boarding pupils, the retirement of a country life, with the advantages of the finest professional talent from the city

As Miss Lammond desires to make this a permanent Institution, no efforts will be spared to make it worthy of the patronage which has been so liberally extended to her during the past four years.

As the class of Boarding pupils is nearly filled, those desiring admission will find it necessary to apply early.

For further particulars, Catalogues may be obtained by calling upon or addressing

MISS M. LAMMOND,

10 Principal.

Academy of Notre Dame,
SAN JOSE, CAL.

THE FOURTEENTH ANNUAL SESSION of this Institution will commence on TUESDAY, AUGUST 23d. The course of instruction embraces all the branches of a polite and useful education. Its aim is to form young ladies to virtue, accustom them to early habits of order and economy, and to cultivate in them those qualities which render virtue both amiable and attractive.
